UCLA® General Catalog

Associate Registrar/Publications Manager: Anita Cotter
Assistant Registrar/Catalog Editor: Kathleen Copenhaver
Research Analyst and Text Editor: Leann J. Hennig
Text Editor, Web Production and Design: James Hudgens
Graduate Requirements Editor: John Cope
Cover Design: Robin Weisz/Graphic Design
Cover Illustration: Mick Wiggins, Baker Design Associates
Photography: James Hudgens, Kathleen Copenhaver

Produced by Academic Publications, UCLA Registrar's Office, using FrameMaker 5.5.6.

Copies of the 1999-01 *UCLA General Catalog* are available for purchase at the UCLA Store for \$6. To obtain a copy by mail, first determine the proper mailing charges by writing the UCLA Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645 or calling (310) 825-6064. Charges vary according to destination and method of shipment. Catalogs may also be ordered online; follow the BookZone link from the store's main menu at <http://www.uclastore.ucla.edu> and look for the link to the *General Catalog*.

Please Note

Every effort has been made to ensure the accuracy of the information presented in the *UCLA General Catalog*. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

The departmental websites referenced in department addresses in this catalog are maintained by independent operators and do not necessarily reflect approved curricula and courses information. Consult the online catalog for the most current, officially approved courses and curricula.

Other information about UCLA may be found in the announcements of the Schools of Dentistry, Education and Information Studies, Engineering and Applied Science, Law, Management, Medicine, Nursing, Public Health, and Public Policy and Social Research, and in literature produced by the School of the Arts and Architecture and School of Theater, Film, and Television. The most current information on graduate programs is available online at <http://www.gdnet.ucla.edu/publications.html>. Links from this page go to various Graduate Division publications, including *Program Requirements for UCLA Graduate Degrees* which has the complete text for officially approved graduate programs.

Chancellor's Message

The *UCLA General Catalog* for 1999-2001 presents the vast range of instructional offerings at UCLA's College of Letters and Science and 11 professional schools. These pages document the rich comprehensiveness of UCLA, while reflecting the University's commitment to high standards, curricular innovation, and interdisciplinary approaches to learning.

UCLA faculty and students come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment. Every facet of scholarly life here benefits immeasurably from the instructional process and its intersection with the research enterprise. In addition, public service is an integral part of our mission, and the University is actively engaged with the surrounding region in myriad ways.

UCLA's leadership in teaching, research, and public service make it a beacon of excellence in higher education. I encourage you to peruse this volume — both to learn about one of the world's premier academic programs, and to discover the excitement of the intellectually stimulating and diverse university community that is UCLA.

A handwritten signature in cursive script that reads "Albert Carnesale". The signature is written in dark ink on a white background.

Albert Carnesale
Chancellor

About UCLA

Introducing UCLA

“...in 10 years...we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee.”

Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns . . .

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between \$2 and \$500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914 the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road that would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later on May 23, 1919, California Governor William D. Stephens signed the legislation that created the “Southern Branch” of the University of California — no longer merely a teacher’s college but an institution that offered two years of instruction in Letters and Science.

Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the “at” became a comma in 1958).

Move Westward

As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA’s future growth. But in 1929, on the barren chaparral-covered hills of West-

wood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of 400 empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master’s degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years, and both experienced phenomenal growth and development during the next half century. The most spectacular period of growth at UCLA occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a \$260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital that is now one of the largest and most highly respected in the world.

UCLA Today

In 1990-00 UCLA celebrates 80 years of growth, from a small two-year college to a comprehensive institution in the elite company of the nation’s most prestigious research universities. This 80-year journey is one of the great success stories in American higher education.

UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Some 282 buildings on 419 acres house the College of Letters and Science plus 11 professional schools and serve more than 35,550 students. Another major period of campus development is currently nearing completion, providing needed additional space for chemistry, human genetics, law, neuroscience, and science and technology research programs, while several of UCLA’s older buildings are

now being made earthquake-safe through a broad seismic correction program.

The top administrative officer at UCLA is Chancellor Albert Carnesale, who took office on July 1, 1997, thus becoming the eighth chief executive in the 80-year history of UCLA.

Setting

Cradled in rolling green hills just five miles inland from the ocean, UCLA is in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour's drive.

Ambience

The stately Tudor Gothic and Italian Romanesque architecture of UCLA's early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptor Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. People must visit the campus to appreciate it. Students thinking of applying to the University as undergraduates should contact Undergraduate Admissions and Relations with Schools (310-825-8764; <http://www.saonet.ucla.edu/uars/prospect/tours.htm>), about campus tours specifically tailored to prospective students. The **Campus Visits Program** (310-206-0616), sponsored by the UCLA Alumni Association, arranges both individual and group tours of the campus throughout the year for everyone else. The tours are offered by current students and reservations are required.

Commitment to Research

UCLA is one of the outstanding research universities in the country. What does this mean to students?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA students are taught by the people making the discoveries, so they learn the latest findings on every front. They may exchange ideas with faculty members who are authorities in their fields, and even as undergraduates are encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

Question of Size

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 31,774 students is about equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,784 men and women studying in its health sciences schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow students to feel that they belong. UCLA provides orientation sessions and several innovative academic assistance programs for new students, a staff of helpful advisers and counselors in every college/school and academic department, a

myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be the academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 96 percent of all lower division lecture classes in 1998-99 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 18 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.

Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation.

UCLA is accredited by the Western Association of Schools and Colleges and by numerous special agencies. Information regarding the University's accreditation may be obtained in the Planning Office Library, Office of Academic Planning and Budget, 2107 Murphy Hall.

Academics

UCLA has one college and 11 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Education and Information Studies, School of Law, John E. Anderson Graduate School of Management, School of Public Policy and Social Research, and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 116 different disciplines; graduate students may earn one of 86 master's and 108 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. For example, new degree programs last year included the B.S. in Ecology, Behavior, and Evolution, B.S. in Marine Biology, B.S. in Plant Biology, M.S. and Ph.D. in Biomedical Engineering, M.S. and Ph.D. in Human Genetics, and M.S. and Ph.D. in Statistics. New undergraduate minors were established in Arabic and Islamic Studies, Armenian Studies, Asian American Studies, Comparative Literature, En-

glish, Geochemistry, Geology, Geophysics and Planetary Physics, Hebrew and Jewish Studies, Italian, Language, Interaction, and Culture, Latin American Studies, Linguistics, Mathematics, Museum Studies, Neuroscience, Political Science, Portuguese, Russian Language, Russian Literature, Russian Studies, Spanish, Spanish Linguistics, and Teaching English as a Second or Foreign Language.

Faculty

Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA's distinguished faculty includes 1997 and 1998 Nobel prizewinners Paul D. Boyer and Louis J. Ignarro, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1997-99 three faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad, and 16 UCLA scientists and scholars were awarded Guggenheim fellowships. Four were elected as fellows of the prestigious American Association for the Advancement of Science (AAAS). With 12 additional American Academy of Arts and Sciences award winners, eight Sloan Foundation fellows, and two National Academy of Sciences awardees, UCLA placed among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in 274 American research universities. UCLA was judged fourteenth in the nation among both public and private universities. Of the 41 doctoral degree disciplines studied, 12 of UCLA's academic departments were ranked among the top 10 in the country and 30 were ranked among the top 20.

Research

UCLA is among the 10 leading research universities in the country, receiving a record \$410.1 million in 1997-98 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

Teaching

Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the most important criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

Student Body

Students at UCLA pride themselves on academic excellence. The Fall Quarter 1998 entering freshman class had an average high school GPA of 4.08, with an average composite score on the Scholastic Assessment Test (SAT) of 1,272 out of a possible 1,600.

One of the University's highest priorities is to advance the ethnic diversity of its students, faculty, staff, and administrators. The diversity of UCLA's student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 115 foreign countries to study at UCLA. The University now enrolls the most ethnically mixed and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise 61.7 percent of the undergraduates and 42.1 percent of the graduate student population. And international students and scholars presently number over 1,900, making this one of the most popular American universities for students from abroad.

Numerous Other Factors

With more than 7.1 million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowl-

edged leader in intercollegiate sports. UCLA Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country. And management of the UCLA at the Armand Hammer Museum of Art and Cultural Center and acquisition of the Geffen Playhouse in Westwood Village enhance the entire arts program.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, and the campus reprised that role in July 1991 for the U.S. Olympic Festival '91. On both occasions, UCLA housed a large Olympic Village and served as the venue for several events.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.

University of California

The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California's first "complete University" be created.

Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment exceeding 169,800 students, over 90 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the Univer-

sity has 18 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

University Administration

The University of California system is governed by a **Board of Regents** whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the **Academic Senate**, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.

Academic Resources and Programs

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of organized research units (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs that lead to bachelor's and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA's educational program and the overall academic quality of the University.

In the overview that follows, UCLA's 23 organized research units are listed within six major divisions — arts and humanities, health sciences, international studies, life sciences, physical sciences and engineering, and social sciences. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Arts and Humanities

Center for Medieval and Renaissance Studies

The Center for Medieval and Renaissance Studies (302 Royce Hall, 310-825-1880, fax: 310-825-0655, e-mail: cmrs@humnet.ucla.edu; <http://www.humnet.ucla.edu/humnet/cmrs/>) supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Major programs include funding research assistants, appointing visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center sponsors the publication of two journals, *Viator*, with emphasis on intercultural and interdisciplinary studies, and *Comitatus*, with articles by graduate students and recent Ph.D. graduates. For more information, send inquiries to the center at UCLA, Box 951485, Los Angeles, CA 90095-1485.

Center for Seventeenth- and Eighteenth-Century Studies

The Center for Seventeenth- and Eighteenth-Century Studies (310 Royce Hall, 310-206-8552; <http://www.humnet.ucla.edu/humnet/c1718cs/>) and the **William Andrews Clark Memorial Library** are united under the administrative direction of the center and the College of Letters and Science. The center organizes scholarly programs and workshops, seeks to enlarge the Clark Library holdings in the early modern period to enhance local research opportunities, has a publications program that makes the results of its conferences and workshops known to the community, provides long- and short-term fellowships to students and scholars doing research in early modern studies, offers graduate research assistantships and master classes, and organizes public programs and classical music concerts. The Clark Library, located approximately 10 miles from UCLA at 2520 Cimarron Street (323-731-8529; <http://www.humnet.ucla.edu/humnet/clarklib/>), is a rare book library specializing in seventeenth- and eighteenth-century British works. It also has a renowned collection centering on Oscar Wilde and his era and significant holdings of modern fine printing and Western Americana. Bequeathed to UCLA in 1934 by William Andrews Clark, Jr., a prominent Los Angeles book collector and philanthropist, the extensive collection is housed in an elegant building in the West Adams district.

In other research activities, the **Center for Bilingual Research and Second Language Education** is working to produce a society that is proficient in at least two languages. In the **Linguistics Phonetics Laboratory** (<http://www.humnet.ucla.edu/humnet/linguistics/faciliti/uclaplab.html>), one of the best-known laboratories of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. In the **Hammer Center for Leonardo Studies and Research** scholars have access to major resources for the study of the works of Leonardo da Vinci. The **Center for the Study of Regional Dress** (<http://www.fmch.ucla.edu/CSRD/CSRD.htm>) within UCLA's Fowler Museum of Cultural History advances the study of past and present cloth and clothing traditions through research, exhibitions, and teaching. The **Center for Jewish Studies** (<http://www.humnet.ucla.edu/humnet/jewishst/>) sponsors lectures, conferences, and visiting scholars and coordinates Jewish studies activities on campus. And the **Center for Modern and Contemporary Studies** (<http://www.humnet.ucla.edu/humnet/cmcs/>) presents workshops, faculty seminars, and public lectures and discussions to bring together people with diverse interests in the humanities and social sciences.

Health Sciences

Brain Research Institute

The Brain Research Institute (BRI), center for neuroscience research and education at UCLA, has one of the largest investigative programs of its kind in the country, with more than 200 scientists involved in every aspect of research in the nervous system from molecular organization to human behavior. The BRI provides core facilities with new technologies and an

environment for multidisciplinary research and training in the structure and function of the central nervous system. The BRI sponsors affinity groups, conferences, symposia, and a variety of other activities designed to strengthen ties among neuroscientists campuswide. The interdisciplinary Ph.D. and B.S. programs in Neuroscience, jointly sponsored by the School of Medicine and the College of Letters and Science, are housed within the BRI. Public service activities include an elementary school outreach program directed by graduate students and a joint educational program with UCLA Extension. The Office of the Director is located in 2506 Gonda Center (310-825-1868; <http://www.medsch.ucla.edu/som/bri/>).

Crump Institute for Biological Imaging

The Crump Institute for Biological Imaging is a science and technology center that brings together physical, biomathematical, chemical, biological, and clinical scientists and students to merge the principles of imaging with those of molecular and cellular biology, genetics, and biochemistry. The imaging domains range from the molecular organization of viruses and cellular subunits to the biological processes of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. Imaging technologies are used to build a picture (image) of the spatial and temporal variations in biological processes. Imaging technologies encompass such areas as cryoelectron microscopy and protein structure studies to assemble and study simple organisms and subcellular domains; confocal fluorescent microscopy for study of cellular and subcellular processes; in vitro and in vivo autoradiography studies of integrated organ function; and positron emission tomography (PET), X-ray computed tomography (CT), and magnetic resonance imaging (MRI) studies of the structure and biological functions of organ systems in animal and human subjects. Specially designed microPET scanners for mice are developed as laboratory devices for repeated in vivo monitoring of gene expression. The institute has research and educational programs for visiting scientists, postdoctoral scholars, and Ph.D. graduate students which include the development of novel multimedia computer-based learning technologies. Dr. Michael E. Phelps is the director (310-825-6539; <http://www.crump.ucla.edu/>).

Dental Research Institute

The mission of the Dental Research Institute (DRI) is to be the preeminent orofacial research center in the U.S. by fostering excellence in research, professional training, and public education. Its objective is to study the basic mechanisms of disease in the orofacial region through original research. Members include scientists trained in the traditional disciplines of molecular biology, immunology, virology, biochemistry, pharmacology, pathology, genetics, developmental biology, neurobiology, and neurophysiology, among others, who are presently engaged in various research projects which include oral cancer/molecular oncology, viral oncology, molecular mechanisms of periodontal diseases, dental implantology,

TMJ disorders and orofacial pain, neuroimmunology, molecular immunology, AIDS/HIV immunology, pain control/pharmacology, and wound repair/keloid tissue formation mechanisms. Currently several extramural funds supported by the National Institutes of Health and other private funding agencies are held by DRI members. The DRI contributes educational activities in the form of quarterly seminars in the UCLA Center for the Health Sciences to which everyone is welcome and encouraged to attend. The Office of the Director is located in 73-017 Center for the Health Sciences (310-206-8045; <http://www.dent.ucla.edu/dri/>).

Jules Stein Eye Institute

The Jules Stein Eye Institute is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility, located in the Center for the Health Sciences (310-825-5000; <http://www.medsch.ucla.edu/som/jsei/>), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. The **Doris Stein Eye Research Center** houses clinical facilities as well as new research and training programs concentrating on major eye diseases worldwide.

Mental Retardation Research Center

The Mental Retardation Research Center, located on the C level and the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 NPI&H (310-825-0313; <http://www.mrrc.npi.ucla.edu/>).

UCLA-DOE Laboratory of Structural Biology and Molecular Medicine

The UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, located in the Molecular Biology Institute (310-825-3754; <http://www.doe-mbi.ucla.edu/>) and the Center for the Health Sciences, is funded through a contract with the Department of Energy. Research is conducted in molecular nuclear medicine and structural biology and genetics. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, nuclear magnetic resonance (NMR), protein expression, and X-ray crystallography facilities.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the **Lewis Neuromuscular Research Center**, the **Reed Neurological Research Center**, and the **Neuropsychiatric Institute and Hospital** (<http://www.MentalHealth.ucla.edu/>). The **Jonsson Comprehensive Cancer Center** (<http://www.cancer.mednet.ucla.edu/>), one of only 35 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The **UCLA AIDS Institute** (<http://www.medsch.ucla.edu/aidsinst/>) is deeply involved in all aspects of the fight against AIDS, with basic research in epidemiology, immunology, and the clinical management of AIDS patients being done in the **Center for Clinical AIDS Research and Education** (<http://www.medsch.ucla.edu/aidsinst/care/>). And the School of Public Health, which established the **Southern California Injury Prevention Research Center** (<http://www.ph.ucla.edu/sciprc/sciprc1.htm>), has joined forces with the School of Medicine to form the **Center for Health Promotion and Disease Prevention**, another clinical research program to enhance the health of the community.

International Studies

Office of International Studies and Overseas Programs

The Office of International Studies and Overseas Programs (ISOP; <http://www.isop.ucla.edu/>) supports and coordinates international and foreign area studies at UCLA. ISOP and its centers also support several interde-

partmental degree programs (IDPs) focusing on particular regions of the world. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world's leading specialists on area studies are affiliated with these centers.

The **Coleman African Studies Center** (10244 Bunche Hall, 310-825-3779; <http://www.isop.ucla.edu/jscasc/>) is one of the major interdisciplinary centers for African studies in the U.S. It encourages and coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the professional schools of Arts and Architecture, Education and Information Studies, Law, Medicine, Public Health, Public Policy and Social Research, and Theater, Film, and Television. The center also sponsors an active program of public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community.

The **Center for European and Russian Studies** (11367 Bunche Hall, 310-825-4060; <http://www.isop.ucla.edu/euro/>) develops and coordinates teaching and research on Russia and the successor states of the former Soviet Union, as well as the countries of western Europe, through conferences, lectures, seminars, and academic exchange programs with European and Russian institutions. It also offers an interdepartmental undergraduate major in European Studies and provides fellowships to graduate students in European area studies.

The **Latin American Center** (10343 Bunche Hall, 310-825-4571, e-mail: cramirez@isop.ucla.edu; <http://www.isop.ucla.edu/lac/>) is a major regional, national, and international resource on Latin America and hemispheric issues. The center sponsors and coordinates research, academic and public programs, and publications on Latin America in the humanities, social sciences, and professional schools and links its programs and activities with developments in the field and in other institutional settings. By combining instruction, research, and service and by encouraging multidisciplinary and interdisciplinary approaches, the center promotes the effective use of UCLA's Latin American resources for the benefit of the campus, the broader community, and the public at large.

The **von Grunebaum Center for Near Eastern Studies** (10286 Bunche Hall, 310-825-1181; <http://www.isop.ucla.edu/cnes/>) coordinates research projects and academic programs related to the Near East and administers the interdisciplinary programs leading to the B.A. degree in Near Eastern Studies and the M.A. and Ph.D. degrees in Islamic Studies. The combined resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. Professors affiliated with the center come from UCLA departments as diverse as History, Public Health, Near Eastern Languages and Cultures, Art History, Anthropology, Sociology, and others. The center also conducts significant publication, community outreach, and scholarly exchange programs.

ISOP also supports other interdisciplinary activities within its other research centers:

The **Center for International Relations** (11381 Bunche Hall, 310-825-0604; <http://www.isop.ucla.edu/cir/>) focuses on international governments, migration, the environment, the spread of nuclear weapons, international political economy, and conflict resolution mechanisms. The center sponsors conferences, seminars, and lectures that deal with modern international problems; the **Center for Pacific Rim Studies** (11286 Bunche Hall, 310-825-0045; <http://www.isop.ucla.edu/pacrim/>) promotes and disseminates research, teaching, and public education programs on issues emerging from increasing interactions among the peoples and nations bordering the Pacific Ocean; the **Center for Chinese Studies** (11353 Bunche Hall, 310-825-8683; <http://www.isop.ucla.edu/ccs/>) develops, coordinates, and supports graduate training in Chinese studies, major research projects, and a regional seminar; the **Joint East Asian Studies Center** (11266 Bunche Hall, 310-825-0007; <http://www.isop.ucla.edu/eas/>) with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region; the **Center for Japanese Studies** (11270 Bunche Hall, 310-825-7671; <http://www.isop.ucla.edu/japan/>) fosters research on Japan and scholarly exchange with Japanese institutions, and sponsors a colloquium series and conferences on Japan, as well as faculty research grants and graduate student fellowships; and the **Center for Korean Studies** (11282 Bunche Hall, 310-825-3284; <http://www.isop.ucla.edu/korea/>) presides over the biggest Korean studies program on the U.S. mainland, with the greatest number of specialists on its faculty dedicated to Korea and the largest number of students studying Korean subjects at both the undergraduate and graduate levels. The center also sponsors seminars, conferences, and symposia on Korea and Korean civilization.

The ISOP dean's office also supports an interdepartmental undergraduate degree program in international development studies (<http://www.isop.ucla.edu/ids/>). This program focuses on critical issues and problems common to Third World countries. Other ISOP programs focus on language teaching and academic exchange. In addition, ISOP houses offices of the UC Education Abroad Program, the Southern California Fulbright Visiting Scholars Program, and the Southern California Consortium on International Studies (SOCCIS; <http://www.isop.ucla.edu/soccis/>).

Life Sciences

Center for the Study of Women

The Center for the Study of Women (288 Kinsey Hall, 310-825-0590, e-mail: csw@csw.ucla.edu; <http://www.csw.ucla.edu/csw/webfro-1.htm>), is the only unit of its kind in the UC system that focuses on women and gender and draws on the energies of more than 200 faculty from 10 professional schools and 34 departments. The center's major purpose is to encourage and facilitate faculty research on women and gender. To this end, the center (1) organizes public conferences and lecture series in the areas of feminist theory, politics, science, technology and medicine, sociology, queer studies, and international relations, (2) administers research grants, and (3) offers an affiliation for research and visiting scholars. In addition, the center sponsors various working groups, produces quarterly calendar of events posters, and hosts various programs for graduate students interested in women and gender, as well as an annual graduate student research conference.

Molecular Biology Institute

The Molecular Biology Institute (MBI), an interdepartmental organization of molecular biologists, promotes molecular biology research and teaching at UCLA. The institute houses the laboratories of 30 MBI members, as well as the administration of the Molecular Biology Interdepartmental Ph.D. Program, the UCLA-DOE Laboratory of Structural Biology and Laboratory Medicine, and the UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences. Administrative offices are located in 168 MBI (310-825-1018; <http://www.mbi.ucla.edu/>).

The **Fernald Child Study Center** is a life sciences interdisciplinary research unit created to study and treat a variety of childhood behavioral problems and learning disorders. The **Center for the Study of Evolution and the Origin of Life** (<http://www.igpp.ucla.edu/cseol/>) melds the di-

verse research of more than 100 UCLA faculty members in the study of the emergence and evolution of life on Earth. And the **UCLA Ocean Discovery Center** (<http://www.lifesci.ucla.edu/odc/>) on the Santa Monica Pier educates Los Angeles-area school children and the public about life under the sea.

Physical Sciences and Engineering

Institute of Geophysics and Planetary Physics

The Institute of Geophysics and Planetary Physics (IGPP) is a multicampus research unit (MRU) of the University of California; the branch at UCLA is engaged in research in climate dynamics, geophysics, geochemistry, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies, global and regional environmental change, the origin of terrestrial life, the dynamical properties of the sun and solar wind, and the nonlinear dynamics of complex systems. Facilities include analytical laboratories in geochemistry, meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life, laboratories for experiments in fluid dynamics and high-pressure physics, developmental laboratories for instrumentation in space physics and seismology, and computational laboratories for large-scale numerical modeling relevant to the above topics. The UCLA office is located in 3845 Slichter Hall (310-825-1664; <http://www.igpp.ucla.edu/Welcome.html>).

W. M. Keck Observatory in Mauna Kea, Hawaii

Institute of Plasma and Fusion Research

The Institute of Plasma and Fusion Research (44-114 Engineering IV, 310-206-0501; <http://www.ipfr.ucla.edu/>) is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, the **Center for Clean Technology** (<http://cct.seas.ucla.edu>) in the School of Engineering and Applied Science fosters research on the interaction between technology and the environment, focusing on pollution prevention and control. On other frontiers, an **Artificial Intelligence Laboratory** designed exclusively for research in this burgeoning field operates under the wing of the Computer Science Department, and the **Joint Services Electronics Program** (<http://www.ee.ucla.edu/jsep.html>), funded by the Department of Defense, supports research in the Electrical Engineering Department to establish millimeter-wave electronics for widespread use.

Social Sciences

Institute of American Cultures

The Institute of American Cultures (1237 Murphy Hall, 310-206-2557; <http://www.gdnet.ucla.edu/iacweb/iachome.htm>) is responsible for strengthening and coordinating interdisciplinary research and instruction in ethnic studies with special attention to UCLA's four ethnic studies research centers. The institute conducts no research itself but makes funds available for research and fellowships and promotes the activities of the four centers whose goals are to study and illuminate the histories of African Americans, American Indians, Asian Americans, Chicanas/Chicanos, and others, and to apply the University's capabilities to the analysis and

solution of specific social issues. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The **Center for African American Studies** (2308 Murphy Hall, 310-825-7403; <http://www.sscnet.ucla.edu/caas/>) conducts and sponsors research on the African American experience, coordinates the Afro-American studies curriculum, publishes research results, and sponsors community service programming.

The **American Indian Studies Center** (3220 Campbell Hall, 310-825-7315; <http://www.sscnet.ucla.edu/indian/CntrHome.html>) serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, a publishing unit that produces books and a quarterly journal, and a student/community relations unit.

The **Asian American Studies Center** (3230 Campbell Hall, 310-825-2974; <http://www.sscnet.ucla.edu/aasc/>) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies.

The center includes a library, publications unit, student/community projects unit, postdoctoral fellowships, and B.A., undergraduate specialization, and master's programs.

The **Chicano Studies Research Center** (2307 Murphy Hall, 310-825-2363; <http://www.sscnet.ucla.edu/cscc/>) promotes the study and dissemination of knowledge on the experience of the people of Mexican descent and other Latinos in the U.S. The center primarily supports UCLA faculty and the training of the next generation of scholars engaged in this area of inquiry, with emphasis given to (1) interdisciplinary and collaborative research of a theoretical, interpretative, and applied nature, (2) the analysis, understanding, and articulation of issues critical to the development of Chicano and Latino communities in the U.S., and (3) establishment and maintenance of relationships with communities with similar academic and research interests at the state, national, and international levels.

Institute of Archaeology

The Institute of Archaeology (A210 Fowler Building, 310-206-8934; <http://www.sscnet.ucla.edu/iaoa/>) is dedicated to studying and understanding the past through laboratory studies of artifacts, analysis of field data, creation of archives to store this information, and the education of students and interested community members via publications and lectures. The institute, the only one of its kind in the U.S., coordinates various academic and practical facilities for more than 40 researchers and many graduate students and volunteers in 10 associated academic departments. It regularly sponsors workshops and special courses. Research facilities include the Information Center (regional office of the California Archaeological Inventory), Ceramics Laboratory, Computer Imaging of Archaeological Data, Obsidian Hydration and Lithics Analysis Laboratory, Paleoethnobotany Laboratory, Rock Art Archive, and Zooarchaeology Laboratory. The Publications Unit publishes the findings of scholars from UCLA and other archaeology centers, while the Public Lecture Program provides a forum for the public presentation of recent archaeological discoveries and advances.

Institute of Industrial Relations

The Institute of Industrial Relations (6350B Public Policy Building, 310-794-5957; http://www.spsr.ucla.edu/res_ctrs/industri.htm) has an interdisciplinary research program directed toward the study of all aspects of the employment relationship, including labor markets, labor law, labor/management relations, equal employment opportunity, occupational safety and health, and related issues. Through the Center for Labor Re-

search and Education, the institute also offers social policy and employment relations programs to the general public, unions, and management.

Institute for Social Science Research

The Institute for Social Science Research (4250 Public Policy Building, 310-825-0711; <http://www.sscnet.ucla.edu/issr/>) promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Center for American Politics and Public Policy, Center for the Study of Urban Poverty, Center for the Study of Society and Politics, Center for Social Theory and Comparative History, Survey Research Center, Social Science Data Archive, and Organizational Research Program. Training in survey research methodology is available to students through participation in the annual Los Angeles County Social Survey. The institute publishes the *ISSR Working Papers in the Social Sciences*.

Other interdisciplinary activities in the social sciences include the nationally respected **Business Forecasting Project** (<http://www.anderson.ucla.edu/research/forecast/index.htm>) in UCLA's John E. Anderson Graduate School of Management and the **Center for the Study of Evaluation** (<http://www.gseis.ucla.edu/research/cse.html>) in the Graduate School of Education and Information Studies which is at the forefront of efforts to improve the quality of schooling in America. The **Center for the Study of Urban Poverty** (<http://www.sscnet.ucla.edu/issr/csup/index.html>) initiates new research on issues related to urban poverty and sponsors seminars in the field. The **Center for Communication Policy** (<http://www.ccp.ucla.edu/>) is a national leader in communications public policy issues such as technological innovations in telecommunications and the social and political impact of these changes. And the recently established **LeRoy Neiman Center for the Study of American Society and Culture** (<http://LeRoy-Neiman.sscnet.ucla.edu/>) in the Department of Sociology explores emerging social and cultural trends in American society.

Resources for Research and Study

Art Galleries and Museums

A tour of all the UCLA museums and art galleries takes visitors from the corner of Wilshire and Westwood Boulevards to the northeast corner of the campus. **UCLA at the Armand Hammer Museum of Art and Cultural Center** regularly presents selections from the **Armand Hammer Collection**, which features Impressionist and Post-Impressionist paintings by such artists as Monet, Pissarro, Sargent, Cassatt, and Van Gogh. Related paintings by Constable, Picasso, and others from UCLA's collection are also on view. The museum organizes and presents major changing exhibitions devoted to examinations of historical and contemporary art in all periods. Extensive cultural programming, including children's performance and storytelling series, music, poetry readings, and "Dialogues on Art," are presented Thursday evenings and Saturdays. The museum is open Tuesday through Saturday 11 a.m. to 7 p.m. (Thursday to 9 p.m.), Sunday 11 a.m. to 5 p.m.; closed Mondays, July 4, Thanksgiving, and Christmas. Admission is \$4.50 for adults; \$3 for seniors 65 and over, non-UCLA students, and UCLA faculty and staff; \$1 for UCLA students; children 17 and under are admitted free. Admission is free on Thursday from 6 to 9 p.m. For information on programming and docent tours, call (310) 443-7000 or see <http://www.hammer.ucla.edu/>.

On the gallery level of the Armand Hammer Museum is the **Grunwald Center for the Graphic Arts**, which houses a distinguished collection of over 45,000 prints, drawings, and photographs, including nearly 10,000 works from the prestigious **Armand Hammer Daumier and Contemporaries Collection**. Maintained as a study and research facility for the benefit of students and the community, the center's permanent holdings include significant European and American examples from the fifteenth century to the present. It is particularly noted for its collection of German Expressionist prints and works on paper by Matisse and Picasso, as well as the Richard Vogler Cruikshank Collection and the Frank Lloyd Wright Collection of Japanese prints. The center is open only by appointment Monday through Friday from 10 a.m. to 4 p.m. (310-443-7078).

The **Wight Art Building**, located in the Dickson Art Center on north campus, includes exhibition space of 6,000 square feet in which to mount campus exhibitions and student-organized programs and exhibits. For a schedule of exhibitions, call (310) 206-6467.

The **Murphy Sculpture Garden**, located between Bunche Hall and the Wight Art Building, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in this distinguished collection, situated on a picturesque five-acre expanse, are private gifts to the University. For information on docent tours, call UCLA at the Hammer Museum of Art and Cultural Center at (310) 443-7000.

The **Fowler Museum of Cultural History** is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. The museum is open Wednesday through Sunday from noon to 5 p.m. (Thursday to 8 p.m.). Admission is \$5 for adults; \$3 for seniors 65 and over, non-UCLA students, and UCLA faculty, staff, and Alumni Association members with I.D.; \$1 for UCLA students; children 17 and under are admitted free. Admission is free on Thursday. Administrative offices are located in 1586 Fowler Building (310-825-4361; <http://www.fmch.ucla.edu/>).

University Library System

Libraries are crucial to classroom study, research, and independent learning, and the UCLA Library, a campus-wide network of libraries serving programs of study and research in many fields, is among the top five ranked research libraries in the U.S. Total collections number more than 7.1 million volumes, and more than 90,000 serial titles are received regularly.

Users identify and locate library holdings through two online information systems, both of which are accessible at <http://www.library.ucla.edu>. ORION contains records for all UCLA Library holdings and other campus collections, including the Archive Research and Study Center of the Film and Television Archive, Chicano Studies Research Center Library, Ethnomusicology Archive, Institute for Social Science Research Data Archives Library, and Instructional Media Library; ORION also identifies library item location and circulation status information. The MELVYL® System, which is also available via telnet (melvyl.uocp.edu), provides information on library holdings at all nine UC campuses and access to 25 periodical databases, several of which include article abstracts and/or full text. In addition, look for ORION2, a new web-based system that provides the same information and access to the campus collections as ORION but is easier to use and more widely available through the web.

For complete information on the UCLA University Library policies, procedures, services, programs, and hours, see <http://www.library.ucla.edu/>.

College Library

The College Library (<http://www.library.ucla.edu/libraries/college/>), located in the Powell Library Building, features collections and services in support of the undergraduate curriculum in the humanities, social sciences, sciences, and mathematics. Course reserve materials, including books, articles, audiotapes, homework solutions, lecture notes, and Academic Publishing Service Readers, are available for loan. The College Library Instructional Computing Commons, located on the first floor of Powell Library, provides students with access to PCs, Macs, and a variety of multimedia equipment, and Night Powell provides study space in a late-night reading room.

Charles E. Young Research Library

The Young Research Library (<http://www.library.ucla.edu/libraries/url/>) on north campus is designed primarily as a graduate research library in the humanities, social sciences, education, public policy, and urban planning. Most of its collections are arranged in open stacks, and the building also houses reference, circulation, graduate reserve, and periodicals services and the Microform and Media Service, with microcopies of newspapers, periodicals, and other selected materials. The **Department of Special Collections** in the Young Research Library contains rare books and pamphlets, primarily in the humanities and social sciences, from the fifteenth to twentieth century, university archives, early maps and atlases, files of early California newspapers, manuscript collections, transcripts of oral history interviews, ephemera, microfilm, tape recordings, prints, paintings, and drawings, including original architectural drawings.

Arts Library

Housed in the Dickson Art Center, the Arts Library (<http://www.library.ucla.edu/libraries/arts/>) collects material on architecture, art history, design, film, television, history of architecture, photography as fine art, studio art, and theater. It also contains the **Elmer Belt Library of Vinci-ana**, a special collection of rare books and incunabula about Leonardo da Vinci and related materials in Renaissance studies. Arts Special Collections, housed in the Young Research Library, contain noncirculating materials, including the Princeton Index of Christian Art, Artists' file, archival records of major Southern California motion picture studios and television production companies, scripts from film, television, and radio, animation art, personal papers of writers, directors, and producers, photographs and production stills, posters, lobby cards, press kits, and West Coast theater playbills.

Louise M. Darling Biomedical Library

The Biomedical Library (<http://www.library.ucla.edu/libraries/biomed/>), located in the Center for the Health Sciences, serves all the UCLA health and sciences departments and schools and the UCLA Medical Center. Its collections focus on materials related to medicine, nursing, dentistry, public health, physiological sciences, biology, molecular biology, biochemistry, zoology, plant sciences, psychology, and life sciences, as well as rare works in the history of health and life sciences, botanical illustration, and Arabic and Persian medical manuscripts.

Richard C. Rudolph East Asian Library

Located on the second floor of the Young Research Library, the East Asian Library (<http://www.library.ucla.edu/libraries/eastasian/>) collects Chinese, Japanese, and Korean vernacular-language materials in the humanities and social sciences. The collection is particularly strong in Japanese Buddhism, religion, Chinese and Japanese fine arts, Chinese archaeology, premodern history and classical literature on both China and Japan, and Korean literature and religion.

Hugh and Hazel Darling Law Library

The Law Library (<http://www.law.ucla.edu/Library/>), housed in a new facility in the Law Building, collects published case decisions, statutes, and

codes of the federal and state governments of the U.S. and other Common Law jurisdictions, legal treatises and periodicals in Anglo-American and international law, and appropriate foreign and comparative law holdings. The Law Library reports to the dean of the School of Law.

Eugene and Maxine Rosenfeld Management Library

Located in the John E. Anderson Graduate School of Management complex, the Management Library (<http://www.anderson.ucla.edu/resources/library/libhome.htm/>) houses materials on accounting information systems, arts management, business history, corporate history, entrepreneurship, finance, general management and management theory, industrial relations, international and comparative management, management information systems, management strategy and policy, marketing, operations, research, production and operations management, public/not-for-profit management, and real estate.

Henry J. Bruman Maps and Government Information Library

The Maps and Government Information (MGI) Library (<http://www.library.ucla.edu/libraries/mgi/>), housed in the Young Research Library, collects modern and historical maps (topographic, aerial, nautical, aeronautical), city plans, atlases and gazetteers, specialized books and serials on mapping and cartography, official publications from U.S. federal, state, and local governments, foreign national governments, and international and intergovernmental organizations, campaign literature from U.S. national and California state and local elections, and pamphlets and ephemeral materials on public affairs-related subjects published by nongovernmental organizations. The library also houses the **Geographic Information System (GIS) Resource Center**, which allows UC students, faculty, and staff to use computer technology to view, manipulate, store, and analyze spatial digital data sets.

Music Library

The collections of the Music Library (<http://www.library.ucla.edu/libraries/music/>) in Schoenberg Hall include books, music scores, sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. Music Special Collections include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music; it also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials.

Science and Engineering Library

The Science and Engineering Library (SEL; <http://www.library.ucla.edu/libraries/sel/>) covers the fields of engineering, mathematics, and the physical sciences. Collections are housed in four separate locations. **SEL/Chemistry**, in Young Hall, houses materials on chemistry, biochemistry, and molecular biology. **SEL/Engineering and Mathematical Sciences**, in Boelter Hall, houses materials on aeronautics, astronomy, atmospheric sciences, bioengineering, chemical, civil, electrical, environmental, manufacturing, mechanical, and nuclear engineering, computer science, elec-

tronics, energy technology, mathematics, metals and materials, and pollution. **SEL/Geology-Geophysics**, in the Geology Building, houses materials on geology, geophysics, geochemistry, space physics, planetary science, paleobiology, micropaleontology, invertebrate paleontology, ore deposits, geomorphology, hydrology, and chemical oceanography. And **SEL/Physics**, in Kinsey Hall, houses materials on solid-state, elementary particle, high-energy, mathematical, nuclear, and plasma physics, acoustics, spectroscopy, optics, and astrophysics.

Special Archives and Collections

In addition to the extensive collections of the University Library, a rich array of other information resources is available to the UCLA community. The archives and collections listed below are independently managed by individual UCLA departments and centers.

The **Center for African American Studies Library** contains materials reflecting the African American experience in the social sciences, arts, and humanities. The **American Indian Studies Center Library** houses a collection on American Indian life, culture, and state of affairs in historical and contemporary perspectives, while the **Asian American Studies Center Reading Room** features Asian and Pacific American resources.

Materials related to Chicano and Latino cultures are housed in the **Chicano Studies Research Center Library**, and the **Clark Memorial Library** contains rare books, manuscripts, and other noncirculating materials on English culture (1640 to 1750). The **English Reading Room** features a noncirculating collection of English and American literature, literary history, and criticism.

The **Ethnomusicology Archive** houses sound recordings of folk, ethnic, and non-Western classical music, while the **Institute for Social Science Research Data Archive Library** contains a collection of statistical databases for the social sciences. The **Seeds University Elementary School Library** features contemporary materials for children from kindergarten through junior high school and adult works on children's literature.

UCLA Film and Television Archive

The UCLA Film and Television Archive (<http://www.cinema.ucla.edu/>) is the world's largest university-based collection of motion pictures and broadcast programming. The archive's holdings of original film and television materials serve both the UCLA community and national and international constituencies.

The Motion Picture Collection, with more than 37,000 films, is the country's largest collection after the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection is the nation's largest university-based collection of television broadcast materials. Its 35,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1946 to the present, with emphasis on drama, comedy, and variety programming. A special collection of over 100,000 news and public affairs programs is also maintained.

The archive's exhibition program presents evening screenings and discussions in the James Bridges Theater that focus on archival materials, new work by independent filmmakers, and a wide array of international films. For program information, call (310) 206-FILM.

The **Archive Research and Study Center (ARSC)**, located in 46 Powell Library (310-206-5388), provides on-site viewing of the Film and Television Archive's collections and research consultation to students, faculty, and researchers. ARSC hours are weekdays 8:30 a.m. to 5 p.m.

Computer Services

The **Office of Academic Computing (OAC)** provides resources and services that support the UCLA distributed computing environment. Through its five service areas OAC seeks to facilitate cross-departmental information technology initiatives, provide specialized resources to faculty and students in pursuit of their research and instructional goals, and leverage the volume purchasing power of the University. For further information, call (310) 825-6635 or see <http://www.oac.ucla.edu>.

Research Technology Services (RTS) offers integrated services to help faculty members succeed in today's research environment. Areas of expertise include (1) technical and administrative grant development support for interdisciplinary granting activities that require investments in information technology, (2) storage and management tools for research and instructional data, (3) analysis and interpretation of complex data sets through statistical and visualization support, (4) high-performance network consulting services for research, and (5) high-performance computing through UCLA's SP/Cluster Program, consulting support for faculty to access the National Supercomputer Centers, and support for the development of central and local commodity-based Linux clusters. For further information, call (310) 825-7426 or see <http://www.oac.ucla.edu/rts>.

OAC Software Central provides information about software available to the UCLA community at educational or special volume discounts. Software Central works with the UCLA Purchasing Department to negotiate and implement volume software license agreements. Software Central provides access to licensed software by CD, disk, or download from the software distribution server. Technical support for many software applications is also available to UCLA licensees. For further information, call (310) 206-4780 or see <http://www.oac.ucla.edu/software>.

Student laboratories are supported through the **OAC Commons Laboratory**, located in 4328 Math Sciences, and the **College Library Instructional Computing Commons (CLICC)** in Powell Library. CLICC is a collaborative effort between OAC, Humanities Computing, Social Sciences Computing, the Office of Instructional Development, and College Library. OAC Commons is available to all undergraduates and provides 58 computers (48 Intel-based and 10 Macs), two high-speed printers, and three walkup ports for laptops. Five stations are designed for wheelchair access. For further information, call (310) 205-6772 or see <http://www.oac.ucla.edu/labs>.

OAC training and consulting services assist faculty and students with statistical computing, high-performance computing, and scientific visualization. Training services include classes in statistical applications such as SAS, SPSS, STATA; high-performance computing, including parallel programming and Fortran 90; and scientific visualization applications such as GIS. Call (310) 825-7431 or see <http://www.oac.ucla.edu/trainin> for further information. Register for classes at <http://www.oac.ucla.edu/classes>. In partnership with Communication Technology Services (CTS) and Administrative Information Services (AIS), OAC also provides access to over 300 **online interactive training** courses in diverse topics ranging from basic word processing to programming and LAN management. See <http://computertraining.ucla.edu>.

The **Disabilities and Computing Program (DCP)** provides adaptive technology services and support to students, faculty, and staff with disabilities, to faculty who are working with students with disabilities, and to departments. The DCP also coordinates access to computers, local area networks, and online information resources for people with disabilities. Specific services include (1) adaptive technology consulting and training, (2) information access consulting and training, (3) braille services, (4) web usability evaluations, and (5) adaptive technology purchase recommendations. Further information is available at 5907 Math Sciences (voice 310-206-7133, TDD 310-206-5155; <http://www.dcp.ucla.edu>).

Other Campus Resources

The **Biological Collections** of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mam-

mals primarily from the Western U.S., Canada, Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates. For more information, contact Fritz Hertel, 1233 Life Sciences (310-825-1282), or Donald Buth, 1335 Life Sciences (310-206-6084).

The **Division of Laboratory Animal Medicine** (1V-211 CHS, 310-825-7281; <http://research.mednet.ucla.edu/cores/dlam.html>) is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The **Hannah Carter Japanese Garden** is one mile from the UCLA campus in Bel Air. The authentic Kyoto-style terraced garden was designed and constructed by Japanese artisans and architects using native plants and artifacts. The garden houses such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a koi pond. It was donated to UCLA in 1965 and is used by faculty, students, school and community groups, and others seeking a serene setting for meditation and solitude. The garden is open to the public by reservation only. For further information, call (310) 825-4574 or see <http://www.urelations.ucla.edu/protocol/garden.html>.

The **Marine Science Center** (310-206-8247; <http://www.lifesci.ucla.edu/msc/>) was established at UCLA in 1989 to coordinate marine-related teaching and research on campus and to facilitate interaction across departmental boundaries of faculty and students with similar interests in marine sciences. UCLA offers one of the broadest interdisciplinary educational programs in marine sciences in the U.S. Field trips for marine-related courses and access to research sites in the Santa Monica Bay, Channel Islands, and the Southern California Bight are provided by UCLA's 68-foot research vessel *Sea World UCLA*.

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The seven-acre **Mathias Botanical Garden**, located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. Volunteer docents lead group tours. The botanical garden also has a research Herbarium containing 180,000 dried plant specimens. The administrative office is located in 124 Botany (310-825-3620; <http://www.lifesci.ucla.edu/botgard/>).

The University of California founded the **UC Natural Reserve System (NRS)** in 1965 to preserve for study a series of undisturbed natural areas representing the state's vast ecological diversity. Students, teachers, and researchers from public and private educational institutions use the reserves as outdoor classrooms and living laboratories. The **Stunt Ranch Santa Monica Mountains Reserve** (23-126 Warren Hall, 310-206-3887; <http://nrs.ucop.edu/reserves/Stunt.html>), administered by the Los Angeles campus, officially joined the UC NRS in November 1995. The 310-acre site is within a 40-minute drive from UCLA and includes fine examples of chaparral and oak woodland ecosystems. The reserve lends itself to programs that focus on the natural ecosystems and issues of resource management in the urban/wildland interface. Undergraduate and graduate courses in the Departments of Anthropology, Earth and Space Sciences, Geography, Organismic Biology, Ecology, and Evolution, and Physics and Astronomy, and the Institute of the Environment utilize Stunt Ranch and other NRS sites.

The **UCLA Ocean Discovery Center** at the Santa Monica Pier (1600 Ocean Front Walk, 310-393-6149; <http://www.lifesci.ucla.edu/odc/>) is a marine science learning center serving K-12 classes from schools in the greater Los Angeles area. Interactive lessons and activities introduce students to the basic concepts of marine environmental studies, marine biology, oceanography, and meteorology. The center is also open to the public, using the same conceptual approach to teach visitors about their connections to Santa Monica Bay and the world ocean.

Supplementary Educational Programs

In addition to the regular academic programs that are described in the Curricula and Courses section of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Education Abroad Program

Each year more than 1,700 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world through the Education Abroad Program (EAP). UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities at more than 100 different universities in 36 countries: Australia, Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Scotland, Singapore, South Africa, Spain, Sweden, Taiwan, Thailand, Turkey, and Vietnam. Participants can spend up to a full academic year abroad, enjoying a unique opportunity to enhance language skills, take courses in their major, and become involved in the culture of the host country. One-term programs are available in Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Italy, Japan, Korea, Mexico, Netherlands, Russia, Singapore, Spain, Sweden, Taiwan, and Thailand. Summer programs are offered in Denmark and Mexico. In Costa Rica there is a one-term tropical biology field study program, and field study programs are available in Mexico. For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) at least a B average (3.0 GPA) overall at the time of application and (2) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well. Most programs require junior standing (90 units minimum) at departure; seniors and transfer students are welcome.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from \$1,740 to \$19,000, but University financial aid and special EAP scholarships are available to those who qualify. Applications must be filed several months in advance. EAP Offices are located in 10370 Bunche Hall and 1105 Hershey Hall. For more information, call (310) 825-4995 or see <http://www.isop.ucla.edu/eap/>.

Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of the colloquia, call the assistant to the provost of the College of Letters and Science at (310) 825-4286.

The **Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences** provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, mathematics, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, statistics, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities and meets on alternate Fridays from 1 to 3 p.m. in C301 Anderson Complex during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in *UCLA Today*. The colloquium is directed by Michael D. Intriligator, professor of economics, political science, and policy studies. For further information, call the Western Management Science Institute at (310) 825-4144 or see <http://www.anderson.ucla.edu/research/marschak/>.

The **Rothman Colloquium in Cognitive Science**, organized by the interdisciplinary Cognitive Science Research Program, sponsors presentations by leading experts in the broad field of cognitive science, which explores the nature of human and artificial intelligence. Participating disciplines include artificial intelligence, biology, computer science, linguistics, neuroscience, philosophy, and psychology. The list of speakers is circulated to the participating departments on campus. For further information, call the Cognitive Science Research Program at (310) 825-0951 or see <http://www.lifesci.ucla.edu/cogsci/Seminars/>.

Summer Sessions

Throughout the summer, UCLA offers more than 500 courses from approximately 60 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following term, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in the Undergraduate Study and Graduate Study sections of this catalog.

Regularly enrolled undergraduate students may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on the UCLA transcript, and grades earned are computed in the grade-point average. Check with the college or school counselor about applying these courses toward the minimum unit requirements and for any limitations the college or school may impose on Summer Sessions study.

Regularly enrolled graduate students may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult the graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees.

Unlike enrollment in regular terms, students may attend another college institution for credit while they are enrolled in Summer Sessions. Registration information is available in 1147 Murphy Hall (310-794-8333; <http://www.summer.ucla.edu>).

UCLA Extension

With over 100,000 adult student enrollments each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

Many of UCLA Extension's 4,500 classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline, in many interdisciplinary areas, and in emerging fields. In addition, Extension offers special programs each term on topical issues as well as those of ongoing public concern. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult the college or school counselor or graduate adviser before enrolling. For more information, see Concurrent Enrollment and Transfer of Credit and Courses of Instruction in the Academics section of this catalog. Graduate students should also see Transfer of Credit in the Graduate Study section.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension Building, 10995 Le Conte Avenue (310-206-6201; <http://www.unex.ucla.edu>). To obtain the current *UCLA Extension Catalog*, contact the Registration Office at (310) 825-9971. Hours are weekdays from 8 a.m. to 6 p.m. (5 p.m. Friday).

Student Life

Associated Students UCLA

Every registered UCLA student is a member of the Associated Students UCLA (ASUCLA). Four entities comprise ASUCLA: the undergraduate and graduate student governments, student media, and retail services and enterprises. For information on all four entities, including the services and enterprises described in the following section, see <http://www.asucla.ucla.edu>.

Automatic Tellers and Banking

Cash is available via on-campus automatic tellers. On the A Level of Ackerman Union are automatic tellers for Bank of America, University Credit Union, Washington Mutual, and Wells Fargo Bank. Near the North Campus Student Center are automatic tellers for Bank of America, University Credit Union, and Washington Mutual. The Hill Top Shop in Sunset Village and the UCLA Store/Health Sciences each have a Wells Fargo Bank machine. The UCLA Store/LuValle Commons, the Bombshelter, and the Terrace Food Court have automatic tellers for the Westwood Student Federal Credit Union.

The University Credit Union (<http://www.ucu.org/>) maintains an electronic services office on the A Level of Ackerman Union; the Westwood Student Federal Credit Union (<http://www.fffccu.org/>) is on the first floor of Kerckhoff Hall. Membership in these credit unions is open to UCLA students.

Campus Photo Studio and Graduation Etc.

Senior yearbook portraits and other formal portraits are available from the Campus Photo Studio (A Level of Ackerman Union, 310-206-8433). Seniors are advised to have yearbook portraits taken in Fall Quarter, since lines are long as the January deadline approaches. At the same location, Graduation Etc. (310-825-2587) sells caps and gowns for bachelor's de-

grees, rents academic attire for advanced degrees, and provides announcements, diploma mounting, and other graduation-related products and services. See <http://www.uclastore.ucla.edu/graduation/>.

Cards and Gifts

Papercuts (A Level of Ackerman Union, 310-206-1564) offers an extensive selection of Hallmark cards and gift wrap, plus stuffed animals, mugs, and other gift items.

Copying and Printing Services

Pulse Copy and Technology operates two copy centers on campus: Lu Valle Commons (310-825-7568) and A Level of Ackerman Union (310-206-0894). Copies, color copies, binding, lamination, and printing are offered.

Gameroom

Xcape (A Level of Ackerman Union, 310-206-0829) is a gameroom featuring pinball, video games, and electronic games. Especially popular are weekend "unlimited play" opportunities, which allow hours of play for one flat fee.

Job Opportunities on Campus

ASUCLA reserves more than 2,500 part-time jobs for UCLA students in the UCLA Restaurants, UCLA Store, student union, and other departments. Listings are posted outside the Human Resources Office, 3519 Ackerman Union (310-825-7055; <http://www.uclastore.ucla.edu/student-jobs/>).

Aside from the student jobs reserved by ASUCLA, the residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the Young Research Library (310-825-7947). Other on-campus jobs may be available through the UCLA Career Center (see Student Services later in this section).

Lecture Notes and Academic Publishing Service

Lecture Notes is a subscription service that publishes concise weekly summaries of about 100 of UCLA's large lecture classes. Notes can be picked up in the Textbooks department of the UCLA Store, Ackerman Union (A Level, 310-206-0882; <http://www.uclastore.ucla.edu/textbooks/lecturenotes/index.html>). **Academic Publishing Service** (next to Lecture Notes, 310-825-2831; <http://www.uclastore.ucla.edu/textbooks/ap/index.html>) reproduces course materials for professors, obtaining 5,000 copyright authorizations each year.

Meeting Rooms

A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union or Kerckhoff Hall, contact the Student Union Operations Office on the A Level of Ackerman Union (310-206-0836).

UCLA Restaurants

ASUCLA operates the UCLA Restaurants and three coffee houses on the general campus. Hours vary, especially during summer and holiday periods. Consult the hours posted at each unit or check the UCLA Restaurants listing at <http://www.uclastore.ucla.edu/information/restaurant.html>.

Bombshelter Deli and Burger Bar (310-206-0727; <http://www.uclastore.ucla.edu/restaurants/bombshelter.html>), in the Court of Sciences, offers traditional deli sandwiches, an outdoor barbecue, snacks, rice bowls, sushi, broiled hamburgers and chicken, and salads at reasonable prices.

Campus Corner (310-206-0726; <http://www.uclastore.ucla.edu/restaurants/taco-sub.html>) is located just across Bruin Walk from Kerckhoff Hall. Taco Bell Express is on the north side, while the south side features sandwiches at SubSection.

The **Cooperage** (310-206-0740; <http://www.uclastore.ucla.edu/restaurants/cooperage.html>), on the A Level of Ackerman Union, offers pizza, chicken, grill items, and an extensive by-the-ounce salad bar. A stage and

sound system for live entertainment and a large-screen TV for major events are available.

Kerckhoff Coffee House (310-206-0729; <http://www.uclastore.ucla.edu/restaurants/kerckhoff.html>), on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, fresh pastries, and gourmet sandwiches and soups.

Lu Valle Commons (310-825-1177; <http://www.uclastore.ucla.edu/restaurants/luvalle.html>), located just north of the School of Law, features deli food, international entrees, hamburgers, and other grilled specialties. Within Lu Valle Commons, **Jimmy's Coffee House** (<http://www.uclastore.ucla.edu/restaurants/jimmy.html>) features specialty beverages, pastries, and desserts.

The **North Campus Student Center** (310-206-0720; <http://www.uclastore.ucla.edu/restaurants/northcampus.html>), southwest of the Young Research Library, offers Mexican entrees, frozen yogurt, pizza, deli and garden sandwiches, Italian food, stir-fry, and a salad bar. North Campus is open for breakfast, lunch, and dinner. At the west end, **Northern Lights** coffee house (310-206-0373; <http://www.uclastore.ucla.edu/restaurants/northernlights.html>) features gourmet coffees and Baskin-Robbins ice cream.

The **Terrace Food Court**, on the first floor of Ackerman Union, offers snacks at Rx Candy (310-206-7879), Wetzels Pretzels (310-206-8645), Columbo Frozen Yogurt (310-206-8645), and Tropix beverage bar (310-206-0732). Italian, Asian, and Mexican food and fish tacos are offered at La Cucina by Sbarro (310-794-4080), Panda Express (310-206-9395), and Rubio's Baja Grill (310-794-4009), respectively.

Tsunami (310-206-9226; <http://www.uclastore.ucla.edu/restaurants/tsunami.html>), in the northwest corner of the A Level of Ackerman Union, serves Japanese noodles and sushi.

UCLA Store

In terms of sales, the UCLA Store is the biggest college store in the nation. There are five locations on campus, plus UCLA Spirit Stores at Santa Monica's Third Street Promenade and Universal CityWalk. See <http://www.uclastore.ucla.edu> or the *Daily Bruin* for information on sales, author signings, and other special events. The website also offers current computer price lists and the opportunity for students to "preshop" textbooks by entering their course I.D. numbers to get a list of required and recommended books.

UCLA Store, Ackerman Union (B Level of Ackerman Union and parts of A Level, 310-825-7711), has seven departments. The **Textbooks** department carries required and recommended texts for most undergraduate and many graduate courses and operates a buyback service so students can sell used texts. **BookZone** offers reference books and a wide selection of titles in literature, science, history, and technical disciplines, including an impressive UCLA Faculty Authors section. The **Computer Store** carries Macintosh and Windows computers, printers, and software at low academic prices. **Essentials** offers school and office supplies, including consumables for computer printers. **BearWear** specializes in UCLA emblematic merchandise. **Fast Track** carries active footwear and sportswear for men and women, plus an extensive Clinique counter. **Market** is a convenience store, with snacks, health and beauty aids, and cut flowers.

UCLA Store/Health Sciences (13-126 CHS, 310-825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. **UCLA Store/Lu Valle Commons** (just north of the School of Law, 310-825-7238), carries convenience items, art supplies, and books, as well as textbooks and supplies for all on-campus Extension courses and selected academic programs (architecture and urban design, film, law, management, public policy, social welfare, theater, urban planning). **North Campus Shop** (in the North Campus Student Center, 310-206-0751) and **Hill Top Shop** (Delta Terrace in Sunset Village, 310-206-4306) are convenience store locations.

Living Accommodations

Where students live while attending UCLA can play an important role in their total college experience. Many students, especially those in their first year, choose to live on campus; others opt for a University-owned apartment or a private apartment in one of the many surrounding communities.

There are many housing options available. Students should decide early which ones they plan to pursue and apply for or follow up on them as soon as possible. If they plan to live off campus, they should arrive early to make their housing arrangements for the coming academic year.

The **UCLA Community Housing Office**, 350 De Neve Drive (Sproul Hall Annex), Box 951495, Los Angeles, CA 90095-1495, (310-825-4491; <http://www.cho.ucla.edu/housing/ochcho.htm>), provides information and current listings for University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, room and board in exchange for work, and short-term housing. Rental listings are updated daily. The housing office also has bus schedules, area maps, and neighborhood profiles. A current BruinCard or letter of acceptance is *required* for service.

UCLA Housing, a booklet that covers housing options in detail, is mailed to all students when they are accepted for admission.

Apartments

If selecting an off-campus apartment, students should carefully consider the kind of living arrangements they can afford. Their financial situation may dictate how close they live to UCLA and whether they can live alone or must share an apartment. Apartments within three miles of UCLA (Westwood, West Los Angeles, parts of Brentwood and Santa Monica) average \$600 per month for single units and \$800 for one-bedroom units. Apartments more than four miles away (Palms, Mar Vista, Culver City) usually cost \$100 to \$150 less. Listings change daily and are posted in the UCLA Community Housing Office. A roommate share board is also available. See <http://www.cho.ucla.edu/housing/cho.htm>.

Student Cooperative and Boarding Houses

There is one student cooperative within walking distance of campus that provides an atmosphere similar to residence halls except students must work three to four hours per week as partial payment for room and board. There are also several boarding houses and private residence halls convenient to UCLA. Phone numbers are available from the UCLA Community Housing Office.

Fraternities and Sororities

Many of the 41 fraternities and sororities at UCLA own chapter houses on the west and east sides of campus respectively. For sororities, students must be members to live in the house and generally are able to move in after their first year of active membership. For fraternities, living in the house depends on the number of housing spaces available. Room, board, and dues are often less than the monthly residence hall fee. During the summer break, most fraternities with chapter houses lease rooms to students, Greek or not (check listings at the UCLA Community Housing Office). For more information, contact Fraternity and Sorority Relations, 118 Men's Gym (310-825-6322; <http://www.saonet.ucla.edu/csp/housing.htm>).

On-Campus Housing

Living on campus can add an extra dimension of academic support, enjoyment, and convenience to the UCLA experience. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls), two residential suite complexes (Hitch and Saxon Residential Suites), Sunset Village, and De Neve Plaza accommodate nearly 6,700 undergraduates, while the Hilgard Houses accommodate 200 transfer and upper division students. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two or three students. Residential suites — shared by four or six students — consist of two bedrooms, a full bathroom, and a common living room. Sunset Village and De Neve Plaza rooms are air conditioned and shared by two or three students. Most rooms in Sunset Village and all rooms in De Neve Plaza have private baths. Hilgard Houses are four large residential homes on the east side of campus. Each accommodates about 40 students and has a large living room, study hall, small computer room, TV lounge, and patio. Students live in furnished doubles, triples, and quads. Each house has single-sex communal bathrooms and a small laundry room. Residential restaurants are located in Rieber Hall, Hedrick Hall, Covell Commons, and De Neve Plaza. All accommodate on-campus residents and serve meals daily. Residents may choose from a variety of meal plans.

Applications for on-campus housing are in the *UCLA Housing* booklet, available at the **UCLA Housing Assignment Office**, 270 De Neve Drive, Box 951381, Los Angeles, CA 90095-1381 (310-825-4271; <http://www.cho.ucla.edu/housing/hao.htm>). To apply for on-campus housing, the completed application must be postmarked by the following deadlines:

Fall Quarter 1999	
Current Students	May 31, 1999
Freshmen	May 3, 1999
Transfer Students	June 1, 1999
Winter Quarter 2000	Assigned as available
Spring Quarter 2000	Assigned as available

For Fall Quarter, the Housing Assignment Office randomly designates a number to each application received; the number determines the order in which students are offered assignment to on-campus housing. **All new freshman and transfer students who are admitted for Fall Quarter and apply for on-campus housing by the stated deadline are guaranteed University housing.**

Students applying for Winter or Spring Quarter are assigned on a space-available basis in the order applications are received.

The full cost per student for the 1999-00 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is \$6,045 to \$6,565 (triples) or \$7,005 to \$7,525 (doubles) for residence halls, \$7,500 to \$8,020 (six persons) or \$8,305 to \$8,825 (four persons) for residential suites, and \$7,660 to \$8,180 (triples) or \$8,475 to \$8,995 (doubles) for Sunset Village and De Neve Plaza, plus a \$22.44 social fee for residential programming.

The **Office of Residential Life**, in the Residential Life Building near Sproul Hall (310-825-3401; <http://www.orl.ucla.edu/>), is responsible for student conduct in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. The office is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

Short-Term Housing

If students need temporary quarters until they find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most short-term housing is available for

no more than one to three months, though some may be for longer periods. Sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office.

University Apartments for Single Graduate and Family Students

About five miles from campus, UCLA maintains nearly 1,400 off-campus apartments for married, single-parent, and single graduate students. Unfurnished one-, two-, and three-bedroom units are available. One-bedroom rentals for 1999-00, excluding utilities, are expected to range from \$586 to \$793 per month. Because assignment to several of the apartment units is by wait list, students should not wait until they have been accepted to UCLA to apply. Verification of marriage and/or copies of children's birth certificates (English translation) must accompany the application. For up-to-date information, call University Apartments South at (310) 398-4692 or see <http://www.cho.ucla.edu/housing/uasouth.htm>.

University Apartments for Single Undergraduate Students

More than 230 apartments for single undergraduate students in four off-campus facilities are maintained by the University; all are located within walking distance of campus. Apartments vary from singles to three-bedroom units, with bedrooms usually shared by two or three students. Space rates for the 1999-00 academic year, including utilities, range from \$3,062 to \$7,336. All occupants must be full-time UCLA students; rental agreements are for the entire academic year. An application is included in the *UCLA Housing* booklet, available at the UCLA Housing Assignment Office. Assignments are made on a space-available basis. Current UCLA students are assigned to the apartments during Spring Quarter; not all types of apartment spaces are available to entering students. Call the Housing Assignment Office at (310) 825-4271 or see <http://www.cho.ucla.edu/housing/uanorths.htm> for current availability information.

Transportation Services

A variety of parking, ridesharing, and other transportation options and services are offered through Transportation Services. There are several commuting alternatives for students to get to and from campus without driving their cars. To save time and money, many students form new or join existing UCLA carpools or vanpools. Both full-time and part-time riding opportunities are available.

Commuter Services

The Commuter Assistance-Ridesharing (CAR) Office (310-794-RIDE) can help students learn about **vanpools** available from their neighborhoods. Currently there are more than 130 vanpools commuting from nearly 80 communities throughout Southern California.

Students interested in forming a **carpool** who need help finding other students who live near them should call (310) 825-3618 and ask for a free *RideGuide*. As an additional incentive to rideshare, registered two- and three-person student carpools are given top priority to receive parking (see Parking Permits).

These alternatives and other commuting options, including an extensive network of public transit service providers, are described in the *UCLA Commuter Guide*, available at <http://www.transportation.ucla.edu/> or at Parking Services on the corner of Strathmore Place and Westwood Plaza (Parking Structure 8, Level 2) weekdays from 7:45 a.m. to 5 p.m. For further information, call (310) 825-3618.

Parking Permits

Due to the limited availability of parking at UCLA, parking is offered to students who demonstrate the greatest need. Student parking permits are currently assigned through a need-based point system which takes into consideration class standing, commute distance, previous attendance, employment status, dependent children, and professional school obliga-

tions. Students are strongly encouraged to apply on time and follow all application and payment guidelines in order to increase their chances of receiving a permit.

When assigning parking permits to students, UCLA Parking Services gives the highest priority to carpools. Carpool permits are guaranteed to all qualified two- and three-person student carpool groups that apply on time. In addition, student carpools are parked in centrally located campus parking areas and share a discounted permit fee. All members of a proposed student carpool must apply in person as a group each term.

Most student permits are assigned for the academic year and can be paid for annually or quarterly. Renewal forms for students paying quarterly are automatically mailed before the Winter and Spring Quarter payment due dates. Students who are not offered a parking assignment during a given term or who wish to change their parking area need to reapply the following term. Student Parking Request forms, along with important quarterly due dates and helpful information on how to apply for a parking permit, are available by calling (310) 825-9871 or in person weekdays from 7:45 a.m. to 5 p.m. at Parking Services.

Students with permanent disabilities who have disabled persons' placards or DMV-issued disabled persons' license plates and students with short-term disabilities should contact the Office for Students with Disabilities (310-825-1501; <http://www.saonet.ucla.edu/osd/>) regarding parking assignments and on-campus transportation assistance.

Parking permits and access cards to campus lots and structures are not transferable and may be purchased only from UCLA Parking Services. *Resale is prohibited and subjects both buyer and seller to disciplinary action.*

Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways students can get involved in campus life and expand their horizons beyond classroom learning.

Clubs and Organizations

Joining a club or organization is a wonderful way to become involved on campus. UCLA currently has about 600 different registered organizations — more than are found on almost any other university campus in the country. Political, recreational, community service, cultural, academic, religious, and residential clubs can be found at UCLA. And it only takes three people to start their own if they can't find one that suits their interests.

Clubs focusing on sports and recreation are listed in the Department of Cultural and Recreational Affairs, located in the Wooden Center (310-825-3701; <http://www.saonet.ucla.edu/recreate/>). For a full listing of regis-

tered organizations, contact the **Center for Student Programming (CSP)**, 105 Kerckhoff Hall (310-825-7041; <http://www.saonet.ucla.edu/csp/>). This office can help students start a club or join an existing one, and serves as the official registry for all campus organizations. CSP assists students with program and leadership development and fund-raising, interprets and enforces University rules and regulations, and administers official and general purpose bulletin boards on campus.

All student organizations are eligible to use the services of **Student Event Management (SEM)**, located in 105 Kerckhoff Hall (310-825-6690). SEM offers technical and logistical consulting for student events, including cost estimates and event management.

Complaints Against Student Organizations

Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (105 Kerckhoff Hall; <http://www.saonet.ucla.edu/csp/>) or Student and Campus Life (1104 Murphy Hall; <http://www.saonet.ucla.edu/sao/scl.html>).

Fraternities and Sororities

The 41 Greek letter social organizations and their four governing councils — Asian Greek Council, Interfraternity Council (IFC, 310-825-7878; <http://www.studentgroups.ucla.edu/ifc/>), National Pan-Hellenic Council (NPHC, 310-206-1868), and Panhellenic Council (PHC, 310-206-5499; <http://www.studentgroups.ucla.edu/panhellenic/>) — are sponsored by a component of the Center for Student Programming — **Fraternity and Sorority Relations (FSR)**, 118 Men's Gym (310-825-6322; <http://www.saonet.ucla.edu/csp/FSR/>).

Greek letter social organizations registered and officially recognized by FSR are eligible to participate in programs such as the Greek Leadership Conference, Membership Recruitment, Greek Week, New Member Forums, Dating Expectations Programs, intramural tournaments, and all University-sponsored programs. Individual student members of IFC and Panhellenic Council are eligible for scholarships offered by the Intersorority Mothers' Club, Los Angeles Alumnae Panhellenic, and their own governing councils. The FSR staff assists organizations in campus and community programming, fund raising, membership recruitment and development, training, and service/learning activities

Fraternities

Alpha Epsilon Pi	Pi Kappa Alpha

Chi Omega	Sigma Gamma Rho
Delta Delta Delta	Theta Kappa Phi
Delta Gamma	Zeta Phi Beta
Delta Sigma Theta	

FSR is also a designated campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group's programs and support networks. "Greeks" follow their founding principles of service, scholarship, and friendship. There is a place for anyone who desires to contribute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members "live out" (not all chapters have houses). Approximately 3,000 UCLA students participate in "Greek life."

Statue commemorating the centennial of the birth of Duke Ellington

Performing Arts

A rich variety of concerts, dance recitals, and theater productions is an integral part of life at UCLA. A full calendar of exceptional programs by the Music, Ethnomusicology, and World Arts and Cultures Departments and UCLA Performing Arts of the School of the Arts and Architecture and the Theater and Film and Television Departments of the School of Theater, Film, and Television provides opportunities for student involvement and personal growth.

The **Music Department** has 12 active performance organizations. Instrumentalists are invited to perform with one of seven groups, including the UCLA Philharmonia Orchestra. Vocalists may join the UCLA Chorale, the Collegiate Chorus, or the Musical Theater Workshop.

The **Ethnomusicology Department** provides students with the opportunity to perform in various non-Western and ethnic groups.

The **World Arts and Cultures Department** presents events and concerts involving departmental faculty, guest artists, and students. Student performances include M.F.A. concerts, an undergraduate and graduate student-produced concert, and the Senior Concert/Colloquium. Students also perform in more informal programs, such as the end-of-term Creative Work showings or *Pau Hana*, that feature many world dance forms.

Each year the **Theater Department** presents a series of major productions to the general public, and the **Film and Television Department** produces approximately 100 student-directed films and 50 television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Since its founding in 1936, **UCLA Performing Arts** (B100 Royce Hall, 310-825-4401; <http://www.performingarts.ucla.edu/>) has served as the premier West Coast showcase for world-class performing artists and ensembles as well as innovative new work in dance, music, theater, and performance art. UCLA Performing Arts presents more than 250 public concerts and events each year, often sponsoring debut performances of new works by major artists. Through UCLA Performing Arts, the campus hosts a varied and active performance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to events with Luciano Pavarotti, Yo-Yo Ma, Alvin Ailey American Dance Theater, Kathleen Battle, Mikhail Baryshnikov, Pina Bausch Tanztheater Wuppertal, Twyla Tharp, Stomp,

Pinchas Zukerman, and Branford and Wynton Marsalis. Subject to availability, discount tickets are offered to students, faculty, and staff.

Publications and Broadcast Media

Publications and broadcast media at UCLA are operated by the UCLA Communications Board and provide excellent training ground for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. The following are the major student-operated sources of information on campus:

The **Daily Bruin**, with a circulation of 20,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the *Bruin* is published each weekday of the regular academic year (once a week during the summer) and is distributed free from kiosks around campus and in Westwood and Brentwood. Students work as reporters, editors, designers, photographers, and advertising sales representatives; new staff members are always welcome. *Bruin* offices are located in 118 Kerckhoff Hall (310-825-9898; <http://www.dailybruin.ucla.edu>).

Seven newsmagazines reflecting the diversity of the campus community are published twice each term. ***Al-Talib*** is a publication devoted to Muslim issues; ***Fem*** reports on women's issues; ***Ha'Am*** deals with Jewish issues; ***La Gente*** treats Chicano, Latino, and Native American issues; ***Nommo*** explores African issues; ***Pacific Ties*** is devoted to Asian issues; and ***TenPercent*** covers gay, lesbian, bisexual, and transgender issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome. The offices of these newsmagazines are located in 149 Kerckhoff Hall.

The UCLA yearbook, ***BruinLife***, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the ***Freshman Record***, is produced for new UCLA students. Students who would like to participate should contact the yearbook staff in 149 Kerckhoff Hall (310-825-2640).

Like many other large universities, UCLA has its own radio station. **KLA Radio** provides music, news, public service programming, and sports coverage during the academic year. The signal is sent to the residence halls over channel 29 on the cable television system. The studios are located at the rear of the Grand Ballroom in 2400 Ackerman Union (310-825-9107; request line: 310-825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

Sports and Athletics

Athletics (<http://www.uclabruins.com/>) play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports and now ranks first in the U.S. in the number of National Collegiate Athletic Association (NCAA) championships won (77). In 1997-98 the UCLA athletic programs (men and women) placed fourth in the Sears Directors Cup national all-around excellence survey. In the 23-year history of the former *USA Today* survey, the men's program placed first 11 times, while the women's program placed first five times in the final nine years. UCLA was the first university in the country to win five NCAA men's and women's championships in a single year (1981-82).

UCLA also has produced a record number of professional athletes such as Troy Aikman, Eric Karros, Reggie Miller, Natalie Williams, and Corey

Pavin and Olympians such as gold medalists Lisa Fernandez, Karch Kiraly, Gail Devers, and Dot Richardson.

Intercollegiate Athletic Facilities

The major indoor arena at UCLA is the famed **Pauley Pavilion**, which seats 12,800 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, **Drake Stadium** is the home of UCLA track and field competitions and site of many outdoor events, including the U.S. Olympic Festival '91. The **Los Angeles Tennis Center**, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. **Easton Softball Stadium**, which seats 1,050, is the home of the championship women's softball team. The **Morgan Intercollegiate Athletics Center** houses the UCLA Athletic Hall of Fame. Off-campus facilities include **Jackie Robinson Stadium** for varsity baseball and the renowned **Rose Bowl** in Pasadena, home of the UCLA football team.

Men's Intercollegiate Sports

UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall

total of 63 NCAA men's championships — second highest in the nation — including 17 in volleyball, 15 in tennis, 11 in basketball, eight in track and field, five in water polo, three in soccer, two in gymnastics, and one each in golf and swimming. Students can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, water polo, golf, soccer, and cross-country. For more information, contact the Athletic Office at (310) 825-8699.

Women's Intercollegiate Sports

With 11 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won an overall total of 14 NCAA titles — fifth highest in the nation — including seven in softball, three in volleyball, two in track and field, and one each in golf and gymnastics. UCLA has also won three collegiate water polo titles. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and soccer. For more information, contact the Athletic Office at (310) 825-8699.

Student Government

In addition to its **Services and Enterprises** division, ASUCLA includes the **Undergraduate Students Association**, the **Graduate Students Association**, and the **Communications Board**, which publishes the *Daily Bruin* and other campus student publications. Governed by a student-majority Board of Directors, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression students may not find in other aspects of their university experience.

Graduate Student Government

The Graduate Students Association (GSA) is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Directors and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program). GSA also maintains an electronic mail listserv for graduate student government bulletins, agendas, and general graduate student information. The GSA Office is located in 243 Kerckhoff Hall (310-206-8512, e-mail: gsa@asucla.ucla.edu; <http://gsa.asucla.ucla.edu/>).

Undergraduate Student Government

The Undergraduate Students Association (USA), with offices in Kerckhoff Hall (310-825-7068; <http://students.asucla.ucla.edu/>), is governed by the Undergraduate Students Association Council (USAC), which administers the USA operating budget through a network of six officers (president, internal vice president, external vice president, three general representatives) and seven student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare).

Many **student government programs** benefit both campus and community. The Community Service Commission (310-825-2333; <http://students.asucla.ucla.edu/csc/>) serves Los Angeles through more than 20 programs such as Amigos del UCLA, offering academic and emotional support for Latina/Latino students; UCLA Project BRITE, providing tutoring for inmates of juvenile correctional institutions; UCLA Special Olympics; and UCLA Hunger Project, to name just a few. More than 2,500 students offer their services on a volunteer basis.

Student government also supports approximately 20 student advocacy groups on campus, such as the African Student Union, American Indian Students Association, Asian Pacific Coalition, Gay and Lesbian Association, International Students Association, MEChA, UCLA Jewish Student Union, Samahang Pilipino, and the Union of Students with Disabilities.

The Campus Events Commission (CEC, 310-825-1958; <http://students.asucla.ucla.edu/CEC/>) and Cultural Affairs Commission (CAC, 310-825-6564) provide the campus with free and low-cost cultural and entertainment programming, as well as opportunities for student involvement. CEC is responsible for the Speakers and Concert Programs and the Ackerman Film Program. CAC sponsors WorldFest, a celebration of campus diversity, and the Jazz/Reggae Festival.

The ASUCLA Library (304D Kerckhoff Hall, 310-206-7997, e-mail: library@asucla.ucla.edu; <http://students.asucla.ucla.edu/Library/>) houses materials related to student and campus governance and aims to enhance understanding among students about University issues and to increase student involvement within the UCLA community.

UCLA Campus Events Speakers and Concert Programs

The Speakers Program, now over 25 years old, brings the world's foremost entertainers, politicians, and literary figures to campus. It also presents two annual awards programs — the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Speakers and awardees have included Bill Gates, Oliver Stone, Goldie Hawn, Frances Crick, Johnny Carson, David Letterman, Whoopie Goldberg, John Cleese, Robin Williams, Jessica Lange, James Stewart, Spike Lee, Sir Anthony Hopkins, Harrison Ford, Lily Tomlin, Nicholas Cage, William Hurt, Patricia Schroeder, Jesse Jackson, Matt Groening, Studs Terkel, Shimon Peres, Walter Cronkite, Dustin Hoffman, Candice Bergen, Tom Hanks, and Denzel Washington.

The Concert Program brings new and name performing artists like the Talking Heads, Guns N' Roses, 10,000 Maniacs, Public Enemy, Rage against the Machine, No Doubt, Big Bad Voodoo Daddy, Green Day, A Tribe Called Quest, Digital Underground, and The Pharcyde to UCLA for free and affordably priced concerts at noon in Westwood Plaza and at night in the Cooperage and Ackerman Grand Ballroom.

UCLA Recreation

UCLA offers a variety of recreational opportunities to meet the needs of the campus community. The **Department of Cultural and Recreational Affairs (CRA)**, 2131 Wooden Center (310-825-3701; <http://www.sao-net.ucla.edu/recreate>), is the administrative center for the coordination of programming, facilities, and equipment and supervision of campus recreational activities and services.

Intramural and Club Sports

The **Intramural Sports Program** consists of team, dual, and individual sports competition in tournament or league play. More than 40 activities, ranging from basketball and badminton to volleyball and water polo, are offered in men's, women's, and coed divisions. Varying skill levels are available in almost all activities, and the emphasis is on friendly competition. In order to maintain the quality of service to Intramural Sports participants, nominal individual and team entry fees have been established. The **Club Sports Program** offers students the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Annually over 18 club teams participate in a competitive schedule of league and tournament play with other college, university, and local area teams. Recognized teams exist in ice hockey, men's and women's rugby and lacrosse, cycling, men's gymnastics, rowing, waterskiing, sailing, snow skiing, and surfing.

Recreation Class Program

A broad range of noncredit recreation classes is available in aquatics, dance, fine arts, martial arts, outdoor studies, tennis, and sports skills. Most classes are designed for beginning and intermediate skill levels. Private lessons in tennis, fitness activities, swimming, racquetball, and golf are also available. Students can also participate in cultural events through art exhibitions, the poetry reading program, museum tours, and theater in Los Angeles outings.

Fitness is offered either as a recreation class or on a drop-in basis. A Fitness Pass must be purchased (\$25 for a four-quarter pass; \$10 for a one-quarter pass) to participate in drop-in fitness classes.

Recreation Clubs

Students with special interests in activities that are primarily instructional or social in nature may pursue their interests through clubs such as amateur radio, chess, snow skiing, golf, swimming, and tennis.

Recreation Facilities/Informal Recreation

A popular attraction of CRA is the opportunity for independent recreation and exercise. UCLA students with appropriate identification have several major facilities in which to practice and play. The **Wooden Recreation and Sports Center** is a comprehensive student activities building with multiple gymnasia, nine racquetball/handball courts, two squash courts, a weight training facility, rock wall, exercise/dance and martial arts rooms, and a games lounge. The **Sunset Canyon Recreation Center** offers year-round activities in an outdoor park setting and features a 50-meter swimming pool, 25-yard family pool, picnic/barbecue areas, multipurpose play fields, an outdoor amphitheater, 10 lighted tennis courts, and various meeting rooms and lounges. The **UCLA Marina Aquatic Center** in Marina del Rey offers sailing, windsurfing, kayaking, canoeing, scuba diving, and rowing classes and activities, as well as the opportunity to sail, kayak, canoe, or row individually. The competitive sailing and rowing club teams are administered through the center. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Dance Building for recreational sports and activities.

Youth and Family Programs

Youth and Family Programs offer an exciting schedule of year-round activities for children 18 months to 17 years. Summer programs include Bruin Kids Day Camp (ages 5 to 12), Camp Explore (ages 12 to 14), UCLA Summer Programs for High School Students, group and private lessons, and special events. Year-round classes are also offered on Saturday mornings. Activities combine play with skill development and deepen the fun in learning.

Student Services

UCLA students enjoy a broad range of benefits and support services that enrich their college careers and help them attain academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see Academic Resources and Assistance in the Undergraduate Study section of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Ashe Student Health and Wellness Center

The Arthur Ashe Student Health and Wellness Center, located at 221 Westwood Plaza, is an outpatient clinic designed especially for UCLA students. Because it is supported by registration fees, a current BruinCard is required for service. Most services are prepaid by registration fees, and students may be seen by appointment or on a walk-in basis. Call (310) 825-4073 for up-to-date fee information. Core (prepaid) services include visits, most procedures, X rays, and most laboratory procedures. Noncore (fee) services, such as pharmaceuticals, injections, orthopedic devices, and some laboratory procedures, are less costly than elsewhere. If students withdraw during a school term, all Ashe Center services continue to be available on a fee basis for the remainder of that term, effective from the date of withdrawal.

The cost of services received outside the Ashe Center (such as the Emergency Room) is *each student's* financial responsibility. Students are strongly encouraged to purchase supplemental medical insurance either through the UCLA-sponsored Medical Insurance Plan (see below) or

other plans that provide adequate coverage. For more information on Ashe Center services, call (310) 825-4073 or see <http://www.sao-net.ucla.edu/health.htm>.

Office hours weekdays are 8 a.m. to 6 p.m. except Tuesday, when service begins at 9 a.m. Patients without appointments and patients with orthopedic or surgery appointments are seen on the first floor; Women's and Men's Clinics, social service, and internal medicine appointments are on the second floor; all other patients with appointments (including immunizations) are seen on the third floor. For emergency care when the Ashe Center is closed, students may obtain treatment at the UCLA Medical Center Emergency Room or UCLA Family Practice on a fee-for-service basis.

Dental care arrangements are available. Call (310) 825-4073 for further information.

Health Education (Pauley Pavilion) offers services and programs that interest, inform, and help students to lead a healthier lifestyle. Outreach programs, such as the Student Health Advocates, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of many aspects of health care. Call (310) 825-4730.

Men's Health Clinic (second floor) treats male genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call (310) 825-4073.

Primary Care (first and third floors) provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and licensed nurse practitioners. Though complete physicals are available for a fee, a prepaid "Well Exam" is available if students have general health questions or concerns. Students are encouraged to select a clinician who provides ongoing health care. Call (310) 825-4073 to schedule an appointment.

Specialty Clinics provide specialized care when students are referred by Primary Care. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, ear, nose, and throat, ophthalmology, urology, and neurology. Health clearances, immunizations, and travel shots are available by appointment for a moderate fee. Call (310) 825-4073.

Women's Health Service (second floor) offers comprehensive health care and counseling. Services include routine gynecological examinations, evaluation of gynecologic problems, abnormal pap smear evaluation and treatment, contraception, and pregnancy testing. Counseling for relationships and sexual concerns is also available. Call (310) 825-4073 for appointments or to speak to clinicians.

Supplemental Medical Insurance

UCLA provides a student Medical Insurance Plan (MIP) which is available as a supplement to the services offered at the Ashe Center. MIP provides benefits for certain major medical expenses not covered by the Ashe Center, such as hospitalization, surgery, and emergency room costs.

All international students (graduate and undergraduate) on nonimmigrant visas and all graduate students *must maintain adequate medical insurance coverage* during all periods of enrollment at UCLA. MIP fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the UCLA Student Billing Statement (BAR) for all graduate students and for undergraduate and graduate international students. This is the only way that MIP can be purchased.

Graduate and international students who are insured under *adequate* private medical insurance may waive out of MIP. See Mandatory Medical Insurance Requirement under Registration in the Undergraduate Study and Graduate Study sections of this catalog for a description of what constitutes adequate private medical insurance and instructions for waiving out of MIP. For further information on medical insurance, call the Ashe Center Insurance Office at (310) 825-4073, option 4.

Bruin OnLine

Bruin OnLine (BOL) gives UCLA students, faculty, and staff access to campus network communication services and the Internet. Using a BOL connection from their computers at home or at a campus workstation, students communicate with friends, family, and professors via e-mail, enroll in classes or access student records through URSA, check class availability in the online *Schedule of Classes*, search the UCLA Library via ORION, or connect to a range of campus events, programs, and services.

Bruin OnLine services include dial-up access to the UCLA campus backbone network and the Internet, an e-mail account, and space for personal webpages. BOL internet access software is available at the UCLA Store and can be downloaded from the BOL site (<http://www.ucla.edu/bruinonline/>).

For more information, contact the BOL Helpdesk in 4302 Math Sciences (310-825-7452, option 1, e-mail: consult@ucla.edu).

Campus Ombuds Office

The ombudsperson is a confidential and neutral party responsible for listening and responding to grievances or concerns from any member of the campus community (students, staff, faculty, or administrators). Acting impartially, the ombudsperson may investigate unresolved grievances or facilitate the resolution of problems for which there are no established guidelines and may also, where possible and when requested by the grievant, assist in resolving an issue through mediation (including sexual harassment cases). The ombudsperson is empowered to recommend changes to the University Policies Commission and/or to the chancellor regarding University policies and procedures. The office is located in 1172 Career Center (310-825-7627; <http://www.saonet.ucla.edu/ombuds/>); hours are weekdays 8 a.m. to 5 p.m.

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Central Ticket Office

Tickets for all UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center (310-825-2101; <http://www.cto.ucla.edu/>).

As part of its service, CTO offers student *discount* tickets to campus athletic and cultural events and local motion picture theaters (current BruinCards must be presented at the time of purchase). Students may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for Los Angeles city buses and tokens for the Santa Monica and Culver City bus systems.

Child Care Services

UCLA Child Care Services (<http://www.childcare.ucla.edu/>) operates four child care centers: Bellagio Center at Sunset Boulevard and Bellagio Drive; Fernald Center at Sunset Boulevard and Royce Drive; Colina Glen Preschool in the Colina Glen faculty housing area at Beverly Glen Boulevard and Nicada Drive; and University Village Center in the University Village family student housing complex at 3233 South Sepulveda Boulevard.

Child care is provided for children two months to five years old (two to five years at the Colina Glen Center and a kindergarten at the University Village Center). Fees range from \$360 to \$835 per month depending on the age of the child, the site, and schedule selected. A limited number of state grants is available at the Bellagio and University Village Centers for eligible student families. Call (310) 825-5086 for more information.

The **Outreach Program** helps parents make off-campus child care arrangements. The program coordinator meets parents the first Monday of each month from noon to 1 p.m. in 2 Dodd Hall and from 4:30 to 5:30 p.m. at the University Village Center for a "Choosing Child Care Forum." For further information, call (310) 825-8474.

The *Working Parents Newsletter* addresses many issues of concern to working parents and is available through department subscription. Call (310) 206-3078 for information.

The **University Parents Nursery School** is a multicultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff; priority is given to students living in Family Student Housing. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Hours are weekdays 7:30 a.m. to 5:30 p.m. There is also a part-time morning program that ends at 12:30 p.m., and an afternoon program from 1:30 to 5:30 p.m. for children two years nine months to five years. The nursery school is located in the UCLA University Village Child Care Complex, 3233 South Sepulveda Boulevard (310-397-2735).

Helpline

UCLA Peer Helpline (310-825-HELP; <http://www.ucla.edu/emergency/helpline.html>) is a crisis intervention and referral hot line staffed by UCLA students and staff members. Students can call and talk to a trained peer counselor about school stress, relationship problems, loneliness, depression, drug problems, suicide, or anything else that is on their mind. Hours are Monday through Thursday 5 p.m. to midnight, Friday through Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (310-825-0768).

Office of the Dean of Students

The Office of the Dean of Students (1206 Murphy Hall, 310-825-3871; <http://www.saonet.ucla.edu/dos/>), exists to help students, either directly or by referral, with whatever needs they might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes "Official Notices" in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

The Office of the Dean of Students also plays a role in administering campus discipline and applying the standards of citizenship that students are expected to follow at UCLA. The standards involve complying with the policies and regulations governing this campus and being aware that violation of those policies or regulations can result in disciplinary action. See Student Conduct: University Policies in the Appendix for more information.

Safety and Security

Dial **911** from any campus phone for **police, fire, or medical emergencies** (do not dial an additional 9 to establish an outside line). For non-emergency information, contact the UCLA Police Department at 601 Westwood Plaza (310-825-1491; <http://www.ucpd.ucla.edu>).

The UCLA Police Department provides a free **Campus Escort Service** every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs) — specially trained UCLA students — are available to walk students, staff, faculty, and visitors between campus buildings and local living areas or Westwood Village. To obtain an escort, call (310) 794-WALK about 20 minutes before one is needed.

The free **Evening Van Service** provides a safe, accessible, and convenient mode of transportation around campus at night. Seven vans driven by CSOs operate Monday through Thursday from 6 p.m. to midnight and provide transportation between Ackerman Union, apartments on the west side of campus, Lot 32, the campus libraries, and the residence halls. For further information or a free brochure, call (310) 825-9800.

Cosponsored by the Women's Resource Center and the UCLA Police Department, **UCLA Sexual Violence Prevention and Education Services** include workshops, self-defense classes, intake counseling, and referrals

to offer practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape, sexual assault, and relationship violence. For more information, call (310) 206-8240 or the Crime Prevention Unit at (310) 825-7661.

Cardiopulmonary resuscitation (CPR) and basic emergency care courses are offered by the Center for Prehospital Care (924 Westwood Boulevard, Suite 720) and can be organized most days and times. For more information or to schedule a course, call (310) 794-8797.

The **Office of Environment, Health, and Safety (EH&S)** is dedicated to the reduction of workplace hazards on the UCLA campus and to the promotion of safety at all levels of the University community. EH&S is a consulting resource for UCLA departments and personnel who want to know more about how they can make their workplaces safe. The goal is to make health and safety information more readily accessible and usable and to promote the mission of the University in a safe and healthful manner. Requests for safety information and training, regulatory interpretation and applicability, approval for potentially hazardous procedures, resolution of safety problems, and surveillance and monitoring of persons and workplaces are handled by EH&S. For further information, call (310) 825-5689 or see <http://www.ehs.ucla.edu>.

Police, Fire, or Medical Emergency	911
UCLA Police Department (24 hours)	(310) 825-1491
UCLA Emergency Medical Center (24 hours)	(310) 825-2111
Campus Escort Service (dusk to 1 a.m.)	(310) 794-WALK
Helpline (Monday through Thursday 5 p.m. to midnight, Friday through Sunday 8 p.m. to midnight)	(310) 825-HELP

Services for International Students

The **Office of International Students and Scholars (OISS)** and the **Dashew International Student Center (DISC)** provide services and programs for UCLA's international community, particularly for 2,000 nonimmigrant students. A comprehensive orientation program for these students helps them achieve their academic objectives. Programs throughout the year allow them to share their viewpoints with American students and the community.

The OISS staff, located in 106 Bradley Hall on the west side of campus (310-825-1681; <http://www.saonet.ucla.edu/intl/>), includes professional and peer counselors specially prepared to assist students with questions about immigration, employment, government regulations, financial aid, academic and administrative procedures, cultural adjustment, and personal matters. OISS is also a designated Sexual Harassment Information Center for international students, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

In addition, OISS provides visa assistance for faculty, researchers, and postdoctoral scholars.

The DISC, also located in 106 Bradley Hall, seeks to improve student and community relationships and assists international students with language, housing, and personal concerns in addition to sponsoring cultural, educational, and social programs for UCLA students and community members. OISS and DISC frequently offer programs with interethnic and international themes.

Services for Students with Disabilities

The **Office for Students with Disabilities (OSD)**, A255 Murphy Hall (voice 310-825-1501, TDD 310-206-6083, fax 310-825-9656; <http://www.saonet.ucla.edu/osd/>), provides academic support services to regu-

larly enrolled students with documented permanent or temporary disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Free support services include readers, note takers, sign language interpreters, Learning Disabilities Program, special parking, registration assistance, fee deferments authorized by the California Department of Rehabilitation, on-campus transportation, campus orientation and accessibility, proctor and test-taking arrangements, tutorial referral, housing assistance, support groups, workshops, special materials, adaptive equipment, and referral to the Disabilities and Computing Program. Accommodations are varied and specifically designed to meet the disability-related needs of each student. All contact and assistance are handled confidentially.

For information on the **Disabilities and Computing Program (DCP)**, see Computer Services earlier in this section of the catalog.

Student Legal Services

Currently registered and enrolled students with legal problems can get assistance from attorneys or law students under direct supervision of attorneys. They help students solve legal problems, including those related to landlord/tenant relations; domestic violence and harassment; divorces and other family law matters; accident and injury problems; criminal matters; automobile purchase, repair, and insurance problems; health care, credit, and financial aid issues; consumer problems; and University-related issues. Assistance is available only by appointment from 9 a.m. to 5 p.m. weekdays in 70 Dodd Hall (310-825-9894; <http://www.saonet.ucla.edu/slgs/>).

Student Psychological Services

Student Psychological Services (SPS; <http://www.saonet.ucla.edu/sps.htm>) offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (310-825-0768); the South Campus Office is in A3-062 CHS (310-825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each term. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

SPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

UCLA Alumni Association

Celebrating more than 65 years of serving the UCLA community, the UCLA Alumni Association has nearly 75,000 members, making it one of the largest alumni groups in the nation. Whether a person is a recent graduate, a pioneer Bruin, or somewhere in between, membership in the Alumni Association is the best way to stay connected to UCLA and its growing excellence.

Membership dues enable the Alumni Association to serve as an advocate on campus and to play the vital role of guardian of the value of every UCLA degree. Dues also support programs such as Bruin Fest, Spring Sing, class reunions, and the scholarship program.

The association also offers a plethora of benefits and services. Members can make new friends, pursue lifelong learning, save money, and make a difference. Recently the association greatly expanded its career services program to meet the needs of members. UCLA graduates, Bruin parents, and friends of the University are invited to take advantage of all the association has to offer. It is located in the West Alumni Center, 325 Westwood Plaza (310-825-ALUM; 800-825-ALUM outside Los Angeles County; <http://www.alumni.ucla.edu/index.cfm>).

UCLA Career Center

The UCLA Career Center (<http://www.career.ucla.edu/>) offers career planning and employment assistance free to all UCLA students. Services are located in the Career Center and in two specialized branches: Engineering and Science Career Services in 5289 Boelter Hall and EXPO Internship and Study Abroad Services in 109 Kerckhoff Hall.

Career Planning and Exploration

Career counselors provide assistance in selecting a major, setting realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities can assist students in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Center Library offers a collection of over 3,000 career-related books and directories, videos, periodicals, and other materials. In addition, the Career Center offers workshops on a variety of career-related topics; many are repeated several times each term.

Employment Assistance

Students who need extra money to finance their college degree can find a large volume of part-time, temporary, and seasonal employment leads advertised through the Career Center's 24-hour BruinTraks™ online listings available on the web. Students and recent graduates looking for full-time, entry-level career positions may access hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in BruinView™ campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-

year academic institutions. Annual career fairs and special events offer additional opportunities to meet potential employers.

University Records System Access

Through University Records System Access (URSA), UCLA students acquire academic, financial, and personal information from their University academic records and enroll in classes. URSA is accessed through **URSA OnLine** at <http://www.ursa.ucla.edu/> or through **URSA Telephone** at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

For most students, URSA OnLine provides the easiest way to gain real-time access to academic, financial, and personal records. The site is designed with an intuitive visual interface that walks students through the different steps of the procedure they are trying to accomplish, whether it be to check their Student Billing and Receivable (BAR) accounts, change address information, view and print Study Lists or Degree Progress Reports (DPRs), or see term grades. URSA OnLine also provides a convenient way to enroll in classes, to verify enrollment appointment times, and to view real-time enrollment counts.

Students use URSA Telephone to process class enrollment and to add, drop, or exchange classes/sections, sign onto class waitlists, add a class using a permission to enroll number, change the grading basis for a class, obtain a reading of a Study List, and obtain instructor names for all courses. Financial aid information allows students to check the status of financial aid applications, track documents submitted with applications, and verify the amounts of disbursements.

Veterans Affairs and Social Security Services

The Veterans Affairs coordinator, 1113 Murphy Hall, provides information for veterans and eligible dependents about veterans' educational benefits and tutorial assistance; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women's Resource Center

The Women's Resource Center (WRC), located in 2 Dodd Hall (310-825-3945), offers services to all UCLA students, with special focus on gender-related issues and concerns.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, relationship violence, career development, single parenting, health, returning to school, men's issues, and personal relationships. It also offers referrals for medical, legal, and personal counseling, mentoring programs for life, physical, and social sciences majors, and other services both on and off campus. A library includes specialized publications on gender-related issues. In addition, rape services consultants (RSCs) — individuals who provide information, support, and resources for members of the UCLA community who have been raped or sexually assaulted — can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise. The WRC is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Committed to improving the status of women on campus, WRC works with other campus agencies to help women reach their full potential.

Undergraduate Study

Undergraduate Admission

Undergraduate Admissions and Relations with Schools
1147 Murphy Hall
(310) 825-3101
<http://www.saonet.ucla.edu/uars.htm>

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites students to visit UCLA and experience the campus firsthand. The UARS Office offers student-guided individual and group tours of the campus Monday through Friday at 10:15 a.m. and 2:15 p.m. and Saturday at 10:15 a.m. throughout the year; reservations are required. Call (310) 825-8764 for tour reservations or see <http://www.saonet.ucla.edu/uars/prospect/tours.htm>; call (310) 825-3101 for general UCLA admission information or see <http://www.saonet.ucla.edu/uars.htm>.

Applying for Admission

The first step in applying for admission is to obtain the *UC Application for Undergraduate Admission and Scholarships*, which contains all necessary forms and instructions, from the California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. Students apply to one UC campus for the basic \$40 application fee; an additional \$40 fee is charged for each additional campus selected.

Students then complete the application, taking care to list their desired major and the correct major code for the campus(es) to which they are applying. Mail the completed application and the nonrefundable application fee in the self-addressed envelope included in the application packet.

If students are in high school when they apply (freshman applicant), their self-reported application information is used to make preliminary admission decisions. Do not send the sixth and/or seventh semester high school transcripts. Once admitted, students must submit a final transcript, including a statement of graduation or proficiency, which is used to verify the application information. Students must submit official results of the Scholastic Assessment Test I (SAT I) or American College Test (ACT) and three subject tests from the SAT II; students should request that test results be sent directly to UCLA when they take each test. The tests should be taken by the December test date, as they are part of the review process for admission.

If students have attended or are attending another college when they apply (transfer applicant), their self-reported application information is used to make preliminary admission decisions. Once admitted, students must submit official transcripts from all colleges and universities attended (high school transcripts may also be required), which are used to verify

the application information. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

Application filing periods for the year 2000 follow. Check the quarterly *Schedule of Classes* for updates or see <http://www.registrar.ucla.edu/calendar/>:

Winter Quarter 2000	Closed to new applicants
Spring Quarter 2000	October 1-31, 1999 (If open to new applicants, junior-level applicants only.)
Fall Quarter 2000	November 1-30, 1999 (Freshmen and transfers)

All majors are open for Fall Quarter. For Spring Quarter all majors in the College of Letters and Science, except communication studies, are open; majors in the Schools of Engineering and Applied Science, Nursing, Arts and Architecture, and Theater, Film, and Television are closed.

Notification of Admission

Students are mailed a notice from the UC Undergraduate Application Processing Service acknowledging receipt of their application. Later, they receive a letter from the UCLA Office of Undergraduate Admissions and Relations with Schools regarding the admission decision. The length of time before admission notification varies. In general, Fall Quarter applicants are notified in mid-March (freshmen) and mid-April (transfers); Spring Quarter applicants are notified in mid-December.

Students who are offered admission are asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable \$100 deposit, also required at this time, is applied to the University registration fee as long as students register in the term to which they are admitted.

Entrance Requirements

The entrance requirements established by the University of California follow the guidelines set forth in the California Master Plan for Higher Education, which requires that the top one eighth of the state's high school graduates be eligible for admission to the University of California. These requirements are designed to ensure that all eligible students are adequately prepared for University-level work and are based on the principles that the completion of certain academic courses in high school prepares them to begin University work and choose a general field of study. Further, the grades earned in these courses indicate whether students will be successful in college-level courses.

Fulfilling the minimum admission requirements, however, does not assure admission to UCLA. The selection of applicants is based on demon-

strated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation.

At least 50 percent of the freshman class is selected on the basis of academic criteria alone. The remainder of the class is selected after a comprehensive review that takes into account both academic and personal elements. Criteria include a progressively challenging academic program, participation in activities that develop academic or intellectual abilities, honors and/or awards, leadership in school or community, and responses to life challenges. Contact Undergraduate Admissions and Relations with Schools for further information.

Admission as a Freshman

Students are considered freshman applicants if they have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, students must meet three major requirements: the **Subject Requirement**, the **Scholastic Requirement**, and the **Examination Requirement**. These are the **minimum** requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

A series of changes in the minimum eligibility requirements for freshman applicants are being gradually implemented over three years, beginning with students entering UCLA in Fall Quarter 2001. Contact Undergraduate Admissions and Relations with Schools for further information.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during the last two years in high school. These are the **minimum** courses required for admission; students are encouraged to exceed these requirements whenever possible.

History/Social Science

Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government; and one year of world history, cultures, and geography.

English

Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature. No more than two semesters of ninth-grade English can be used to meet this requirement.

Mathematics

Three years of college preparatory mathematics that include the topics covered in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus). Mathematics courses taken in the seventh and eighth grades may be used to fulfill this requirement if the high school accepts them as equivalent to its own courses.

Laboratory Science

Two years of laboratory science (three years are recommended) which provide fundamental knowledge in at least two of these areas — biology, chemistry, and physics. Laboratory courses in Earth/space sciences are acceptable if they have requisites or provide basic knowledge in biology, chemistry, or physics. No more than one year of ninth-grade laboratory science can be used to meet this requirement.

Language Other than English

Two years of the same language, other than English (three to four years are recommended). Courses should emphasize speaking and understanding and include instruction in grammar, vocabulary, reading, and composition.

College Preparatory Electives

Two units (four semesters), in addition to those required above, to be selected from the following subject areas: history, English, advanced mathematics, laboratory science, language other than English, social science, and visual and performing arts.

Scholastic Requirement

Eligibility for admission to the University of California is based on a combination of the grade-point average (GPA) in the academic subject requirements and the American College Test (ACT) or Scholastic Assessment Test I (SAT I) scores. For detailed scholarship information, see the UC publication *Introducing the University* or contact Undergraduate Admissions and Relations with Schools.

Examination Requirement

All freshman applicants must submit scores from the following tests:

(1) Either the American College Test (ACT) composite score OR the Scholastic Assessment Test I: Reasoning Tests (SAT I) total score.

(2) Three Scholastic Assessment Test II: Subject Tests (SAT II) which must include

- (a) Writing AND
- (b) Mathematics, level 1 or 2, AND
- (c) One additional test (either English literature, foreign language, science, or social studies).

The tests should be taken by the December test date, as they are part of the review process. Students should request that test results be sent directly to UCLA when they take each test.

Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) academic grade-point average, (2) scores on the SAT I or ACT and the three SAT II tests, (3) quality, content, and level of coursework throughout the entire high school program, including the senior year, and (4) number of and performance in honors and advanced placement (AP) courses.

Students should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

For detailed information on admission requirements for freshman students, see the UC publication *Introducing the University* or contact UARS.

Admission as a Transfer Student

Students are considered transfer applicants if they have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) They **may not disregard** their college record and apply for admission as a freshman. Priority is given to junior-level applicants. Students who wish to transfer to UCLA should follow these general guidelines:

The number of advanced standing students applying to UCLA has increased significantly during the last several years. Students admitted to the University exceed the minimum University of California transfer eligibility requirements, and those with the strongest preparation and performance are offered admission.

In accordance with the California Master Plan for Higher Education, first preference is given to California community college applicants. Applicants transferring from other UC campuses are next in priority, followed by applicants transferring from other colleges and universities. Each application receives a comprehensive review, integrating all available information.

The academic criteria are as follows: grade-point average (GPA) in transferable courses, significant preparation for the major, completion of the English composition and mathematics requirements, and progress toward completion of the Intersegmental General Education Transfer Curriculum (IGETC) or UCLA general education requirements. Applicants who have completed the English composition and mathematics requirements as early as possible in their academic program and who have 90 transferable quarter units by the time they enroll in the University receive priority admission consideration.

For more detailed information on admission requirements for transfer students, see the *UC Application for Undergraduate Admission and Scholarships* and the *UC Answers for Transfers* booklet or contact UARS.

Intercampus Transfers

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see When to Apply at the beginning of this section). Students who have attended another UC campus and wish to be considered for admission to UCLA must have been in good standing when they left that campus. Intercampus transfers are not automatic; students must compete with all other applicants.

Senior-Level Applicants

Students attaining senior standing are not generally admitted by the University.

Transfer Credit and Credit by Examination

The University awards unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS). All courses which meet the criteria are used in determining eligibility for admission. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units \times 1.5 = 18 quarter units.)

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement (AP) Tests given by the College Board and the International Baccalaureate. Contact UARS for more information.

Applicants from Other Countries

Application for Admission

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

The application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens (see When to Apply at the beginning of this section). This allows time for the necessary correspondence and, if students are admitted, to obtain their passport visas.

Proficiency in English

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, they are required to take the UCLA English as a Second Language Placement Examination (ESLPE) before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Depending on the ESLPE results, students may be required to successfully complete one or more English as a second language

courses. In addition, they are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing their ability. Make arrangements for this test by contacting TOEFL/TSE Publications, P.O. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at <http://www.toefl.org>. Have the test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all **undergraduate international students** on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement for International Students under Undergraduate Registration later in this section.

Readmission

Undergraduate students are required to apply for readmission only if they are absent from the University for more than one term. Thus, if they complete a term and then withdraw, cancel, or fail to register for the next term, registration information is available for the term immediately following.

Students who are absent for two or more consecutive terms must complete an Undergraduate Application for Readmission form and file it with the Registrar. All such students returning in the same standing (undergraduate) must file readmission applications by the following dates or, if the deadline falls on a weekend or holiday, on the following workday.

Fall Quarter	August 15
Winter Quarter	November 25
Spring Quarter	February 25

Application forms are available at 1113 Murphy Hall. The completed application must be accompanied by a \$40 application fee (nonrefundable) and transcripts of records from any other institutions (including UCLA Extension) students attended during their absence. The paper records of nonregistered students, including transcripts submitted for transfer credit, are retained for five academic years by the Registrar's Office. Students who have not been registered for the last five years must resubmit official transcripts of all work completed outside UCLA. Readmission is generally approved if students were in good academic standing (2.0 grade-point average) when they left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. The college or school may have other academic regulations governing readmission (consult the appropriate counseling office). Contact the readmission clerk at (310) 825-1091 for further information.

Second Bachelor's Degree Applicants

By policy, second bachelor's degrees are not generally granted by the University, except in the School of Nursing.

Undergraduate Registration

Enrollment and Degree Services
1113 Murphy Hall
(310) 825-1091
<http://www.registrar.ucla.edu>

Registration consists of paying fees and enrolling in classes. The UCLA Student Billing Statement (BAR), mailed monthly to students' UCLA mailing addresses by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed online or by telephone through URSA (University Records System Access). Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Paying Fees

Details on **fee payment, enrollment procedures, and deadlines** are in the quarterly *Schedule of Classes*, available for purchase at the UCLA Store several weeks before the beginning of each term. To obtain a copy, write to UCLA Store, Attn: Mail Out, 308 Westwood Plaza, Los Angeles, CA 90024-1645, or call (310) 825-6064. The *Schedule of Classes* is available at <http://www.ucla.edu/registrar.ucla.edu/schedule/>.

Eligible students must pay fees by the applicable deadlines. Payments may be mailed, paid by credit card through URSA OnLine, or deposited in the UCLA Administrative Main Cashier's Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and are assessed an additional \$50 late payment fee.

Mandatory Medical Insurance Requirement for International Students

UCLA requires, as a condition of registration, that all **undergraduate international students** on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment.

The following plans are NOT acceptable and do NOT fulfill the University requirement for adequate medical/health insurance: (1) travel insurance plans of any kind, (2) any plans purchased outside the U.S. and/or not issued by a U.S. company, (3) reimbursement arrangements or vouchers, including those from home governments and consulates in the U.S.

UCLA provides a student Medical Insurance Plan (MIP) that fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the BAR statement for all undergraduate international students. This is the only way that MIP can be purchased.

International students who do not purchase MIP must have an adequate private medical insurance plan with all of the following minimum benefits:

- (1) A *minimum* of \$100,000 in lifetime benefits.
- (2) Coverage of at least 75 percent of medical expenses, with a deductible of \$500 or less and a copayment of 20 percent or less.
- (3) A policy issued in the U.S. by a U.S. carrier.
- (4) Inclusion of Medical Evacuation and Repatriation benefits for those on J-1 or J-2 visas.

If the private medical insurance plan does not meet all of the above requirements, students must purchase MIP.

International students who decide to waive out of MIP because they have adequate private medical insurance must complete the Medical Insurance Waiver Request included each term with the BAR statement and submit the form when they pay their registration fees. Students whose fees are paid by financial aid or other sources must submit their MIP waiver by the published registration deadline each term. Students may waive out of MIP at <http://www.saonet.ucla.edu/health/insuranc/mipforms/auth.html>; the online waiver deadline is two days prior to the official fee payment deadline published in the quarterly *Schedule of Classes* calendar.

This information serves as notice of the mandatory medical insurance requirement; it is each student's responsibility to obtain the necessary information before they register. Changes and exceptions requested after students have registered cannot be honored. MIP cancellation requests must be made to the Ashe Student Health and Wellness Center Insurance Office within 10 days from the MIP effective date.

For all **other undergraduate students**, the MIP fee appears as a voluntary option on the BAR statement and is in addition to the amount due each term. To request MIP, students must select it by marking that item on the remittance portion of the BAR statement. The remittance slip must be returned to the UCLA Administrative Main Cashier by the published registration deadline each term. This is the only way that MIP can be purchased.

For further information on MIP or adequate medical insurance requirements, call the Ashe Center Insurance Office at (310) 825-4073 option 4.

Enrolling in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from the school or college advisers, students can assemble a program of courses (see Choosing the Major and Planning a Program later in this section).

Students should plan two or three alternate programs in case their first choice of courses is not available. They may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

University Records System Access Enrollment

Through **University Records System Access (URSA)**, UCLA students enroll in classes and obtain academic, financial, and personal information from their University records. URSA can be accessed either through **URSA OnLine** at <http://www.ursa.ucla.edu/> or through **URSA Telephone** at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

The easiest way for most students to enroll is through URSA OnLine, which also provides enrollment appointment times. The site's intuitive interface makes it easy to view course descriptions and times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a printout of the Study List. Students can also check their BAR account, make online credit card payments, and obtain refund information.

By using URSA Telephone, students can obtain enrollment appointment times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a reading of their Study List, which includes the day, time, and location of classes, examination codes, and instructor names. Students may also verify that their registration fees have been paid and that they have no outstanding holds, factors that could effect their ability to enroll. In addition, they may check financial aid information.

In-Person Enrollment

For classes that require written approval or specialized processing, students may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists

At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes "official," and all wait lists are eliminated. Students should obtain a reading of their Study List through URSA after all enrollment transactions. **Students are responsible for all courses and the grading basis as listed on URSA, and they cannot receive credit for courses not listed.** Errors or omissions should be corrected before the academic dean's deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

Beginning with the third week of instruction, most changes to the Official Study List can be made with a fee via URSA or require an Enrollment Petition which is available for purchase in the school supplies section at any UCLA Store. Approval signatures are required before processing. If students add a special studies (199) course, they must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. Consult the *Schedule of Classes* for deadlines and complete instructions. Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action appear on the official transcript.

Change of College/School or Major

Changing the college/school or major requires the approval of the college/school or department students want to attend. Applications for change of college/school are made by petition, which is available without charge from the college or school office. Change of major petitions are available from the department students want to attend. They may not change majors after the opening of the last term of their senior year.

Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA varies according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay annual tuition in addition to registration fees, as published in the quarterly *Schedule of Classes* and online at <http://www.registrar.ucla.edu/fees/>. For a full definition of residence and nonresidence, see the Appendix.

Fees are current as of publication but are subject to change without notice by The Regents. See <http://www.registrarucla.edu/fees/> for updates.

Annual Expenses for 1999-00	
University registration fee	\$ 713.00
Educational fee	2,896.00
Ackerman Student Union fee	51.00
Undergraduate Students Association fee	54.00
Wooden Recreation Center fee	36.00
Seismic fee for Ackerman/Kerckhoff	113.00
Total for California residents	\$3,863.00
Nonresident educational fee	3,086.00
Nonresident tuition fee	9,384.00
Total for nonresidents	\$13,437.00

The registration fee covers certain student expenses for counseling service, laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Ashe Student Health and Wellness Center. This fee is charged whether or not students make use of these services.

Course Materials Fees

The College of Letters and Science and several professional schools are authorized to assess course materials fees for particular courses. The fees may take the form of materials use fees or instructional enhancement fees. Depending on the academic unit, schools either assess these fees at the start of the quarter or based on actual enrollment at the end of the fourth week of instruction. Students are responsible for ensuring that all Study List errors and omissions are corrected prior to this time.

All students in a course with an approved course materials fee are assessed the fee, regardless of major. The fee is nonrefundable once assessed. Students who are approved for a Late Add enrollment in a course

after the fourth week of instruction are required to pay the course materials fees, which are billed through the BAR statement, for the entire quarter.

Other Fees

Miscellaneous fees charged to UCLA undergraduate students include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes) and a \$20 late fee if the BAR statement has an unpaid balance in excess of \$25. A \$60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. Minimal charges of \$5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the *Schedule of Classes*.

Fee Refunds

Students who formally withdraw from the University may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in the Academics section of this catalog or consult the *Schedule of Classes* for policy details and specific refund dates for each term.

Fee Waiver Requests

Late registration, processing, and penalty fees are waivable on request in writing to the office assessing the fees only if they were incurred through the fault of the University or because a student suffered sudden and debilitating injury or accident.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. Students who have ongoing family or employment responsibilities or health problems that preclude full-time study may qualify for part-time enrollment.

Students who have approval from their college or school to enroll in 10 units or less may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the educational fee. Students must file the Request for Fee Reduction form with their college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction. Students who receive the part-time fee reduction from their academic dean may not also use the UC employee reduction; they must use one or the other.

Estimated Annual Budgets for Undergraduate California Residents

Expenses cover the three regular session terms of the 1999-00 academic year and do not include Summer Sessions. Nonresidents must add \$9,384 annual tuition to their total expenses for an accurate estimate. The budgets are designed to serve as a guide and are subject to change.

	Commuter from Home	On-Campus Housing	Off-Campus Housing
University fees	\$ 3,863.00	\$ 3,863.00	\$ 3,863.00
Books and supplies	902.00	902.00	902.00
Food and rent	2,854.00	7,692.00	6,839.00
Transportation	1,028.00	473.00	701.00
Personal	1,524.00	1,317.00	1,453.00
Total Budget	\$10,171.00	\$14,247.00	\$13,758.00

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive, (310) 825-4491.

Financial Support

Financial Aid Office
A129J Murphy Hall
(310) 206-0400
<http://www.saonet.ucla.edu/fa.htm>

Students do not need to come from low-income families to qualify for financial aid. They must, however, demonstrate financial need, which is defined as the difference between the cost of attending UCLA and the amount that they and their families should be able to contribute. The University expects that students and their families bear as much of the necessary cost of a student's education as their circumstances permit.

The Financial Aid Office publishes a *Financial Aid Handbook* with detailed information. Students can obtain a free copy at the Financial Aid Office, A129J Murphy Hall, UCLA, Box 951435, Los Angeles, CA 90095-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications is **March 2** (or the Friday before that date if March 2 falls on a weekend). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline are considered only if funds are still available. The *Daily Bruin* and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the *UC Application for Undergraduate Admission and Scholarships* during the filing period (see Undergraduate Admission at the beginning of this section). They can also use the admissions application to apply for undergraduate scholarships.

Free Application for Federal Student Aid

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Free Application for Federal Student Aid (FAFSA). If students are financially independent according to the federal financial aid guidelines, their own financial circumstances are analyzed rather than those of their parents.

The FAFSA is used to apply for all federally funded programs, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. The FAFSA is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed by March 2. Be sure to indicate that a report is to be sent to UCLA by using the UCLA Title IV code: 001315.

Continuing students may obtain UCLA Financial Aid Application Packets beginning in January of each year at the Financial Aid Office. Continuing undergraduate students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Types of Financial Aid

There are four basic types of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some funds that are a gift (scholarship or grant) and some that have to be paid back or earned through employment.

Unless otherwise stated, students must demonstrate financial need to qualify for aid, and they must be making normal academic progress as defined by their college or school, their department, and the Financial Aid Office (for a full definition of financial aid minimum progress standards, see the Appendix of this catalog).

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a requisite only for University and name (endowed) scholarships other than those listed below. Each year approximately \$300,000 is awarded from the many different scholarship funds. Awards range from \$100 to \$2,000 and are not renewable. Students must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium if they have no financial need. Scholars who establish financial need by filing the FAFSA receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from \$500 to \$2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter and to community college transfer students. No financial need is involved, but eligibility requirements exist, and students should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded. Freshman award amounts range from \$500 to \$10,000; transfer awards are \$500 each. The Dr. Ralph Bunche Scholarship Awards, also presented by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, are given to students from historically underrepresented communities. In addition to the monetary awards, Alumni Scholars receive special privileges. Recipients who receive work-study and/or loans as part of a financial aid package receive additional alumni grant monies.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of \$150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

Grants

Grants are funds that do not have to be repaid and are based solely on need. Whenever awarding policies and funds permit, the financial aid package includes a grant.

Federal Pell Grants

Federal Pell Grants are federal aid awards intended to be the "floor" of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1999-00 range from \$400 to \$3,150, depending on federal funding, and are determined by student financial resources and the family's financial resources. U.S. citizens and eligible noncitizens may apply by filing the FAFSA. The University requires all eligible undergraduates to apply for a Federal Pell Grant.

Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 1999 are eligible to apply for a California Student Aid Commission Cal Grant award. The FAFSA and GPA Verification Form are the official applications for these programs. Cal Grant A awards are applied toward registration fees. They are based on need and academic achievement and are renewable each year. Cal Grant B awards are intended to assist low-income families and are renewable annually. First-year freshmen receive a quarterly stipend. In subsequent years recipients receive a stipend plus funds toward educational and registration fees.

State University Grants

These grants provide eligible students with financial assistance from state funds. Awards range from \$100 to \$4,000. All undergraduate students are considered.

Federal Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from \$100 to \$4,000. Recipients must be U.S. citizens or eligible noncitizens.

Loans

Loans allow students to postpone paying some of the costs of their education until they have completed school. A financial aid offer includes a long-term, low-interest loan.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, students should assess their total educational debt and their ability to repay following graduation. The University makes every effort to assist students during the repayment of their obligation, but University services, including registration and the release of official transcripts, are withheld if the loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action. All first-time borrowers must attend a loan entrance interview before their funds are released.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview helps students understand their loan agreement and their rights and responsibilities. If students fail to participate in an exit interview, the University places a hold on their academic records and registration materials. Call (310) 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Federal Perkins Loans

Low-interest Federal Perkins loans are available to all students who are U.S. citizens or eligible noncitizens. Repayment begins six or nine months after students terminate at least half-time study. Repayment terms are fully explained when students accept the loan. Minimum repayment is \$90 per quarter, including interest, up to a maximum of 10 years.

Federal Nursing Loans

To be eligible for a nursing loan, applicants must be U.S. citizens or eligible noncitizens and students in the School of Nursing. Up to \$3,000 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans

Students need not be receiving financial aid to apply for emergency loans. They may borrow up to \$100 for immediate emergency needs; the amount is repayable on the 20th of the month following the month in which the loan was made. To qualify, applicants must be registered UCLA students with satisfactory loan repayment records. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Federal Family Education Loan Program

Federal Stafford Loans are long-term need-based loans made by banks and credit unions. They are available to U.S. citizens and eligible noncitizens who are enrolled in at least a half-time program at UCLA. Freshmen may borrow up to \$2,625, sophomores up to \$3,500, and juniors and seniors up to \$5,500 per academic year, to a maximum of \$23,000.

Unsubsidized Federal Stafford Loans for Middle-Income Borrowers are not based on need. Although repayment can be deferred until after graduation, interest begins to accrue while students are in school. Students must file a FAFSA to be considered for the program.

Through **Federal Parent Loans for Undergraduate Students (PLUS)** parents may be eligible to borrow up to the cost of a student's education for the academic year minus any estimated financial aid. These loans are not deferrable.

Work-Study Programs

Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows them to work a maximum of 20 hours per week while attending school. An academic year's work-study award may range from \$1,000 to \$1,800, but gross earnings may not exceed the amount awarded.

Under **Federal Work-Study**, the federal government pays a portion of the hourly wage; the employer contributes the balance. Whenever possible, work is related to student educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of the work, experience, and capabilities. To be eligible, students must be U.S. citizens or eligible noncitizens.

Off-campus community service positions are also available in nonprofit organizations and governmental agencies. Students who are placed in these positions may petition the Financial Aid Office for an increase in work-study funding up to a maximum of \$5,000.

Whether employed on or off campus, students must maintain full-time enrollment (12 units for undergraduates, eight units for graduate students) to be exempt from Social Security and Medicare taxation.

Getting the Bachelor's Degree

College and Schools

The UCLA campus consists of one college and 11 schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

The **College of Letters and Science** provides a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees.

The **schools** provide training for specific professions and are authorized to grant professional degrees (for example, Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 11 professional schools, four of which offer undergraduate degree programs: School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television.

Each college and school has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when students attend UCLA, they are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Their academic life is governed by the college or school that houses their major.

UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. In addition there are a number of special programs and minors that students may complete as an adjunct to their major. The bachelor's degree (only one may be earned) is the culmination of their undergraduate work; master's and doctoral degrees are earned in graduate study.

Student Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to students to realize when they need help and to seek it out. It is also the responsibility of students to keep informed and to comply with the rules, regulations, and policies affecting their academic standing and their life as UCLA students. Consult this catalog, the college and school announcements, and the *Schedule of Classes* for the information needed; watch for official announcements in the *Daily Bruin* and on campus bulletin boards. Meeting academic deadlines, monitoring the Study List for accuracy, completing requisites, and fulfilling degree requirements are all part of their academic duties as students. Living up to their responsibilities adds immeasurably to the value and enjoyment of their education (also see Student Conduct in the Appendix of this catalog).

Choosing the Major

One of the most important decisions students have to make in college is their choice of major — the field of study that represents their principal academic interest and that likely will contribute toward their career goals. Some students select their major at the time they fill out the University's application for admission. A far greater number, however, are undecided about their major.

Students in the College of Letters and Science do not need to declare their major in their freshman year. The college allows them to attend with an undeclared major until the end of their sophomore year. In fact, if students are not certain of their specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major students select. To narrow the choices, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss interests and plans with a departmental counselor or faculty adviser, a college counselor, or advisers in the UCLA Career Center.

Certain majors, especially in the arts, theater, film and television, engineering, and the sciences, require **early declaration**. Some have enrollment quotas and allow application by new majors only during a specified term. Students should check with the departmental adviser for the majors that interest them.

In addition, UCLA undergraduate students are limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if they wait to declare a major, they should not wait too long. In any case, they must declare a major by the beginning of their junior year (90 quarter units).

When students are ready to declare their major, or if they wish to change from one major to another, they should obtain a Petition for Change of Major at the college or school office. There is no fee for the petition.

Planning a Program

New students should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, they need to plan courses to satisfy all of the degree requirements while staying within the maximum number of units required for graduation. The Orientation program for new students takes them through a step-by-step process designed to insure they enroll in an effective program (see Orientation later in this section). Students who cannot attend Orientation should see their college or school adviser or, if they have selected a major, should make an appointment with their major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, students are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of Nursing and School of Theater, Film, and Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed.

As students work toward a bachelor's degree, they should be aware that in addition to unit requirements there are three types of requirements they must satisfy. The first type consists of Universitywide requirements that all undergraduates must satisfy; the rest vary depending on the major and the college or school that offers it.

- (1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;
- (2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);
- (3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. See the College and Schools section of the catalog for a description of the college or school requirements and the Curricula and Courses section for departmental requirements.

University Requirements

The University of California has established two requirements that all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is each student's responsibility to see that these requirements are fulfilled.

Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that students must satisfy before entering UCLA or during their first year in residence. They may meet this requirement by

- (1) Scoring 3, 4, or 5 on one of the College Board Advanced Placement Tests in English OR
- (2) Scoring 680 or better on the SAT II Subject Test in Writing OR
- (3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR
- (4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination during the month of May before they enrolled; others take an examination at UCLA early in their first term.

If students do not meet the requirement in one of the ways described above, Academic Senate regulations require them to enroll in either En-

English Composition A or 2 (determined by performance on the Subject A Examination) as early as possible during their first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. Students receiving a final grade of C– or less must repeat the course during their next term in residence. Satisfaction of the Subject A requirement is a requisite to English Composition 3 and all subsequent English courses.

English as a Second Language

The English as a Second Language Placement Examination (ESLPE) is required of all entering UCLA students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE. Undergraduate students may take the ESLPE once only. Unauthorized retakes of the examination result in an invalid examination score.

Nonnative-speaking **first-year students** who have taken the Subject A Examination are evaluated on the basis of their Subject A composition and informed if they need to take the ESLPE before the term in which they are to register. Failure to take the ESLPE results in a hold on student records. Results of the ESLPE and the Subject A Examination are reviewed to determine which track (Subject A or ESL) is a more appropriate placement. Students placed in the Subject A track may satisfy the Subject A requirement by following the guidelines listed above. If students are placed in the ESL track, they must complete the requirement by taking the designated courses through the ESL track.

Nonnative-speaking **transfer students** with grades of B or better in the English Composition 3 and English 4 equivalent courses at their transfer institution are exempt from the ESL requirement. Other students must take the ESLPE and may be required to take one or more ESL courses beginning in their first term in residence at UCLA to satisfy the ESL requirement.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. In the case of a nonpassing score on the examination, students are placed in one or more of the credit-bearing courses — English as a Second Language 33A, 33B, 33C, and 35. Students must begin taking courses during their first term in residence at UCLA and must complete the courses in sequence with grades of C or better (C– or a Passed grade is not acceptable). All units are applied toward graduation but cannot be applied toward general education requirements. Certain ESL courses fulfill major requisite requirements and provide upper division elective units.

American History and Institutions

The American History and Institutions requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

- (1) Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
- (2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:

Afro-American Studies M104A, M104B, M104C, M158A, M158B, M158C, M158E

Asian American Studies M153

Chicana and Chicano Studies M159A, M159B

Economics 183

English 80, 85, M104A, M104B, 115A, 170A, 170B, 171A, 171B, 172A, 172B, 173A, 173B, 173C, 174A, 174B, 174C

Geography 136

History 13A, 13B, 13C, 145A, 145B, 146, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A, 154B, 154C, 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E, M159A, M159B, 160A, 160B, 161, 162, 163, 164

Political Science 40, 114A, 114B, 140A, 140B, 140C, 142A, 143A, 143B, 145B, 145C, 146A

Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR

(3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR

(4) Scoring 500 or better on the SAT II Subject Test in American History OR

(5) Scoring 3, 4, or 5 on the College Board Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 151A, 151B, Political Science 145B, or 145C.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (310-825-3720).

Course Credit and Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C– through D– yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C+ or better in other courses.

In order to qualify for a bachelor's degree in any college or school at UCLA, students must earn at least a C (2.0) average in all courses taken at any University of California campus. Students who fail to maintain this level may be placed on academic probation or may become subject to dismissal.

Petitions

A petition is a form submitted to explain a student's need or desire to be excepted from any standard rule or regulation of the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over the particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between students, their college or school and, in some cases, the department chair, granting students an exception from the existing regulations.

Petitions are also used at UCLA to change the college/school or major, take more or fewer units than regulations permit, make changes to the Study List after URSA processing ends, or obtain credit by examination. In addition, students may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from the college/school or department; consult the *Schedule of Classes* for details about procedures.

Academic Probation

Students are placed on probation if their overall grade-point average falls between 1.5 and 1.99 or if they do not earn at least a 2.0 GPA in any one term. While they are on probation, they may not take any course on a Passed/Not Passed basis, and they may have to limit their Study List to 12 units.

Probation ends at the close of a regular term if students have attained a C (2.0) average for the term and a cumulative C average in all University

work. Students who do not end probation within two terms are subject to dismissal.

Academic Dismissal

Students are subject to dismissal from the University under any of the following conditions:

- (1) If their grade-point average in any one term is less than 1.5 OR
- (2) If they do not earn at least a C (2.0) average in any term when they are on probation OR
- (3) If they do not end probation within two terms.

If students are subject to dismissal, their transcripts carry that notation. They should make an appointment with their college or school counselor. Depending on the situation, they are given conditions for continuation or are dismissed from the University.

The college or school counselor can explain the conditions for readmission if students wish to return to the University after dismissal (see Readmission earlier in this section).

Progress toward the Bachelor's Degree

The undergraduate curriculum at UCLA is designed as a four-year curriculum. In order to graduate in four years, students need to complete at least 45 units during each academic year, not just the 36 required for "minimum progress." In the absence of special circumstances justifying slower progress, they should plan to complete 45 units per year, in an arrangement of courses appropriate to their needs. Students should consult their college or school counselor if they have questions or need advice.

Each college and school enforces minimum enrollment or minimum progress regulations. Students may be subject to disqualification for failing to meet minimum progress requirements. Check with a college or school counselor. Read the degree requirements section under each college and school for specific Study List limits. See the Academics section of this catalog for information on concurrent enrollment, credit by examination and credit from other institutions, and individual special studies (199) course limitations.

Undergraduate Research

Undergraduate Research Centers

The Undergraduate Research Centers (URC) assist students in the humanities and social sciences (1201A Campbell Hall, 310-825-2935) and in the life and physical sciences (2121 Life Sciences, 310-794-4227) by supporting scholarly, critical, and creative undergraduate research. The centers provide individual research counseling, house the Student Research Program (SRP) and the URC/AAP mentor program, and administer stipends and scholarships for undergraduate research. URC sponsors *Westwind*, *A Journal of Undergraduate Writing and Research* and *The Undergraduate Science Journal*, and organizes campuswide undergraduate research events such as the Humanities and Social Sciences Undergraduate Research Conference and Science Poster Day. In addition, URC coordinates the Summer Research Program for Undergraduate Research Scholars. Website: <http://www.college.ucla.edu/ugresearch/centers.html>.

Student Research Program

Housed in each Undergraduate Research Center, the Student Research Program (SRP) offers undergraduate students, especially lower division undergraduates, opportunities to become actively involved in the University research community. Working with faculty members on research projects, SRP students gain valuable research training and experience for advanced undergraduate work and preparation for graduate school. Students earn transcript notation after completing 60 to 100 hours of research (approximately six to 10 hours per week). There is no minimum grade-point average. Website: <http://www.college.ucla.edu/up/SRP/>.

Undergraduate Research Development Stipend

Undergraduate Research Development Stipend (URDS) awards are available on a competitive basis and by application for undergraduate students who have financial need and who want to participate in two terms of research through the Student Research Program. The commitment to the SRP project is for Winter and Spring Quarters, and stipends are set at \$1,000 per term. Applications are accepted during Fall Quarter only, and the deadline for submission of applications is late November. Website: <http://www.college.ucla.edu/up/SRP/srpstip.htm>.

Academic Research Courses

All academic departments offer undergraduate research courses that allow students to obtain academic credit for their research experiences. Students enrolled in the courses are often upper division students with Student Research Program experience. Department requirements for credit vary, but all departments require a research proposal to enroll in independent studies and a research report to receive credit when the research project is completed. Senior students working toward honors or highest honors in many majors must complete a two-term (or more) research project that culminates in an honors thesis. Arrangements must be made with a faculty mentor before students can register for the course. See the undergraduate adviser in the department of interest for more information.

Center for Academic and Research Excellence

The Center for Academic and Research Excellence (CARE), located in 2103 Life Sciences (<http://www.lifesci.ucla.edu/CARE/>), provides enrichment opportunities for students majoring in the sciences and mathematics who seek careers in scientific research and teaching and whose success through graduate training will increase the numbers of historically underrepresented individuals in academic and technological fields. CARE offers a variety of research opportunities during the academic year and summer that allows students the financial support to dedicate themselves to research. CARE programs, some sponsored by grants through federal agencies such as the National Institutes of Health (NIH) and the National Science Foundation (NSF), are for UCLA students as well as students from other universities.

Academic Resources

A broad range of options at UCLA can lend an added dimension to the undergraduate academic program. Other services and programs available to both graduate students and undergraduates are listed in the About UCLA section of this catalog.

Center for American Politics and Public Policy

The Center for American Politics and Public Policy (CAPPP) selects 25 to 30 undergraduates each fall and spring to participate in its Quarter in Washington, DC Program, which offers an exciting opportunity to combine UCLA courses with research and field experience in areas directly related to the policy-making process of the federal government. Students live in the Washington area for 12 weeks, dividing their time between courses taught by UC faculty and a part-time field placement position. They are registered as UCLA students and earn academic credit for the courses taken. Most of the courses emphasize politics and public policy. The core course carries political science credit. Efforts are also made to provide at least one course in a subject other than political science, such as art or history. All courses take advantage of Washington's unique resources for study and research.

CAPPP administrators help students find a field placement, which is central to a research seminar each student takes, in a Washington organization. Washington field placement locations have included the American Enterprise Institute, CNN, Carnegie Endowment for International Peace, General Accounting Office, Heritage Foundation, Japan Economic Institute, Justice Department, Office of National Drug Control Policy, Senator Edward Kennedy's Office, Treasury Department, and others. For further

information and applications, contact the CAPPP Office in 4250 Public Policy Building (310-206-3109, e-mail: cappp@issr.ucla.edu; <http://www.sscnet.ucla.edu/issr/cappp>).

Center for Experiential Education and Service Learning

The Center for Experiential Education and Service Learning (CEESL), formerly known as Field Studies Development, strives to enhance the quality of undergraduate education at UCLA by offering students the opportunity to participate in "experiential" learning. In courses supported by CEESL, students work outside the classroom at internships or public service positions and use their experiences as the basis for academic projects. In this way, students participate in their communities and gain insights into a range of professional fields, while applying and testing academic theories firsthand. CEESL is located in 160 Powell Library (310-825-7867; <http://www.oid.ucla.edu/Ceesl/>).

A variety of exciting field placements is available to students either in the form of internships or short-term projects such as community service work, local industry and business positions, and out-of-state opportunities. Students combine service experiences with research and writing to receive academic credit. For example, a CEESL student interning at a talent agency researched and wrote a paper on racial stereotypes in the acting profession; a student working with ESL students at an elementary school wrote a paper on the politics of English-only legislation and its impact on teaching; students volunteering at a health clinic researched and produced educational pamphlets on AIDS prevention in Russian and Armenian for recent immigrants in the community.

Supported Courses

Every term CEESL supports a variety of unique courses that incorporate community work with course readings, lectures, and discussions. These courses and seminars create opportunities for students to work with an instructor and to interact with their peers in a structured environment. Examples of such courses are Film and Television 192 and Community Health Sciences 195. Courses supported by CEESL are mostly designed for upper division students who have the necessary academic preparation to benefit from out-of-classroom learning opportunities. Lower division students may participate in courses that offer a portion of course credit for community service and fieldwork.

Upper division students looking for a more intensive service or field experience may enroll in immersion programs or in sequential courses. Immersion programs are structured around a block of courses with focus on the study and observation of a single topic (for example, social and cultural stigma). They require a full-time commitment for one or two terms, for which students earn 12 to 16 units per term. The **Developmental Disabilities Immersion Program (DDIP)** and **Sociology Immersion Quarter** (with changing themes) are two long-standing immersion programs. Sequential courses are taken consecutively for two or three terms. Students receive prefield training during the first term and conduct service and research in subsequent terms.

Students may also design individualized service-learning and internship projects to meet their specific academic, personal, and career goals. These are organized through individual studies courses (199 or 199I), in which a CEESL graduate student coordinator helps students develop suitable projects, secure field placements, and identify faculty sponsors.

Each term CEESL publishes a list of service and experience-based courses. Interested students should visit 160 Powell Library for the most recent schedule and speak with a coordinator for more information. The deadline for enrollment in CEESL supported courses is the end of the second week of the term.

Community Service and Internship Sites

All CEESL participants need to secure academically viable placement sites. Hundreds of local and national opportunities are listed in 160 Powell Library and at EXPO Internship and Study Abroad Services. Students may also initiate contact with a site on their own. However, all community

service and internship placements must be approved by a CEESL coordinator.

EXPO Internship and Study Abroad Services

The EXPO Internship and Study Abroad Services, a branch of the UCLA Career Center, offer access to a variety of off-campus learning experiences. Information on the programs or services below is available at 109 Kerckhoff Hall (310-825-0831) or at <http://www.saonet.ucla.edu/career/EXPO.htm>.

UCLA National Internship Program

More than 5,000 UCLA students have learned about the inner workings of government and business while serving in the internship program. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and media organizations in Sacramento, Washington, DC, and other U.S. cities. Stipends for students in the program can be arranged.

Los Angeles Internship Program

Local internships are available throughout the year in fields such as advertising, business, film, media, and politics.

International Opportunities

EXPO advises students on study, travel, volunteer, international internship, and short-term work opportunities outside the U.S., offering information on overseas study programs open to UCLA students. EXPO maintains a library of current materials related to study, travel, and other opportunities abroad. International Student Identity Cards and Youth Hostel Cards are also issued.

Freshman and Sophomore Programs

Collegium of University Teaching Fellows

The Collegium of University Teaching Fellows (CUTF) was initiated to provide a mechanism for UCLA's finest advanced graduate students to develop and teach lower division seminars in their area of expertise. These unique courses cover all areas, from the social sciences and humanities to the life and physical sciences. Undergraduate students have the chance to take courses that are at the cutting edge of a discipline and to experience the benefits of participating in a small-seminar environment. General education and honors credit is granted for most seminars, which are offered in Winter and Spring Quarters only (consult the quarterly *Schedule of Classes*). Enrollment is limited to allow students close contact with the instructors. For further information, contact the Office of Instructional Development in 160 Powell Library (310-825-5467; <http://www.oid.ucla.edu/Cutf/index.html>).

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA's promising freshmen and sophomores. Some upper division courses are also offered. For a complete description of this program, see the College of Letters and Science in the College and Schools section of this catalog.

Lower Division Seminars

Lower division seminars are departmentally sponsored and designed to provide freshmen and sophomores the opportunity to participate in a small classroom setting to enhance writing, verbal, and analytical skills. Many courses carry general education credit.

Professional Schools Seminar Program

The Professional Schools Seminar Program (PSSP) offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in Fall, Winter, and Spring Quarters (consult the quarterly *Schedule of Classes*). Enrollment is limited to allow students

close contact with professional school faculty members; lower division students are preferred. Students must satisfy the Subject A requirement before enrolling in these seminars. General education and honors credit is granted for most seminars. For further information, contact the PSSP Office in 160 Powell Library (310-825-5467; <http://www.oid.ucla.edu/Pssp/index.html>).

Individual Classes

Most departments offer the individual studies (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Students should consult their department or the departmental listings in this catalog for further information.

Individual Majors

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Refer to the Curricula and Courses section of this catalog for major requirements.

Reserve Officers' Training Corps

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs provide a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in the Curricula and Courses section of this catalog.

Teaching Careers

Although UCLA has no undergraduate major in education, students may prepare for a career in teaching and/or education on campus. Information is available from the following offices:

(1) **Education Studies Minor** Program Office, 1009 Moore Hall, for information regarding the minor which is described in detail in the Curricula and Courses section of this catalog.

(2) College of Letters and Science Counseling Service, A316 Murphy Hall, for information regarding the **Diversified Liberal Arts Program** which is described in detail in the Curricula and Courses section of this catalog.

(3) UCLA Center X (1041 Moore Hall, <http://www.gseis.ucla.edu/x/x.html>) for information about the **Teacher Education Program** which offers both a Master of Education (M.Ed.) degree and a Cross-Cultural Language and Academic Development (CLAD) or Bilingual Cross-Cultural Language and Academic Development (BCLAD) Credential in a combined, full-time two-year program.

(4) The Department of Mathematics for details on the **Mathematics/Education Program** which is jointly sponsored by the Department of Mathematics and UCLA Center X of the Graduate School of Education and Information Studies. In their junior year, mathematics majors who have a grade-point average of 3.0 or better and a firm commitment to teaching in urban public schools begin to take introductory education courses. In the senior year, while completing the bachelor's degree in mathematics, students begin teacher-education courses. Students earn a master's in education and a teaching credential in one academic year and two summers beyond the baccalaureate. A similar program for science majors is

planned for Fall Quarter 1999; contact Dr. Arlene Russell, 1037A Young Hall, for details.

(5) UCLA Career Center, for information on employment opportunities in teaching and education.

(6) UCLA Graduate School of Education and Information Studies, Office of Student Services, 1009 Moore Hall, for information on master's and doctoral degree programs in education and current information on requirements for various instructional credentials.

Advising and Academic Assistance

UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. Students need only to seek it out. This section introduces them to the many kinds of assistance available to undergraduates. Refer to the section on Student Services in the About UCLA section of this catalog for other helpful programs.

College and School Advisers

Each college/school and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help students plan their academic program, monitor their progress toward the bachelor's degree, provide information about college/school and major requirements and requisites, and assist them with academic problems, improving study habits, and program planning. See the *Schedule of Classes* for a listing of counselors and advisers.

Counseling Assistants

Counseling assistants (CAs) in the College of Letters and Science are graduate students who help lower division students with course selection, major requirements, and graduate school information. Many CAs have served as teaching assistants (TAs) and can give unique perspectives on courses and faculty, in addition to academic advice and referrals to student support services. Appointments can be made at Window 1, A316 Murphy Hall (<http://www.college.ucla.edu/up/ca/>). CAs are also available on a walk-in basis on weekday afternoons in Covell Commons and in selected departments across campus.

ASK Peer Counselors

The ASK Peer Counseling Program is an extension of the College of Letters and Science Counseling Service. ASK peer counselors are undergraduate students in the college trained to provide counseling and respond to students' immediate concerns and questions in convenient walk-up settings. No appointments are required. Counselors can provide most petitions, give directions, make referrals, and bridge the gap between campus life and the college office in Murphy Hall.

Students can find ASK counselors weekdays when school is in session at these campus locations: Campbell Hall (southwest corner), Royce quad, and Powell Library (southeast corner) from 10 a.m. to 2 p.m.; the ASK Web Lab, A316C Murphy Hall, from 10 a.m. to 3 p.m.; and adjacent to 1105 Murphy Hall from 10 a.m. to 4 p.m. Students may also e-mail questions to ASK@hup.ucla.edu.

Orientation

Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation students work in small groups with peer counselors and gain insight into necessary academic skills, learn how to plan and construct their academic program, and become familiar with the educational opportunities, student services,

and facilities available at UCLA. Individual counseling sessions help students adjust to University life and fulfill the advising requirements of their college or school. Sessions for family members are also offered.

During the summer, Orientation offers three-day, two-night residence hall live-in programs for first-year students and one-day programs for transfer students. Prior to Winter and Spring Quarters, a one-day program is offered. There is a fee for participation. For more information, contact the Orientation Office in 201 Covell Commons (310-206-6685; <http://www.college.ucla.edu/up/ORIENTATION/>).

College Tutorial Services

College Composition and ESL Tutorials

The College Composition Tutoring Laboratory (<http://www.college.ucla.edu/up/CT/>), in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English Composition A, 2, and 3 and to students writing papers for other UCLA courses. The laboratory is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process — from generating and organizing ideas to polishing final drafts.

The College ESL Tutoring Laboratory (<http://www.college.ucla.edu/up/CT/ESL.htm>) assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. Most of the ESL tutors are graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Laboratories are located in 228 Covell Commons and offer free individual tutoring by appointment. For tutoring appointments or further information, call (310) 206-1491.

College Mathematics/Sciences Tutorials

The College Mathematics/Sciences Tutorials, located in 230 Covell Commons, provide an organized by-appointment tutorial program for most introductory courses in biology, chemistry, mathematics, and physics. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the term; early registration is strongly advised. Drop-in tutoring is also offered. Schedules vary each term. For further information, call (310) 206-6965 or 825-7305 or visit http://www.college.ucla.edu/up/CT/math_sci.htm.

College Tutorials for Student Athletes

The College Tutorials for Student Athletes (<http://www.college.ucla.edu/up/CT/athletic.htm>) provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in other tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located in 209 Covell Commons. For appointments and further information, call (310) 825-8699.

Academic Advancement Program

The Academic Advancement Program (AAP), a multiracial program, has a threefold mission: (1) to ensure the academic success, retention, and graduation of its more than 6,500 students, (2) to increase the numbers of its students entering graduate and professional schools, and (3) to develop the academic, political, scientific, economic, and community leadership necessary to transform society in the twenty-first century. Programs are proactive rather than reactive, comprehensive rather than fragmented, and oriented toward furthering the long-term academic and per-

sonal growth of AAP students rather than merely solving immediate problems.

AAP encourages and promotes academic achievement and excellence by providing students with tutoring, academic, personal, and career counseling, graduate mentoring, scholarships, research opportunities and stipends, opportunities to participate in innovative science programs, and a computer laboratory. Freshman and Transfer Summer Programs provide an academic transition into the University for entering students.

Students are eligible for AAP if their academic profiles and personal backgrounds may impact their University experience and their retention and graduation from UCLA. Students are also eligible if they are part of any federally funded program that requires counseling, tutoring, or mentoring. For more information, contact the AAP Office in 1232 Campbell Hall (310-206-1550; <http://www.humnet.ucla.edu/aap/>).

Freshman and Transfer Summer Programs

Two six-week academic summer programs are sponsored by AAP, the Freshman Summer Program (FSP) and the Transfer Summer Program (TSP). Both are designed to introduce students to life at UCLA and to prepare students to succeed at UCLA by exposing them to the rigor and demands of academic life and the wide range of campus programs, services, and learning resources available to undergraduates.

Students enroll in two University courses that meet UCLA requirements for graduation and receive close personal attention, in either small groups or individual sessions, from teaching assistants and tutors. They are encouraged to live on campus so that they can participate in the many cultural and social events, interact with students of diverse backgrounds, build a network of friends, and broaden their life experiences and world outlook. For more information, call (310) 206-1571.

Counseling Services

AAP counselors encourage students to explore their talents and abilities, follow their interests and their passions, believe in themselves, set the highest standards for themselves, and aspire to academic and personal excellence. Counselors, including two science counselors, work with students to plan their academic programs, monitor progress toward the bachelor's degree, provide information about requirements and requisites for different majors, and discuss graduate school and career options.

AAP peer counselors are upper division AAP students who work with entering students and assist them in making the transition to the University. They provide a student perspective on life at UCLA.

Program Leading to Undergraduate Success

The Program Leading to Undergraduate Success (PLUS), a federally funded component of AAP, provides intensive personalized services, including counseling, peer counseling, tutoring, workshops, and social and cultural programs for first-generation college, low-income, UCLA freshmen. Application information is available at 1229 Campbell Hall (310-825-9276, fax 310-825-1312; <http://www.geocities.com/~plus>).

Tutorial Services

Providing tutorial services for more than 450 courses, AAP aims to foster excellence, not remediation. Tutoring is done primarily by AAP undergraduates who are themselves successful upper division students. AAP tutors provide students with the intellectual challenge, encouragement, and personal support they need to recognize their own authority as thinkers and learners. The majority of AAP tutoring is done in small groups, which fosters discussion and allows students to listen to, grapple with, and articulate new and different perspectives.

Graduate Mentor Program

The AAP Graduate Mentor Program (GMP) is grounded in the belief that it is never too early for students to prepare for graduate school and that it is never too late to decide to do so. Graduate student mentors help AAP students prepare for graduate school. The primary goal of GMP is to in-

crease the number of AAP students who enroll in graduate or professional schools.

Instructional Media

The **Instructional Media Laboratory** provides individual student access to course- or textbook-related audio, interactive, and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. The laboratory is located in 270 Powell Library (310-206-1211; <http://www.oid.ucla.edu/lmlab/>).

The **Instructional Media Library** is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community and beyond. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. The library is located in 46 Powell Library (310-825-0755; <http://www.oid.ucla.edu/lmlib/>).

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean's Honors List and Provost's Honors

The School of the Arts and Architecture, School of Engineering and Applied Science, and School of Theater, Film, and Television award Dean's Honors to deserving students each term, while the College of Letters and Science awards Provost's Honors each term. The School of Nursing awards Dean's Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult the college or school for further information.

Honors at Graduation

The college or school awards honors according to overall GPA at graduation. **To be eligible students must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade.**

The levels of honors are *summa cum laude*, *magna cum laude*, and *cum laude*. Specific requirements vary for each level and are detailed in the College and Schools section of this catalog. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

Departmental Honors

In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on the recommendation of a student's major department, based on successful completion of a departmental honors program. Students should consult their department for its requirements.

Departmental Scholar Program

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as UCLA Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. Students interested in becoming Departmental Scholars should consult their departments well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

Alpha Lambda Delta and Phi Eta Sigma

Membership in the national freshman honor societies is based solely on academic achievement during the freshman year. To be eligible students must have a 3.5 grade-point average with 12 graded University of California units in the first term of their freshman year, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871; <http://www.studentgroups.ucla.edu/aldpes/>).

Golden Key

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates and graduating seniors, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871; <http://www.studentgroups.ucla.edu/Goldenkey/>).

Mortar Board

Mortar Board (<http://www.studentgroups.ucla.edu/mboard/>) is a national honor society for college seniors which recognizes outstanding and continual scholarship, leadership, and service to the campus community. To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available from the Center for Student Programming (105 Kerckhoff Hall, 310-206-5523) and the Office of the Dean of Students (1206 Murphy Hall, 310-825-3871) early in Winter Quarter and are due by mid-February. Approximately 40 members are selected each spring by the outgoing chapter.

Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, liberal arts, and sciences, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do **not** apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum grade-point average considered is 3.67 (for 140 or more UC units); the minimum number of UC units considered is 90 (students at the 90-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. Students who are elected are notified by mail. For more information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall (310-206-9667; <http://www.college.ucla.edu/up/honors/pbk.htm>).

Outstanding Senior Award

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted during Fall Quarter and close in late January. Awards are presented at the annual UCLA Alumni Association Awards Ceremony in May. Award recipients receive senior class rings and life memberships in the Alumni Association. For more information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza (310-206-0523; <http://www.alumni.ucla.edu/>).

Graduate Study

Graduate Study

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to — the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline all provide an extraordinary range of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, education is enriched by the several hundred postdoctoral fellows and visiting scholars from other universities who engage in research and, in some instances, teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration, is intended to develop mastery of a field and prepare students for the practice of a profession. The doctoral degree (Ph.D., Ed.D., and so forth) is designed to prepare students for creative activity and original research, often in association with college or university teaching.

Administration

Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate and its Graduate Council for master's, doctoral, and graduate professional degree programs other than the professional degree programs in law, medicine, and dentistry. It oversees graduate recruitment and admissions (including the recruitment of a diverse student body), fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — academic affairs.

Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's commitment to the philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

Graduate Adviser

At matriculation, a graduate student usually selects or is assigned a graduate adviser who assists in program planning and completion of degree requirements. Sometimes this role is temporarily assumed by a faculty adviser assigned to the program as a whole. When the student's master's or doctoral committee is established, the chair of the committee assumes the adviser's role.

Graduate Students Association

The Graduate Students Association (GSA) at UCLA shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see Student Activities in the About UCLA section of this catalog or visit http://gsa.ucla.edu/~gsa/frame_main.html.

Graduate Admission

Graduate Admissions/Student and Academic Affairs
1255 Murphy Hall
(310) 825-1711

<http://www.gdnet.ucla.edu/asis/infoserv/gdservcs.htm>

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a university or university-level institution. If their examinations have been graded Excellent, Very Good, Good, and Pass, students must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, and so forth, or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, *should not apply for graduate admission*. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, and so forth, also do not qualify for graduate admission unless they also hold recognized university-level degrees or titles.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's schools, college, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Applicants are encouraged to apply electronically using the online application available at <http://www.gdnet.ucla.edu>. The paper *Application for Graduate Admission* may be obtained in person or by mail from the prospective school or department.

Applications are accepted Fall Quarter, although some departments also accept applications for Winter and Spring Quarters. Further information is provided in this catalog's departmental listings and in the application brochure. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

When to Apply

Most departments and schools have deadlines in November and December for the following Fall Quarter. Consult the *Application for Graduate Admission* for specific deadlines for each major. Applications may be considered if received after a program's stated deadline, provided the enrollment limits have not been exceeded.

Supporting papers and materials to be submitted, including official transcripts of record and a \$40 nonrefundable application fee, are specified in the application brochure and at <http://www.gdnet.ucla.edu>. Submitted materials are not returnable.

Graduate Record Examination

Applicants who apply for admission to a department or school that requires Graduate Record Examination (GRE) scores should arrange to take the examination no later than December so scores arrive on time.

GRE scores should be sent directly to the prospective department and not to the Graduate Division.

GRE applications and information about both paper and computer-based testing are available from offices of the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000. For information on GRE Fee Waivers, write to the associate program director at the above address.

Letters of Recommendation

Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze students' abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application brochure and at <http://www.gdnet.ucla.edu>.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all **graduate students** and all **international students** on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement under Graduate Registration later in this section.

International Applicants

International applicants should have an academic degree or professional title earned at a university and are evaluated on the basis of grades (marks) and class or rank achieved. Students should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application brochure.

Proficiency in English

International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction are exempt from both the **Test of English as a Foreign Language (TOEFL)** and the UCLA English as a Second Language Placement Examination (ESLPE). *All other applicants* must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from TOEFL/TSE Publications, P.O. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at <http://www.toefl.org>.

Students whose native language is not English are required to take the **UCLA English as a Second Language Placement Examination (ESLPE)** in addition to the TOEFL, before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Those graduate students who believe that their initial ESLPE score is not reflective of their English language proficiency due to having recently arrived in the U.S. may sit for the examination a second time in the subsequent term only (retaking the examination in the same term is not counted as a valid result). In cases where students retake the examination in their second term of study, the most recent examination score is held to be

valid. Unauthorized retakes of the examination result in an invalid examination score. Depending on the ESLPE results, students may be required to complete one or more courses in the English as a Second Language 33 series, beginning in their first term in residence at UCLA. These courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. Students should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if they are required to take any English as a second language courses. If they do not achieve a minimum score on the ESLPE, their admission is deferred until they have acquired the necessary proficiency in English. Neither the TOEFL nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

International students or permanent residents who are not native speakers of English, before they are allowed to serve as teaching assistants, must take and pass either the **Test of Spoken English (TSE)** offered at TOEFL Centers in their home countries or the **SPEAK** examination (institutional version of the TSE) on arrival at UCLA. They can "pass" with a score of 50 or "pass conditionally" with a score of 45 if they also are enrolled in English as a Second Language 32 or 34 at UCLA. Students should consult with their departments to determine if they require a higher score. If students are to serve as teaching assistants during their first term at UCLA, it is very important that they either take and pass the TSE before arrival, or arrive on campus early enough to take the SPEAK examination before instruction begins. UCLA's Office of Instructional Development (OID) conducts the SPEAK testing. Students should contact either their departments or the TA Training Program at (310) 206-2622 or 825-7867 or at <http://www.oid.ucla.edu/TATP/speak.html> for more information and the SPEAK examination schedule.

No Degree Objective

UCLA has no special limited or unclassified categories of graduate admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master's degree who wish some refresher study, or international students on a year's stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs, and the academic program must agree to accept the student for the no degree objective (NDO) status. All admission to no degree objective programs, except for students in official Education Abroad Programs, must be specially approved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see Concurrent and Articulated Degree Programs later in this section). Students who are applying for a second academic degree at the same level or lower than the one they already hold are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. Students who wish to apply Summer Sessions courses to their subsequent graduate program should consult in advance with their departmental adviser. This is also true if they have been readmitted to graduate standing and wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 1147 Murphy Hall. Also see Academic Residence and Transfer of Credit later in this section.

If students take Summer Sessions courses following the award of their bachelor's degree, the grades do not appear on the undergraduate tran-

script (they are included on a separate transcript). After students are accepted by the Graduate Division, Summer Sessions grades are included on the graduate transcript and computed in the grade-point average.

Readmission

Students who are granted a formal leave of absence do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term through cancellation or withdrawal, must compete for readmission with new applicants.

Students who have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence) must file an *Application for Graduate Admission*. Forms are available from the departments and should be submitted to Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, UCLA, Box 951428, Los Angeles, CA 90095-1428. The following materials must accompany the application:

- (1) A check or money order for \$40 (nonrefundable) made payable to The Regents of the University of California.
- (2) The Graduate Petition for Change of Major, if appropriate. (Students who are reapplying in a new major should request this form along with the *Application for Graduate Admission*.) The UCLA graduate transcript must also be submitted.
- (3) Transcripts of all academic work completed since registration at UCLA as a graduate student.

Admission to the Schools of Dentistry, Law, and Medicine

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.

Special Programs and Training

UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences

The life and basic biomedical sciences departments at UCLA offer a mechanism for a combined recruitment, admission, and first-year program that provides Ph.D. students in the molecular, cellular, and integrative life sciences with maximal choice and flexibility in selecting a research specialization. Through UCLA ACCESS, students are able to select research projects from faculty mentors according to changing perceptions, interests, and goals without regard to traditional departmental boundaries. The first year of each degree program has a common curriculum and advising structure.

The following Ph.D. programs use UCLA ACCESS to recruit and admit students: Biochemistry and Molecular Biology, Microbiology and Molecular Genetics, Molecular Biology, Molecular, Cell, and Developmental Biology, and Physiological Science in the College of Letters and Science; Anatomy and Cell Biology, Biological Chemistry, Experimental Pathology, Human Genetics Microbiology and Immunology, Pharmacology, and Physiology in the School of Medicine. For specific information, refer to the individual department listings in the Curricula and Courses section of this catalog.

Admission

Applicants apply to UCLA ACCESS rather than to an individual department and must have completed an undergraduate major in a life or physical sciences discipline with superior scholastic achievement. Students should have preparation in physics, biology, and chemistry, as well as specialized courses within the major which may include cell biology, neu-

robiology, immunology, structural or computational biology, microbiology, virology, plant molecular biology, developmental biology, biochemistry, or molecular biology. In certain cases, background deficiencies may be remedied concurrently with graduate studies if recommended by the UCLA ACCESS steering committee. In addition to the UCLA *Application for Graduate Admission*, students should submit their scores on the Graduate Record Examination (GRE) General Test (Subject Test is optional) and three letters of recommendation from individuals who can provide direct knowledge of their academic record and potential for superior achievement in independent research. Admission is limited to Fall Quarter.

Applications and further information are available from the Program Coordinator, UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, or at <http://www.uclaaccess.ucla.edu/NewLookFrame.html>.

First-Year Course Requirements

Individual requirements vary based on background and scientific interest and are determined by the steering committee. In general a formal course of study consists of three lecture courses, three laboratory rotations, and three seminar courses. In addition, participation is required in related activities on an informal basis.

Three survey **lecture courses** to be selected from a list of approved courses maintained in the program office are required (one in molecular biology, one in cellular biology, and an elective in one of several areas).

Students must enroll in one **seminar course** each term that includes reading and reporting on current research literature.

During their first nine months in residence, students rotate for one term each through three **laboratories** selected from the UCLA ACCESS faculty list. They enroll in a 500-level course for six units of credit for each rotation.

An **additional course** in ethics (Microbiology and Molecular Genetics CM234) is required.

All departments participating in UCLA ACCESS consider **teaching experience** to be an integral part of the graduate program. Students are required to complete two terms of teaching beginning in their second year. They are also required to complete a course on approaches and methods for successful teaching.

Transfer to the Degree-Granting Program

Students are admitted to UCLA graduate standing through UCLA ACCESS on a provisional basis for up to four terms. At the end of Spring Quarter, academic progress is evaluated by the steering committee. Students who receive a satisfactory evaluation select a faculty mentor as their doctoral committee chair. With concurrence of the mentor and the degree-granting program, students then transfer from UCLA ACCESS to that program for the remainder of their Ph.D. studies.

In the event students are unable to identify a suitable mentor and program by the end of their first year, one additional laboratory rotation approved by the steering committee is available during the summer quarter. Students who are unable to arrange for a laboratory after four rotations are recommended for release from their provisional graduate standing.

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses that would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

Students who have completed at least one term of graduate study at UCLA, are in good academic standing, and have obtained the necessary approvals may enroll in a 501 course through their department. When they have completed the course at USC, their grade is forwarded to UCLA to

be recorded on the transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the minimum five-graduate-course requirement. Applications, available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, should be completed before the start of the term in which the course is offered.

UC Intercampus Exchange Program

Students who have completed one term of graduate study at any campus of the University and are in good academic standing may attend another campus as an Intercampus Exchange Graduate Student with the approval of their department chair, the chair of the department or group in which they wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although students are considered to be in residence at their home campus, as an Intercampus Exchange Student they have library, health service, and recreation center privileges at the host campus. Grades are transferred to their home campus and entered on the official record.

Applications are available from Graduate Admissions/Student and Academic Affairs and should be filed at least four weeks before the beginning of the term in which students expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the **Education Abroad Program** described in the About UCLA section of this catalog.

Postdoctoral and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance.

A postdoctoral scholar is one who (1) has been awarded a doctoral degree or the foreign equivalent where at least three years of undergraduate study are requisite to admission to the graduate program, (2) has been awarded a fellowship, traineeship, or equivalent support (including academic appointments such as postgraduate researcher) for studies at the postdoctoral level, and (3) is pursuing a program of research and training under the direction of a faculty member with the approval of the department or research unit, and by the dean of the Graduate Division. Enrollment as a postdoctoral scholar is normally for a period of one to three years and is limited to a period not to exceed five years, including time spent in postdoctoral training at other institutions. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to visiting scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA, working with a colleague for a limited time, normally no more than one year. Visiting scholars are distinguished from postdoctoral scholars in that they are not in training under faculty supervision but rather are themselves peers of our faculty, visiting from other universities and institutions where they hold appointments. Visiting scholars ordinarily have adequate support funds from sources outside the University.

Further information on postdoctoral and visiting scholars is available from Graduate Student Support, 1228 Murphy Hall.

Graduate Registration

Enrollment and Degree Services
1113 Murphy Hall
(310) 825-1091
<http://www.registrar.ucla.edu>

Registration consists of paying fees and enrolling in classes. The UCLA Student Billing Statement (BAR), mailed monthly to students' UCLA mail-

ing addresses by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed online or by telephone through URSA (University Records System Access). Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Paying Fees

Details on **fee payment, enrollment procedures, and deadlines** are in the quarterly *Schedule of Classes*, available for purchase at the UCLA Store several weeks before the beginning of each term. To obtain a copy, write to UCLA Store, Attn: Mail Out, 308 Westwood Plaza, Los Angeles, CA 90024-1645, or call (310) 825-6064. The *Schedule of Classes* is available at <http://www.registrar.ucla.edu/schedule/>.

Eligible students must pay fees by the applicable deadlines. Payments may be mailed, paid by credit card through URSA OnLine, or deposited in the UCLA Administrative Main Cashier's Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and are assessed an additional \$50 late payment fee.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all **graduate students** and all **international students** on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment.

The following plans are NOT acceptable and do NOT fulfill the University requirement for adequate medical/health insurance: (1) travel insurance plans of any kind, (2) any plans purchased outside the U.S. and/or not issued by a U.S. company, (3) reimbursement arrangements or vouchers, including those from home governments and consulates in the U.S.

UCLA provides a student Medical Insurance Plan (MIP) that fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the BAR statement for all graduate and international students. This is the only way that MIP can be purchased.

Students who do not purchase MIP must have an adequate private medical insurance plan with all of the following minimum benefits:

- (1) A *minimum* of \$100,000 in lifetime benefits.
- (2) Coverage of at least 75 percent of medical expenses, with a deductible of \$500 or less and a copayment of 20 percent or less.
- (3) A policy issued in the U.S. by a U.S. carrier.
- (4) Inclusion of Medical Evacuation and Repatriation benefits for those on J-1 or J-2 visas.

If the private medical insurance plan does not meet all of the above requirements, students must purchase MIP.

Students who decide to waive out of MIP because they have adequate private medical insurance must complete the Medical Insurance Waiver Request included each term with the BAR statement and submit the form when they pay their registration fees. Students whose fees are paid by financial aid, graduate fellowship funds, or other sources must submit their MIP waiver by the published registration deadline each term. Students may waive out of MIP at <http://www.saonet.ucla.edu/health/insuranc/mip-forms/auth.html>; the online waiver deadline is two days prior to the official fee payment deadline published in the quarterly *Schedule of Classes* calendar.

This information serves as notice of the mandatory medical insurance requirement; it is each student's responsibility to obtain the necessary information before they register. Changes and exceptions requested after students have registered cannot be honored. MIP cancellation requests must be made to the Ashe Student Health and Wellness Center Insurance Office within 10 days from the MIP effective date.

For further information on MIP or adequate medical insurance requirements, call the Ashe Center Insurance Office at (310) 825-4073, option 4.

Enrolling in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from the school or college advisers, students can assemble a program of courses.

University Records System Access Enrollment

Through **University Records System Access (URSA)**, UCLA students enroll in classes and obtain academic, financial, and personal information from their University records. URSA can be accessed either through **URSA OnLine** at <http://www.ursa.ucla.edu/> or through **URSA Telephone** at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

The easiest way for most students to enroll is through URSA OnLine, which also provides enrollment appointment times. The site's intuitive interface makes it easy to view course descriptions and times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a printout of the Study List. Students can also check their BAR account, make online credit card payments, and obtain refund information.

By using URSA Telephone, students can obtain enrollment appointment times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a reading of their Study List, which includes the day, time, and location of classes, examination codes, and instructor names. Students may also verify that their registration fees have been paid and that they have no outstanding holds, factors that could effect their ability to enroll. In addition, they may check financial aid information.

In-Person Enrollment

For classes that require written approval or specialized processing, students may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists

At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes "official," and all wait lists are eliminated. Students should obtain a reading of their Study List through URSA after all enrollment transactions. **Students are responsible for all courses and the grading basis as listed on URSA, and they cannot receive credit for courses not listed.** Errors or omissions should be corrected before the academic dean's deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

Beginning with the third week of instruction, changes to the Official Study List can be made with a fee via URSA through the end of the last day of instruction. Consult the *Schedule of Classes* for full enrollment details.

Change of Major

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filed with Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but students should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program

Three courses (or 12 units) per term are considered the normal enrollment for graduate students and are required for students not in doctoral candidacy to be counted for full-time standing in the University's official enrollment records. Therefore, students are directed by their departments to enroll full time whenever possible.

Throughout their appointments, **teaching assistants** are required to be registered and enrolled in at least eight quarter units and **graduate student researchers** in at least 12 quarter units. Those assistants/researchers who take a leave of absence, or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level for graduate student researchers may be counted in reaching the eight- or 12-unit load.

Graduate students holding fellowships must be enrolled in at least eight units, both before and after advancement to candidacy. The eight-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Department of Veterans Affairs regulations is available from the Veterans Affairs coordinator, 1113 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three terms of each academic year, including the term in which their degrees or certificates are to be awarded. Students who are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see below) are exempt from this requirement. They must be registered in order to receive financial aid, use University facilities, or take any University examination except the master's comprehensive or doctoral final oral examination (defense of the dissertation).

Students who fail to register or to file for an official leave of absence by the end of the second week of instruction are assumed to have withdrawn from UCLA. They then have to reapply and compete for readmission with all other graduate applicants if they wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a term may pay half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from the departments.

Employment and Degree Progress

Policy governing the employment of graduate students considers them primarily as students rather than employees and emphasizes their need to make timely progress toward their degree. Students are limited to a maximum of 12 quarters of appointment in academic apprentice teaching titles and a maximum of 18 quarters in a combination of academic apprentice teaching and research titles. Appointment to any title limits employment to 50 percent time during the academic year.

University policy prohibits the employment of graduate students in academic titles. This policy was established to ensure that students (1) make timely progress toward their degree, (2) not be subject to the conflicting roles of student and faculty member, and (3) not be involved in the instruction of their peers.

Registration in the Final Term for Award of the Degree

(1) Students must register in the final term in which the degree is to be conferred if they are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, (d) a doctoral student and were not registered the term immediately preceding the term in which their dissertation is filed, or (e) receiving University funds in the form of a fellowship or appointment as a teaching assistant, reader, or graduate student researcher. Students who were not continuously registered or on leave of absence and are required to register to receive their degree must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in the final term, students may be eligible to pay the filing fee instead of registering (see below).

(3) Students who were registered in the preceding term and have completed all degree requirements, including final examinations and filing the thesis/ dissertation, during the interval between terms and before the first

day of instruction are not required to register (or pay the filing fee) to receive their degree at the end of the following term.

Filing Fee

Students who have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master's comprehensive or doctoral final oral examination may be eligible to pay a filing fee of half the registration fee instead of registering and paying all required fees. Applications are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final term, consult *Standards and Procedures for Graduate Study at UCLA*, available in 1255 Murphy Hall or in individual departments.

Health Assessment and Evaluation

New students enrolling in the School of Dentistry, Education and Information Studies, Medicine, Nursing, or Public Policy and Social Research must complete and return to the Ashe Student Health and Wellness Center the Health Evaluation forms provided by their departments. For clearance information, call (310) 794-7896.

Graduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA varies according to academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay annual tuition in addition to registration fees, as published in the quarterly *Schedule of Classes* and online at <http://www.registrar.ucla.edu/fees/>. For a full definition of residence and nonresidence, see the Appendix.

Fees are current as of publication but are subject to change without notice by The Regents. See <http://www.registrar.ucla.edu/fees/> for updates.

Annual Expenses for 1999-00	
University registration fee	\$ 713.00
Educational fee	3,086.00
Ackerman Student Union fee	51.00
Graduate Students Association fee	16.50
Wooden Recreation Center fee	36.00
Mandatory medical insurance	579.00
Seismic fee for Ackerman/Kerckhoff	113.00
Total for California residents	\$ 4,594.50
Nonresident tuition fee	9,384.00
Total for nonresidents	\$13,978.50

Students in the Schools of Dentistry, Law, Management M.B.A. program, Medicine, Nursing, and Theater, Film, and Television should refer to the quarterly *Schedule of Classes* for explanation of additional fees.

Other Fees

Miscellaneous fees charged to UCLA graduate students include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); \$50 for advancement to doctoral candidacy; a \$20 late fee if the BAR statement has an unpaid balance in excess of \$25; and \$5 or less for most petitions and other special requests. A \$60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. A complete list of fees may be found in the *Schedule of Classes*.

Reduced Nonresident Tuition

The annual nonresident tuition fee for graduate doctoral students who have advanced to candidacy is reduced by 75 percent. Doctoral students may receive this reduced nonresident tuition rate for a maximum of three years. After three years, the full nonresident rate is assessed.

Fee Refunds

Students who formally withdraw from the University or take an approved leave of absence may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in the Academics section of this catalog or consult the *Schedule of Classes* for policy details and specific refund dates for each term.

Estimated Annual Budgets for Graduate California Residents

Expenses cover the three regular session terms of the 1999-00 academic year and do not include Summer Sessions. Students admitted in fall 1999 to the D.D.S., J.D., M.B.A., M.S.N., M.F.A. in Theater, M.F.A. in Film and Television, and M.D. degree programs must add the professional school fee (varies by school), and nonresidents must add \$9,384 annual tuition to their total expenses for an accurate estimate. Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from the health professions counselor. The budgets are designed to serve as a guide and are subject to change.

	Commuter from Home	Off-Campus Housing
University fees	\$ 4,594.00	\$ 4,594.00
Books and supplies	1,221.00	1,221.00
Food and rent	2,475.00	9,009.00
Transportation	2,097.00	1,917.00
Personal	1,899.00	1935.00
Total Budget	\$12,286.00	\$18,676.00

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive, (310) 825-4491.

Financial Support

Graduate Student Support
1228 Murphy Hall
(310) 825-1025
<http://www.gdnet.ucla.edu/asis/infoserv/gdservcs.htm>

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

Information on available funding for entering students is included in the *Application for Graduate Admission*. Readmitted students should also refer

quest the *Application for Graduate Admission*, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by **January 8**. (Some departments have earlier deadlines; consult the application brochure for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by the Graduate Division. Students should contact their department for more detailed information.

Fellowships

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. **Teaching assistantships** provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) **Graduate student researcher appointments** give students experience working on faculty-supervised research projects.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and financial resources. Financial aid applicants must file the Free Application for Federal Student Aid (FAFSA).

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid "package" which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.

Requirements for Graduate Degrees

Graduate students earn a master's or doctoral degree by distinguished achievement in advanced study and research. In addition to coursework, there are various means of evaluating achievement in study, including qualifying and comprehensive examinations and various kinds of laboratory and fieldwork. Achievement in research is primarily assessed through evaluation of the master's thesis or doctoral dissertation. Professional master's and doctoral degree programs require professional training. Demonstration of achievement in these fields may take various forms, including fieldwork, completion of projects, and training that involves professional licensure.

University Minimum Standards

The requirements described here for master's and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master's degree. Each department also sets ad-

ditional requirements for doctoral degrees according to the demands of the field of study. Students are advised to consult *Program Requirements for UCLA Graduate Degrees* at <http://www.gdnet.ucla.edu> and the departmental graduate adviser for details. Policies and regulations are outlined in *Standards and Procedures for Graduate Study*, which is available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall or at <http://www.gdnet.ucla.edu>.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless students are UCLA Departmental Scholars (see Academic Excellence in the Undergraduate Study section of this catalog). Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless students are enrolled in a Graduate Council-approved concurrent degree program (see Concurrent and Articulated Degree Programs later in this section).

Transfer of Credit from Within the University

Students may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

Transfer of Credit from Outside the University

With approval of the dean of the Graduate Division and the major department, courses completed with grades of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — for example, 12 quarter units \times .666 = 7.99 or 8 semester units.)

Transfer of Credit from Summer Sessions

Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. Students should consult their departmental graduate adviser about applying Summer Sessions courses to their graduate program.

Transfer of Credit from UCLA Extension

Extension courses can be applied only if they are **concurrent** courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with grades of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If the master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing the grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Academic Residence

Master's Degree

The minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

Doctoral Degree

The minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If students earned a master's degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (four units) during a term.

Students may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If their program has a language requirement, students should fulfill it either before they begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that they can acquire broad knowledge in their field of study and keep abreast of foreign developments in the field. Students are urged to complete language requirements as early as possible in their graduate career. If the department requires two or more foreign languages, students must complete at least one before the University Oral Qualifying Examination (unless the department requires that both be completed before the examination).

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not the native language.

For further details on foreign language requirements, consult the departmental graduate adviser.

Program of Study and Scholarship

Master's Degree

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses.

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and students must consult with their department to determine the plan for meeting their degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy, students under Plan I must submit a thesis reporting on results of their original investigation of a problem.

While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members' eligibility requirements). The thesis committee, which must be appointed before students may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty members have approved the subject for the thesis, work may begin. Students are responsible for preparing the thesis in the proper form and for observing filing deadlines.

Master's Comprehensive Examination (Plan II)

Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its format is available in the departments.

Doctoral Degree

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before students take the University Oral Qualifying Examination. Students determine their course of study in consultation with a graduate adviser until the doctoral committee is appointed.

Doctoral Examinations before Advancement to Candidacy

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. They are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after students complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with the student and then nominates a doctoral committee.

University Oral Qualifying Examination

The doctoral committee, consisting of at least four faculty members nominated by the department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

Master's Degree

When students have completed approximately half the program for the master's degree (usually at least two terms), they should formally apply for advancement to candidacy. Application forms are available from the departments and must be filed there no later than the second week of the term in which students expect to receive their degree (by the end of the second week of the first Summer Session for a September degree).

Students may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. They then have one year from the date of advancement to complete all requirements for the degree, including their thesis or comprehensive examination. Candidacy expires at the end of one year

and reinstatement during the term in which they plan to receive the degree is by petition only.

Doctoral Degree

Students are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four terms of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. They are officially advanced to candidacy on the date the completed application for candidacy form is received in Graduate Admissions/Student and Academic Affairs, provided the information on the form is correct and complete and the examination was conducted in accordance with Graduate Council regulations. Students are billed the advancement to candidacy fee on their BAR statement.

Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see above). Four terms in academic residence at UCLA are required. (Also refer to Academic Residence earlier in this section.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the end of this section. For further details, consult the Graduate Division.

Doctoral Dissertation

Once the doctoral committee approves the subject for the dissertation, the in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates ability for independent investigation. The doctoral committee guides the progress toward its completion. Students are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines.

Final Preparation and Filing of Thesis or Dissertation

For guidance in the final preparation of the thesis or in the preparation and submission of the dissertation and accompanying abstract, students may

- (1) Consult the theses and dissertations adviser, Office of the University Archivist, 390 Powell Library.
- (2) Read *Regulations for Thesis and Dissertation Preparation*, available in Graduate Admissions/Student and Academic Affairs or in the Archivist's Office.
- (3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each term (see the Calendar at the beginning of this catalog).

Master's Thesis

When all members of the committee have approved the thesis and students are ready to file it, they must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to Graduate Admissions/Student and Academic Affairs where completion of degree requirements is verified. After final approval by the dean of the Graduate Division, students must file the thesis with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Doctoral Dissertation

When all members of the committee have approved the dissertation and students are ready to file it, they must submit the original signature (approval) page and title page to Graduate Admissions/Student and Aca-

demical Affairs where completion of degree requirements is verified. After final approval by the dean of the Graduate Division, students must file two paper copies of the dissertation with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded). Consult the *Schedule of Classes* Calendar for exact dates.

Doctoral Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which *all* committee members must be present, may be held before students have prepared the final copy of their dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult the doctoral committee chair or graduate adviser for further information.

Interdepartmental Degree Programs

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 28 interdepartmental programs offer bachelor's, master's, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs that currently lead to advanced degrees are listed below. All are described more fully in the Curricula and Courses section of this catalog. For further information, students should contact the chair or graduate adviser of the specific program that interests them.

African Area Studies (M.A.)
 Afro-American Studies (M.A.)
 American Indian Studies (M.A.)
 Applied Linguistics (Ph.D.)
 Archaeology (M.A., Ph.D.)
 Asian American Studies (M.A.)
 Biomedical Engineering (M.S., Ph.D.)
 Biomedical Physics (M.S., Ph.D.)
 Environmental Science and Engineering (D.Env.)
 Folklore and Mythology (M.A., Ph.D.)
 Indo-European Studies (Ph.D.)
 Integrated Manufacturing Engineering (M.Engr.)
 Islamic Studies (M.A., Ph.D.)
 Latin American Studies (M.A.)
 Molecular Biology (Ph.D.)
 Neuroscience (Ph.D.)
 Romance Linguistics and Literature (M.A., Ph.D.)

Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow students to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. Students may petition to design their own articulated program (with departmental and Graduate Division approval), but they may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study;

they prepare students more fully for the world's complexities by combining the cultural (political/social/economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

Concurrent Degree Programs

By allowing a specified amount of credit to apply to both degrees, concurrent degree programs permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

American Indian Studies, Interdepartmental M.A. — Law, J.D.
 Architecture and Urban Design, M.Arch. I — Urban Planning, M.A.
 Asian American Studies, Interdepartmental M.A. — Public Health, M.P.H.
 Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
 History, M.A. — Information Studies, M.L.I.S.
 Islamic Studies, Interdepartmental M.A. — Public Health, M.P.H.
 Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
 Management, M.B.A. — Computer Science, M.S.
 Management, M.B.A. — Information Studies, M.L.I.S.
 Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
 Management, M.B.A. — Law, J.D.
 Management, M.B.A. — Medicine, M.D.
 Management, M.B.A. — Nursing, M.S.N.
 Management, M.B.A. — Public Health, M.P.H.
 Management, M.B.A. — Urban Planning, M.A.
 Social Welfare, M.S.W. — Law, J.D.
 Urban Planning, M.A. — Law, J.D.

Articulated Degree Programs

Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
 African Area Studies, Interdepartmental M.A. — Film and Television, M.F.A.
 Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
 Latin American Studies, Interdepartmental M.A. — Information Studies, M.L.I.S.
 Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
 Medicine, M.D. — Graduate Division health science major, Ph.D.
 Oral Biology, M.S. or Ph.D. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Students should contact Graduate Admissions/Student and Academic Affairs for information on designing articulated programs.

General Policies and Regulations

Standards of Scholarship

To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing

at the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work that would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation

Students are on probation and are subject to dismissal if their cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive terms falls below a B average. The dean of the Graduate Division, in consultation with the department, determines student eligibility to continue graduate study in probationary status. Students who are allowed to continue must make timely progress toward improving their grade-point average.

Disqualification and Appeal

If students are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, they have their records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, they may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals are considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Disagreements over evaluation of academic quality are not considered appropriate causes for appeal. Refer to *Standards and Procedures for Graduate Study at UCLA* for specific details on how to submit an appeal or contact Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council's Committee on Degree Programs. Students are required to submit a written statement on the basis for the appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints

Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

Students who have complaints of a scholastic or professional nature involving faculty should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, students should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, they may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against individual students should be made at the Office of the Dean of Students, 1206 Murphy Hall. Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (105 Kerckhoff Hall) or Student and Campus Life (1104 Murphy Hall).

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints from teaching assistants about workloads and evaluations are governed by the provisions of the Teaching Assistant Grievance Procedures, which are spelled out in detail in the *Academic Apprentice Personnel Manual*. Copies are available from departments and from Graduate Student Support, 1228 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be handled as described in the Non-discrimination, Harassment, and Faculty Code of Conduct sections in the Appendix.

Graduate Majors, Degrees, and Foreign Language Requirements

Graduate Majors	Degrees	Language Requirements
African Area Studies	M.A.	1 language: African Consult the program concerning additional foreign languages which may be required or recommended.
Afro-American Studies	M.A.	1 language
American Indian Studies	M.A.	Completion of Linguistics 114 or Anthropology 243P
Anthropology	M.A. Ph.D.	1 language 1 language, special proficiency With departmental approval, a program of courses or other work may be substituted for a language.
Applied Linguistics	C.Phil., Ph.D.	2 languages or 1 language, special proficiency
Applied Linguistics and Teaching English as a Second Language	M.A.	None
Applied Linguistics and Teaching English as a Second Language	M.A.	For students whose native language is English, a program of language courses
Teaching English as a Second Language	Certificate Program	Not admitting new students at this time.
Archaeology	M.A. C.Phil., Ph.D.	1 language Consult the program concerning additional foreign languages which may be required or recommended. 2 languages Consult the program concerning additional foreign languages which may be required or recommended.
Architecture	M.Arch. I, M.Arch. II, M.A. Ph.D.	None 2 languages or proficiency in mathematics, statistics, and/or computing
Art	M.A., M.F.A.	None
Art History	M.A. Ph.D.	2 languages: French and German unless otherwise specified Consult the department concerning additional foreign languages which may be required or recommended. 2 languages: French and German unless otherwise specified, with additional language needs to be determined by student's committee
Asian American Studies	M.A.	1 language: two years of Asian at university level or equivalent or research tool
Atmospheric Sciences	M.S., C.Phil., Ph.D.	None
Biological Chemistry	M.S., Ph.D.	None
Biomathematics	M.S., Ph.D.	None
Biomedical Physics	M.S., Ph.D.	None
Chemistry and Biochemistry		
Biochemistry and Molecular Biology	M.S., C.Phil., Ph.D.	None
Chemistry	M.S., C.Phil., Ph.D.	None
Classics		
Classics, Greek, Latin	M.A.	1 language: French, German, or Italian, either by passing course 5 with a minimum grade of C or by examination
Classics	Ph.D.	2 languages: French, German, or Italian, either by passing course 5 with a minimum grade of C or by examination
Comparative Literature	M.A., C.Phil., Ph.D.	2 languages, special proficiency Consult the department concerning additional foreign languages which may be required or recommended.
Dentistry		
Dentistry	D.D.S., Postgraduate Certificate Programs	None
Oral Biology	M.S., Ph.D.	None
Design	M.A., M.F.A.	None
Earth and Space Sciences		
Geochemistry	M.S., C.Phil., Ph.D.	None
Geology	M.S., C.Phil., Ph.D.	None
Geophysics and Space Physics	M.S., Ph.D.	None
East Asian Languages and Cultures	M.A. C.Phil., Ph.D.	1 year of Japanese for Chinese majors; 1 year of Chinese for Japanese majors 2 languages: French and German Consult the department concerning additional foreign languages which may be required or recommended.

Graduate Majors	Degrees	Language Requirements
Economics	M.A., C.Phil., Ph.D.	None
Education		
Education	M.A., M.Ed., Ed.D., Ph.D.	None
Educational Administration (joint with UC Irvine)	Ed.D	None
Special Education (joint with CSULA)	Ph.D.	None
Multiple and Single Subject Instruction, Administrative Services	Certificate Programs	None
Engineering and Applied Science

Academics

Academic Policies

Units and Grading Policy

Students at UCLA are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the Manual of the Academic Senate, the manual prevails in all cases. Copies of the Senate manual are available for review in the Academic Senate Office, 3125 Murphy Hall.

Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at UCLA:

Undergraduate Students

A+	Extraordinary
A	Superior
B	Good
C	Fair
D	Poor
F	Fail
P	Passed (achievement at grade C level or better)
NP	Not Passed
I	Incomplete
IP	In Progress
DR	Deferred Report

The grades A, B, C, and D may be modified by a plus (+) or minus (–) suffix, to either raise or lower the grade-point average (GPA). The A+ grade does **not** raise the GPA because it carries the same number of grade points as the A grade. The grades A, B, C, and P denote satisfactory progress toward the bachelor's degree, but a D grade must be offset by higher grades in the same term for students to remain in good academic standing. An F grade yields no unit or course credit.

Graduate Students

A	Superior Achievement
B	Satisfactorily demonstrated potentiality for professional achievement in field of study
C	Passed the course but did not do work indicative of potentiality for professional achievement in field of study
F	Fail
S	Satisfactory (achievement at grade B level or better)
U	Unsatisfactory
I	Incomplete
IP	In Progress
DR	Deferred Report

The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for students to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees unless otherwise prohibited by the requirements of the degree program.

The Schools of Dentistry, Medicine, and Law maintain their own grading codes. Students who are interested in programs in any of these schools should consult the appropriate school announcement.

Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (for example, one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

A+	4.0
A	4.0
A–	3.7
B+	3.3
B	3.0
B–	2.7
C+	2.3
C	2.0
C–	1.7
D+	1.3
D	1.0
D–	0.7
F, NP, U	0.0

Courses in which students receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, IP, and NR, are disregarded in determining the grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent GPAs.) NR indicates that no grade was received from the instructor.

Computing Grade-Point Average

The grade-point average is determined by dividing the number of grade points earned by the number of units attempted. The number of grade points earned for a course equals the number of grade points assigned times the number of course units. For example, suppose a student takes three four-unit courses and receives grades of A–, B–, and C+.

Grade	Grade Points	Course Units	Total Grade Points
A–	3.7	4	14.8
B–	2.7	4	10.8
C+	2.3	4	9.2
Total		12	34.8

To determine the GPA for the term, divide the total grade points earned (34.8) by the total course units attempted (12). The GPA is 2.9

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Grades earned at another institution or in UCLA Extension courses other than those prefixed by XLC do not affect the GPA.

Other schools and agencies may calculate GPAs differently from the University when evaluating records for admission to graduate and professional school programs. Students should contact them about their policies in this regard.

Passed/Not Passed Grades

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed (P/NP) basis.

By alleviating grading pressures, this option allows students to explore areas in which they have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect the GPA. Students receive neither units nor course credit for an NP grade.

Students may enroll in one course each term on a P/NP basis (two courses if they have not elected the P/NP option in the preceding term). They may not elect this option for Summer Sessions courses without an approved petition. Their department or school may require that they take some or all courses in their major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult the college or school for details.

Students may make program changes to or from P/NP grading through the sixth week of instruction (see the *Schedule of Classes* Calendar for exact dates); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any UCLA Store).

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the *Schedule of Classes*.

Satisfactory/Unsatisfactory Grades

Graduate students in good standing (minimum 3.0 GPA) may enroll for Satisfactory/Unsatisfactory (S/U) grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner are not counted in computing the GPA. Students receive neither units nor degree credit for a U grade. They may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the *Schedule of Classes* Calendar); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any UCLA Store).

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the *Schedule of Classes*.

Incomplete Grades

Once an Incomplete (I) grade is assigned, it remains on the transcript along with the passing grade students may later receive for the course. The instructor may assign the I grade when work is of passing quality but is incomplete for a good cause (such as illness or other serious problem). It is the student's responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, students may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Students should not reenroll in the course; if they do, it is recorded twice on the transcript. If the work is not completed by the end of the next full term in residence, the I grade lapses to an F, NP, or U as appropriate. The college or school may extend the deadline in unusual cases (not applicable to graduate students).

Consult the *Schedule of Classes* for procedure instructions.

In Progress Grades

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the *Schedule of Classes*), evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of In Progress (IP) are assigned in the intervening term(s) and are replaced with the final grade when students complete the full sequence. The school or college faculty or the Graduate Council determines credit if they do not complete the full sequence and petition for partial credit.

Deferred Report Grades

Students may receive a Deferred Report (DR) grade when the instructor believes their work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If students are given a disciplinary DR grade, the Office of the Dean of Students assists them in resolving the problem. For graduate students, the dean of the Graduate Division sets a deadline by which the DR lapses to an F if the problem is not resolved and a grade assigned. The DR is changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that the situation is resolved. The DR grade is not included in determining the grade-point average.

Repetition of Courses

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

- (1) To improve the grade-point average, students may repeat only those courses in which they receive a grade of C– or lower; NP or U grades may be repeated to gain unit credit. Courses in which a letter grade is received may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.
- (2) Repetition of a course more than once requires the approval of the college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.
- (3) Degree credit for a course is given only once, but the grade assigned each time the course is taken is permanently recorded on the transcript.
- (4) For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points are computed in the

GPA. After repeating 16 units, however, the GPA is based on all letter grades assigned and total units attempted.

(5) For graduate students, all courses in which a letter grade is given, including repeated courses, are used in computing the GPA.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner.

The results of these courses are entered on the record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master's degrees but cannot apply to academic residence requirements for master's or doctoral degrees.

Students need approval from the appropriate instructors, the department, and the college or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

Correction of Grades

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. Students who are dissatisfied with a grade should review their work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on the transcript. See the Appendix for further details and procedures for appealing grades.

Class Standing

Undergraduate classification is determined by the number of units completed.

Classification	Completed Units
Freshman	0.0 – 44.9
Sophomore	45.0 – 89.9
Junior	90.0 – 134.9
Senior	135.0 or more

In all campus units except the School of Engineering and Applied Science, students are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of Nursing and School of Theater, Film, and Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed. If students exceed the maximum, they may not be allowed to continue, except in rare cases approved by their college or school. See the degree requirements under each college and school for further details.

Graduate classification is based on the degree objective and whether or not students are advanced to candidacy for a doctorate.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. Concurrent enrollment is not permitted except in extraordinary circumstances, and no credit is given for courses taken concurrently elsewhere without the approval of the college or school. This does not apply to UCLA Summer Sessions.

Undergraduate Students

During the summer or during a term when students are not registered at UCLA, they may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The UCLA Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is the students' responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. They should avoid courses that are closely related to those they have already taken, as they cannot receive credit twice for the same or similar courses. Students who wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA should consult their college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus other than UC Santa Cruz (unless the letter-grade option is elected at UCSC) and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Students may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When they have completed the work, they must have the other college send a copy of their transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); they must also fill out a Transfer Credit Evaluation Request form at UARS, 1147 Murphy Hall.

Students who wish to receive degree credit for work taken through **UCLA Extension** should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. Grades earned by Arts and Architecture and Letters and Science undergraduate students in courses prefixed by XLC are computed in the UCLA grade-point average. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

The maximum number of **community college** units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools does not grant transfer credit for community college courses beyond 105 quarter units, but students may still receive subject credit for this coursework to satisfy lower division requirements. Consult the college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — for example, 12 quarter units \times .666 = 7.99 or 8 semester units.)

Graduate Students

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master's degree. For more details, see Transfer of Credit under Requirements for Graduate Degrees in the Graduate Study section of this catalog.

Transcripts and Student Records

The Registrar prepares, maintains, and permanently retains a record of each student's academic work. Student files of pertinent documents are maintained up to five years following the last date of attendance. Students

may view their documents in Academic Record Services, 1134 Murphy Hall, by calling (310) 825-3801 to make an appointment. Advance notice of 24 hours is required for viewing.

The permanent record is the transcript, which reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically the courses, units, grades, cumulative GPA, transfer credits, and total units.

The University Records System Access (URSA) allows all UCLA students to obtain course confirmation, UCLA grades for any completed term, GPA, completed units, and outstanding holds. Students may also confirm registration fee payment, update and review selected student information, and change their security code. Students may access the system for up to 10 years after their graduation or last term of attendance. For additional information, consult the *Schedule of Classes*.

As needed, students may obtain a free printout of their grades for the most recent graded term from the Registrar's Office, 1113 or 1134 Murphy Hall, by presenting their valid current-term BruinCard.

To have official transcripts sent to other schools, institutions, or agencies, complete a Transcript Request form (available in the Murphy Hall North Lobby) or write to the Registrar's Office, Attn: Transcripts, UCLA, Box 951429, Los Angeles, CA 90095-1429. Requests must include the student name while in attendance at UCLA, Social Security number and/or student I.D. number, dates of attendance, and student signature for release.

To reduce the risk of fraud and tampering, UCLA transcripts are printed on customized security paper. Transcripts are issued in blue envelopes marked "Official Transcripts Enclosed." Requests for additional notations or enclosures are considered special handling and may incur additional fees.

Each transcript costs \$5; additional fees apply for transcripts requiring special handling and/or mailing services. Call (310) 825-3801 for prices and to make arrangements for special services. Although fax services are available, transcripts that are faxed are not considered official and may not remain confidential. Continuing students and former students with UCLA Student Billing (BAR) accounts may charge transcript orders to their accounts. Other requests must be accompanied by a check made payable to Regents-UC. Transcript fees are subject to change at any time. Requests are not processed if students have outstanding financial, academic, or administrative obligations (holds) to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Transcripts for UCLA Extension courses must be ordered from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90024.

Verification of Student Status

The Registrar issues a verification transcript to verify fee payment and enrollment status as students are eligible. Verification cannot be issued if registration fees for the term have not been paid. Verification transcripts cost \$5 each and are issued at 1134 Murphy Hall.

Verifications for loan forms and student aid guarantors are processed through the National Student Loan Clearinghouse, a nonprofit industry-sponsored organization representing schools, guarantors, lenders, servicers, and secondary markets for the sole purpose of standardizing, simplifying, and automating enrollment verifications and deferment processing. UCLA provides student enrollment verification data, including student names, mailing addresses, Social Security numbers, and enrollment status, to the clearinghouse on a regular basis. Release of this information to the clearinghouse has been approved by the U.S. Department of Education and ruled in compliance with the Federal Family Educational Rights and Privacy Act (FERPA). The \$5 verification transcript fee is waived for student loan requests when proof of need is presented.

Submit all verification request forms (including "good student" auto insurance discounts and health insurance verifications) to Academic Record

Services, 1134 Murphy Hall. Forms for clearinghouse participants are forwarded to the clearinghouse by Academic Record Services.

Certificate of Resident Study for International Students

International students who must leave the University and the country before completing a degree or certificate program may request a Certificate of Resident Study in addition to a formal transcript. The certificate cannot be awarded if the studies involved are covered by a diploma or other certificate. The chair of the major department recommends the award of the certificate through a petition to the college, school, or Graduate Division. To be eligible to receive the certificate, students must have completed a program of at least nine courses with a minimum GPA of 2.0 (2.5 for Graduate Division students) and have satisfactorily completed a research project over a period of nine months or more.

UCLA BruinCard

The UCLA BruinCard is a mandatory student identification card that is used to electronically confirm student status and eligibility for services. Supportive photo identification, such as a driver's license or passport, is required when the card is issued.

The primary benefit of the BruinCard is convenience. It is a versatile card that serves the following functions: confirmation of student status; I.D. card for faculty, staff, and students; residence halls access card; library card; recreation card; debit card (if activated) for purchases at all campus stores and restaurants; AT&T Calling Card (if this feature is elected); and time-management card for departments using the Kronos system.

Students with a hold from an office with which they have an outstanding obligation (financial, academic, or administrative) may not receive services until the hold is released by the initiating office. For details on outstanding holds and initiating offices, check with URSA Telephone (310) 208-0425 or URSA OnLine.

BruinCard centers at 123 Kerckhoff Hall, 107 UCLA Wilshire Center, and 150A Sproul Hall are open weekdays from 9 a.m. to 4 p.m. (310-825-2336). To report lost or stolen cards, call (310) 206-3199.

Change of Name or Address

Students who wish to change their name on official University records should fill out a UCLA Correction or Change of Name form (available in the Murphy Hall North Lobby) and submit it to Academic Record Services, 1134 Murphy Hall. All name changes are recorded on the transcript. If students change their address, they should notify Enrollment and Degree Services in 1113 Murphy Hall as soon as possible.

Leaving UCLA

Intercampus Transfer

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see Undergraduate Admission in the Undergraduate Study section of this catalog). Applications are available from the Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, UCLA, Box 951436, Los Angeles, CA 90095-1436, other University of California Undergraduate Admissions Offices, or the local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Term

Students who need to be absent from classes temporarily for reasons beyond their control should notify their instructors. Regardless of the reasons for absence, they are required to complete all coursework. If they cannot complete the work on time because the absence is late in the term

or prolonged, they may request that the instructors assign an Incomplete grade (see Incomplete Grades earlier in this section).

One-Term Absence for Undergraduates

Undergraduate students who have completed at least one term at UCLA and fail to register for the following term may return to the University the next subsequent term as continuing students. Students who plan to attend another institution (including UCLA Extension) during their absence should consult their college or school counselor before enrolling elsewhere (see Concurrent Enrollment and Transfer of Credit earlier in this section). Students who are absent for two or more consecutive terms are no longer considered continuing students and must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines).

Leave of Absence for Graduate Students

Graduate students in good standing may be granted leaves of absence, normally for periods of one to three terms, on approval from the appropriate department and the Graduate Division. The maximum amount of official leave of absence allowed is six terms (two academic years). Leaves must be requested before the end of the second week of classes (see Withdrawal below for fee refund procedures and more information). Request forms are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For details on leaves of absence, see *Standards and Procedures for Graduate Study at UCLA*, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time and cannot receive University financial support. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a term and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation

Before the first day of classes, students may cancel registration by mailing a written notice to Enrollment and Degree Services, Attn: Cancellation Clerk, 1113 Murphy Hall, UCLA, Box 951429, Los Angeles, CA 90095-1429. Refund is as follows: fees paid by new undergraduate students are refunded except for the nonrefundable \$100 acceptance of admission fee and a \$10 service fee; fees paid by new M.B.A. and Dentistry students are refunded except for their respective nonrefundable acceptance of admission fee; for new graduate, continuing, and reentering students, a service fee of \$10 is deducted from the amount of fees paid. A \$20 cancellation fee is also deducted if medical insurance was purchased.

Undergraduates who return to the University for the following term are considered continuing students. Students who are absent longer than one term must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines). If they cancel in their first term at UCLA, they must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal

Withdrawing from the University means discontinuing attendance in all courses in which students are enrolled. Students who withdraw during a term need to file a Notice of Withdrawal, available from their academic dean's office (undergraduates) or departmental office (graduate students).

When students officially withdraw, a percentage of the registration fee is refunded depending on the date the withdrawal form is filed with the academic dean.

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the *Schedule of Classes* for policy details and specific refund dates.

Students may withdraw only if they have not taken any final examinations or otherwise completed the work in any classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if they started the term in good academic standing. If they withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on their continuance in undergraduate standing. Before withdrawing, they are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once they have officially graduated from the University.

Students who register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation receive F, NP, or U grades, as appropriate, for all courses in which they are enrolled for that term. A \$60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. No fees are refunded, and future registration privileges may be curtailed or revoked. Transcripts are not issued if students have outstanding financial obligations to the University.

Undergraduate Students

If students return to the University for the term following withdrawal, they are considered continuing students. If they return later than the following term, they must apply for readmission.

Graduate Students

If students do not register for a term, they are considered to have withdrawn from the University and must apply for readmission when they return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Undergraduate Students

The awarding of the bachelor's degree does not happen automatically but is the culmination of several steps that begin when students identify the term they expect to complete degree requirements through URSA Telephone (consult the *Schedule of Classes* for complete instructions on using URSA to declare degree candidacy). This must be done before students complete 160 units (172 for the School of Engineering and Applied Science) or a **\$13 late candidacy fee** is assessed. The identified term must fall within the academic year (four quarters) subsequent to the term in which students reach or expect to reach the 160-/172-unit mark. Exceptions can be made by the degree auditor depending on the program of study (for example, double majors).

Students may request a review of their degree progress by a counselor in their college or school office at any time. Advisers in the major department are also available for counseling on departmental requirements.

The "degree expected term" students specify through URSA Telephone is used by the degree auditors to review coursework and begin the audit of the completion of degree requirements. Students cannot graduate without such an audit. If the expected graduation date changes, update the degree term through URSA Telephone. Once students have completed 160/172 or more units, a fee is assessed each time they change the "degree expected term" through URSA Telephone.

Students who are current-term or past-term candidates over the unit limit can only change the "degree expected term" in person at 1113 Murphy Hall. They must use the UCLA Declaration of Candidacy form (available

for purchase in the school supplies section at any UCLA Store) for this purpose.

Consult the *Schedule of Classes* for the deadline to declare candidacy for the current term (with fee if 160/172 or more units completed). Declaration of candidacy after the published deadline may result in a degree award date for the following term and additional candidacy penalty fees.

Students can confirm their “degree expected term” at any time through URSA Telephone at (310) 208-0425. Declaring candidacy is not a guarantee of graduation. Students who have requested through URSA that no public information (including their name) be released are not included in the program booklet for Commencement ceremonies.

Students who intend to complete degree requirements as nonregistered students (for example, taking a course through UCLA Extension or at another institution or needing to remove an Incomplete grade) must file a request to graduate “in absentia” with the degree auditor by the candidacy deadline for the “degree expected term.” Students graduating “in absentia” are assessed the special order diploma fee in addition to the declaration of candidacy fee.

Students in the School of the Arts and Architecture, School of Nursing, School of Engineering and Applied Science, and School of Theater, Film, and Television are audited for degree requirements by staff members in their respective counseling/student affairs offices and should consult them regarding questions on degree requirements and school degree audit procedures.

A computer-generated **Degree Progress Report (DPR)** serves as the degree check for students in the College of Letters and Science. The DPR contains a detailed evaluation of transfer credit, courses and grades for each completed term, degree requirements completed, and requirements still outstanding. Students can view and print their DPR through URSA OnLine or order one at A316 Murphy Hall.

A “Summary of Shortages for the Bachelor’s Degree” statement is mailed to each current-term candidate who does not satisfy degree requirements that term. Students who receive such notices should contact a degree auditor immediately to discuss their expected completion of the requirements. If students expect to satisfy degree requirements in a later term, they must change their “degree expected term” over URSA Telephone or at 1113 Murphy Hall. They may be assessed applicable fees, with the option to submit payment or be billed through BAR.

Graduate Students

Candidates for both master’s and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (consult the *Schedule of Classes* for filing deadlines).

For full details on degree requirements and procedures for graduate students, see the Graduate Study section of this catalog.

Final Transcript

Official transcripts with the graduation date included are available approximately seven weeks after the end of the term. Students who require earlier proof of graduation should contact their degree auditor.

Degree Date

Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of Summer Session C (mid-September). For the School of Law and School of Medicine, degrees are awarded at the end of Fall and Spring Semesters. Consult the respective University calendars (quarter, summer sessions, semester) for the actual degree award date, which is the final day of the term.

Diplomas

Diplomas for both undergraduate and graduate students are available approximately three to four months after the degree award date. Information about obtaining the diploma in person (no fee) or by mail (with fee) is sent to students approximately seven weeks after the end of their final term. To expedite receipt of the diploma, students are encouraged to return the diploma mailer form and remit the mailing fee. Recorded information regarding diploma availability may be obtained by calling the Diploma Hot Line at (310) 825-8883. The Registrar’s Office retains diplomas for five years from graduation date.

If the original diploma is destroyed, a duplicate may be ordered by contacting the Registrar’s Office, Diploma Reorder, 1113 Murphy Hall. There is a fee for the replacement diploma, and it bears a reissue date and the signatures of the current officials of the state and University.

Commencement

Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, and recognition of candidates who have achieved high academic distinction and honors. Check with the school or college for eligibility requirements, programs, and time schedules.

Academic regalia (caps, gowns, and hoods) are available for rent/purchase at Graduation Etc. (A Level of Ackerman Union, 310-825-2587, <http://www.uclastore.ucla.edu>). In addition, graduation announcements, diploma covers, and diploma mounting are available.

Further information, including the schedule of ceremonies, maps and parking information, what to expect, and commencement updates, is available from the University commencement website at <http://www.commencement.ucla.edu/>.

College and Schools

School of the Arts and Architecture

Daniel Neuman, Dean

UCLA
303 East Melnitz Building
Box 951427
Los Angeles, CA 90095-1427
(310) 206-6465
<http://www.arts.ucla.edu>

The School of the Arts and Architecture at UCLA plays a vital role in the cultural and artistic life of the campus and community. Providing a full range of course offerings and degree programs, the school consists of six departments — Architecture and Urban Design, Art, Design, Ethnomusicology, Music, and World Arts and Cultures. Students have unparalleled opportunities to learn from and interact with distinguished faculty members who rank among the most innovative artists and architects of our time.

A balance of practice and theory, built on the academic foundation of the liberal arts, assures the understanding and appreciation of both the interdependence and integration of creativity, performance, and research. In educating the whole person, the school strives to empower and inspire the next generation of citizens to serve as cultural leaders of the twenty-first century.

Also under the School of the Arts and Architecture umbrella is an impressive array of public arts units, including the UCLA Performing Arts, one of the largest arts presenters in the nation, UCLA at the Armand Hammer Museum of Art and Cultural Center which houses the Grunwald Center for the Graphic Arts, the UCLA Fowler Museum of Cultural History, and the renowned Murphy Sculpture Garden. These institutions offer extraordinary access to leading anthropological, historical, and contemporary visual arts exhibitions and collections, and presentations by the world's most outstanding performing artists.

In addition to providing a rich and diverse environment on campus, the school offers students the opportunity to participate in community outreach programs designed around concerts, exhibitions, symposia, and dance productions presented in cooperation with groups throughout the greater Los Angeles area.

The departments of the School of the Arts and Architecture are integral to the rich and varied cultural life of the campus. The Department of Architecture and Urban Design provides architecture students with a unique opportunity to study buildings, cities, and their interdependence in one of the most structurally and ethnically diverse cities in the world. Students in the Department of Art are taught to understand the broad panorama of the visual arts emphasizing experimentation. The Department of Design focuses on electronic and digital imagery in visual communication design and on the computational devices and computer applications most likely to be sought by industry in the twenty-first century. Students in the Department of Ethnomusicology study the performance and context of music-making from a global perspective, and the Department of Music offers concentrations in composition, music education, performance, and jazz studies. The Department of World Arts and Cultures offers an innovative interdisciplinary arts curriculum based on the vital relationship between dance/performance and theory/criticism.

Informative brochures on the school are available from the Office of Recruitment and Outreach, 1100 Dickson Art Center, UCLA, Box 951620, Los Angeles, CA 90095-1620, (310) 825-9708.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

Majors and Degrees Offered

Architecture (M.Arch. I, M.Arch. II, M.A., Ph.D.)

Art (B.A., M.A., M.F.A.)

Dance (M.A., M.F.A.)

Dance/Movement Therapy (M.A.)

Design (B.A., M.A., M.F.A.)

Ethnomusicology (B.A., M.A., C.Phil., Ph.D.)

Music (B.A., M.A., M.M., C.Phil., D.M.A., Ph.D.)

World Arts and Cultures (B.A.)

Note: New students are not being admitted to the M.A. in Design or the M.A. in Dance/Movement Therapy at this time.

Undergraduate Study

Admission

In addition to the University of California Undergraduate Application, departments in the School of the Arts and Architecture require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

Study Lists

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units if they have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. Consult the Student Services Office no later than the end of the third week of instruction.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as major, scholarship, and residence requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Under-

graduate Degree Requirements in the Undergraduate Study section of this catalog.

School of the Arts and Architecture students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take the courses for a letter grade.

School Requirements

The general requirements of the School of the Arts and Architecture must be completed with a grade-point average of 2.0 or better.

Unit Requirements

Students must complete for credit, with a passing grade, no less than 180 units and no more than 216 units, of which at least 64 units must be upper division courses (numbered 100 through 199). Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Students may petition to be reviewed for a double major on an individual basis. Contact the Student Services Office for an outline of criteria required.

Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). All majors include both lower and upper division courses. Those listed under Preparation for the Major (lower division) should be completed before upper division major work is undertaken.

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the major department must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts and Architecture may require a general final examination.

Individual Majors

Highly motivated students who believe that no single major accommodates their specific interests and goals may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and must explain the intent concerning the anticipated program of study and reasons why the academic goals cannot be achieved within an existing major. Proposals must be submitted no later than the end of the sophomore year. Transfer students must complete at least one term of residency at UCLA before proposing an individual major. Students interested in designing an individual major should consult with the Director of Student Services, School of the Arts and Architecture, 1100 Dickson Art Center, (310) 825-9707.

Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

Minimum Progress

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if

they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

Residence Requirements

Students are "in residence" while enrolled and attending classes at UCLA as a major in the School of the Arts and Architecture. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of the Arts and Architecture. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

English Composition and Critical Reading and Writing Requirements

English Composition and Rhetoric

English Composition 3 with a minimum grade of C must be completed by the end of the third term at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

Critical Reading and Writing

One course from Comparative Literature (formerly Humanities) 2A, 2B, 2C, 2D, or English 4 with a minimum grade of C must be completed by the end of the second year at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 5 also meets this requirement. Comparative Literature 2A, 2B, 2C, or 2D may not be applied toward the humanities/literature requirement if taken to meet this requirement.

Foreign Language Requirement

Students may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, or scoring 4 or 5 on the AP foreign language test in Latin, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with a grade of Passed or C or better.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

Computing/Mathematics/Statistics Requirement

One course (four units) in mathematics or statistics or an introductory course in computers selected from Anthropology M80, Computer Science 1, 2, Economics M40, Geography M40, Mathematics 1, 2, 3A, 3B, 3C, 31A, 31B, Program in Computing 1, 10A, 10B, 10C, Sociology M18, Statistics 10, M11, M12, M21A, M21C. An SAT I mathematics score of 600 or better or an SAT II mathematics subject test score of 550 or better also meets this requirement.

Additional Upper Division Nonmajor Requirements

In addition to the general education requirements, students are required to take a minimum of 12 units of upper division nonmajor courses. Courses that do not apply on this requirement are studio, performance, activity, independent study, debate, creative dramatics, internships, production, workshop, and field studies courses. Consult the school counselor prior to enrolling.

General Education (GE) Requirements

Reciprocity with Other UC Campuses

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of the Arts and Architecture general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to the Student

Services Office, School of the Arts and Architecture, 1100 Dickson Art Center, UCLA, Box 951620, Los Angeles, CA 90095-1620.

Intersegmental General Education Transfer Curriculum

Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of the Arts and Architecture general education requirements.

Arts and Architecture GE Course List

Courses marked with one asterisk (e.g., History *4. Introduction to History of Religions) are listed in more than one category and can fulfill GE requirements in only one of the cross-listed categories.

**If Comparative Literature 2A, 2B, 2C, or 2D is taken to meet the Arts and Architecture critical reading and writing requirement, it may not also be applied toward the humanities/literature requirement.

A. Science

Two courses from different departments:

Anthropology

- 7. Human Evolution
- 10. Principles of Human Evolution: Genetic Basis
- 12. Principles of Human Evolution: Comparative Analysis

Astronomy

- 2A, 2B. Introduction to the Physical Universe
- 3. Astronomy: Nature of the Universe
- 3H. Introductory Astronomy and Astrophysics
- 4. Universe of Stars and Stellar Systems
- 5. Life in the Universe
- 6. Cosmology: Our Changing Concepts of the Universe
- 81. Astrophysics I: Stars and Nebulae
- 82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology

Atmospheric Sciences

- 2, 2E. Air Pollution
- 3, 3E. Introduction to the Atmospheric Environment
- 4. California Weather and Climate
- 5. Climates of Other Worlds
- 6, 6E. Climate and Climatic Change
- 8. Clouds, Rain, and Storms
- 10. Introduction to the Earth System

Chemical Engineering

- 2. Technology and the Environment

Chemistry and Biochemistry

- 2. Introductory Chemistry
- 15. Survey of Organic Chemistry and Biochemistry

Civil and Environmental Engineering

- 3. Fundamentals of Environmental Engineering Science

Earth and Space Sciences

- 1. Introduction to Earth Science
- 2. Earth History
- 5. Environmental Geology of Los Angeles
- 8. Earthquakes
- 9. Origin and Evolution of Solar System
- 15. Introduction to Oceanography
- 16. Major Events in History of Life
- 17. Dinosaurs and Their Relatives
- 20. Natural History of Southern California

Geography

- 1. Physical Environment
- 2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World

5. People and the Earth's Ecosystems

Life Sciences

- 1. Evolution, Ecology, and Biodiversity
- 2. Cells, Tissues, and Organs
- 3. Introduction to Molecular Biology
- 4. Genetics

Microbiology and Molecular Genetics

- 6. Introduction to Microbiology
- 7. Developments in Biotechnology
- 10. Applied Medical Microbiology

Molecular, Cell, and Developmental Biology

- 30. Biology of Cancer
- 40. AIDS and Other Sexually Transmitted Diseases
- 70. Genetic Engineering and Society
- 80. The Green World: Plant Biology for Now and the Future

Organismic Biology, Ecology, and Evolution

- 10. Plants and Civilization
- 12. Biodiversity and Extinction: Crisis and Conservation
- 13. Evolution of Life
- 21. Field Biology
- 25. Oceans
- 50. Desert Life

Physics

- 1A. Physics for Scientists and Engineers: Mechanics
- 1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields
- 1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity
- 3A. General Physics: Mechanics of Solids and Fluids
- 3B. General Physics: Heat, Sound, Electricity and Magnetism
- 3C. General Physics: Light, Relativity, and Modern Physics
- 6A. Physics for Life Sciences Majors: Statics and Dynamics
- 6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics
- 6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport
- 10. Physics

Physiological Science

- 3. Introduction to Human Physiology
- 5. Issues in Human Physiology: Diet and Exercise
- 6. The Human Machine: Physiological Processes
- 13. Introduction to Human Anatomy

Psychology

- 15. Introductory Psychobiology

B. Social Sciences

Three courses, with at least one from each group:

B1. Group A

Economics

- 1, 2. Principles of Economics
- 5. Introductory Economics

History

- 1A, 1B, 1C. Introduction to Western Civilization
- 2A. Power, Ethics, and Technological Change
- 2B. Social Knowledge and Social Power
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- *4. Introduction to History of Religions
- 8A. Colonial Latin America
- 8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
- 8C. Latin American Social History
- 9A. Introduction to Asian Civilizations: History of India
- 9C. Introduction to Asian Civilizations: History of Japan
- 9D. Introduction to Asian Civilizations: History of the Near and Middle East
- 10A, 10B. Introduction to Civilizations of Africa
- 11A, 11B. History of China
- 13A. History of the U.S. and Its Colonial Origins: Colonial Origins and First Nation Building Acts
- 13B. History of the U.S. and Its Colonial Origins: 19th Century
- 13C. History of the U.S. and Its Colonial Origins: 20th Century

67 / School of the Arts and Architecture

- 20. World History to A.D. 600
- 21. World History, 1200 to 1800
- 22. Contemporary World History, 1870 to the Present

Political Science

- 10. Introduction to Political Theory
- 20. World Politics
- 30. Introduction to Political Economy
- 40. Introduction to American Politics
- 50. Introduction to Comparative Politics

B2. Group B

Afro-American Studies

- M5. Social Organization of Black Communities

American Indian Studies

- *10. Introduction to American Indian Studies

Ancient Near East (Near Eastern Languages)

- *10. Jerusalem: The Holy City

Anthropology

- 8. Archaeology: An Introduction
- 9. Culture and Society
- 33. Culture and Communication

Asian American Studies

- *21. Asians and Pacific Islanders in American Society
- *99. History of Asians in America

Chicana and Chicano Studies

- 10B. Chicanos in American Society

Classics

- *M70. Survey of Medieval Greek Culture

Communication Studies

- 10. Introduction to Communication Studies

Geography

- 3. Cultural Geography
- 4. Globalization: Regional Development and World Economy

History

- *M70. Survey of Medieval Greek Culture

Lesbian, Gay, Bisexual, and Transgender Studies

- *M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Portuguese (Spanish and Portuguese)

- *46. Brazilian Culture and Civilization

Psychology

- 10. Introductory Psychology

Social Sciences

- 20. Racial Minorities in the U.S.

Sociology

- 1. Introductory Sociology
- 2. Changing Society and Making History
- 3. Sociology of Everyday Life
- 4. Jobs and Careers: Sociological Approach
- M5. Social Organization of Black Communities
- 24. Conversation and Society
- 31. Dilemmas of Third World Development

Women's Studies

- 10. Introduction to Women's Studies: Feminist Perspectives on Women and Society
- *M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

C. Humanities

Three courses, with at least one course in three of the four groups:

C1. Arts

Afro-American Studies

- M103A. African American Theater History: Slavery to Mid-1800s
- M103B. African American Theater History: Minstrel Stage to Rise of the American Musical
- M103E. African American Theater History: The Depression to the Present
- M109. Women in Jazz
- M110A, M100B. African American Musical Heritage
- M145. Ellingtonia

Art History

- 50. Ancient Art
 - 51. Medieval Art
 - 54. Modern Art
 - 55A. Introduction to African Art
 - 55B. Arts of Pre-Columbian America
 - 56A. Art of India and Southeast Asia
 - 56B. Introduction to Chinese Art
 - 57. Renaissance and Baroque Art
- (Art history courses cannot fulfill GE requirements for Art majors.)

Chicana and Chicano Studies

- M103C. Origins and Evolution of Chicano Theater
- M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement (except World Arts and Cultures majors)
- M103H. Contemporary Chicano Theater: Chicano Theater since 1980 (except World Arts and Cultures majors)
- M108A. Music of Latin America
- M114. Chicanos in Film/Video
- M115. Musical Aesthetics in Los Angeles
- M116. Chicano/Latino Music in the U.S.

Classics

- 42. Cinema and the Ancient World
- 51A. Art and Archaeology of Classical World: Greece
- 51B. Art and Archaeology of Classical World: Rome

Design

- 10. Nature of Design
- (Design course cannot fulfill GE requirements for Design majors.)

English

- M111B. Anglo-American Folk Song

Ethnomusicology

- 15. American Life in Music
 - 20A, 20B, 20C. Musical Cultures of the World
 - 106A, 106B, 106C. Music of the American Indians
 - M108A, 108B. Music of Latin America
 - M109. Women in Jazz
 - M110A, M110B. African American Musical Heritage
 - M111. Ellingtonia
 - 113. Music of Brazil
 - M115. Musical Aesthetics in Los Angeles
 - M116. Chicano/Latino Music in the U.S.
 - 117. American Popular Music
 - 118. Development of Rock
 - 120A, 120B. Development of Jazz
 - 121. Cross-Cultural Perspectives in Jazz
 - 123. Music of Bebop
 - M124. Anglo-American Folk Song
 - M126. Folk Music of Western Europe
 - 128. Folk Music of Eastern Europe
 - 130. Folk Music of the Mediterranean
 - M131. Development of Latin Jazz
 - CM132. Celtic Folk Music
 - 136A, 136B. Music of Africa
 - 146. Folk Music of South Asia
 - 147. Survey of Classical Music in India
 - C150. Music and Politics in East Asia
 - C156A, 156B. Music in China
 - 157. History of Chinese Opera
 - 158A, 158B, 158C. Studies in Chinese Instrumental Music
 - 160A. Survey of Music in Japan
 - 174. Aesthetics of Music
- (Ethnomusicology courses cannot fulfill GE requirements for Music or Ethnomusicology majors.)

Film and Television

- 106A. History of the American Motion Picture
- 106B. History of the European Motion Picture
- 106C. History of African, Asian, and Latin American Film
- 107. Experimental Film
- 108. History of Documentary Film

- 110A. History of Broadcasting
- 110C. World Media Systems
- 112. Film and Social Change
- 113. Film Authors
- 114. Film Genres
- 116. Film Criticism
- M117. Chicanos in Film/Video
- 127. Problems and Ethical Issues in Film and Telecasting

Folklore and Mythology

- CM106. Anglo-American Folk Song
- CM132. Celtic Folk Music
- M154A, M154B. African American Musical Heritage
- M181. Folk Music of Western Europe
- CM184. Dance and Folklore

Lesbian, Gay, Bisexual, and Transgender Studies

- M137. Gay and Lesbian Perspectives in Pop Music

Music

- 15. Art of Listening
 - M131. Development of Latin Jazz
 - 136A, 136B, 136C. Historical Survey of Music Theater
 - 158. New Orleans Jazz
- (Music courses cannot fulfill GE requirements for Music or Ethnomusicology majors.)

Music History

- 2A, 2B. Introduction to Literature of Music
 - 5. History of Rock and Roll
 - 7. Film and Music
 - 13. 20th-Century Music of the Western World
 - 130. Music of the U.S.
 - 131. American Popular Song
 - 132. Mozart
 - 133. Bach
 - 134. Beethoven
 - 135A, 135B, 135C. History of Opera
 - M137. Gay and Lesbian Perspectives in Pop Music
 - 139. History and Literature of Church Music
 - 156. Studies in Musical Genres
 - 189A, 189B. The Symphony
- (Musicology courses cannot fulfill GE requirements for Music or Ethnomusicology majors.)

Russian (Slavic Languages)

- *30. Russian Literature and World Cinema

Spanish (Spanish and Portuguese)

- *62A, *62B, *62C. Hispanic Literatures and Film

Theater

- 101A, 101B, 101C. History of World Theater and Drama
- 102A. Theater of Japan
- 102B. Theater of Southeast Asia
- 102C. Cross-Cultural Currents in Theater
- 102E. Theater of Non-European World
- M103A. African American Theater History: Slavery to Mid-1800s
- M103B. African American Theater History: Minstrel Stage to Rise of the American Musical
- M103C. Origins and Evolution of Chicano Theater
- M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement (except World Arts and Cultures majors)
- M103E. African American Theater History: The Depression to the Present
- 103F. Native American Theater
- M103H. Contemporary Chicano Theater: Chicano Theater since 1980 (except World Arts and Cultures majors)
- 104A, 104B, 104C. History of American Theater
- 105. Main Currents in Theater
- 106. History of American Theater and Drama
- 107. Drama of Diversity
- 111A. Selected Topics on History of European Theater from Primitive Times to 1640
- 111B. Selected Topics on History of European Theater from 1640 to 1900
- 111C. Selected Topics on History of European Theater from 1900 to the Present

Women's Studies

- M109. Women in Jazz

World Arts and Cultures

- M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement
 - M103H. Contemporary Chicano Theater: Chicano Theater since 1980
 - 128. Dance and the Visual Media
 - 132A. Philosophical Bases and Trends in Dance
 - 134. History of Dance in Culture and Performance
 - 135. Dance in the U.S.
 - 144. Costume and Scenic Design Concepts for Dance Theater
 - 181A. Dance Cultures of Asia
 - 181B. Dance in Southeast Asia
 - 181C. Dance in East Asia
 - 181D. Dance in South Asia
 - 182. Dance in Africa and the African Diaspora
 - 183. Dance in Latino American Cultures
 - CM184. Dance and Folklore
 - C187. Dance in Native American Cultures
- (World arts and cultures courses cannot fulfill GE requirements for World Arts and Cultures majors.)

C2. Culture and Civilization

American Indian Studies

- *10. Introduction to American Indian Studies

Asian American Studies

- *21. Asians and Pacific Islanders in American Society
- *99. History of Asians in America

Chicana and Chicano Studies

- 10A. Introduction to Chicano Life and Culture

Chinese (East Asian Languages)

- 50. Chinese Civilization

Classics

- 10. Survey of Classical Greek Culture
- 20. Survey of Roman Civilization
- *30. Introduction to Classical Mythology
- *M70. Survey of Medieval Greek Culture

Folklore and Mythology

- 15. Introduction to American Folklore Studies

French

- 14. Introduction to French Civilization, in English

German (Germanic Languages)

- 100A. German Civilization and Culture before 1700
- 100B. Modern German Civilization and Culture from 1700 to 1919
- 100C. German Civilization and Culture in the 20th Century

History

- *M70. Survey of Medieval Greek Culture

Italian

- 42A. Italy through the Ages, in English: Holy Roman Empire to Sack of Rome
- 42B. Italy through the Ages, in English: Late Renaissance to Postmodern Period
- 46. Italian Cinema and Culture

Japanese (East Asian Languages)

- 50. Japanese Civilization

Jewish Studies (Near Eastern Languages)

- 10. Social, Cultural, and Religious Institutions of Judaism

Korean (East Asian Languages)

- 50. Korean Civilization

Lesbian, Gay, Bisexual, and Transgender Studies

- *M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Near Eastern Languages

- 50A. Introduction to Near Eastern Languages and Cultures: Ancient Near East
- 50B. Introduction to Near Eastern Languages and Cultures: Medieval Near East
- 50C. Introduction to Near Eastern Languages and Cultures: Modern Near East

Portuguese (Spanish and Portuguese)

- M42. Civilization of Spain and Portugal
- M44. Civilization of Spanish America and Brazil
- *46. Brazilian Culture and Civilization

Romanian (Slavic Languages)

99. Introduction to Romanian Civilization

Russian (Slavic Languages)

99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century

Slavic (Slavic Languages)

99. Introduction to Slavic Civilization

Spanish (Spanish and Portuguese)

M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

Women's Studies

*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

C3. Literature

Classics

*30. Introduction to Classical Mythology
40. Survey of Greek Literature in Translation
41. Survey of Latin Literature in Translation

Comparative Literature (formerly Humanities)

1A. World Literature: Antiquity to Early Middle Ages
1B. World Literature: Late Middle Ages to the 17th Century
1C. World Literature: Age of Enlightenment to the 20th Century
1D. Great Books from the World at Large
**2A. Survey of Literature: Antiquity to Early Middle Ages
**2B. Survey of Literature: Late Middle Ages to the 17th Century
**2C. Survey of Literature: Age of Enlightenment to the 20th Century
**2D. Survey of Literature: Great Books from the World at Large

English

10A. English Literature to 1660
10B. English Literature, 1660 to 1832
10C. English Literature, 1832 to the Present
70. Major British Authors before 1800
75. Major British Authors, 1800 to the Present
80. Major American Authors
85. The American Novel
90. Shakespeare
95A. Introduction to Poetry
95B. Introduction to Drama
95C. Introduction to Fiction
96. The Short Story in England and America

French

12. Introduction to Study of French Literature (in French)

German (Germanic Languages)

50A. Masterworks of German Literature in Translation: Medieval Period through Classicism
50B. Masterworks of German Literature in Translation: Romanticism to the Present

Italian

50A. Masterpieces of Italian Literature in English: Middle Ages and Renaissance
50B. Masterpieces of Italian Literature in English: Baroque Period to the Present

Japanese (East Asian Languages)

60. Image of Japan: Humanistic Tradition

Portuguese (Spanish and Portuguese)

40A, 40B. Portuguese, Brazilian, and African Literature in Translation

Russian (Slavic Languages)

25. The Russian Novel in Translation
*30. Russian Literature and World Cinema

Scandinavian

50. Introduction to Scandinavian Literature

Spanish (Spanish and Portuguese)

60A, 60B, 60C. Hispanic Literatures in Translation
61A, 61B, 61C. Hispanic Literatures in Spanish
*62A, *62B, *62C. Hispanic Literatures and Film

Selected upper division courses

in English and in other language and literature departments

C4. Philosophy/Religion

Ancient Near East (Near Eastern Languages)

*10. Jerusalem: The Holy City
130. Ancient Egyptian Religion

Anthropology

156. Comparative Religion

Chinese (East Asian Languages)

160. Chinese Buddhism
175. Introduction to Chinese Thought

Classics

88A. Lower Division Seminar: Socrates
M145A. Ancient Greek and Roman Philosophy
M145B. Later Ancient Greek Philosophy
166A. Greek Religion
166B. Roman Religion

East Asian Languages and Cultures

60. Introduction to Buddhism

History

*4. Introduction to History of Religions

Indic (East Asian Languages)

175. Introduction to Indic Philosophy

Iranian (Near Eastern Languages)

170. Religion in Ancient Iran

Islamic (Near Eastern Languages)

110. Introduction to Islam

Japanese (East Asian Languages)

C160. Japanese Buddhism
161. Religious Life in Modern Japan
175. Introduction to Japanese Thought

Jewish Studies (Near Eastern Languages)

130. Modern Jewish Religious Movements and Their Ideologies

Korean (East Asian Languages)

160. Korean Buddhism
175. Introduction to Traditional Korean Thought
187. Popular and Folk Religion in Korea

Philosophy

1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Introduction to Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
9. Principles of Critical Reasoning
21. Skepticism and Rationality
22. Introduction to Ethical Theory
31. Logic, First Course
32. Logic, Second Course
M103A. Ancient Greek and Roman Philosophy
M103B. Later Ancient Greek Philosophy

Honors

Dean's Honors

To receive Dean's Honors in the School of the Arts and Architecture, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at Graduation

Honors at graduation are awarded to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors are *summa cum laude*, *magna cum laude*, and *cum laude*. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

Counseling and Program Planning

The School of the Arts and Architecture offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center, (310) 206-3564.

Graduate Study

The advanced degree programs offered in the School of the Arts and Architecture provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, the special collections of the Arts and Music Libraries, and the University's exhibition and performance halls.

The School of the Arts and Architecture cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of the arts areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division.

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of creative work (auditions, portfolios, computer programs, etc.) are required. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gd-net.ucla.edu/departments.html>.

School of Dentistry

No-Hee Park, Dean

UCLA
53-038 Dentistry
Box 951762
Los Angeles, CA 90095-1762

(310) 206-6063
<http://www.dent.ucla.edu>

The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational, training, and research programs prepare dental students for professional careers dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment

modalities and health care delivery systems. Students become actively involved in preventive and clinical dental care immediately in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; mandatory fourth-year selectives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center, the Roybal Children's Dental Center, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. A graduate program and a number of resident specialty programs foster new lines of research which lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. (Doctor of Dental Surgery) degree program, a number of resident programs, and Oral Biology M.S. and Ph.D. degree programs. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required.

Degrees Offered

Dental Surgery (D.D.S.)
Oral Biology (M.S., Ph.D.)

Predental Curriculum

For details on the three-year predental curriculum, see the College of Letters and Science later in this section.

D.D.S. Degree Program

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see <http://www.dent.ucla.edu> or write to the Office of Student Affairs and Admissions, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

Resident Programs

The School of Dentistry offers the following opportunities for resident study: a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four- or six-year oral and maxillofacial surgery residency training program; a three-year prosthodontics, periodontics, and combined orthodontic/pediatric dentistry program; two-year pro-

grams in the specialties of endodontics and orofacial pain and dysfunction; and a 27-month program in orthodontics and pediatric dentistry.

Information on the resident programs can be obtained by writing directly to Resident Programs, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

Graduate School of Education and Information Studies

Harold G. Levine, Interim Dean

UCLA
2320 Moore Hall
Box 951521
Los Angeles, CA 90095-1521
(310) 206-9260
<http://www.gseis.ucla.edu>

The UCLA Graduate School of Education and Information Studies (GSEIS) includes two departments — the Department of Education and the Department of Information Studies. Together, the two departments embody the school's commitment to understand and improve teaching and learning, educational practice, information policy, and information systems in a diverse society. Research and doctoral training programs bring together faculties committed to expanding the range of knowledge in education, information science, and associated disciplines. The professional training programs seek to develop librarians, teachers, and administrators within the enriched context of a research university.

GSEIS is committed to developing expertise in both old and new methods of information storage and retrieval and to bringing innovative approaches in educational technology and information access to the schools and classrooms of the state and nation. In addition, GSEIS faculty members are engaged in research, teaching, and program development in the areas of management and leadership of schools and libraries, information policy formation, and information systems designs in organizations of all kinds.

Through its scholarship, its graduate training programs, and its partnerships with schools and educational professionals, GSEIS honors its commitment to improve practice in schools, universities, and libraries, enhance theoretical and applied research, expand the role of the university in policy creation, and advance the careers of professional leaders and specialists.

Together our commitment is to the highest quality professional education and to the application of research to the challenges facing a diverse and increasingly urbanized world.

The school offers programs of study leading to the degrees of M.A. in Education, Master of Education (M.Ed.), Master of Library and Information Science (M.L.I.S.), Doctor of Education (Ed.D.), Ph.D. in Education, Ph.D. in Library and Information Science, joint Ed.D. in Educational Administration with UC Irvine, and joint Ph.D. in Special Education with California State University, Los Angeles. Several credential programs are available through the Department of Education, and a post-M.L.I.S. certificate program is offered by the Department of Information Studies.

Degrees Offered

Education (M.A., M.Ed., Ed.D., Ph.D.)
Educational Administration (Joint Ed.D. with UC Irvine)
Library and Information Science (M.L.I.S., Ph.D.)
Special Education (Joint Ph.D. with California State University, Los Angeles)

School of Engineering and Applied Science

A.R. Frank Wazzan, Dean

UCLA
6426 Boelter Hall
Box 951600
Los Angeles, CA 90095-1600
(310) 825-2826
<http://www.seas.ucla.edu>

Since its inception as the College of Engineering in 1945, the School of Engineering and Applied Science has been on the cutting edge of technological advances. In addition to the school's strengths in traditional engineering programs, it is advancing research in the evolving fields of biomedical engineering, wireless communications and networking, and micromachines. Researchers are also creating innovative methods of handling increasing Internet traffic and imaginative uses of new materials.

As we approach the twenty-first century, the pace of technological development quickens, and engineers need to adapt faster to help meet societal needs and maintain U.S. leadership in the marketplace. Engineers must greatly expand their knowledge in their own disciplines and must be able to work as team members across disciplines to solve increasingly complex problems.

UCLA meets the needs of the marketplace by seeing that laboratory breakthroughs translate into technologies and products. Faculty members engage in mutual collaborations with industry, from applied research to technology goal setting. The school's educational mission nurtures innovation and provides a balanced approach to teaching and research.

Students receive their professional education through classroom investigation and real-world applications. The curriculum includes exposure to the humanities, social sciences, and fine arts and addresses the need to educate men and women about their responsibility to create, protect, and manage technology with due regard for ethics and human values. The challenges and rewards of a career in engineering have never been greater. Students who can commit to a high standard of achievement are invited not only to join but also to contribute to the great success story of UCLA.

Degrees Offered

Aerospace Engineering (B.S., M.S., Ph.D.)
Biomedical Engineering (M.S., Ph.D.)
Chemical Engineering (B.S., M.S., Ph.D.)
Civil Engineering (B.S., M.S., Ph.D.)
Computer Science (B.S., M.S., Ph.D.)
Computer Science and Engineering (B.S.)
Electrical Engineering (B.S., M.S., Ph.D.)
Engineering (M.Engr., Engr.)
Engineering and Applied Science (Graduate Certificate of Specialization)
Integrated Manufacturing Engineering (M.Engr.)
Manufacturing Engineering (M.S.)
Materials Engineering (B.S.)
Materials Science and Engineering (M.S., Ph.D.)
Mechanical Engineering (B.S., M.S., Ph.D.)

Undergraduate Study

Students in the School of Engineering and Applied Science (SEAS) may elect one of the eight four-year curricula listed below.

- (1) Bachelor of Science in Aerospace Engineering
- (2) Bachelor of Science in Chemical Engineering

- (3) Bachelor of Science in Civil Engineering
- (4) Bachelor of Science in Computer Science
- (5) Bachelor of Science in Computer Science and Engineering
- (6) Bachelor of Science in Electrical Engineering
- (7) Bachelor of Science in Materials Engineering
- (8) Bachelor of Science in Mechanical Engineering

For the departmental areas of instruction, consult the listings of the individual departments or refer to the *Announcement of the UCLA School of Engineering and Applied Science*, available from the Office of Academic and Student Affairs, 6426 Boelter Hall.

Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled Undergraduate Admission in the Undergraduate Study section of this catalog. Students must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Freshman applicants are strongly advised to take the tests required by the University for admission on or before December 2. Reports of test scores are needed to give full consideration to admission requests; students should ask the testing agencies to send their results directly to the UCLA Undergraduate Admissions Office.

Applicants are accepted at either the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in engineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of normal full-time study. Some students who select certain majors, such as Computer Science and Engineering or Chemical Engineering, may be required to complete additional lower division courses as requisites for the major sequence.

Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

Algebra	2 years
Plane geometry	1 year
Trigonometry	.5 year
Chemistry and physics with laboratory	2 years

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the Scholastic Assessment Test I: Reasoning Tests (verbal and mathematics sections) and Scholastic Assessment Test II: Subject Tests in Writing, Mathematics, and Physics or Chemistry before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

Credit for Advanced Placement Tests

Students may fulfill part of the school requirements with credit allowed at the time of admission for College Board Advanced Placement Tests with scores of 5, 4, or 3. Students with Advanced Placement Test credit may exceed the 213-unit maximum by the amount of this credit. Advanced

Placement Test credit for freshmen entering in Fall Quarter 1999 fulfills requirements in the School of Engineering and Applied Science as indicated on the Advanced Placement chart for the school.

Some portions of Advanced Placement Test credit are evaluated by corresponding UCLA course number. If students take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation.

Students who have completed 36 quarter units after high school graduation at the time of the examination receive no Advanced Placement Test credit.

Admission as a Junior

Applicants for admission to the school in junior standing should have completed 90 quarter units (60 semester units) in good standing, including the following minimum subject requirements:

- (1) Chemistry courses equivalent to UCLA's Chemistry and Biochemistry 20A, 20B, 20L (only Chemistry and Biochemistry 20A is required for the computer science and engineering degree; the computer science degree does not require chemistry; the chemical engineering curriculum also requires Chemistry and Biochemistry 30, 30L, 130A/130AL, which do not need to be taken prior to admission to UCLA);
- (2) mathematics courses equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B;
- (3) physics courses equivalent to UCLA's Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected.

Transfer students must complete a course equivalent to UCLA's English Composition 3 and a second more advanced course in English composition.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

All lower division requirements should be completed by the end of the spring term prior to anticipated enrollment at UCLA.

Requirements for Bachelor of Science Degrees

The requirements for the B.S. degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science, Computer Science and Engineering, Electrical Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 180 to 200 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. Students must also satisfy the curricular requirements for the curriculum they choose to follow.

University Requirements

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Scholarship and Minimum Progress Requirements

In addition to the University requirement that students must earn at least a C (2.0) average in all courses taken at any University of California campus, at least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. A 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is also required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

Senior Resident Requirement

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence in the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

Advanced Placement Credit: School of Engineering and Applied Science

Advanced Placement Test	Credit Allowed
Art History	8 lower division units toward humanities
Biology	4 lower division units toward life sciences
Chemistry	8 lower division units (credit determined on an individual basis)
Computer Science Computer Science (A Test) Computer Science (AB Test)	Four units maximum for both computer science tests. 2 lower division units free electives Computer Science PASCAL (4 units)
Economics Macroeconomics Microeconomics	Score 3 — 4 lower division units free electives Score 4 or 5 — Economics 2 (4 units) Score 3 — 4 lower division units free electives Score 4 or 5 — Economics 1 (4 units)
English Composition and Literature Language and Composition	Eight units maximum for Composition and Literature <i>and</i> for Language and Composition. Score 3 — 8 lower division units (4 units humanities, 4 units free electives), Subject A Score 4 — English Composition 3 (4 units), 4 units humanities, Subject A Score 5 — English Composition 3 (4 units), English 4 (4 units), Subject A Score 3 — 8 lower division units free electives, Subject A Score 4 — English Composition 3 (4 units), 4 lower division units free electives, Subject A Score 5 — English Composition 3 (4 units), English 4 (4 units), Subject A
Environmental Science	Score 3 — 4 lower division units free electives Score 4 or 5 — Geography 5 (4 units)
Government and Politics Comparative United States	4 lower division units toward social sciences 4 lower division units toward social sciences
History European United States	History 1C, 4 lower division units toward social sciences (8 units) Score 3 — 8 lower division units toward social sciences Score 4 or 5 — History 13A-13B-13C (8 units)
Languages and Literature French Language French Literature German Language Latin (Vergil, Latin Literature) Spanish Language Spanish Literature	Score 3 — French 4 (4 units), 4 lower division units free electives Score 4 — French 5 (4 units), 4 lower division units free electives Score 5 — French 6 (4 units), 4 lower division units free electives 8 lower division units toward humanities Score 3 — German 3 (4 units), 4 lower division units free electives Score 4 — German 4 (4 units), 4 lower division units free electives Score 5 — German 5 (4 units), 4 lower division units free electives Score 3 — Latin 1 (4 units per test) Score 4 or 5 — Latin 3 (4 units per test) Score 3 — Spanish 4 (4 units), 4 lower division units free electives Score 4 — Spanish 5 (4 units), 4 lower division units free electives Score 5 — Spanish 6 (4 units), 4 lower division units free electives 8 lower division units toward humanities
Mathematics Mathematics (AB Test) Mathematics (BC Test)	Students who take both mathematics tests receive a maximum of eight units of credit. Score 3 — 4 lower division units Score 4 or 5 — Mathematics 31A (4 units) Score 3 — 8 lower division units Score 4 or 5 — Mathematics 31A, 31B (8 units)
Music Music Literature (no longer offered) Music Theory	If students have credit for both Music Theory <i>and</i> Music Literature, maximum credit is four lower division units for Music Theory and four lower division units for Survey of Music. 8 lower division units toward humanities 8 lower division units free electives
Physics Physics (B Test) Physics (C — Mechanics) Physics (C — Electricity and Magnetism)	If students have credit for Physics B and C — Mechanics <i>or</i> Physics B and C — Electricity and Magnetism <i>or</i> Physics B, C — Mechanics, and C — Electricity and Magnetism, maximum credit is four lower division units for Physics B and four lower division units for Physics C. If students have credit for Physics C — Mechanics and C — Electricity and Magnetism, maximum credit is eight lower division units for Physics C. 8 lower division units free electives 4 lower division units (credit determined on an individual basis) 4 lower division units (credit determined on an individual basis)
Psychology	4 lower division units toward social sciences
Statistics	4 lower division units free electives

Study Lists and Credit Limitations

Study Lists require approval of the dean of the school or a designated representative. It is the student's responsibility to present a Study List which reflects satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. Students are expected to enroll in at least 12 units each term. Students enrolling in less than 12 units must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. Students may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

Students must attain a minimum grade of C to satisfy the English Composition 3 requirement, which must be met before completing 90 quarter units (a grade of C- does not satisfy this requirement). Undergraduates who have not taken (or otherwise satisfied the requirement for) English Composition 3 at the time they are admitted must complete the course at UCLA during Fall, Winter, or Spring Quarter.

After 213 quarter units, enrollment may not normally be continued in the school. Students may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After students have completed 105 quarter units (regardless of where these units have been completed), they do not receive unit credit or subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

Credit for Transfer Students

A course in digital computer programming, using a higher-level language such as FORTRAN, PASCAL, C, or C++, satisfies the computer programming requirement. Applicants to majors in Computer Science, Computer Science and Engineering, and Electrical Engineering should take C or C++.

Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Academic and Student Affairs.

Preparation for the Majors

The following lower division courses or their equivalents are required preparation for engineering majors:

Mathematics

Analytic geometry and calculus, eight units; calculus of several variables, eight units; matrices and differential equations, four units; infinite series, four units (total of 24 quarter units minimum).

UCLA equivalent courses: Mathematics 31A, 31B, 32A, 32B, 33A, 33B.

Physics

Calculus-based courses in mechanics of solids, vibration, wave motion, sound, fluids, heat, kinetic theory, electricity, magnetism, electromagnetic waves, light and relativity, with laboratory (total of 19 quarter units minimum).

UCLA equivalent courses: Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected.

Chemistry

Two quarters or two semesters of general chemistry with laboratory (total of 10 quarter units minimum).

UCLA equivalent courses: Chemistry and Biochemistry 20A, 20B, 20L. Only Chemistry and Biochemistry 20A is required for the computer sci-

ence and engineering degree; chemistry is not required for the computer science degree. The chemical engineering curriculum also requires Chemistry and Biochemistry 30, 30L, 130A/130AL.

Engineering

Digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C (four units); other courses: statics, dynamics, graphics and descriptive geometry, surveying, circuit analysis, properties of materials, strength of materials, additional chemistry, additional computer science.

UCLA equivalent courses: Civil and Environmental Engineering 15; Computer Science 11; Electrical Engineering 5C; Mechanical and Aerospace Engineering 20; engineering core courses; free electives. See specific undergraduate curricula for core courses, SEAS general education (GE) courses, and free electives.

Additional Courses

Life sciences (four units), English composition (four units), humanities/social sciences (total of 16 quarter units minimum).

UCLA equivalent courses: SEAS general education (GE) courses.

Curricular Requirements

The curricula for the bachelor's degrees include the following categories, depending on curriculum selected:

- (1) Twelve to 16 engineering major field courses (48 to 64 units), depending on curriculum followed.
- (2) One to 10 engineering core courses (four to 40 units), depending on curriculum selected.
- (3) Mathematics courses, ranging from four to 12 upper division units; see curricula in individual departments.
- (4) SEAS general education (GE) course requirements: (a) English Composition 3, which must be completed with a minimum grade of C within the first 90 units; (b) six courses from the humanities and social sciences, with at least two courses from each category; (c) one life sciences course (this requirement is automatically satisfied for Chemical Engineering majors).

All lower division courses taken to satisfy items b and c must be selected from the College of Letters and Science GE requirements list (see the Curricula and Courses section of this catalog or online GE Requirements at <http://www.registrar.ucla.edu/GE/>). Students interested in taking a foreign language to satisfy this requirement must first consult with an academic counselor in the Office of Academic and Student Affairs.

For item b, at least three courses must be in the same academic department or must otherwise reflect coherence in subject matter. Of the three, at least two must be upper division courses selected from an approved list available in the Office of Academic and Student Affairs.

Computer Science, Computer Science and Engineering, and Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

Lists of courses approved to satisfy specific curricular requirements are available from the Office of Academic and Student Affairs.

The aerospace engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, materials engineering, and mechanical engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs. The computer science curriculum is accredited by the Computing Sciences Accreditation Board (CSAB), the nationally recognized accrediting body for computer science programs.

Advising and Program Planning

As new undergraduates, students must have their course of study approved by an academic counselor. After the first term, curricular and ca-

reer advising is accomplished on a formal basis. Students are assigned a faculty adviser in their particular specialization in their sophomore year or earlier.

In addition all undergraduate students are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides them with advice regarding general requirements for the degrees and University and school regulations and procedures. It is the students' responsibility to periodically meet with their academic counselor in the Office of Academic and Student Affairs, as well as with their faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

Students normally follow the curriculum in effect when they enter the school. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

All SEAS undergraduate students may use the computerized SEAS Academic Program Planner, an interactive self-advising system which informs users immediately if their programs meet the requirements for graduation. Students beginning upper division coursework in the major are required to submit an Academic Program Proposal to the Office of Academic and Student Affairs for approval by the associate dean.

Academic counselors in the Office of Academic and Student Affairs are available to assist with University procedures and to answer any questions students may have in regard to general requirements.

Passed/Not Passed Grading

Students may take one course per term on a Passed/Not Passed basis if they are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only SEAS general education courses (with the exception of English Composition 3) and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see Units and Grading Policy in the Academics section of this catalog or consult the Office of Academic and Student Affairs.

Honors

Departmental Scholars

Students who are exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. See Academic Excellence in the Undergraduate Study section of this catalog and the *Announcement of the UCLA School of Engineering and Applied Science* for details.

Dean's Honors List

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of at least 15 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7. Students are not eligible for the Dean's Honors List if they receive an Incomplete (I) or Not Passed (NP) grade or repeat a course. Only courses applicable to an undergraduate degree are considered toward eligibility for Dean's Honors.

Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places them in the top five percent of the school (GPA of 3.815 or better) for *summa cum laude*, the next five percent (GPA of 3.729 or better) for *magna cum laude*, and the next 10 percent (GPA of 3.552 or better) for *cum laude*. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

Based on grades achieved in upper division courses, engineering students must have a 3.815 grade-point average for *summa cum laude*, a 3.729 for *magna cum laude*, and a 3.552 for *cum laude*. For all designations of honors, students must have a minimum 3.25 grade-point average

in their major field courses. To be eligible for an award, students should have completed at least 80 upper division units at the University of California.

Tau Beta Pi

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs "to foster a spirit of liberal culture in engineering colleges."

Special Programs and Activities

Extracurricular Activities

The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school's Executive Committee.

Women in Engineering

Women make up approximately 20 percent of the undergraduate and 15 percent of the graduate enrollment in the School of Engineering and Applied Science. Today's opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a "males only" field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual résumé book to aid women students in finding jobs and presents a career day for women high school students.

Continuing Education

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX) Department of Engineering, Information Systems, and Technical Management in close cooperation with the School of Engineering and Applied Science. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (540 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for engineering and information systems class programs, (310) 825-3344 for short course programs, (310) 825-0328 for environmental management, and (310) 825-3858 for technical management programs. The fax number is (310) 206-2815.

Graduate Study

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master's degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After students arrive at UCLA, the adviser helps them plan a program to remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which students are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90095. Students may also submit an online application at <http://www.seas.ucla.edu>. From there connect to the homepage of the preferred department or program and then to the online graduate application.

Undergraduate Courses

No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199, Civil and Environmental Engineering 106A, 108, 199, Computer Science M152A, M152B, 171L, 199, Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199, Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199, Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with the graduate adviser on departmental requirements and restrictions.

Master of Science Degrees

Major Fields or Subdisciplines

The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., manufacturing engineering in the Department of Mechanical and Aerospace Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. Students are free to propose to the school any other field of study, with the support of their adviser.

Course Requirements

A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from the department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in the School of Engineering and Applied Science. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan

The thesis must either describe some original piece of research that students have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in their major field of study. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Comprehensive Examination Plan

The comprehensive examination, which is offered every term, is required in written form only. The comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, students may be reexamined once with the consent of their departmental graduate adviser.

Cooperative Degree Program

The School of Engineering and Applied Science has established a joint degree program with the John E. Anderson Graduate School of Management which allows students to earn two master's degrees simultaneously: the M.B.A. and the M.S. in Computer Science. Contact the Office of Academic and Student Affairs for details.

Master of Engineering Degree

The Master of Engineering (M.Engr.) degree is granted to graduates of the interdepartmental Integrated Manufacturing Engineering (IME) Program which educates and trains future manufacturing engineering leaders. For further information, contact the Integrated Manufacturing Engineering Program, 48-121 Engineering IV, UCLA, Box 951597, Los Angeles, CA 90095-1597, (310) 825-7780, fax: (310) 206-4830, e-mail: imeinfo@ime.ucla.edu, website: <http://ime.ucla.edu>.

The M.Engr. degree is also granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601, (310) 825-1704.

Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an Engineer degree or even pick up the Engineer degree enroute to the Ph.D. degree; similarly, a student in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

Doctoral Degrees

Major Fields or Subdisciplines

Biomedical Engineering Interdepartmental Program

Bioacoustics, speech, and hearing; biochemical engineering; biomechanics, biomaterials, and tissue engineering; biomedical instrumentation; biomedical signal and image processing; neuroengineering.

Chemical Engineering Department

Chemical engineering.

Civil and Environmental Engineering Department

Environmental engineering, geotechnical engineering, structures (structural mechanics and earthquake engineering), water resource systems engineering.

Computer Science Department

Artificial intelligence, computer networks, computer science theory, computer system architecture, programming languages and systems (software systems, data and knowledge-based systems), scientific computing (biomedical engineering systems, physical systems).

Electrical Engineering Department

Applied mathematics (established minor field only), communications and telecommunications, control systems, electromagnetics, integrated circuits and systems, operations research, photonics and optoelectronics, plasma electronics, signal processing, solid-state electronics.

Materials Science and Engineering Department

Ceramics and ceramic processing, electronic and optical materials, structural materials.

Mechanical and Aerospace Engineering Department

Applied mathematics (established minor field only), applied plasma physics and fusion engineering (minor field only), dynamics, fluid mechanics, heat and mass transfer, manufacturing and design, microelectromechanical systems (MEMS), structural and solid mechanics, systems and control.

Students may propose to their department any other field of study with the support of their adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

All candidates must fulfill the minimum requirements of the Graduate Division. Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

Graduate Certificate of Specialization

A Certificate of Specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master's and/or doctoral degrees.

School of Law

Jonathan D. Varat, Dean

UCLA
1242 Law
Box 951476
Los Angeles, CA 90095-1476

(310) 825-4841
<http://www.law.ucla.edu>

By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of a faculty that includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA

students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what ultimately faces them as lawyers and policymakers. Students and faculty often pioneer new programs together, such as the Environmental Clinic, the Program in Public Interest Law and Policy, and a concentration in business law.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Degrees Offered

Juris Doctor (J.D.)

Master of Laws (LL.M.)

Concurrent Degree Programs

The School of Law offers five concurrent degree programs that allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously: the M.B.A./J.D. with the John E. Anderson Graduate School of Management, the M.A./J.D. with the Department of Urban Planning in the School of Public Policy and Social Research, the M.A./J.D. with the American Indian Studies Program in the College of Letters and Science, the M.S.W./J.D. with the Department of Social Welfare in the School of Public Policy and Social Research, and either the M.Ed., M.A., Ed.D., or Ph.D./J.D. with the Department of Education in the Graduate School of Education and Information Studies. For details on all degree programs, see the Law copy in the Curriculum and Courses section of this catalog.

In addition to the formal concurrent programs listed above, students may design a tailored program from other disciplines in UCLA's curriculum or from another high-quality institution; this must be arranged in consultation with the School of Law and the other selected program.

Special Programs

Program in Public Interest Law and Policy

The School of Law has long attracted students interested in public interest and policy issues. The school has one of the strongest public interest law faculties in the country and sits next to the School of Public Policy and Social Research in a city that is a living laboratory for every conceivable social problem.

Building on these strengths, the school instituted a Program in Public Interest Law and Policy in Fall Semester 1997. Students take a special lawyering skills class, participate in a public interest workshop in their first year, and take required year-long seminars in their second and third years. Through the three-year program, which leads to the J.D. degree, students work closely with the small group of faculty who designed the program.

The program marks a distinct break with the way law schools have traditionally trained lawyers for public interest careers. Recognizing the need for coordinated and sequenced training and hoping to engage the interest of the most dedicated public interest-minded students, the program offers a challenging approach to legal education that helps aspiring lawyers refine their own career goals while training them for legal and policy work in the public interest.

Clinical Program

The UCLA School of Law offers one of the finest clinical education programs in the nation. Housed in a state-of-the-art clinical wing, the program provides extensive and rigorous practical training for student-lawyers interested in litigation and transactional work prior to entry into the legal profession. Through simulated and actual client contact, students learn skills such as interviewing and counseling clients, drafting legal documents, examining and cross-examining witnesses, negotiating commercial agreements and litigation settlements, deposing witnesses, mediating disputes, and arguing before a judge or jury.

For example, in the recently established Frank G. Wells Environmental Law Clinic, students work on large and small cases, both federal and state, involving citizen enforcement actions under various environmental statutes, especially actions under the Clean Water Act against polluters of the Santa Monica Bay. In the Community Outreach, Education, and Organizing Clinic, students work on a variety of projects that involve them with members of the community. In one project, students created a workshop to teach lay persons about Proposition 187, the California initiative that sought to eliminate government benefits for illegal immigrants. Other innovative programs include a complex litigation clinic that concentrates on the discovery process, a mediation clinic working in municipal court, and a public policy advocacy course that focuses on public interest policy questions.

In addition to the speciality clinics, students can choose from an extensive array of clinical subjects ranging from trial advocacy and alternative dispute resolution to fact investigation and pretrial procedures. Students in most clinical courses work with real clients under close faculty supervision, either in the school's in-house clinical office or in public interest law settings.

The clinical wing includes a two-story Law Office designed with modern lawyering technology. The student work rooms are equipped with networked computers that have access to legal research databases, the Internet, and leading-edge computer litigation support systems.

The School of Law was a pioneer of clinical legal education, and the program continues on the cutting edge of methods for training lawyers. Clinical faculty members have written numerous influential texts and articles that are used by law schools nationwide.

Extern Program

The school has one of the most extensive, best established, and most diversified student extern programs in the nation. Under supervision of experienced public interest and governmental lawyers and federal judges, students perform legal work in government offices, public interest law firms, nonprofit agencies, and the chambers of federal judges.

In the semester-long program, students develop legal skills in supervised settings and acquire perspectives about the lawyering process or the judicial decision-making process. They also participate in a faculty-led, law school-based seminar in which they reflect systematically in a classroom setting on their experiences in the placement. Students regularly report that the program is an excellent educational experience.

Business Law Program

The Business Law Program gives second- and third-year law students a coherent program of focused coursework in an important practice area. Students who successfully complete the program receive an appropriate notation on their transcripts.

The program has several goals. A large part of practice consists of transactions — a term encompassing agreements as diverse as the negotiation of a lease, the financing of low-cost housing, and the mergers of billion-dollar companies. Lawyers structuring those transactions and those engaged in litigation about them need to understand both legal principles and economic dynamics. Yet students interested in such practices are sometimes uncertain how they may best prepare themselves for such careers. The program provides guidance for these students, offering suggested courses and sequences of courses that enable those interested in a career in business law — or another field where such knowledge would be useful — to plan orderly, logical schedules that build from the basic to the advanced.

Business law students take three foundational courses in their second year of law school: financial analysis, business associations, and taxation. Thereafter, students may select one of five cores, or areas of specialization: corporate and securities, commercial and financing, international business, taxation, and a general business field. In each of the fields students choose among a set of relevant courses that build on and reinforce each other. Students then complete the concentration with an advanced transactional course.

College of Letters and Science

Brian P. Copenhaver, Provost

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430

(310) 825-1965
<http://www.college.ucla.edu>

“The Idea of a Multiversity” is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom.”

Clark Kerr, *The Uses of the University*

With over 23,369 students and 800 faculty, UCLA's College of Letters and Science is the largest academic unit in the UC system. Underscoring the “multiversity” concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 120 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a “liberal arts education” which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, life sci-

ences, physical sciences, and social sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its components: College of Letters and Science Counseling Service, Honors Programs, and Academic Advancement Program.

Humanities

The mission of the Division of Humanities is to promote, through scholarly inquiry and transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition and to engage in thoughtful reflection on those deep and abiding questions that relate to what it is to be human. Faculty and students reflect on art, literature, philosophy, and other expressions of the human spirit, each of which deepens their understanding. The instructional goal is to engage students in this inquiry — to further their knowledge and competence to express themselves clearly, rigorously, with style and originality.

Programs in the humanities range from teaching the craft of composition in writing programs to developing an appreciation of profound philosophical thinkers and writers from Asia, the Near East, Europe, England, and America. Pauline R. Yu is the divisional dean.

Life Sciences

Faculty and students in the Division of Life Sciences play an essential role in unlocking the secrets and mechanisms of life at the most fundamental level. The geography of Southern California is very conducive to life sciences research. An area as ecologically rich and diverse as Southern California is a natural laboratory for environmental physiologists and plant and animal ecologists.

Scientists in biology, microbiology and molecular genetics, and molecular biology conduct research in cell and developmental biology. Neurochemists, neurophysiologists, psychobiologists, and behavior biologists research the underlying mechanism of the neural basis of behavior. Physiological scientists examine the regulation of human movement, neural control of breathing, and environmental conditions such as weightlessness, which affect bone and muscle structure and function. Cognitive scientists are concerned with the nature of knowledge — how people learn, remember, associate, and think, and how computers relate to thought processes. Frederick A. Eiserling is the divisional dean.

Physical Sciences

Departments in the Division of Physical Sciences present the results of mankind's efforts to understand the physical aspects of the natural sciences, which include the study and understanding of the properties and characteristics of matter and energy; the science of numbers and order; studies of the origin and structure of the universe, solar system, and Earth; and climatic change. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, and observational.

Faculty and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interactions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas; and high-energy accelerator physics. Roberto Peccei is the divisional dean.

Social Sciences

Departments in the Division of Social Sciences are guided by the ideal of creating a deeper understanding of cultures and heritages and helping young people make sense of the rapidly changing world. By studying and comparing diverse cultures with their own, students gain self-knowledge and global awareness.

Anthropology students study human communities and social systems, archaeological records, and artifacts. Communication studies students learn about the mass media of today and their technological advances, social

uses, and abuses. Leading economists investigate the applications of economic principles to business decisions. The geographic purview extends from studying the effects of location on human behavior to the Earth's ecosystem. Courses in history bring about understanding of the forces that have shaped the many societies and cultures of this country and the world. Political scientists study the motivations of political behavior and the relations between today's superpowers. UCLA sociologists examine subjects ranging from the everyday interaction of people to the complexities of social organizations. Scott L. Waugh is the divisional dean.

Majors and Degrees Offered

African Area Studies (M.A.)
 African Languages (B.A.)
 Afro-American Studies (B.A., M.A.)
 American Indian Studies (M.A.)
 American Literature and Culture (B.A.)
 Ancient Near Eastern Civilizations (B.A.)
 Anthropology (B.A., B.S., M.A., Ph.D.)
 Applied Linguistics (C.Phil., Ph.D.)
 Applied Linguistics and Teaching English as a Second Language (M.A.)
 Applied Mathematics (B.S.)
 Arabic (B.A.)
 Archaeology (M.A., C.Phil., Ph.D.)
 Art History (B.A., M.A., Ph.D.)
 Asian American Studies (B.A., M.A.)
 Astronomy (M.S., M.A.T., Ph.D.)
 Astrophysics (B.S.)
 Atmospheric, Oceanic, and Environmental Sciences (B.S.)
 Atmospheric Sciences (M.S., C.Phil., Ph.D.)
 Biochemistry (B.S.)
 Biochemistry and Molecular Biology (M.S., C.Phil., Ph.D.)
 Biology (B.S., M.A., C.Phil., Ph.D.)
 Business Economics (B.A.)
 Chemistry (B.S., M.S., C.Phil., Ph.D.)
 Chemistry/Materials Science (B.S.)
 Chicana and Chicano Studies (B.A.)
 Chinese (B.A.)
 Classical Civilization (B.A.)
 Classics (M.A., C.Phil., Ph.D.)
 Cognitive Science (B.S.)
 Communication Studies (B.A.)
 Comparative Literature (B.A., M.A., C.Phil., Ph.D.)
 Cybernetics (B.S.)
 Earth Sciences (B.A.)
 East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
 East Asian Studies (B.A.)
 Ecology, Behavior, and Evolution (B.S.)
 Economics (B.A., M.A., C.Phil., Ph.D.)
 Economics/International Area Studies (B.A.)
 English (B.A., M.A., C.Phil., Ph.D.)
 English/Greek (B.A.)
 English/Latin (B.A.)
 European Studies (B.A.)
 Folklore and Mythology (M.A., Ph.D.)
 French (B.A., M.A., C.Phil., Ph.D.)
 French and Linguistics (B.A.)
 General Chemistry (B.S.)
 General Mathematics (B.S.)
 General Physics (B.A.)
 Geochemistry (M.S., C.Phil., Ph.D.)
 Geography (B.A., M.A., C.Phil., Ph.D.)
 Geography/Environmental Studies (B.A.)
 Geology (B.S., M.S., C.Phil., Ph.D.)

Geology — Engineering Geology (B.S.)
 Geology — Paleobiology (B.S.)
 Geophysics — Applied Geophysics (B.S.)
 Geophysics and Space Physics (B.S., M.S., Ph.D.)
 German (B.A.)
 Germanic Languages (M.A., C.Phil., Ph.D.)
 Greek (B.A., M.A.)
 Greek and Latin (B.A.)
 Hebrew (B.A.)
 Hispanic Languages and Literatures (C.Phil., Ph.D.)
 History (B.A., M.A., C.Phil., Ph.D.)
 History/Art History (B.A.)
 Indo-European Studies (C.Phil., Ph.D.)
 International Development Studies (B.A.)
 Iranian Studies (B.A.)
 Islamic Studies (M.A., C.Phil., Ph.D.)
 Italian (B.A., M.A., C.Phil., Ph.D.)
 Italian and Special Fields (B.A.)
 Japanese (B.A.)
 Jewish Studies (B.A.)
 Korean (B.A.)
 Latin (B.A., M.A.)
 Latin American Studies (B.A., M.A.)
 Linguistics (B.A., M.A., C.Phil., Ph.D.)
 Linguistics and Anthropology (B.A.)
 Linguistics and Computer Science (B.A.)
 Linguistics and East Asian Languages and Cultures (B.A.)
 Linguistics and English (B.A.)
 Linguistics and French (B.A.)
 Linguistics and Italian (B.A.)
 Linguistics and Philosophy (B.A.)
 Linguistics and Psychology (B.A.)
 Linguistics and Scandinavian Languages (B.A.)
 Linguistics and Spanish (B.A.)
 Marine Biology (B.S.)
 Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
 Mathematics/Applied Science (B.S.)
 Mathematics/Economics (B.S.)
 Mathematics of Computation (B.S.)
 Microbiology and Molecular Genetics (B.S., M.A., Ph.D.)
 Molecular Biology (Ph.D.)
 Molecular, Cell, and Developmental Biology (B.S., M.A., Ph.D.)
 Music History (B.A.)
 Musicology (M.A., C.Phil., Ph.D.)
 Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
 Near Eastern Studies (B.A.)
 Neuroscience (B.S.)
 Philosophy (B.A., M.A., C.Phil., Ph.D.)
 Physics (B.S., M.S., M.A.T., Ph.D.)
 Physiological Science (B.S., M.S., Ph.D.)
 Plant Biology (B.S.)
 Political Science (B.A., M.A., C.Phil., Ph.D.)
 Portuguese (B.A., M.A.)
 Psychobiology (B.S.)
 Psychology (B.A., M.A., C.Phil., Ph.D.)
 Public Administration (M.P.A.)
 Religion, Study of (B.A.)
 Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
 Russian Language and Literature (B.A.)
 Russian Studies (B.A.)
 Scandinavian (M.A.)
 Scandinavian Languages (B.A.)
 Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)

Sociology (B.A., M.A., C.Phil., Ph.D.)
 Spanish (B.A., M.A.)
 Spanish and Linguistics (B.A.)
 Spanish and Portuguese (B.A.)
 Statistics (M.S., Ph.D.)
 Teaching English as a Second Language (M.A.)
 Women's Studies (B.A.)

Note: The following master's degree programs require application to the doctoral degree program: English, Philosophy, Physics, Psychology. New students are not being admitted to the M.A.T. in Astronomy or the M.P.A. in Public Administration at this time.

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, students are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses they are relatively free to concentrate attention on one field of interest: their major.

Students are expected to select a major by the beginning of their junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet a special need (individual major). Preparation for a major often requires prior completion of courses known as "requisites."

Counseling Services

The Division of Honors and Undergraduate Programs has three counseling units to advise undergraduate students: (1) AAP Counseling Service, 1209 Campbell Hall, (310) 825-1481; (2) Honors Counseling Service, A311 Murphy Hall, (310) 825-1553; and (3) College Counseling Service, A316 Murphy Hall, (310) 825-3382. Staff members are specially trained to assist students with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance their university education.

Declaring a Major

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as "undeclared." These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest.

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When they are ready to do so, they obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs their intended major.

Assessing Progress toward the Degree

One responsibility of a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that students read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements needed. Departmental counselors can advise students regarding progress and completion of the major requirements. It is important that students maintain an accurate assessment of progress toward the degree by utilizing departmental and College Counseling Service resources. To assist in degree planning, the College Counseling Service provides computerized Degree Progress Reports (DPRs) on request.

Minimum Progress

UCLA is a full-time institution, and it is expected that students complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per term. Normal progress (toward graduation in four years) may be defined as the completion of 45 units per year.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms are placed on probation, and students who do not pass at least 32 units during three consecutive terms are subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. Students who have been away from the University for several terms should consult with their major department or curriculum adviser concerning the requirements under which they are to graduate.

There are three categories of majors in the College of Letters and Science: departmental majors, interdepartmental majors, and individual majors.

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 98 departmental majors currently offered by the college.

Interdepartmental Majors

An interdepartmental major consists of at least 13 related courses, of which at least 11 are upper division and no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 24 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Detailed descriptions of the interdepartmental majors are given in the Curricula and Courses section of this catalog.

Individual Majors

If students have some unusual but definite academic interest for which no suitable major is offered at the University and have completed at least three terms of work (nine courses) at the University with a grade-point average of 3.4 or better, they may plan an individual major. The consent of the Division of Honors and Undergraduate Programs and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. For further details about individual majors, contact the Honors Programs Office, A311 Murphy Hall, (310) 825-1553.

Returning Students and Their Majors

Students returning to the University to resume their studies after an absence of several years may find their previous major area of study no longer available. They then must select a current major in which to complete their studies. Consult the College of Letters and Science Counseling Service for assistance.

Minors

Students may choose from 46 different college/school minors, each of which must be taken jointly with an organized departmental or interdepartmental major. For a list of minors see the Undergraduate Study section. Detailed descriptions of the minors are given in the Curricula and Courses section of this catalog.

Specializations

Students may choose from eight different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance their work in certain areas. Each of these specializations must be taken jointly with an organized departmental or interdepartmental major. For a list of specializations see the Undergraduate Study section. Descriptions of the specializations are given in the Curricula and Courses section of this catalog. For descriptions of the Computing specialization, see the programs in anthropology, cybernetics, economics, geography, linguistics, mathematics, mathematics/economics, organismic biology, ecology, and evolution, psychology, and sociology.

Life Sciences Core Curriculum

For information on the life sciences core curriculum, see the Curricula and Courses section of this catalog.

Student Research Program

For information on the Student Research Program (SRP), see Alternative Academics in the Undergraduate Study section of this catalog.

Double Majors

Students in good academic standing may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and students must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. Students must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

Changing Majors

Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if students are on probation or have begun their last term.

Students who fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per term. For exceptions, see Minimum Progress earlier in this section. Students may carry four and one-half courses (18 units) without petition. After the first term, students may petition to enroll in as many as five courses if they attained at least a B average the preceding term in a program of at least three graded courses. First-term transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

Requirements for Bachelor's Degrees

Each student must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on department requirements, see the Curricula and Courses section of this catalog.

Structure of a Degree

Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor's degree:

University Requirements

- (1) Subject A or English as a Second Language (ESL)
- (2) American History and Institutions

College Requirements

- (1) English Composition or ESL Composition
- (2) Quantitative Reasoning
- (3) Foreign Language
- (4) General Education Requirements

Department Requirements

- (1) Preparation for the Major
- (2) Major Requirements

Electives

The remaining units, defined as electives, are courses which vary according to student interests and goals. When selecting courses, keep the following degree criteria in mind:

Scholarship

Students must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of their major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Academic Residence Requirement

See Academic Residence Requirements below.

Upper Division Unit Requirement

At least 60 units must be upper division (numbered 100-199) for students entering Fall Quarter 1999 and thereafter.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

College Requirements

The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, academic residence, English composition, quantitative reasoning, foreign language, and general education requirements.

Unit Requirements

Students must satisfactorily complete for credit a minimum of **180 units** for the bachelor's degree. At least **60** of the 180 units must be **upper division (numbered 100-199)** for students entering Fall Quarter 1999 and thereafter. A maximum of 216 (228 for double majors and special programs) units is allowed. Students with advanced placement (transfer) credit may exceed the unit maximum by the amount of that credit.

Scholarship and Major Requirements

Students must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor's degree. They must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Academic Residence Requirements

Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. **No more than 16 of the 68 units may be completed in UCLA Summer Sessions.** While enrolled in the college students must complete at least 10 upper division courses (40 units), including six courses in the major. These academic residence requirements apply to all students, both continuing and transfer.

College Writing Requirement

Note: Students must complete the University's Subject A or English as a Second Language (ESL) requirement prior to completing the college's writing requirement.

Effective Fall Quarter 1999, all new students admitted to the College of Letters and Science are required to complete a two-quarter English Composition Writing I and Writing II requirement. Continuing and returning students fulfill the requirements in effect prior to Fall Quarter 1999.

Two courses in English composition are required for graduation. Both courses must be taken for a letter grade, and students must receive grades of C or better (C- grades are not acceptable). The Writing I requirement must be satisfied by completing English Composition 3, or an equivalent course approved by the Letters and Science Faculty Executive Committee, within the first three quarters of enrollment.

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Tests in English; a combination of a score of 720 or better on the SAT II Subject Test in Writing and superior performance on the English Composition 3 Proficiency Examination; or, for students whose native language is not English who satisfy the Subject A requirement with English as a Second Language 35, successful completion of English as a Second Language 36 or an equivalent.

The Writing II course is selected from a list of courses approved by the Faculty Executive Committee. Consult the College of Letters and Science Counseling Service for an updated list. The Writing II course may also be applied toward the general education requirements or preparation for the major.

Transfer Students

Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum will have satisfied both parts of the English Composition requirement.

No transfer student is admitted to the college without completing, with a grade of C or better (a grade of C- is not acceptable), a college-level writing course that the Office of Undergraduate Admissions and Relations with Schools accepts as equivalent to English Composition 3.

English as a Second Language (ESL) Students

Students whose native language is not English may satisfy the English Composition requirement by completing English as a Second Language 36 with a grade of C or better (C- or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

Quantitative Reasoning and Foreign Language Requirements

In the College of Letters and Science students must demonstrate basic skills in quantitative reasoning and satisfy the foreign language requirement.

Note: All courses taken to satisfy these requirements must be completed with a grade of Passed or C or better.

Quantitative Reasoning

May be satisfied by achieving an SAT I mathematics score of 600 or better, an SAT II mathematics subject test score of 550 or better, or by completing one of the following courses: Anthropology M80, Biostatistics 100A, 100B, Computer Science 10C, 10F, Economics M40, Geography M40, Mathematics 2 (or any higher numbered course except 38A, 38B, and 104), Philosophy 31, Political Science 6, Program in Computing 10A, 10B, 10C, Sociology M18, 109A, Statistics 10, M11, M12, M21A, M21C.

Foreign Language

May be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA's level three or above **OR** (2) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit **OR** (3) presenting a UCLA foreign language departmental examination score indicating competency through

Note: All UCLA course equivalents consist of lower division advanced placement units. Students may not repeat for units or grade points an AP Test credit that has been given UCLA course number equivalency (e.g., History 13A-13B-13C).

level three (consult the *Schedule of Classes* for times and places of these regularly scheduled examinations).

If students wish to demonstrate proficiency in a language which is taught in a UCLA department but for which there is no scheduled examination, they should contact the appropriate department to arrange for one. Students wishing to take an examination in a language not taught at UCLA should contact a college counselor.

The following language courses may be used to fulfill the foreign language requirement:

African Languages (Linguistics) 1A-1B-1C or 15 (Swahili); 7A-7B-7C or 17 (Zulu); 11A-11B-11C or 25 (Yoruba); 31A-31B-31C or 35 (Bambara); 41A-41B-41C or 45 (Hausa); 51A-51B-51C (Amharic)

Afrikaans (Germanic Languages) 105A, 105B

Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B-140C (Sumerian)

Arabic (Near Eastern Languages) 1A-1B-1C

Armenian (Near Eastern Languages) 101A-101B-101C or 104A-104B-104C

Berber (Near Eastern Languages) 101A-101B-101C

Bulgarian (Slavic Languages) 103A-103B-103C

Chinese (East Asian Languages) 1, 2, and 3, or 1A and 2A, or 3R or 8

Czech (Slavic Languages) 102A-102B-102C

Dutch (Germanic Languages) 103A-103B, and 103C, or 104A-104B

French 1, 2, and 3, or 8

German (Germanic Languages) 1, 2, and 3, or 8

Greek (Classics) 1, 2, and 3, or 16; 15 (Modern Greek)

Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C

Hungarian (Slavic Languages) 101A-101B-101C

Indigenous Languages of the Americas (Linguistics) 17 or 18A-18B-18C (Quechua)

Iranian (Near Eastern Languages) 1A-1B-1C or 20A-20B-20C (Persian)

Italian 1, 2, and 3, or 1A and 2A

Japanese (East Asian Languages) 1, 2, and 3, or 8

Korean (East Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 8

Latin (Classics) 1, 2, and 3, or 16

Polish (Slavic Languages) 102A-102B-102C

Portuguese (Spanish and Portuguese) 1, 2, 3

Romanian (Slavic Languages) 101A-101B-101C or 104

Russian (Slavic Languages) 1, 2, and 3, or 10 or 11A-13B (two units each) or 15A-15B

Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)

Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)

Serbian/Croatian (Slavic Languages) 103A-103B-103C

South and Southeast Asian Languages (Applied Linguistics and Teaching English as a Second Language) 40A-40B-40C (Hindi); 50A-50B-50C (Vietnamese); 60A-60B-60C (Thai); 70A-70B-70C (Tagalog)

Spanish (Spanish and Portuguese) 1, 2, and 3, or 2A and 3A

Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)

Ukrainian (Slavic Languages) 101A-101B-101C

Yiddish (English) 101A, 101B, and 101C, or 102B

General Education (GE) Requirements

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college — humanities, physical sciences, social sciences, and life sciences — students are encouraged to explore the different possibilities for further university study. Whether or not students have a specific educational goal, general education requirements are designed to broaden their intellectual perspective and to set them on the path to becoming educated members of society.

The set of GE course requirements students follow is specified on the list labeled GE Course List. They must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

All students entering UCLA in Fall Quarter 1999 with 45 or more quarter units are not required to complete the complementary course requirement in physical sciences.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

General Education Clusters

General education clusters, available to entering freshmen only, are an option for satisfying general education requirements. The clusters span three quarters and are interdisciplinary team-taught courses designed to introduce students to multiple areas of knowledge. They focus on a common topic and are organized in such a way that students can explore how different disciplines converge and diverge in their approach to a particular problem.

General education clusters are taught by some of the University's most distinguished faculty and are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. During Fall and Winter Quarters, instruction in the clusters consists of lecture courses taught in concert with discussion sections. In Spring Quarter students enroll in one of a number of small satellite seminars whose topics are related to the cluster theme.

For the current cluster course offerings, refer to the general education website at <http://www.college.ucla.edu/ge/clusters.htm>.

Course Exemptions

Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Course Substitutions

Two lower division seminars which have been approved for GE credit may be substituted for courses on the GE Course List. Students may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the *General Education Handbook*, and descriptions are listed in the quarterly *Schedule of Classes* under Special Programs.

Advanced Placement Credit

For application of advanced placement (AP) credit on the general education requirements, see the Advanced Placement chart or consult a college counselor.

Reciprocity with Other UC Campuses

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the college's GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a college counselor regarding eligibility for this option.

Intersegmental General Education Transfer Curriculum

Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by complet-

ing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although general education or transfer core courses are graduation requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the College of Letters and Science general education requirements.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdepartmental majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

A. Humanities

A1. Literature

African Languages
American Literature and Culture
Arabic
Chinese
Comparative Literature
English

College of Letters and Science GE Course List

Courses marked with an asterisk (e.g., Honors Collegium *1. Transformations of the West in the 20th Century) are listed in more than one category and can fulfill GE requirements in only one of the cross-listed categories.

See the Quantitative Reasoning and Foreign Language Requirements section for courses to fulfill those requirements.

Completion of a general education cluster earns the equivalent of four general education courses distributed among the four categories of GE requirements. Specific GE credit may vary from year to year based on the cluster course content. Inquire at the General Education Office, A265 Murphy Hall, or refer to the general education website at <http://www.college.ucla.edu/ge/clusters.htm> for specific general education application.

All honors sections of courses listed below also fulfill GE requirements.

A. Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

A1. Literature

Classics

40. Survey of Greek Literature in Translation

41. Survey of Latin Literature in Translation

Comparative Literature (formerly Humanities)

1A. World Literature: Antiquity to Early Middle Ages

1B. World Literature: Late Middle Ages to the 17th Century

1C. World Literature: Age of Enlightenment to the 20th Century

1D. Great Books from the World at Large

2A. Survey of Literature: Antiquity to Early Middle Ages

2B. Survey of Literature: Late Middle Ages to the 17th Century

2C. Survey of Literature: Age of Enlightenment to the 20th Century

2D. Survey of Literature: Great Books from the World at Large

English

10A. English Literature to 1660

10B. English Literature, 1660 to 1832

70. Major British Authors before 1800

75. Major British Authors, 1800 to the Present

80. Major American Authors

85. The American Novel

88J. Lower Division Seminar: Introduction to Asian American Fiction

88L. Lower Division Seminar: Poetics of Myth

88M. Lower Division Seminar: Three Philosophical Novels

88M. Lower Division Seminar: When Myth Systems Collide -- 20th-Century Literature and Culture Confront Traditional Myths

90. Shakespeare

95A. Introduction to Poetry

95B. Introduction to Drama

95C. Introduction to Fiction

96. The Short Story in England and America

Folklore and Mythology

88. Poetics of Myth

French

12. Introduction to Study of French Literature (in French)

114A, 114B, 114C. Survey of French Literature (in French)

German (Germanic Languages)

50A. Masterworks of German Literature in Translation: Medieval Period through Classicism

50B. Masterworks of German Literature in Translation: Romanticism to the Present

- 140A. Introduction to German Poetry (in German)
 140B. Introduction to German Drama (in German)
 140C. Introduction to German Narrative Prose (in German)

Honors Collegium

- *1. Transformations of the West in the 20th Century
 *9. Greeks and Barbarians: Multiculturalism in the Ancient World
 16. Contemporary Fiction and Psychology of the Self
 17. Archetypal Heroines
 21. Rise and Fall of Modernism
 *28. Misleading Mirror: Self-Portraits in Word and Image
 33. Art of Engagement
 47. Literature of Colonization and Colonization of Literature
 *50A. Greek Views of Humanity
 *52. Good, Better, Best Western: Approaches to the 19th-Century American Frontier
 59. Literature and Culture of the American South
 *64. Encounters with the Other: European Colonialism and Representation
 *69. American Writing, American Photography
 74. Life Crises in Literature
 80. Literature of Diversity: Cultural Experience in America
 83. Politics and Rhetoric of Literature
 86. Federico Garcia Lorca and Literature of New York

Italian

- 50A. Masterpieces of Italian Literature in English: Middle Ages and Renaissance
 50B. Masterpieces of Italian Literature in English: Baroque Period to the Present

Japanese (East Asian Languages)

60. Image of Japan: Humanistic Tradition

Portuguese (Spanish and Portuguese)

- 40A, 40B. Portuguese, Brazilian, and African Literature in Translation
 120A, 120B. Introduction to Portuguese Literature (in Portuguese)
 130A, 130B. Brazilian Literature and Identity: Introduction (in Portuguese)

Russian (Slavic Languages)

25. The Russian Novel in Translation

Scandinavian

50. Introduction to Scandinavian Literature

Spanish (Spanish and Portuguese)

- 60A, 60B, 60C. Hispanic Literatures in Translation
 88A. Lower Division Seminar: Reaching 2001 (Fantasy of Reality and Reality of Fantasy)

A2. Philosophy

Honors Collegium

32. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences
 *50A. Greek Views of Humanity

Philosophy

1. Beginnings of Western Philosophy
 2. Introduction to Philosophy of Religion
 4. Philosophical Analysis of Contemporary Moral Issues
 5A. Philosophy in Literature
 6. Introduction to Political Philosophy
 7. Introduction to Philosophy of Mind
 8. Introduction to Philosophy of Science
 21. Skepticism and Rationality
 22. Introduction to Ethical Theory

A3. Language and Linguistics

Classics

55. Origins and Nature of English Vocabulary

English

- 88K. Lower Division Seminar: Introduction to English Etymology

Honors Collegium

56. Language as a Window to the Mind

Language

Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

Linguistics

1. Introduction to Study of Language
 2. Language in the U.S.

10. Structure of English Words

20. Introduction to Linguistics

Portuguese (Spanish and Portuguese)

- M35. Spanish, Portuguese, and Nature of Language

Spanish (Spanish and Portuguese)

- M35. Spanish, Portuguese, and Nature of Language

A4. Culture and Civilization

Ancient Near East (Near Eastern Languages)

10. Jerusalem: The Holy City

Art History

- *88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

Chicana and Chicano Studies

- 10A. Introduction to Chicano Life and Culture

Chinese (East Asian Languages)

50. Chinese Civilization

Classics

- *10. Survey of Classical Greek Culture

- *20. Survey of Roman Civilization

30. Introduction to Classical Mythology

- 51A. Art and Archaeology of Classical World: Greece

- 51B. Art and Archaeology of Classical World: Rome

East Asian Languages and Cultures

60. Introduction to Buddhism

Folklore and Mythology

15. Introduction to American Folklore Studies

French

14. Introduction to French Civilization

41. French Cinema and Culture

German (Germanic Languages)

- 100A. German Civilization and Culture before 1700

- 100B. Modern German Civilization and Culture from 1700 to 1919

- 100C. German Civilization and Culture in the 20th Century

History

- *9A. Introduction to Asian Civilizations: History of India

- *9C. Introduction to Asian Civilizations: History of Japan

- *9D. Introduction to Asian Civilizations: History of the Near and Middle East

- *10A, *10B. Introduction to Civilizations of Africa

- *11A, *11B. History of China

Honors Collegium

- *1. Transformations of the West in the 20th Century

4. Surrealist Challenge

- *9. Greeks and Barbarians: Multiculturalism in the Ancient World

- *13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s

15. America, 1963 to 1973: Culture and Counterculture

18. Culture, Conquest, and Communication: Fatal Attractions

- *19. Interdisciplinary Perspectives on Production and Consumption of Popular Music

- *26. The Bible as Political Theory

- *30. Vietnam War and American Culture

43. Male Identity and Sexuality in Ancient Rome

- *50A. Greek Views of Humanity

- 50B. Gender and Race: Constructions of Greek Political Thought

- *64. Encounters with the Other: European Colonialism and Representation

- *65. Carnival and Festivity

- *69. American Writing, American Photography

77. Intellectual Life in Japan: Classics, Moderns, and Postmoderns

78. Writing in Age of Revolution

79. Rhetoric of Rule: Spectacle and Image Making in Reign of the Sun King and Presidents Reagan and Clinton

- *96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

Italian

- 42A. Italy through the Ages, in English: Holy Roman Empire to Sack of Rome

- 42B. Italy through the Ages, in English: Late Renaissance to Postmodern Period

46. Italian Cinema and Culture

Japanese (East Asian Languages)

50. Japanese Civilization

Jewish Studies (Near Eastern Languages)

10. Social, Cultural, and Religious Institutions of Judaism

Korean (East Asian Languages)

50. Korean Civilization

Near Eastern Languages

50A. Introduction to Near Eastern Languages and Cultures: Ancient Near East
50B. Introduction to Near Eastern Languages and Cultures: Medieval Near East
50C. Introduction to Near Eastern Languages and Cultures: Modern Near East

Portuguese (Spanish and Portuguese)

M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
46. Brazilian Culture and Civilization

Russian (Slavic Languages)

30. Russian Literature and World Cinema
99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century

Slavic (Slavic Languages)

99. Introduction to Slavic Civilization

Spanish (Spanish and Portuguese)

M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

A5. The Arts

Afro-American Studies

M110A, M110B. African American Musical Heritage

Art History

50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Introduction to African Art
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art
*88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

Chicana and Chicano Studies

M108A. Music of Latin America

Classics

42. Cinema and the Ancient World

Design

10. Nature of Design

Ethnomusicology

20A, 20B, 20C. Musical Cultures of the World
M108A, 108B. Music of Latin America
M110A, M110B. African American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music

Film and Television

106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change

Folklore and Mythology

M154A, M154B. African American Musical Heritage

Honors Collegium

*13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s
*28. Misleading Mirror: Self-Portraits in Word and Image
*29. Critical Vision: History of Art as a Social and Political Commentary
34. Film and Society: The Hollywood Myth of Ancient Rome

Music

15. Art of Listening

Music History

2A, 2B. Introduction to the Literature of Music

5. History of Rock and Roll

7. Film and Music

13. 20th-Century Music of the Western World

133. Bach

134. Beethoven

135A, 135B, 135C. History of Opera

Theater

102E. Theater of Non-European World
104C. History of American Theater: WWI to the Present

World Arts and Cultures

134. History of Dance in Culture and Performance
135. Dance in the U.S.
181A. Dance Cultures of Asia
182. Dance in Africa and the African Diaspora
C187. Dance in Native American Cultures

B. Physical Sciences

Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

Astronomy

2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe
4. Universe of Stars and Stellar Systems
5. Life in the Universe
6. Cosmology: Our Changing Concepts of the Universe
81. Astrophysics I: Stars and Nebulae
82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology
88A. Lower Division Seminar: Cosmic Evolution

Atmospheric Sciences

2, 2E. Air Pollution
3, 3E. Introduction to the Atmospheric Environment
4. California Weather and Climate
5. Climates of Other Worlds
6, 6E. Climate and Climatic Change
10. Introduction to the Earth System

Chemical Engineering

2. Technology and the Environment

Chemistry and Biochemistry

2. Introductory Chemistry
14A. Chemical Structures and Equilibria
14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy
14BL. General and Organic Chemistry Laboratory
15. Survey of Organic Chemistry and Biochemistry
15L. Laboratory in Elementary Organic Chemistry and Biochemistry
20A. Chemical Structure
20B. Chemical Energetics and Change
20L. General Chemistry Laboratory

Civil and Environmental Engineering

3. Fundamentals of Environmental Engineering Science

Computer Science

2. Great Ideas In Computer Science

Earth and Space Sciences

1. Introduction to Earth Science
2. Earth History
5. Environmental Geology of Los Angeles
8. Earthquakes
9. Origin and Evolution of Solar System
*15. Introduction to Oceanography
*20. Natural History of Southern California

Geography

1. Physical Environment

Honors Collegium

*5. Science and the Human Condition
*11. Galileo and the Scientific Revolution from the 17th to 21st Century
*24. 21st Century: Technology, Society, and Ethics
35. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life

44. Trail of Light

*57. Life and Sciences of Complexity

67. Structure of Physical Reality

73. Elementary Particles in the Universe

75. On Nature of Things: Comparative Reading of Poem by Lucretius and Modern Science

85. Science and Art: Concepts and Connections

99. Case-Based Astrophysics with Computer Visualization

Mathematics

2. Finite Mathematics

3A, 3B. Calculus for Life Sciences Students

31A, 31B. Calculus and Analytic Geometry

31E. Calculus for Economics Students

Physics

1A. Physics for Scientists and Engineers: Mechanics

1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields

1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity

3A. General Physics: Mechanics of Solids and Fluids

3B. General Physics: Heat, Sound, Electricity and Magnetism

3C. General Physics: Light, Relativity, and Modern Physics

6A. Physics for Life Sciences Majors: Statics and Dynamics

6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics

6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport

10. Physics

Complementary courses include Astronomy 2A/2B, 3/4, 3/5, 3/6, 81/82; Atmospheric Sciences 2/3, 2E/3E, 3/4, 3/5, 3/6, 3E/6E, 5/6; Chemistry and Biochemistry 14A/14B, 15/20A, 20A/20B; Earth and Space Sciences 1/2, 1/8, 1/9, 1/15, 1/Geography 1, 20/Geography 1; Mathematics 3A/3B, 3A/31B, 3A/31E, 3B/31A, 31A/31B, 31A/31E; Physics 1A/1B, 1A/1C, 1B/1C, 3A/3B, 6A/6B, 6A/6C, 6B/6C.

Courses with a laboratory and/or demonstration component include Astronomy 2A, 2B, 3, 81, 82, Atmospheric Sciences 2, 3, 3E, 4, 6E, Chemistry and Biochemistry 14BL, 15L, 20L, Earth and Space Sciences 1, 2, 15, 20, Geography 1, Honors Collegium 67, Physics 1A, 1B, 1C, 3A, 3B, 3C, 6A, 6B, 6C, 10.

C. Social Sciences

Four courses (two each from Groups C1 and C2):

C1. Historical Analysis

Two courses from a single sequence are recommended:

Classics

*10. Survey of Classical Greek Culture

*20. Survey of Roman Civilization

History

1A, 1B, 1C. Introduction to Western Civilization

*2A. Power, Ethics, and Technological Change

*2B. Social Knowledge and Social Power

3A, 3B, 3C. Introduction to History of Science

3D. Themes in History of Medicine

4. Introduction to History of Religions

8A. Colonial Latin America

8B. Political Economy of Latin American Underdevelopment, 1750 to 1930

8C. Latin American Social History

*9A. Introduction to Asian Civilizations: History of India

*9C. Introduction to Asian Civilizations: History of Japan

*9D. Introduction to Asian Civilizations: History of the Near and Middle East

*10A, *10B. Introduction to Civilizations of Africa

*11A, *11B. History of China

13A. History of the U.S. and Its Colonial Origins: Colonial Origins and First Nation Building Acts

13B. History of the U.S. and Its Colonial Origins: 19th Century

13C. History of the U.S. and Its Colonial Origins: 20th Century

20. World History to A.D. 600

21. World History, 1200 to 1800

22. Contemporary World History, 1870 to the Present

Honors Collegium

*2. Comparative Genocide

*3. Historical and Sociological Perspectives on Women and Work

*11. Galileo and the Scientific Revolution from the 17th to 21st Century

*14. History, Science, and Society

42. European Expansion in Age of Columbus

62. Community and Self-Interest in History of American Culture

68. History of Social Thought

*71. History through Clothes

84. Los Angeles, 1900 to 2000: History of a 20th-Century City

90. French Revolution: Ideologies and Images

95. Art, Politics, and Social Change in 19th-Century England and France

*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

Political Science

10. Introduction to Political Theory

C2. Social Analysis**Afro-American Studies**

M5. Social Organization of Black Communities

American Indian Studies

10. Introduction to American Indian Studies

Anthropology

8. Archaeology: An Introduction

9. Culture and Society

33. Culture and Communication

M70. Politics of Reproduction

Asian American Studies

21. Asians and Pacific Islanders in American Society

Chicana and Chicano Studies

10B. Chicanos in American Society

Communication Studies

10. Introduction to Communication Studies

88C. Lower Division Seminar: Future of Mass Communication

Economics

1, 2. Principles of Economics

5. Introductory Economics

Geography

3. Cultural Geography

4. Globalization: Regional Development and World Economy

History

*2A. Power, Ethics, and Technological Change

*2B. Social Knowledge and Social Power

Honors Collegium

*2. Comparative Genocide

*3. Historical and Sociological Perspectives on Women and Work

7A, 7B. Urban Poverty and Public Policy in the U.S.

10. Social Classification and Categorization

12. Thinking about Rights

*19. Interdisciplinary Perspectives on Production and Consumption of Popular Music

22. Work, Inequality, and Changing American Political Economy

23. Globalization

*24. 21st Century: Technology, Society, and Ethics

*26. The Bible as Political Theory

*29. Critical Vision: History of Art as a Social and Political Commentary

*30. Vietnam War and American Culture

36. Ethnicity and Social Class in America

37A. Ethnicity, Social Class, and Social Mobility in the U.S. and Other Societies

37B. Ethnicity, Social Class, and Social Mobility in Los Angeles

46. Masculinity, Sexuality, and Patriarchy

48. Politics of Reproduction

49. Evidence in Law, Science, History, and Journalism

51. Childhood in Historical and Sociological Perspective

*52. Good, Better, Best Western: Approaches to the 19th-Century American Frontier

53. Sociology of Food and Eating

54. Human Lives: Psychocultural Perspective

58. Apartheid and Social Stratification in South Africa: Theory and Data

60. Immigration and New Second Generation

61. Social Theory in the 20th Century

*65. Carnival and Festivity

*71. History through Clothes

76. Race, Class, and Gender

82. Community and Labor Development from Ground Up

*87. Humans and Other Animals

89. Freud, Fairytales, and Feminism

*92. Genes, Genomics, and Internet

*94. Historic Roots of Healing Arts

97. Issues in American Foreign Policy: Methodology of Assessment

M119. Nuclear Weapons: Critical Decisions

Lesbian, Gay, Bisexual, and Transgender Studies

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

Organismic Biology, Ecology, and Evolution

*11. Biomedical Research Issues in Minority Communities

Policy Studies

M116. Nuclear Weapons: Critical Decisions

Political Science

20. World Politics

30. Introduction to Political Economy

40. Introduction to American Politics

50. Introduction to Comparative Politics

Psychology

10. Introductory Psychology

*88A. Lower Division Seminar: Stress, Adaptation, and Coping

Social Sciences

20. Racial Minorities in the U.S.

Sociology

1. Introductory Sociology

2. Changing Society and Making History

3. Sociology of Everyday Life

4. Jobs and Careers: Sociological Approach

M5. Social Organization of Black Communities

31. Dilemmas of Third World Development

Women's Studies

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

D. Life Sciences

Three courses from the following, one of which must have a laboratory and/or demonstration component:

Anthropology

7 (Human Evolution) or 12 (Principles of Human Evolution: Comparative Analysis)

10. Principles of Human Evolution: Genetic Basis

Earth and Space Sciences

*15. Introduction to Oceanography

16. Major Events in History of Life

17. Dinosaurs and Their Relatives

*20. Natural History of Southern California

Geography

2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World

5. People and the Earth's Ecosystems

Honors Collegium

*5. Science and the Human Condition

8. Communication among Organisms

*14. History, Science, and Society

25. Human Genome: Prospects for a Super Race?

*57. Life and Sciences of Complexity

63. Emerging Infections and Their Effects on Society: Past, Present, and Future

66. Substance Abuse and the Brain

70. Genetic Engineering in Medicine and Agriculture

*87. Humans and Other Animals

*92. Genes, Genomics, and Internet

*94. Historic Roots of Healing Arts

Life Sciences

1. Evolution, Ecology, and Biodiversity

2. Cells, Tissues, and Organs

3. Introduction to Molecular Biology

4. Genetics

15. Life, Concepts, and Issues

Microbiology and Molecular Genetics

6. Introduction to Microbiology

7. Developments in Biotechnology

Molecular, Cell, and Developmental Biology

30. Biology of Cancer

40. AIDS and Other Sexually Transmitted Diseases

70. Genetic Engineering and Society

80. The Green World: Plant Biology for Now and the Future

88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective

88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications

88F. Lower Division Seminar: Science and Scientists — Expectations and Realities

Organismic Biology, Ecology, and Evolution

10. Plants and Civilization

*11. Biomedical Research Issues in Minority Communities

12. Biodiversity and Extinction: Crisis and Conservation

13. Evolution of Life

21. Field Biology

25. Oceans

50. Desert Life

Physiological Science

3. Introduction to Human Physiology

5. Issues in Human Physiology: Diet and Exercise

6. The Human Machine: Physiological Processes

13. Introduction to Human Anatomy

Psychology

15. Introductory Psychobiology

*88A. Lower Division Seminar: Stress, Adaptation, and Coping

88B. Lower Division Seminar: Feeding, Food Fads, and Fat

Courses with a laboratory and/or demonstration component include Earth and Space Sciences 15, 16, 17, 20, Geography 2, 5, Life Sciences 15, Microbiology and Molecular Genetics 7, Molecular, Cell, and Developmental Biology 80, Organismic Biology, Ecology, and Evolution 10, 21, 50, Physiological Science 3, 5, 13.

General Education Clusters

M1A-M1B-M1C. Global Environment. (Same as Environment M1A-M1B-M1C.) Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

Two life sciences courses

Two physical sciences courses

In addition, the cluster also satisfies the laboratory and/or demonstration component for both life sciences and physical sciences, as well as the complementary course requirement for physical sciences.

20A-20B-20C. Interracial Dynamics in American Culture, Society, and Literature. Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

One humanities/culture and civilization course

Two humanities/literature courses

One social sciences/historical analysis course

21A-21B-21C. History of Modern Thought. Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

One humanities/culture and civilization course

One humanities/philosophy course

One social sciences/historical analysis course

One social sciences/social analysis course

70A-70B-70C. Evolution of Cosmos and Life. Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

Two life sciences courses

Two physical sciences courses

In addition, the cluster also satisfies the laboratory and/or demonstration component for both life sciences and physical sciences, as well as the complementary course requirement for physical sciences.

Credit Limitations

Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final term before graduation. Students should consult a counselor in the College Counseling Service if they have questions.

Subject A

If students do not satisfy the Subject A requirement prior to enrolling at UC, they must pass an approved course or other program prescribed by their UC campus of residence. Only after satisfying the Subject A requirement can they take for transfer credit an English composition course after enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College

After completing 105 quarter units (26.25 courses) toward the degree in all institutions attended, students are allowed no further unit credit for courses completed at a community college.

Physical Education

No more than four units in physical education activities courses may be applied toward the bachelor's degree.

300- and 400-Level Courses

No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

Performance Courses

No more than 12 units of music and/or dance performance courses (Ethnomusicology 91A-91Z, 191A-191Z, Music C90A through 90N, and World Arts and Cultures 71B through 79, C171B through C179) may be applied toward the bachelor's degree whether taken at UCLA or another institution.

Foreign Language

Credit is not allowed for completing a less advanced course in grammar and/or composition after students have completed a more advanced course. College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Programs

Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor's degree.

Advanced Placement (AP) Tests

Advanced Placement (AP) Test credit may not be applied toward a degree unless students had less than 36 units of credit at the time of the examination(s). See the Advanced Placement chart for UCLA course equivalents and credit allowed for general education requirements.

ROTC Courses

For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the requirements for the bachelor's degree; for students contracted in the Military Science Department, 26 units of military science credit may be applied; for students contracted in the Naval Science Department, 26 units of naval science credit may be applied.

Independent Study Courses

No more than two courses (eight units) of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Physics 1A, 2AH, 3A, 6A, 8A, 10

Any two or more courses from Physics 1A, 2AH, 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics

No credit is allowed for more than one lower division course in statistics (Anthropology M80, Economics M40, Geography M40, Political Science 6, Psychology 41, Sociology M18, Statistics 10, M11, M12, M21A, M21C) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program

Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination

Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or UCLA Honors Programs.

Students may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before they may petition for credit by examination in another course. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office, A311 Murphy Hall.

Honors

College Honors

College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

College Honors is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework **or** 36 units of honors coursework that include a senior research project/thesis based on original research **or** 28 units of honors coursework if they entered College Honors as a transfer student. With the assistance of Honors Programs counselors, students integrate this coursework throughout their undergraduate education with other University, college, and major requirements for the bachelor's degree. In this way, these units need not be above and beyond their other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, some preferential preenrollment in classes each term, access to specially designed honors classes, eligibility for unique scholarships and research stipends, counseling on graduate and pre-professional programs, graduate library privileges, and letters of verification for graduate and professional school applications. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA and who file their housing application on time are also offered preferred on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and a combined SAT score of 1,360 or better (on one test date) or an ACT score of 31 or better **or** (2) graduate in the top three percent of their high school class. Entering transfer students are admitted with a transfer GPA of 3.5. Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate.

Students may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Honors Programs Office.

Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places them in the top five percent of College of Letters and Science graduates (GPA of 3.817 or better) for *summa cum laude*, the next five percent (GPA of 3.715 or better) for *magna cum laude*, and the next 10 percent (GPA of 3.566 or better) for *cum laude*. Coursework taken on the Education Abroad Program is applied toward honors at graduation.

The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year (fall, winter, spring, summer) determine eligibility. Students should consult their graduation-year catalog or the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

Provost's Honors

The Provost's Honors list recognizes high scholastic achievement in any one term. The following criteria are used to note Provost's Honors on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Provost's Honors are automatically recorded on the transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility to participate in the college/school honors program. Students must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. Students interested in becoming Departmental Scholars should consult their department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Honors Programs Office in A311 Murphy Hall.

Honors Collegium

The Honors Collegium is a unique and innovative educational alternative of seminars and courses designed primarily for students in their freshman and sophomore years. Some upper division courses are also offered. Refer to Honors Collegium in the Curricula and Courses section of this catalog for a complete description of the program.

Honors Programs Office

The Honors Programs Office, located in A311 Murphy Hall (310-825-1553, 825-3786, <http://www.college.ucla.edu/up/WhoWeAre/Honors/>), provides academic counseling and services for College Honors students, Departmental Scholars, Education Abroad Program students, and students pursuing individual majors. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include a specialized honors curriculum, academic counseling, degree checks, assistance with petitions and, for College Honors students only, letters describing the program to graduate and professional schools.

A variety of scholarships and awards for qualified continuing students is also available.

In addition, the Honors Programs Office administers Phi Beta Kappa (national honor society).

Preparing for a Professional School

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each grouping of courses is to assist students if they plan to apply to a professional school at the end of their sophomore (90 units) or junior (135 units) year.

If students are not accepted by a professional school or plan to receive their degree before entering, they must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as "undeclared" majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Information and counseling on preparing for professional schools and assistance in filing applications and preparing for interviews are available through the Preprofessional Advising Office, A334 Murphy Hall. Workshops, drop-in counseling, reference letter services, and MCAT, DAT, AMCAS, LSAT, GRE, GMAT, and other applications are available. For more information, call (310) 825-1817 or visit the website at <http://www.college.ucla.edu/up/PAO/>.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. Students should determine and satisfy the specific requirements of the dental schools to which they expect to apply.

To be adequately prepared for the predental curriculum, students should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements

(1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements

(1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, 153A, 153L; (2) English Composition 3, English 4 (or upper division composition in place of 4; English Composition 3 taken at UCLA or the equivalent taken at another college satisfies this requirement, but credit for English Composition 3 and/or English 4 through Advanced Placement does not); (3) Life Sciences 1, 2, 3, 4, and two biology courses with laboratory; (4) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C; (5) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and/or music, and philosophy should also be included.

For further information, consult *Admissions Requirements of U.S. and Canadian Dental Schools*, AADS, 1625 Massachusetts Avenue NW, Suite 101, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Preprofessional Advising Office (310-825-1817).

Predental Hygiene Curriculum: Two Years

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at any two- or four-year college institution; the last two years must be taken at the School of Dentistry at the University of California, San Francisco.

Admission to UCSF is by competitive application. The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the *Announcement of the School of Dentistry, UC San Francisco*.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Predental Hygiene Curriculum Requirements

(1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental curriculum); (3) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, 153A, 153L; (4) one year of English which includes English Composition 3; (5) Life Sciences 1, 2, 3, 4; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended. For more information, call the Preprofessional Advising Office at (310) 825-1817.

Premedical Studies: Four Years

If students intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, they should select a major within the College of Letters and Science. *Medical schools have no preference as to major. Students should choose the major in which they are most interested and can do best.* In addition to fulfilling the requirements of the selected major, they should satisfy the specific requirements for medical schools to which they expect to apply.

High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French, German, or Spanish), two units. It is desirable that a course in freehand drawing be taken in high school.

Premedical Curriculum Requirements

The following courses are usually required for admission to the UCLA School of Medicine: (1) two years of college biology/life sciences to include the study of organismic, cellular, molecular, developmental, and genetic biology, including at least one year of laboratory courses and one year of upper division courses (Life Sciences 1, 2, 3, 4, plus additional life sciences courses to meet the general and laboratory coursework requirements); (2) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, 153A, 153L; (3) 12 quarter units of English, including at least one course in English composition (English Composition 3 taken at UCLA or the equivalent taken at another college satisfies this requirement, but credit for English Composition 3 and/or English 4 through Advanced Placement does not; an intermediate or advanced composition course is highly recommended); (4) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, students should consult the following publications: *Medical School Admission Requirements, U.S. and Canada*, Association of American Medical Colleges, 2450 N Street NW, Washington, DC 20037-1126; *The Education of Osteopathic Physicians*, AACOM, 5510 Friendship Boulevard, Suite 310, Chevy Chase, MD 20815-7231; and *The New MCAT Student Manual* (also an AAMC publication available at the above AAMC address). For more information, call the Preprofessional Advising Office at (310) 825-1817.

Prenursing Curriculum

Contact the Preprofessional Advising Office at (310) 825-1817 for information on prenursing curriculum requirements.

Preoptometry Curriculum: Three Years

A three-year program designed to prepare students for admission to optometric schools may be completed in the College of Letters and Science. Students planning to transfer to the School of Optometry at Berkeley should contact Sandy Jaeger, School of Optometry, University of California, Berkeley, CA 94720, (510) 642-9537, as early in their preprofessional studies as possible.

Students are adequately prepared for preoptometric studies if they have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

Specific UC Berkeley School of Optometry Requirements

(1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; (2) English Composition 3, and English 4 or 100; (3) Life Sciences 1, 3; (4) Mathematics 1, 3A, and 3B, or 3A, 3B, and 3C, or 31A, 31B, and Statistics 10; (5) Microbiology and Molecular Genetics 6 or 101; (6) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C; (7) introductory anatomy (Physiological Science 13) and physiology (Organismic Biology, Ecology, and Evolution M166); (8) Psychology 10. Recommended: neuroanatomy, cell physiology, or additional statistics courses.

The balance of the 135 quarter units required for admission may be selected from social sciences, foreign languages, and humanities.

For further information, obtain the booklet *Information for Applicants to Schools and Colleges of Optometry* from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141, or call the Preprofessional Advising Office at (310) 825-1817.

Prepharmacy Curriculum: Two Years

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum students must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, students should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.

Students who have completed the prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy on the San Francisco campus. A personal interview may be required. Applicants should contact the school in early fall of the year preceding the September of proposed admission. Contact the Office of Student Affairs, School of Pharmacy. Applications and admission information may be obtained from the University of California, San Francisco, School of Pharmacy Student Affairs, Box 0150, San Francisco, CA 94143-0150 (415-476-2732).

Prepharmacy Curriculum Requirements

(1) Subject A; (2) American History and Institutions; (3) Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, 130A/130AL, 153A, 153L; (4) English Composition 3, English 4; (5) Life Sciences 1, 2, 3; (6) intermediate algebra and trigonometry (if not completed in high school), Mathematics 3A and 3B, or 31A and 31B; (7) Physics 1A, 1B, and 4AL, or 3A and 3B, or 6A and 6B; (8) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities.

Requirements for schools change on a yearly basis; it is best to check with each individual school for specific requirements. For further information, call the Preprofessional Advising Office at (310) 825-1817.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (Physiological Science and Psychology are commonly selected) and complete the following requisite courses: (1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; (2) Life Sciences 1, 2, 3; (3) Physics 3A, 3B, 3C; (4) introductory anatomy (Physiological Science 13) and physiology (Organismic Biology, Ecology, and Evolution M166); (5) Psychology 10, 115, 127, 130; (6) one course in statistics and one in computing. The req-

quisite courses should be taken for a letter grade; grade-point averages for these courses should not be lower than 3.0, with no grade lower than a C.

Students should write to schools with physical therapy programs early in their sophomore year for specific admission requirements and application deadlines. Information concerning in-state and out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th Street NW, Washington, DC 20005, and the Preprofessional Advising Office (310-825-1817).

Prepublic Health Studies

The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathematics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses each in mathematics, biological sciences, and social sciences, and one course in physical sciences.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school's announcement booklet for additional requirements or recommendations for entry into the various programs of study. Information is available at the Preprofessional Advising Office (310-825-1817).

Prerespiratory Therapy Curriculum: One Year

Santa Monica College (SMC) offers a two-year program in respiratory therapy accredited by the American Medical Association (AMA) through which students may obtain a Certificate of Completion.

The first year of the curriculum may be taken at UCLA or any other two- or four-year college/university. Many UCLA students opt to incorporate the first-year respiratory therapy curriculum into their UCLA science or pre-medical B.S./B.A. degree requisites and, after completing their UCLA degree, enter the second year at the SMC Respiratory Therapy Program. The only first-year course that must be taken at Santa Monica College is an introductory course on respiratory therapy as a profession (Respiratory Therapy 1).

The second year of the program (the formal respiratory therapy curriculum) is taken through Santa Monica College. It is a lecture, laboratory, and clinical program conducted at the UCLA Medical Center, beginning with summer school each year. Admission to the second year is by competitive application. Because enrollment in the second year is limited, students should become familiar with the admission requirements as early as possible.

First-Year Prerespiratory Therapy Curriculum Requirements

(1) Respiratory Therapy 1 (taken at SMC in Fall/Spring Quarter); (2) general human anatomy with laboratory; (3) general chemistry with laboratory; (4) basic lower division English; (5) U.S. history or general political science; (6) any general humanities course (art, music, foreign languages, etc.); (7) microbiology with laboratory; (8) human physiology with laboratory; (9) general psychology; (10) speech or advanced English composition.

For further information and/or a counseling appointment, contact the SMC Respiratory Therapy Program at (310) 434-3463.

Prelaw Studies

Law schools have no preference with regard to specific majors or particular courses. However, two terms of English composition in preparing to apply to law school would be useful. Admission to law school is based on the quality of academic work, LSAT scores, and other qualities as reflected in the written application, personal statement, and letters of recommendation. The College of Letters and Science offers advising on preparing for and applying to law schools through daily drop-in counseling, appointments, and workshops. For more information, call the Preprofessional Advising Office at (310) 825-1817.

For additional information, see the *Law School Admission Bulletin* available at the Admissions Office, UCLA School of Law, 71 Dodd Hall.

Graduate Study

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gdnet.ucla.edu/departments.html>.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

John E. Anderson Graduate School of Management

Bruce Willison, Dean

UCLA
110 Westwood Plaza, Suite F407
Box 951481
Los Angeles, CA 90095-1481
(310) 825-6121
<http://www.anderson.ucla.edu/>

In today's rapidly changing global marketplace, it is essential that professional managers be conversant with the latest concepts and principles of management. At UCLA's John E. Anderson Graduate School of Management, which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, the Anderson School offers the business community a wide range of higher education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in fundamental and cutting-edge research in all fields of management and by educating scholars who can continue to create this new knowledge.

Anderson School students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

The school offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management

is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school also offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

Degrees Offered

Master of Business Administration (M.B.A.)

Master of Science (M.S.)

Doctor of Philosophy (Ph.D.)

Centers and Programs

Business Forecasting Project

Using large-scale econometric models, the Business Forecasting Project (<http://www.anderson.ucla.edu/research/forecast/index.htm>) makes quarterly and long-term forecasts of the national and California economies, focusing on unemployment and employment by three-digit SIC code. Results of the forecasts are announced at conferences attended by members of the media and leaders in business and government.

Center for Digital Media

The Center for Digital Media's mission is to become an internationally recognized institution for studying the effects of new media and digital technologies on organizations and the business environment, providing a wellspring of fresh ideas on innovation in the field. The center (<http://www.anderson.ucla.edu/research/digital/Digital.html>) actively exploits its location in Southern California to develop mutually beneficial relationships with major industries, providing its industrial partners with research studies, networking, consulting, and recruiting opportunities, while providing faculty and students with the latest information, project financing, access to decision makers, and research topics related to digital media.

Center for Health Care Management

The Center for Health Care Management (CHCM) is operated jointly by the Anderson School and the School of Public Health. Organized as a partnership with the health services management community, the center's activities are designed to be supportive of management practitioners in the health care community. The center offers management education programs uniquely suited to managers and executives from health care organizations. In addition, it conducts research carefully identified to further the practice of management of health service organizations. Programs have included a top management course for Cedars-Sinai Medical Center and a management development program for diagnostic radiologists.

Center for International Business Education and Research

The Center for International Business Education and Research (CIBER; <http://www.anderson.ucla.edu/research/ciber/>) is dedicated to enhancing the teaching and understanding of issues related to the global marketplace. The center actively increases international business research across the campus through the direct funding of faculty research travel, graduate student research assistantships, and academic conferences.

Center for Operations and Technology Management

The Center for Operations and Technology Management (COTM; <http://www.anderson.ucla.edu/cotm/cotm.htm>) addresses the needs of manufacturing and service companies in the areas of technology management, service delivery, and manufacturing operations. These issues are becoming central to competitive success in global markets. The center organizes conferences and seminars, as well as faculty and student projects with companies. Its programs introduce M.B.A. students to the key concerns in technology and operations in business today.

Harold Price Center for Entrepreneurial Studies

The Harold Price Center for Entrepreneurial Studies (<http://www.anderson.ucla.edu/research/esc/>) provides academic and extracurricular activities that prepare M.B.A. candidates for the challenge of business management in entrepreneurial environments. These efforts include teaching and curriculum development, student activities, and scholarly research. The interdisciplinary curriculum draws on faculty expertise in many areas.

Human Resources Round Table

The Human Resources Round Table (HARRT) is affiliated with the Anderson School and with UCLA's Institute of Industrial Relations. The program's mission is to enhance the profession of human resource management by linking the academic and practitioner human resource management communities.

Information Systems Research Program

The Information Systems Research Program (ISRP) was established to recognize the importance of maintaining close ties between the activities of practicing professionals and the activities of academics in the information systems area, while at the same time raising money to support education and research activities in the information systems area. The senior managers and technical professionals who belong to the Information Systems Associates participate in a number of activities to facilitate professional interchange and networking, such as the Information Systems Executive Leadership annual award dinner and the annual Information Systems Associates Symposium.

John M. Olin Center for Policy

The John M. Olin Center for Policy facilitates teaching and research dealing with the issues and processes of public policy and business/government interaction. The center serves as a facilitator and catalyst for the Anderson School's distinguished faculty with strong and diverse policy interests. It accomplishes this mission by sponsoring or cosponsoring a number of public policy conferences and by providing summer faculty research support and research apprenticeships for Anderson School doctoral students working on research projects dealing with the issues and processes of public policy and business/government interaction.

Leadership, Education, and Development Program

The Leadership, Education, and Development (LEAD) program sponsors four-week residential summer institutes at outstanding business schools, including the Anderson School, and recruits qualified African American, Hispanic, and Native American students between their junior and senior years of high school. LEAD is designed to introduce participants to the world of business, economics, finance, and management through a carefully tailored curriculum involving University faculty, guest lecturers from industry, and corporate field trips.

Office of Executive Education

Lifelong learning plays a critical role in the success of today's business leaders. The Anderson School's Office of Executive Education Programs offers more than 40 innovative open enrollment and customized programs that address complex and rapidly changing business issues. The Executive Program covers such diverse areas as strategic planning, organizational design, and competitive positioning.

Office of International Affairs

The Office of International Affairs (OIA; http://www.anderson.ucla.edu/research/oia/oia_hmpg.html) reflects the Anderson School's commitment to incorporating global issues into management education. Through a portfolio of innovative initiatives, such as the Global Partners Forum conference series, Executive Roundtable series, and Oxford-UCLA CEO Briefings, OIA expands the school's opportunities for global management education and research and marshals school resources to the task of achieving a comprehensive and effective international focus throughout its programs.

Riordan Programs

The Riordan Programs were established in 1987 by the Riordan Foundation in response to the growing demand for trained managers who can provide vision and leadership in culturally diverse communities. The programs' success results from the collaborative efforts of Anderson School faculty, students, and alumni, and corporate leaders throughout the community. Together these individuals encourage underrepresented students to pursue higher education in management and to become future leaders in business and society.

School of Medicine

Gerald S. Levey, Dean and Provost

UCLA
12-105 Center for the Health Sciences
Box 951720
Los Angeles, CA 90095-1720

(310) 825-6081
<http://www.medsch.ucla.edu>

UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Students at the UCLA Medical Center are exposed to the best of all worlds — strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation's elite, superb affiliated clinical facilities that provide the full spectrum of teaching settings and patient populations, and a biomedical library that is considered one of the world's best. The UCLA School of Medicine offers an M.D. degree program, allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs, as well as a wide range of master's and doctoral degrees offered through the Graduate Division.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including two of the nation's 56 hospital-based biomedical cyclotrons producing short-lived radioisotopes for biological research and diagnostic nuclear medicine procedures.

M.D. Degree Program

The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humanistic approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

The School of Medicine curriculum combines traditional teaching with problem-based learning and laboratories to maximize the educational experience. Because medical school is but one phase in a physician's education, the curriculum fosters an environment where students are well-prepared for a future in which scientific knowledge, social values, and human needs are ever changing. Formats for instruction include lectures, tutorials, seminars, laboratory sessions, demonstrations, and visits to physicians' offices; students are exposed to patients from their first week through graduation.

The M.D. degree is conferred at the culmination of a four-year medical curriculum that prepares students broadly for careers in research, practice, or teaching in the medical field of their choice. As medicine moves into the twenty-first century, the curriculum continues to evolve, emphasizing issues of growing importance such as primary care, development of research opportunities for those considering careers in academic med-

icine, human genetics, and the evolving world of gene therapy, psychosocial issues of health and disease, preventive medicine, and medical ethics.

Students interested in details on the M.D. curriculum or who wish to apply to the M.D. program should contact the School of Medicine Admissions Office, 12-105 CHS, UCLA, Box 951720, Los Angeles, CA 90095-1720. See the College of Letters and Science earlier in this section for details on the four-year premedical studies program.

Special Programs

Special programs have been designed to address the needs and issues of specific communities and populations.

UCR/UCLA Biomedical Sciences Program

The UCR/UCLA Biomedical Sciences Program is a cooperative venture involving UC Riverside, the UCLA School of Medicine, and selected Riverside community sites. Students may earn both the B.S. and M.D. degrees in seven years through a combined program maximizing the curricula of both.

Drew/UCLA Medical Education Program

The Drew/UCLA Medical Education Program is designed to attract students who express and demonstrate an interest in addressing the concerns of underserved populations. Students in the program spend their first two years at the UCLA campus and complete their last two years of clinical work at the King/Drew Medical Center on the Drew University campus.

Articulated and Concurrent Degree Programs

The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows students to earn both the M.D. and Ph.D. in about seven years, depending on their course of study and research. The Ph.D. may be awarded in one of several medical sciences fields. For more information, contact the Medical Scientist Training Program at (310) 794-1817.

A concurrent program with the John E. Anderson Graduate School of Management allows medical students to earn both the M.D. and M.B.A. degrees over five years by following a designated course of study and some shared coursework. Separate application must be made to the Anderson School during the third year of medical school. For additional information, contact the School of Medicine at (310) 825-2866 or 825-3970.

An arrangement with the School of Public Health enables students to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health at (310) 825-5516.

Postgraduate Medical Training Programs

Postgraduate medical training programs, including residencies, are offered through all the clinical departments at UCLA and the affiliated training hospitals such as Harbor-UCLA, Cedars-Sinai, and West Los Angeles VA Medical Centers, Sepulveda-San Fernando Valley Program, and many others. Programs at the affiliated institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the individual clinical departments of the School of Medicine or the affiliated hospitals.

Allied Health Programs

For information regarding allied health programs in the UCLA Center for the Health Sciences, call (310) 794-8352.

Graduate Programs

Master's and/or doctoral degrees are offered through the UCLA Graduate Division in the following fields: anatomy and cell biology (Department of Neurobiology), biological chemistry, biomathematics, biomedical physics, experimental pathology, human genetics, microbiology and immunology, neuroscience, pharmacology, and physiology. Detailed information on

these programs, for which admission to the School of Medicine is not required, is provided in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog

Graduate Degrees Offered

Anatomy and Cell Biology (M.S., C.Phil., Ph.D.)
 Biological Chemistry (M.S., Ph.D.)
 Biomathematics (M.S., Ph.D.)
 Biomedical Physics (M.S., Ph.D.)
 Human Genetics (M.S., Ph.D.)
 Microbiology and Immunology (M.S., Ph.D.)
 Neuroscience (Ph.D.)
 Pathology — Experimental Pathology (M.S., Ph.D.)
 Pharmacology (M.S., Ph.D.)
 Physiology (M.S., Ph.D.)
 Psychiatry and Bibehavioral Sciences Clinical Psychology
 Internship (Certificate)

Note: The following Master of Science degrees require application to the doctoral degree program: Anatomy and Cell Biology, Microbiology and Immunology, Pharmacology, Physiology.

School of Nursing

Marie J. Cowan, Dean

UCLA
 2-200 Factor Building
 Box 951702
 Los Angeles, CA 90095-1702
 (310) 825-7181
<http://www.nursing.ucla.edu>

The School of Nursing was established at UCLA in 1949 and rapidly became a leading school of nursing in the U.S. Now the school enjoys a national and international reputation for excellence in teaching, research, and clinical practice.

One of the strengths of the school is its teaching of the scientific basis for nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, or in selected community sites. Education at the master's level provides advanced practice options in primary care, acute care, and nursing administration. The majority of graduate students acquire expertise as nurse practitioners, with several options for clinical preparation in primary or acute care. The doctoral program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

The School of Nursing has an exceptionally well-qualified faculty, and many have earned national and international reputations for excellence. The school is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in health care and the diversity of the patient population. Graduates of the program are sought by health care institutions and educational programs, and many alumni have become leaders in the field. Education in this research University with its full range of academic disciplines provides a rich environment for preparation in the health sciences.

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, 2-200 Factor

Building, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in nursing leading to the Bachelor of Science (B.S.) degree and made possible the establishment of a graduate program leading to the Master of Science (M.S.) degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The M.S. degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. was approved in 1995.

The B.S. program curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's nurse practitioner program has Board of Registered Nursing approval.

Degrees Offered

Bachelor of Science (B.S.)
 Master of Science in Nursing (M.S.N.)
 Doctor of Philosophy (Ph.D.)

Philosophy of the School

The UCLA School of Nursing is guided by a philosophy which embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students.

Nursing encompasses clinical practice, education, research, consultation, leadership, management, and service to the profession and the community. It involves individuals, families, groups, organizations, and communities as clients. The profession must consider the human and physical environments that interact with these clients who may have health conditions that range from wellness to illness. Nursing activities must include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. At an advanced practice level, nursing involves comprehensive primary health care which encompasses the responsibility and accountability for continuity of care across the health/illness spectrum.

Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science. Guided by ethical standards that consider the perspectives of the client, the health care provider, and the larger society, nursing has a social mission which encompasses the right and responsibility to provide health care to all its clients regardless of disease status, gender, race, or culture.

Persons who receive client-centered nursing care are complex individuals who exist in relationship to others in their family and community. This complexity of person involves biological, behavioral, emotional, sociocultural, and spiritual dimensions. Each individual reflects a unique combination of these dimensions that interact dynamically with the environment. The clients of nursing are autonomous decision makers who have certain values and knowledge about themselves that not only are relevant but essential to successful health care outcomes. As a result, persons have a

right and a responsibility to participate collaboratively with the nurse and other health professionals in their care.

Successful nursing students are active learners who bring unique gender, cultural, and ethnic life experiences to the professional practice of nursing. Students at all levels learn relevant theory, acquire practice skills, and are socialized into the profession of nursing. Increasing levels of complexity and sophistication of learning and socialization are expected of students in the different programs. Whether at the beginning practice, advanced practice, or scholar level, nursing students learn to apply knowledge, skills, and professional attitudes in their practice which may include educative, administrative, and research arenas. While students have the right and responsibility to participate in their own learning, faculty members have the right and responsibility to structure the teaching/learning environment to facilitate learning. Individual academic counseling and a variety of one-on-one, small-group, and interactive learning formats assist students to meet program and individual learning goals.

School of Public Health

Abdelmonem A. Affi, Dean

UCLA
16-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5524
<http://www.ph.ucla.edu/>

The emergence of public health as an independent discipline dates back over a century, when the field was concerned mainly with the epidemic of communicable diseases and some facets of sanitation. Changes in socioeconomic conditions, lifestyle, and other factors have brought such issues as injuries, aging, air pollution, alcoholism, drug addiction, smoking, mental health, homicide, and sexually transmitted diseases to the fore as community health problems. In time the following general statement evolved — “The mission of public health is to fulfill society’s interest in assuring conditions in which people can be healthy.”

Public health professionals can promote the health of the community through (1) research into the development of methodologies in biostatistics, epidemiology, demography, and techniques of prevention, (2) investigations into factors which influence health behavior, quality of and access to health care, health education, nutrition, environmental problems, and problems of special population groups such as mothers, children, and minorities, and (3) development of research into new areas that impact on the health of the community. Public health professionals are also responsible for translating knowledge of disease and health enhancement into resolution of health problems in the community. Whether public health professionals elect to serve through research or the application of public health principles to improve health, they are committed not only to the prevention of disease but to promotion of health and improvement in the quality of life.

The UCLA School of Public Health began as a department of the University-wide school which was established in 1944. By 1961 UCLA’s school became an independent entity whose mission is to create, disseminate, and apply pertinent knowledge to assure the conditions in which people can be healthy. These conditions include a favorable social, economic, and physical environment, access to an effective preventive and therapeutic health system, and an awareness of how to prevent disease or disability and promote health. As part of the UCLA Center for the Health Sciences, the school focuses on the health problems of populations, whereas the other three health sciences schools are concerned primarily with the health problems of individuals.

To fulfill its national and international mission, the school (1) educates new professionals and leaders for the private and public sectors of the health system in the U.S. and abroad, (2) prepares future public health re-

searchers and educators, (3) provides continuing education for current professionals and leaders in the public health field, (4) conducts basic and applied research relevant to describing, protecting, and improving conditions for a healthy public, and (5) contributes knowledge, expertise, and service to the community. It is the goal of the school to ensure that the protection and improvement of the public’s health is accomplished by the most efficient and effective means, consistent with equity for all individuals in the state, the nation, and the world.

Degrees Offered

Biostatistics (M.S., Ph.D.)
Environmental Health Sciences (M.S., Ph.D.)
Environmental Science and Engineering (D.Env.)
Epidemiology (M.S., Ph.D.)
Health Services (M.S., Ph.D.)
Preventive Medicine and Public Health (M.S.)
Public Health (M.P.H., M.S., Dr.P.H., Ph.D.)

Note: The M.S. and Ph.D. degrees in Public Health are offered through the Department of Community Health Sciences. New students are not being admitted to the M.S. in Preventive Medicine and Public Health at this time.

Departments and Programs

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences deals with five areas of study and program implementation, including behaviors which prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health education and promotion, public health policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Services deals with the organization, financing, delivery, quality, and distribution of health care services. The school is also responsible for the administration of the interdepartmental degree program in environmental science and engineering.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; three concurrent degree programs: M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies; and three articulated degree programs: M.D./M.P.H. with the School of Medicine and M.A./M.P.H. with African Area Studies and with Latin American Studies.

Admission

In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog. Help in deciding on a department is available in the school’s Student Affairs Office.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

Degree Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings in the Curricula and Courses section of this catalog for specific requirements and procedures.

Centers and Programs

Center for Health Policy Research

The Center for Health Policy Research was established in March 1994 to apply the expertise of UCLA faculty and researchers to meet national, state, and local community needs for health policy-related research and information. Building on the extensive health policy research of School of Public Health faculty, the center was established to accomplish three missions: (1) to conduct research on national, state, and local health policy issues, (2) to provide public service to policymakers and community leaders, and (3) to offer educational opportunities for graduate students and postdoctoral fellows.

The center, sponsored by the School of Public Health and the School of Public Policy and Social Research, provides a collaborative health policy research environment for UCLA's leading professional schools and academic departments. The center's staff assists faculty and other researchers to obtain extramural research and training funds, and it helps researchers manage and conduct research studies. Faculty from the Schools of Public Health, Public Policy and Social Research, and Medicine participate in center research projects and its public service and educational activities.

The center, directed by Professor E. Richard Brown, publishes its health policy research findings in a series of Policy Briefs, making policy-relevant information directly accessible to policymakers, public health and health care leaders, the media, and the general public. The center also publishes more extensive findings in a series of Policy Research Reports and sponsors lectures and seminars on health policy-related topics for students, faculty, and staff. For additional information, call (310) 825-5491 or visit <http://www.healthpolicy.ucla.edu/>.

Center for Health Promotion and Disease Prevention

Established in July 1991, the Center for Health Promotion and Disease Prevention is a joint endeavor of the UCLA Schools of Public Health and Medicine. The five full-time faculty members have their primary appointments in one of the clinical departments in the School of Medicine such as obstetrics, surgery, medicine, or pediatrics and, depending on their training, joint appointments in an appropriate department in the School of Public Health such as community health sciences, health services, or epidemiology. Within the School of Medicine, faculty members are involved in clinical activities and teaching, especially in the course on doctoring. Within the School of Public Health, they are engaged in teaching and research. Faculty research activities are wide-ranging and involve studies on the quality of life of men with prostate cancer, manpower requirements for the care of those with HIV infections, community interventions for asthma control in Latino children, systems for smoking cessation used by physicians caring for Latino patients, etc.

The center, through its members, has ties with a variety of local and national organizations concerned with managed care, as well as with the Veterans Administration and several other hospitals and professional organizations. It serves as the UCLA site for the activities of the Pacific AIDS Education and Training Center. The center, directed by Professor Charles E. Lewis, is also responsible for overseeing the Preventive Medicine Residency Program.

Center for Health Services Management

The Center for Health Services Management was jointly established in fall 1996 by the School of Public Health and the John E. Anderson Graduate School of Management as UCLA's response to the increasingly challenging environment for health care management in California. It is designed to bring together the best in university-based research and education with the best and most current in management practices in the California health care community, for the mutual benefit of both.

The center is a laboratory in which new challenges can be identified and new solutions can be tested through the joint efforts of the University and the health care community. It is the vehicle to improve training and education of managers and executives, both in the degree and certificate pro-

grams at the University as well as the management development programs within health care organizations themselves.

A central theme is an active working partnership with the health services management community. The center operates under the direction of a joint University/community guidance committee, and all activities, whether research, teaching, or consultation, involve intense collaboration between health care practitioners and University faculty and students.

UCLA has a large group of nationally known scholars and teachers who are expert in both the organization of health services and in the latest approaches to modern management. The University is located in the middle of the most active and rapidly changing health care environment in the U.S. and has a wide and active group of alumni, friends, and colleagues in the Southern California health care community who can be called on to teach, advise, support, and counsel the development of the center.

The center, codirected by Professors Paul R. Torrens and Victor C. Tabush, conducts activities in three major areas: applied health services management research, education and teaching in a variety of settings and on a variety of levels, and consultation to organizations and individuals about health services management issues. For additional information, call (310) 206-3435 or visit <http://www.ph.ucla.edu/hs/hsmgt.html>.

Center for Healthier Children, Families, and Communities

The Center for Healthier Children, Families, and Communities was established at UCLA in 1995 to address some of the most challenging health and social problems facing children and families. The center's mission is to improve society's ability to provide children with the best opportunities for health and well-being and the chance to assume productive roles within families and communities.

Through a unique interdisciplinary partnership between UCLA departments, schools, and affiliated institutions, including the Schools of Public Health, Medicine, Nursing, Education, Law, and Public Policy and Social Research and the Department of Psychology, as well as providers, community agencies, and affiliated institutions, a critical mass of expertise has been assembled to conduct activities in five major areas: (1) child health and social services, (2) applied research, (3) training of health and social service providers, (4) public policy research and analysis, and (5) technical assistance and support to community providers, agencies, and policymakers. The center is led by three codirectors, Professors Neal Halfon, Jonathan E. Fielding, and Neal Kaufman. For additional information, call (310) 206-1898 or visit <http://www.ph.ucla.edu/chcfc/>.

Center for Human Nutrition

Established in 1996, the Center for Human Nutrition is a joint endeavor of the Schools of Public Health and Medicine. Participating faculty have their academic appointments in Medicine and/or Public Health. The center brings together faculty, postdoctoral research fellows, graduate students, and medical students to focus on the roles of nutrition and food in human health and disease and is closely affiliated with UCLA's Clinical Nutrition Research Unit, which is focused in the area of nutrition and cancer prevention.

Programs include basic biological research; nutrition education for various constituencies including medical, graduate, undergraduate, and postgraduate students; participation in multicenter clinical trials for primary and secondary disease prevention through dietary intervention; and public health and international nutrition. The center maintains core laboratory/research facilities in body composition, dietary assessment and intervention, micronutrient analysis, lipid and hormone analyses, stable isotope techniques, and related areas.

The public health and international aspect of the programs include focus on nutrition surveillance of populations, nutritional status and food supply in developing and transitional countries, and nutrition and food policy. The center provides research and field experience opportunities for students from UCLA and elsewhere and, through linkages with several international institutions, has several international visiting scholars in residence at most times. For additional information, call (310) 206-1987 or 825-3738.

Center for Occupational and Environmental Health

In 1977 a group of chemical workers in California became sterile after exposure to the pesticide DBCP, which now is known to be a carcinogenic and reproductive toxin. That incident prompted the California State Legislature to mandate the formation of occupational health centers in the northern and southern regions of the state. The purposes of the Center for Occupational and Environmental Health (COEH) are training occupational and environmental health professionals, conducting research, and providing services through consultation, education, and outreach. The centers constitute the first state-supported institutions to provide occupational and environmental health leadership in the U.S.

UCLA's COEH is housed in the Center for the Health Sciences and involves the Schools of Public Health, Medicine, Nursing, and Public Policy and Social Research. Collaboration also occurs with the School of Engineering and Applied Science.

Specific COEH programs within the School of Public Health include

Environmental Chemistry

Environmental chemistry is concerned with the sampling, analysis, and fate/transport of chemicals in the environment and data interpretation for the analysis of environmental chemicals and hazardous wastes. Environmental chemists are employed in research, government, and industry associated with environmental management, industrial hygiene chemistry, environmental toxicology, air pollution, water quality treatment, and other related areas.

Occupational and Environmental Epidemiology

Occupational and environmental epidemiologists conduct research to establish causal links between environmental exposure and adverse health outcomes. The study of exposure-response relationship is central to the role of the epidemiologists.

Occupational and Environmental Medicine

A joint occupational medicine residency between UCLA and USC provides specialty training for physicians in occupational medicine. The program leads to a master's degree in public health and board eligibility in occupational medicine. The first year of the program involves taking courses at the UCLA School of Public Health leading to an M.P.H. degree. In the second year students participate in clinical and field rotations under the supervision of the Division of Occupational and Environmental Medicine at USC. A similar joint residency program in occupational medicine is offered with the UC Irvine COEH.

Occupational Ergonomics

Occupational ergonomics is the science of designing a work environment compatible with the capabilities and needs of the workforce. The primary goal of the program is to improve the design of the work environment for the prevention of occupational illnesses and injuries. Current research areas include static and dynamic strength modeling, task analysis, and identification and qualification of risk factors for cumulative trauma disorders.

Occupational Hygiene

Occupational hygienists are environmental specialists concerned with evaluation and control of the workplace environment for exposure to potentially dangerous agents, physical stresses, biologic agents, and ergonomic effects. Occupational hygienists provide insight into these problems based on their knowledge of the health effects of exposure to the substances involved and the physics and chemistry of the environment. These specialists work as part of interdisciplinary teams with epidemiologists, physicians, nurses, and toxicologists.

Service Outreach to the Community

The center has the task of providing expertise in occupational and environmental health to the community. Available services and opportunity for student activities include (1) consultative assistance to physicians, nurses, and occupational hygienists, (2) faculty evaluation of the work environment with potential occupational health hazards and surveillance of

industrial workers exposed to hazardous substances, and (3) continuing education opportunities for professionals and educational programs for workers exposed to potential occupational health hazards. For additional information, visit <http://www.ph.ucla.edu/coeh/>.

Toxicology

Toxicology is the study of the adverse effects of chemicals and physical agents on living organisms. The goal of the discipline is to understand what agents provide a threat to organisms and how they function in order to minimize their impact. Toxicologists work collaboratively with physicians, nurses, industrial hygienists, and epidemiologists to determine the causes of occupational and environmental disease.

Center for Public Health and Disaster Relief

With funding from the Los Angeles County Department of Health Services, the Center for Public Health and Disaster Relief was established to address the critical issues faced when a disaster impacts a community. The center's mission is to develop a curricular focus area and research agenda that examines how natural and human-generated disasters affect the public's health. The center staff and participating faculty are multidisciplinary in nature and have backgrounds that include emergency medicine, environmental health sciences, epidemiology, gerontology, health services, social work, sociology, urban planning, and public health.

The center, through the Department of Community Health Sciences, is the only program in the nation to offer multiple graduate-level courses in public health and natural disasters. Courses taught by center faculty include an introduction to public health and disasters, program planning and evaluation of disaster preparedness programs, cooperative inter-agency disaster management from a public health perspective, post-disaster community health, and disaster epidemiology.

The courses bring together students who have strong research backgrounds with those students who are frontline disaster practitioners, thus enriching the future pool of public health disaster experts. In order to expose future professionals to the rigors of this area, opportunities have been or are being developed to place graduate interns within emergency and disaster units of the Los Angeles County Department of Health Services, the California Emergency Medical Services Authority, the American Red Cross, and the World Health Organization.

Center staff and colleagues have studied earthquakes in California since the early 1970s. Recent research contributes to knowledge about human behavior and disaster preparedness before and after earthquakes, emotional and physical injuries, and utilization of both medical and disaster services following earthquakes. Similar factors are currently under study following the 1997-98 el niño season. The center is directed by Professor Steven Rottman. For additional information, call (310) 794-6646 or visit <http://www.ph.ucla.edu/cphdr/>.

Health Career Resource Center

In September 1996 the School of Public Health established the Health Career Resource Center (HCRC) which offers a variety of career planning resources, counseling, and job search services designed to help both students and alumni explore public health career possibilities, obtain employment and internship leads, and develop skills for conducting a successful job search.

The center also houses the Diversity Enrichment Program (DEP), designed to provide a wide range of preparatory, informational, and developmental services for disadvantaged students considering a career in public health. The goal of this program is to promote the increase of underrepresented/disadvantaged individuals within the public health profession by providing education and resource information that facilitates access and encourages retention in public health graduate degree programs.

Services provided include the following:

(1) **Career Planning and Job Search**, with résumé and curriculum vitae critique, one-on-one counseling, job search skill building workshops, career and job search resource literature, internship information, and fellowships, scholarships, grants, and postdoctoral opportunities.

(2) **Employment Opportunities**, with part-time and temporary job listings, full-time career opportunity listings, access to online job search engines, and alumni networking opportunities.

(3) **Recruitment and Retention Services**, with recruitment and outreach conferences, application processing assistance, Graduate Record Examination preparatory courses, retention counseling, new student orientation, and tutorial support for enrolled students.

The center, located in 16-085 CHS, is open to students and alumni weekdays from 10 a.m. to 4 p.m. For more information or to schedule an appointment, call (310) 825-7449.

Office of Public Health Practice

The School of Public Health plays a unique role in community-based health promotion and disease prevention. To coordinate this important function, the school established the Office of Public Health Practice in 1992. The goals of the office are to (1) establish firm practice links with local and state departments, (2) strengthen the curriculum with innovative community-based public health practice experience, (3) assist policy development affecting public health, (4) develop model interventions to address the leading public health problems of our diverse and multiethnic communities, and (5) develop continuing education programs, including an M.P.H. degree for working professionals. For additional information, call (310) 794-7028 or visit <http://www.ph.ucla.edu/php/>.

Pollution Prevention Education and Research Center

The Pollution Prevention Education and Research Center (PPER) was established in 1991 by faculty members in the Schools of Public Health, Engineering and Applied Science, and Public Policy and Social Research. The center's mission is to conserve resources, reduce or eliminate the use of toxic substances, and improve human and environmental health through an interdisciplinary program of education, research, and outreach. To that end, faculty members and associates have offered classes, developed curricula, conducted research, and sponsored a variety of outreach activities to promote the principles of pollution prevention across a range of disciplines and institutions.

Within a short period of time, the center has established itself among the leading academic pollution prevention programs and has developed an impressive track record of accomplishments. Within the last four years, faculty members and associates have collaboratively taught innovative multidisciplinary courses which examine pollution prevention opportunities in a wide variety of industry sectors; developed curricula, case studies, and problem sets for students and professionals in diverse fields; sponsored public seminars and conferences to share pollution prevention information and stimulate discussion; written two books and numerous articles on technology, health, and policy issues associated with pollution prevention; and have given presentations and participated in various roundtables working to reduce or eliminate the problems associated with toxics use. For more information, contact Professor John R. Froines at (310) 206-6141 or visit <http://www.oxy.edu/departments/pperc/>.

Preventive Medicine Residency Program

The School of Public Health offers an accredited residency in public health and general preventive medicine, a specialty recognized by the American Board of Preventive Medicine. Under Program Director Charles E. Lewis, the residency is designed to prepare qualified physicians for leadership roles in preventive medicine and public health practice, research, and teaching. The program is based on the academic strength of the School of Public Health in conjunction with the School of Medicine and outstanding UCLA-affiliated agencies such as the Los Angeles County Department of Health Services.

The residency provides training in the academic and practicum years as defined by the Accreditation Council for Graduate Medical Education. Residents participating in the academic phase must enroll in one of the departments within the School of Public Health and must fulfill all requirements for the M.P.H. (or equivalent) degree as specified by the department in which they are enrolled. Application should be made both to the department and the residency simultaneously. Residents may also under-

take studies toward qualification for a more advanced degree (Dr.P.H. or Ph.D.) in public health; this involves further coursework, an approved project or dissertation, and academic examinations as specified by the school. Part of this work may be applied toward the practicum.

During the practicum phase, residents obtain practical experience in preventive medicine supervised by onsite preceptors, the residency program director, and appropriate UCLA faculty. Flexibility is an essential component of the UCLA practicum; residents may work in a variety of settings while pursuing their commitment to preventive medicine and public health. The particular strengths of this program lie in the areas of public health practice (particularly in medically underserved areas), clinical preventive medicine, health services, epidemiology, administration/management, and research. In addition, residents may develop individualized training programs in any area of preventive medicine. Applicants who have completed their M.P.H. studies at an accredited school of public health may be admitted directly into the practicum. A license to practice medicine in California is a requisite to entering the residency. For further information, contact the School of Public Health Students Affairs Office or visit <http://www.ph.ucla.edu/pmr/home.htm>.

Program for Health Professionals

Health professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by faculty members in the School of Public Health. Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years of professional experience or its full-time equivalent in a health care setting.

Generally the first year of study is devoted to the specific core requirements in the area of concentration and to the required M.P.H. core courses in biostatistics, community health sciences, environmental health sciences, epidemiology, and health services. The course of study also entails completing required and elective courses in the specialty area, a master's project, and a report on that project. The master's project, which usually includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem.

Currently two departments accept students into this program, although all five departments in the school have the option to offer a concentration in their area. For those areas not listed below, contact the department of interest directly.

Community Health Sciences

The M.P.H. degree is offered in the health education/promotion concentration and can be completed in 21 months with once-a-month, four-day course sessions spanning Thursday through Sunday and an additional intensive summer session between the two academic years. Coursework is the same as for the concentration in the regular M.P.H. program, except that the fieldwork internship requirement (Community Health Sciences 400) is replaced with an extended master's project completed under the guidance of a faculty member. The program includes required core and specialty courses, with elective courses offered based on the special interests and needs of students enrolled in the program. For program information and consultation, contact Professor Snehendu Kar at (310) 825-5156, e-mail: kar@ucla.edu.

Health Services

The M.P.H. degree is offered in the health care management concentration and provides a rigorous program of graduate education and training. The two-year program is problem-based and relevant to the rapidly changing health care environment. Growing competition demands that professionals develop an evolving knowledge base and understanding of current management practices and their applications to health care in both the public and private sectors. The curriculum is built around the following themes: health services organization, management content and

practice, finance/economics, analytical skills, public health/understanding the community, and personal development/career planning. The program has also created partnerships with leaders in the health care community, drawing on their strengths and insights to ensure that the educational process is consonant with the needs of the industry. Classes and other instructional activities are scheduled on alternate Fridays from 1 to 9 p.m. and Saturdays from 8 a.m. to 5 p.m. during the academic year. Practical field studies are conducted during the interim summer. For program information, call Professor Paul R. Torrens at (310) 206-3435 or visit <http://www.ph.ucla.edu/hs/mph.html>.

Southern California Environmental Health Sciences Center

The Southern California Environmental Health Sciences Center (SCEHSC) was established through funding from the National Institute of Environmental Health Sciences (NIEHS). Researchers and professionals from UCLA, University of Southern California, and California Institute of Technology have collaborated to create an interdisciplinary approach to the study and advancement of research in environmental health. As one of the newest of 19 centers across the nation, the SCEHSC primarily focuses on using epidemiologic methods to study effects of the environment on human health, especially with regard to the multiethnic populations of California and the Pacific Rim.

The SCEHSC is organized into an administrative core, five research cores, and four service cores, with the overall goal to understand how environmental factors affect health and how personal factors modify response. Research cores include exposure assessment, respiratory effects, childhood cancer, adult cancer, and statistical methods, while the service cores include analytical chemistry, molecular biology, biological sample processing, and biostatistics.

The center supports an Environmental Health Research Pilot Projects Program to advance research in environmental health by expanding opportunities to pursue larger-scale projects. It also maintains a Community Outreach and Education Program to develop models for community outreach and school curricula to educate the public on how to control, reduce, or eliminate the threat of living with environmental hazards. Dissemination of research findings to the health care, corporate, and policy-making communities and the public at large enables the SCEHSC to facilitate an informed public debate and, ultimately, improved public policies, making it a regional and national resource on environmental health research. For more information, contact Professor John R. Froines at (310) 206-6141 or Professor William C. Hinds at (310) 825-7152.

Southern California Injury Prevention Research Center

Injuries kill more people under the age of 45 than all other causes of death combined. The Southern California Injury Prevention Research Center (SCIPRC) is one of nine centers in the U.S. that focus on the problem of intentional (homicide, suicide, abuse) and unintentional (motor vehicle crash, drowning, falls) injuries through three phases of injury control — prevention, acute care, and rehabilitation — addressed through its research, training, and community service components.

The theme of SCIPRC is to research intentional and unintentional injuries among ethnic/racial minorities, disadvantaged persons, and other underserved populations. Highly focused, multidisciplinary community-based research projects are undertaken with the collaboration of public health scientists, clinicians, social scientists, and biomechanics specialists affiliated with UCLA, University of Southern California, King/Drew and Rancho Los Amigos Medical Centers, Los Angeles County Department of Health Services, Edward R. Roybal Institute for Applied Gerontology, and California State Office of Traffic Safety and Departments of Health Services and Industrial Relations.

Graduate students can affiliate with SCIPRC through academic coursework in injury and research experience with ongoing investigations and can apply for support for independent graduate student research. For additional information, call (310) 206-4115 or visit <http://www.ph.ucla.edu/sciprc/sciprc1.htm>.

School of Public Policy and Social Research

Barbara J. Nelson, Dean

UCLA
3250 Public Policy Building
Box 951656
Los Angeles, CA 90095-1656
(310) 206-7568
<http://www.spsr.ucla.edu>

Established in 1994, the School of Public Policy and Social Research is a leader in redefining policy education, research, and outreach to solve major problems in an era defined by rapid change, increasing complexity, and remarkable diversity. The school's distinctive approach emphasizes solving problems across boundaries, particularly at the growing intersection of the public, private, and nongovernmental sectors.

This approach is embodied in the school's structure, which combines three academic departments — Policy Studies, Social Welfare, and Urban Planning — and faculty members from such diverse disciplines as economics, geography, history, law, management, and political science. The school trains policy professionals, planners, and social workers for public, private, and nongovernment service, conducts research on significant regional, national, and international issues with a strong interdisciplinary and cross-cultural focus, and acts as a convener and catalyst for public dialogue on important issues.

The school houses 11 active research centers that allow faculty members from across the campus to pursue issues of mutual interest, including the California Census Research Data Center, Center for Child and Family Policy Research, Center for Communication Policy, Center for Health Policy Research, Center for International Science, Technology, and Cultural Policy, Center for Labor Research and Education, Center for Policy Research on Aging, Institute of Industrial Relations, Institute of Transportation Studies, Lewis Center for Regional Policy Studies, and North American Integration and Development Center. In addition to their focus on practical policy problems, the research centers also provide opportunities for student financial aid in the form of research assistant positions, grants, and fellowships.

The school offers graduate programs leading to the Master of Public Policy (M.P.P.), Master of Social Welfare (M.S.W.), Master of Arts (M.A.) in Urban Planning, and Ph.D. in Social Welfare and in Urban Planning. Five concurrent degree programs, which allow students to fulfill the requirements of two graduate degrees simultaneously, are also offered: M.A.-Urban Planning/J.D. and M.S.W./J.D. with the School of Law, M.A.-Urban Planning/M.A.-Latin American Studies, M.A.-Urban Planning/M.B.A. with the John E. Anderson Graduate School of Management, and M.A.-Urban Planning/M.Arch. I with the Department of Architecture and Urban Design. Further information about these programs can be found in the Cur-

ricula and Courses section of this catalog. Informative brochures about the school's programs can be obtained from the Office of Academic and Student Services, 3371 Public Policy Building.

The school also offers an undergraduate minor in Public Policy and a wide array of undergraduate courses in policy studies, social welfare, and urban planning. Enrollment in these courses is open to all undergraduate students.

Degrees Offered

Public Policy (M.P.P.)

Social Welfare (M.S.W., Ph.D.)

Urban Planning (M.A., Ph.D.)

Graduate Study

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Individuals interested in concurrent degrees must be admitted to both programs. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gdnet.ucla.edu/departments.html>.

Research Centers and Programs

California Census Research Data Center

The California Census Research Data Center (<http://www.ccrdc.ucla.edu>) is a partnership between the U.S. Bureau of the Census and the University of California. With laboratories at the School of Public Policy and Social Research and at UC Berkeley, the center fosters applied research, much of it California-specific, on a wide range of important economic and public policy issues. It provides researchers, on a project-by-project basis, with confidential data from the Census Bureau's business and household data programs. It is the first such center to be established west of Pittsburgh.

Center for Child and Family Policy Research

The Center for Child and Family Policy Research (http://www.spps.ucla.edu/res_ctrs/family.htm) was established in 1984 to conduct and promote research, training, and community service programs to inform policy and develop needed programs for children and families. The center has a distinguished history of policy analysis, applied research, and program development in such areas as child abuse and neglect, income maintenance, and services for high-risk teenagers and disabled populations. Major policy research projects include a study of methods of preparing youths in foster care for emancipation and studies of social support and health care use among Korean Americans and Mexican American elderly.

Center for Communication Policy

The Center for Communication Policy (<http://ccp.ucla.edu/>) was established in 1993 as a forum for the discussion and development of policy alternatives addressing the leading issues in media and communication. The center conducts and facilitates research, courses, seminars, working

groups, and conferences designed to have a major impact on policy at the local, national, and international levels. The center has launched a groundbreaking new study of the social, political, and economic effects of computer technology and the Internet. Conferences include the Superhighway Summit with the Academy of Television Arts and Sciences, Religion and Prime Time Television with the American Cinema Foundation, and an annual national media conference with Children Now and Stanford University.

Center for Health Policy Research

Jointly sponsored by the School of Public Policy and Social Research and the School of Public Health, the Center for Health Policy Research (<http://www.healthpolicy.ucla.edu/>) conducts research on the national, state, and local levels, provides testimony, and conducts seminars and forums for government leaders and policymakers both public and private. Research activities emphasize a community- and population-based perspective to improve health outcomes. Current research areas and programs touch on such issues as access to health services, managed care, health care reform, women's health, disease prevention policy, cost issues, and the health policy-making process itself.

Center for International Science, Technology, and Cultural Policy

The Center for International Science, Technology, and Cultural Policy (http://www.sppsr.ucla.edu/rsrch/rch_cnt/CISTCP.HTML) facilitates interdisciplinary research on the influences of government policy on the development of the arts and sciences and their commercial and noncommercial expressions, including technology, the media, fashion/design, and other uses of the nation's knowledge capital. The center's mission is to improve the basis for policy decisions by conducting and supporting solid empirical research designed to examine alternative policy models, including the comparison of systems across countries as well as across substantive areas within the same country. Rigorous policy research on these topics requires discipline-based, but also interdisciplinary, research teams that are informed by social science theory. The center promotes dissemination of policy research to governments seeking to make more empirically informed policy decisions.

Center for Labor Research and Education

Regarded as the flagship of all U.S. labor centers, the Center for Labor Research and Education (<http://labor.sppsr.ucla.edu>) plays a unique role as a bridge between the University and the labor community. As part of the Institute of Industrial Relations, the center is a cosponsor, with the Urban Planning Department, of the Community Scholars Program — a dynamic project that brings labor and community leaders to UCLA to study economic development. The center also serves as the West Coast coordinator for the AFL-CIO's George Meany Center, providing summer residential programs for union leaders, and regularly hosts visiting trade unionists and scholars from around the world. A vital part of the center is the Labor Occupational Health and Safety Program, which provides extensive resources and training in the field of workplace safety and health.

Center for Policy Research on Aging

One of the newest of the school's research centers, the Center for Policy Research on Aging (http://www.sppsr.ucla.edu/rsrch/rch_cnt/cpra.html) was formed to address the significant issues of an aging society through policy analysis, dissemination of information, and technical assistance to the public and private sectors. The demographic challenges of a nation growing older and living longer force us to confront the roles of government and the private sector in serving the increasing number of elderly and their families. The center's mission is to conduct research, inform policymakers, link communities to local, state, and federal governments, and foster collaboration among UCLA faculty members.

Institute of Industrial Relations

Established by the California Legislature in 1945, the Institute of Industrial Relations (http://www.sppsr.ucla.edu/res_ctrs/industri.htm) conducts research and community service programs that focus on all aspects of the

modern employment relationship involving workers, management, and unions. These issues run the gamut from technological change and workforce preparedness to collective bargaining and macroeconomic policy. Community service programs are directed at the Southern California region as well as the state and nation. Because of the ongoing globalization of the economy, the institute — both in research and community service — increasingly is focusing on international issues.

Institute of Transportation Studies

The Institute of Transportation Studies (http://www.spsr.ucla.edu/res_ctrs/its/its_home.htm) was created in 1993 to conduct research and provide professional education on the social, economic, environmental, and cultural aspects of transportation policy. Research projects have included measuring the efficiency and effectiveness of transit performance, particularly regional rail and bus transit systems in the Los Angeles area; the development of statistically reliable methods for estimating average vehicle occupancy from sampling in the field; and the first major study comparing the transportation-related impacts of the 1994 Northridge earthquake to the damage inflicted by the 1989 Loma Prieta and 1995 Kobe earthquakes.

Lewis Center for Regional Policy Studies

The Lewis Center for Regional Policy Studies (http://www.spsr.ucla.edu/res_ctrs/lewis/lewis.htm) was established in 1990 with a \$5-million endowment from Ralph and Goldy Lewis to promote the multidisciplinary study, understanding, and solution of regional policy issues, with special reference to Southern California. Research projects include studies on the impact of the North American Free Trade Agreement on Latinos in the U.S., welfare and work, pollution prevention policies, transportation and parking policies, work-residence relationships in restructuring metropolitan areas, and economic development strategies for local areas. With the support of several foundations, the center also has begun a major research program on ethnic and immigration issues, one product of which is the 1996 volume *Ethnic Los Angeles*.

North American Integration and Development Center

The North American Integration and Development Center (http://www.spsr.ucla.edu/res_ctrs/namerica.htm) was created to provide technical assistance to local communities affected by the North American Free Trade Agreement (NAFTA). The center conducts research and offers continuing education programs in cooperation with nongovernmental organizations in selected communities to support local economic development efforts and facilitate their relationship with the North American Development Bank (NADBank). The center is developing a comprehensive online database with essential information for economic development planning and makes it available to the public on-line through custom-designed Internet sites.

UCLA Policy Forum

As the chief outreach arm of the School of Public Policy and Social Research, the UCLA Policy Forum (http://www.spsr.ucla.edu/outrch/out_pf.html) is a leader in promoting dialogue on major issues through its Center for Public Dialogue and in providing training and other programs through the Advanced Policy Institute and the Center for Executive Policy Education. Policy Forum programs include the Senior Fellows Program, in which distinguished policy practitioners are appointed to spend a year engaged in a dialogue with UCLA scholars and in mentoring graduate students.

School of Theater, Film, and Television

Robert Rosen, Dean

UCLA
202 East Melnitz Building
Box 951622
Los Angeles, CA 90095-1622
(310) 825-5761
<http://www.tft.ucla.edu/>

The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film and Television, recognized national centers for higher education in production and performance as well as history, theory, and criticism. Whether exploring the ancient and sacred roots of theater or the latest secular rituals enacted by popular film, creat-

ing a dramatic character on a bare stage or a dramatic narrative on screen, writing scripts or scholarly articles, or making digital movies or designing websites, all students study both the aesthetics and cultural significance of theater, film, and television. Through an intensive, multidiscipline curriculum, the school defines the inherent differences of theater, film, television, and new media, affirms their similarities, and encourages their interaction. As expressive art forms, modes of communication, and cultural interventions, theater, film and television, and digital media have in common the ability and power to reflect and shape our perception of a complex, diverse, and ever-changing world. We believe — as artists and scholars — that we have an obligation to reflect on this power and to use it responsibly.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the UCLA Performing Arts, Geffen Playhouse, and UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of art forms essential to a healthy and dynamic society.

The Department of Theater and the Department of Film and Television are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school's programs are either strongly professional in nature or oriented toward advanced scholarly study and research in an atmosphere that recognizes and often draws on studio practice. Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television. The Master of Fine Arts degree programs prepare talented and highly motivated students for careers in the worlds of theater, film, television, and digital production. The M.A. and Ph.D. programs engage students in the critical study and research of these media, including their history, aesthetics, and theory, and prepare students for advanced research within the context of college and university teaching, as well as for writing and research in a variety of media-related professions.

In the Department of Theater, approximately 275 undergraduate and 125 graduate students interact with over 40 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. Resources include the four theaters of the Macgowan Hall complex, with the latest technologies needed for the creation, control, and integration of scenery, lighting, and sound. Specializations in the Master of Fine Arts

program include acting, directing, playwriting, design, technology and production management, and the producers program.

The Department of Film and Television includes both production and critical studies programs, with approximately 265 graduate and 60 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producers program. The critical studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, a complete animation laboratory for both traditional and computer-generated animation, and a laboratory and research facility for digital media. The M.A. and Ph.D. programs are supported by the collections of the University's libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and classroom instruction.

M.A. and Ph.D. faculty members and students also participate in various campus organized research units.

Informative brochures on the school are available from the Student Services Office, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

Majors and Degrees Offered

Film and Television (B.A., M.A., M.F.A., C.Phil., Ph.D.)
Theater (B.A., M.A., M.F.A., C.Phil., Ph.D.)

Undergraduate Study

Admission

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require applicants to submit additional supporting materials. Information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

Study Lists

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units (up to 20 units maximum) if they have an overall grade-point average of 3.0 (B) or better **and** have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If students have not filed their Study List by the end of the second week of classes, they must obtain the consent of the dean of the school to continue for that term.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet specific requirements. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

School Requirements

The general requirements of the School of Theater, Film, and Television must be completed with a grade-point average of 2.0 or better.

Unit Requirements

Double majors in the school, or between the school and other academic units, are not permitted.

Students must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). The Theater major includes both lower and upper division courses. Those listed under Preparation for the Major (lower division) must be completed before upper division major work is undertaken. The Film and Television major requires upper division work only.

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the school must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

Minimum Progress

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

Residence Requirements

Students are “in residence” while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

English Composition/Critical Reading and Writing Requirements

English Composition and Rhetoric

English Composition 3 with a minimum grade of C should be completed by the end of the freshman year and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

Critical Reading and Writing

One course from Comparative Literature (formerly Humanities) 2A, 2B, 2C, or English 4 with a minimum grade of C should be completed by the end of the sophomore year and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 5 also meets this requirement. Comparative Literature 2A, 2B, or 2C may not be applied toward the literature requirement if taken to meet this requirement.

Additional Degree Requirements

In addition to the school’s general education requirements, students must complete the following requirements:

Literature

Three courses (12 units) in literature are required, at least one of which must be upper division. Any literature course taken in the original language can fulfill this requirement. Comparative Literature 2A, 2B, or 2C may not be applied toward the critical reading and writing requirement if taken to meet this requirement; English 4 may **not** be applied here.

Foreign Language Proficiency

Students may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA’s level three or above with an average grade of C or better.

International students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

General Education (GE) Requirements

Reciprocity with Other UC Campuses

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of Theater, Film, and Television general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

Intersegmental General Education Transfer Curriculum

Transfer students from California community colleges have the option to fulfill UCLA’s lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when students complete it. If they select the IGETC, they must

complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of Theater, Film, and Television general education requirements.

Theater, Film, and Television GE Course List

For specific courses that fulfill the general education requirements, refer to the lists below or consult the Student Services Office before enrolling. Note: Courses that include the study of theater, film, or television may not be applied toward any general education requirements.

A. Art and Philosophy

Five courses (20 units), with no more than two courses from any single group:

A1. Group A

Art History

- 50. Ancient Art
- 51. Medieval Art
- 54. Modern Art
- 55A. Introduction to African Art
- 55B. Arts of Pre-Columbian America
- 56A. Art of India and Southeast Asia
- 56B. Introduction to Chinese Art
- 57. Renaissance and Baroque Art

Classics

- 51A. Art and Archaeology of Classical World: Greece
- 51B. Art and Archaeology of Classical World: Rome

A2. Group B

World Arts and Cultures

- 134. History of Dance in Culture and Performance
- 140A. Art as Social Action
- 140B. Art as Moral Action
- 140C. Seminar: Intercultural and Interdisciplinary Performance
- 141. Lighting Design for Dance Theater
- 181A. Dance Cultures of Asia
- 182. Dance in Africa and the African Diaspora
- C187. Dance in Native American Cultures

A3. Group C

Afro-American Studies

- M110A, M110B. African American Musical Heritage

Chicana and Chicano Studies

- M108A. Music of Latin America

Ethnomusicology

- 20A, 20B, 20C. Musical Cultures of the World
- M108A, 108B. Music of Latin America
- M110A, M110B. African American Musical Heritage
- 113. Music of Brazil
- 136A, 136B. Music of Africa
- 147. Survey of Classical Music in India
- 174. Aesthetics of Music

Folklore and Mythology

- M154A, M154B. African American Musical Heritage

Music

- 15. Art of Listening

Music History

- 2A, 2B. Introduction to Literature of Music
- 13. 20th-Century Music of the Western World
- 133. Bach
- 134. Beethoven
- 135A, 135B, 135C. History of Opera

A4. Group D

Philosophy

- 1. Beginnings of Western Philosophy
- 2. Introduction to Philosophy of Religion
- 4. Philosophical Analysis of Contemporary Moral Issues
- 5A. Philosophy in Literature

6. Introduction to Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
9. Principles of Critical Reasoning
21. Skepticism and Rationality
22. Introduction to Ethical Theory

B. Social Sciences

Three courses (12 units), with no more than two courses from any single group. Whenever possible, two courses from a single sequence are recommended:

B1. Group A

Chinese (East Asian Languages)

50. Chinese Civilization

Classics

10. Survey of Classical Greek Culture
20. Survey of Roman Civilization

East Asian Languages and Cultures

60. Introduction to Buddhism

Folklore and Mythology

15. Introduction to American Folklore Studies

German (Germanic Languages)

- 100A. German Civilization and Culture before 1700
- 100B. Modern German Civilization and Culture from 1700 to 1919
- 100C. German Civilization and Culture in the 20th Century

Italian

- 42A. Italy through the Ages, in English: Holy Roman Empire to Sack of Rome
- 42B. Italy through the Ages, in English: Late Renaissance to Postmodern Period

Japanese (East Asian Languages)

50. Japanese Civilization

Jewish Studies (Near Eastern Languages)

10. Social, Cultural, and Religious Institutions of Judaism

Korean (East Asian Languages)

50. Korean Civilization

Portuguese (Spanish and Portuguese)

- M42. Civilization of Spain and Portugal
- M44. Civilization of Spanish America and Brazil

Russian (Slavic Languages)

- 99A. Introduction to Russian Civilization
- 99B. Russian Civilization in the 20th Century

Spanish (Spanish and Portuguese)

- M42. Civilization of Spain and Portugal
- M44. Civilization of Spanish America and Brazil

Women's Studies

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

B2. Group B

Communication Studies

10. Introduction to Communication Studies

History

- 1A, 1B, 1C. Introduction to Western Civilization
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
4. Introduction to History of Religions
- 8A. Colonial Latin America
- 8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
- 8C. Latin American Social History
- 9A. Introduction to Asian Civilizations: History of India
- 9C. Introduction to Asian Civilizations: History of Japan
- 9D. Introduction to Asian Civilizations: History of the Near and Middle East
- 10A, 10B. Introduction to Civilizations of Africa
- 11A, 11B. History of China
- 148C. U.S. since 1945

Political Science

10. Introduction to Political Theory
20. World Politics
40. Introduction to American Politics

50. Introduction to Comparative Politics

B3. Group C

Anthropology

8. Archaeology: An Introduction
9. Culture and Society
33. Culture and Communication

Psychology

10. Introductory Psychology

Sociology

1. Introductory Sociology
2. Changing Society and Making History
3. Sociology of Everyday Life
4. Jobs and Careers: Sociological Approach
31. Dilemmas of Third World Development

C. Science

One course (four units) in physical sciences and one course (four units) in biological sciences:

C1. Physical Sciences

Astronomy

- 2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe
4. Universe of Stars and Stellar Systems
5. Life in the Universe
6. Cosmology: Our Changing Concepts of the Universe

Atmospheric Sciences

2. Air Pollution
3. Introduction to the Atmospheric Environment
4. California Weather and Climate
5. Climates of Other Worlds
6. Climate and Climatic Change

Chemistry and Biochemistry

2. Introductory Chemistry
15. Survey of Organic Chemistry and Biochemistry

Earth and Space Sciences

1. Introduction to Earth Science
2. Earth History
5. Environmental Geology of Los Angeles
8. Earthquakes
9. Origin and Evolution of Solar System
15. Introduction to Oceanography

Geography

1. Physical Environment

Mathematics

2. Finite Mathematics
- 3A, 3B. Calculus for Life Sciences Students
- 31A, 31B. Calculus and Analytic Geometry

Physics

- 1A. Physics for Scientists and Engineers: Mechanics
- 1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields
- 1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity
- 3A. General Physics: Mechanics of Solids and Fluids
- 3B. General Physics: Heat, Sound, Electricity and Magnetism
- 3C. General Physics: Light, Relativity, and Modern Physics
- 6A. Physics for Life Sciences Majors: Statics and Dynamics
- 6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics
- 6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport
10. Physics

C2. Biological Sciences

Anthropology

7. Human Evolution
10. Principles of Human Evolution: Genetic Basis
12. Principles of Human Evolution: Comparative Analysis

Earth and Space Sciences

16. Major Events in History of Life

Geography

2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World

5. People and the Earth's Ecosystems

Microbiology and Molecular Genetics

6. Introduction to Microbiology

7. Developments in Biotechnology

Molecular, Cell, and Developmental Biology

30. Biology of Cancer

40. AIDS and Other Sexually Transmitted Diseases

70. Genetic Engineering and Society

Organismic Biology, Ecology, and Evolution

10. Plants and Civilization

13. Evolution of Life

21. Field Biology

25. Oceans

Psychology

15. Introductory Psychobiology

Honors

Dean's Honors

To receive Dean's Honors in the School of Theater, Film, and Television, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at Graduation

Honors at graduation are awarded to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are *cum laude*, an overall average of 3.663; *magna cum laude*, 3.792; *summa cum laude*, 3.848. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

Counseling and Program Planning

The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, (310) 206-8441.

Graduate Study

The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, UCLA Film and Television Archive, special collections of the Arts Library, and the University's exhibition and performance halls.

The School of Theater, Film, and Television cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The producers program is an M.F.A. management program in the Departments of Theater and Film and Television, with options in either theater or film and television.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of these areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division.

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gd-net.ucla.edu/departments.html>.

Curricula and Courses

COURSE LISTINGS

In the following section, curricula and courses are listed alphabetically with the college or school administering the program identified in the program heading. Every effort has been made to ensure the accuracy of the information presented. However, all courses, course descriptions, instructor designations, and curricular degree requirements described herein are subject to change or deletion without notice. For up-to-date information, consult the quarterly *Schedule of Classes* or visit <http://www.registrar.ucla.edu/schedule/>.

For a complete outline of graduate degree requirements, see *Program Requirements for UCLA Graduate Degrees* available on the Graduate Division website at <http://www.gd-net.ucla.edu/departments.html>.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. **Lower division courses (numbered 1-99)** are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the requisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Lower division/first-year seminars (numbered 88) are departmentally sponsored courses designed to provide freshmen and sophomores the opportunity to participate in small classroom settings to enhance writing, verbal, and analytical skills. Many carry general education credit.

Variable topics courses (numbered 97 and 197) are offered at both the lower (97) and upper (197) division levels; topics within a defined subject area vary with the instructor and individual offerings. These topics have a fixed and permanent place in the regular curriculum.

Professional schools seminars (numbered 98) are designed by the faculty of the professional schools specifically for freshmen and sophomores. Outside of the professional schools, 98 courses are often offered as the lower division equivalent of 198 courses, defined below. Because they are temporary in nature, vary in content, and are offered irregularly,

they are not listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

Group special studies courses (numbered 198) are structured special studies for groups. They may be departmentally sponsored experimental and/or temporary in nature (e.g., courses taught by a visiting professor) or those which are being tested for permanent inclusion in the curriculum. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

Individual special studies courses (numbered 199, 199F, 199H, and 199I) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are structured by the instructor and student at the time they are initiated and are open to juniors (with a minimum 3.0 grade-point average in the major field), seniors, and graduate students. To enroll, students must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, and/or 199I courses per term. After completing 16 units of 199 and/or 199H credit on a letter grade basis, students must take any additional 199 and/or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. Students with an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific requisites and credit limitations.

Graduate Courses

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If students take a graduate course as an undergraduate, they may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree

only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596, directed individual study or research; 597, preparation for master's comprehensive or doctoral qualifying examination; 598, master's thesis research and preparation; and 599, doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with USC.) See individual departmental listings for specific limitations on 500-series courses.

Note: These definitions do not apply to the School of Law, which maintains its own course numbering system.

UCLA Extension Courses

In general, students may not attend UCLA Extension for degree credit if they are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see Concurrent Enrollment in the Academics section of this catalog.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Language in Culture is offered by the Department of Anthropology (Anthropology M140) and the Department of Linguistics (Linguistics M146). The course is listed under both departments.

Scope and Objectives

The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including the social sciences, humanities, and professional fields. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 30 active faculty members on campus with African interest and experience in many disciplines, students have multiple options to design individualized programs.

According to a recent survey, 45 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 30 percent work with international or foreign organizations in 20 countries.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The African Area Studies Program offers the Master of Arts (M.A.) degree in African Area Studies and participates in articulated degree programs with the Department of Film and Television and with the School of Public Health.

Admission

In addition to the University minimum requirements, applicants to the M.A. program are required to (1) submit three letters of recommendation, which normally should be from academic referees; (2) present a dossier containing a résumé describing academic, African-related, and professional experience and a research paper or other writing sample that well demonstrates their writing and analytical skills; and (3) take the Graduate Record Examination (GRE) General Test.

Also, applicants should have adequate preparation in undergraduate fields related to the program. Required preparation for the M.A. in African Area Studies most typically consists of a Bachelor of Arts in the social sciences, humanities, or fine arts.

M.F.A. Film and Television/M.A. African Area Studies

The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies with the M.F.A. in Film and Television, with a specialization in motion picture/television. Student must be accepted by both the Film and Television Department and the Program in African Area Studies before admission is offered.

M.P.H./M.A. African Area Studies

The African Area Studies Program and the School of Public Health have an articulated degree program whereby a student can work sequentially for the M.A. in African Area Studies and the Master of Public Health. By planning the concentration in public health while taking the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Areas of Study

Students choose a disciplinary (or interdisciplinary) concentration that requires at least five courses. Most concentrations are in the social sciences, fine arts, humanities, public health, or urban and regional planning. Sociology and anthropology may be taken as a combined major, as may interdisciplinary courses in development studies.

Course Requirements

A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. The courses must be distributed between disciplines as follows:

- (1) Major discipline: a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser.
- (2) A minimum of four other courses outside the major area, of which three must be at the graduate level.

Except for 500-series courses, University regulations indicate that students in an interdepartmental degree program may not apply courses taken on an S/U grading basis toward the master's degree. By petition, the program will consider an exception for one of the nine required courses. Such petitions must be approved by a graduate adviser and the Graduate Division. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, other 500-level courses may be allowed but may not be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination plan involves a four- to six-hour written examination. It is set by a three-person faculty committee, two members of which must be from the major discipline or field of concentration. The examination is taken in the last quarter of residence. In consultation with the graduate adviser, students select committee members for the examination. The chair of the committee receives questions from other members and is responsible for setting the examination questions and requirements. An additional oral examination may be held at the discretion of the examining committee. If the comprehensive examination is failed, it may be retaken only once.

Thesis Plan

The thesis option is available by permission of the graduate adviser. Upon obtaining permission, students, in consultation with the graduate adviser, select a faculty committee to supervise and assess the thesis. Two of the three faculty committee members, including the chair, must be from the area of concentration; a third member must be from another discipline. The thesis must reflect the major discipline or field of concentration. An oral defense may be required in some circumstances.

African Area Studies

Graduate Courses

201. Africa and the Disciplines. (4) Major intellectual trends and currents in development of African studies. Emphasis on appreciation of multidisciplinary background of African studies and relevant interpretive strategies. Central questions, critical issues, and current problems affecting Africa. Content varies each year.

M229B. Africana Bibliography and Research Methods. (4) (Same as Information Studies M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Course List

African Area Studies

All courses are not offered every academic year. Students should verify courses with the respective departments.

Courses with asterisks are special courses which may be applied toward the M.A. degree requirements with prior approval of the graduate adviser. These courses either do not exclusively focus on Africa or focus on Africa only in certain years.

African Languages (Linguistics)

1A-1B-1C. Elementary Swahili

2A-2B-2C. Intermediate Swahili

7A-7B-7C. Elementary Zulu

8A-8B-8C. Intermediate Zulu

Christopher Ehret, Ph.D. (*History*)
Teshome H. Gabriel, Ph.D. (*Film and Television*)
Thomas J. Hinnebusch, Ph.D. (*Linguistics, African Languages*)
Hartmut S. Walter, Ph.D. (*Geography*)

Scope and Objectives

The African Studies specialization is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward a bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology.

Undergraduate Study

African Studies Specialization

Students completing the African Studies specialization receive a degree with a major in a selected discipline and a specialization in African Studies. The chair of the committee in charge certifies completion of the program.

Preparation for the Specialization

Required: History 10A-10B and either African Languages M190 or a three-term sequence in any African language.

Upper Division Requirements

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, they are required to take an upper division course related to Africa in each of four departments.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (310-825-2944) or Professor Hartmut S. Walter, Geography, 1177 Bunche Hall (310-825-3116, 825-1071).

Scope and Objectives

Originally born during the late 1960s and early 1970s, the Afro-American studies major was designed to fill a void that existed at UCLA in terms of scholarly and curricular material relevant to the African American experience. Students and faculty currently associated with the program see the major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that they examine both the truth and the fiction regarding the African American experience in the U.S. For African American students, this leads

to a heightening of self-awareness and self-pride. For non-African American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of African Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the African American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

Undergraduate Study

Afro-American Studies B.A.

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates.

Preparation for the Major

Required: History 10A and the courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (requisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): *anthropology* — Anthropology 8, 9, 10 (or 7), 12; *economics* — Economics 1, 2, M40, Mathematics 3A, 31E (or 3A and 3B, or 31A and 31B); *English* — English Composition 3, English 4, 10A, 10B, 10C (all must be taken in sequence); *history* — History 1A-1B-1C, 10B, 13A-13B-13C, and 99 or 100; *philosophy* — Philosophy 4, 21, 22, 31; *political science* — Economics 1, Political Science 6, 20, 40, Sociology 1; *psychology* — Anthropology 7, Mathematics 2, Organismic Biology, Ecology, and Evolution 2, Physics 10 (or 1A or 3A or 6A), Psychology 100A, 100B, one year of high school chemistry (or Chemistry and Biochemistry 2 or 20A); *sociology* — Afro-American Studies M5 or Anthropology 34, Anthropology 9, Mathematics 2, Sociology 1, M18. Students are strongly urged to complete the required lower division courses within the first two years of the major.

The Major

Required: (1) Anthropology M164, English M104A or M104B or M104C, History M158B-M158C; (2) four upper division and/or graduate

courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: Students may petition the committee which administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, students should select a combination of courses that best meets their current and future educational and career goals.

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. Afro-American Studies majors with grade-point averages of 3.5 or better complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American Studies and another). Students interested in this option must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, students are encouraged to plan their curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Afro-American Studies Program offers the Master of Arts (M.A.) degree in Afro-American Studies.

Admission

Applicants for admission to the M.A. program must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in African American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) official transcripts; (2) three academic letters of recommendation; (3) a minimum 3.0 or B average in the junior/senior years of college; (4) a statement of purpose describing their background

in African American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses their interests and abilities; and (7) other evidence of promise that is deemed relevant, such as work experience, accomplishments, or community and public service.

Admission to the program is limited to Fall Quarter. Prospective students may request applications from the program office.

Areas of Study

The M.A. in Afro-American Studies is interdepartmental, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: Art, Dance, Economics, Geography, Psychiatry and Biobehavioral Sciences, Theater, Folklore and Mythology, Latin American Studies, African Area Studies, Education, Library and Information Science, Management, Public Health, Social Welfare, and World Arts and Cultures.

Course Requirements

A total of 12 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of six required courses. Students are required to take Afro-American Studies M200A, three courses from 200B through 200F, 270A, and one graduate-level course in research methods (for social sciences students) or critical theory (for humanities students). The methods course should be selected from the list approved by the interdepartmental degree committee (students may petition to substitute an appropriate upper division course if their outside department's methods course is closed to nonmajors). These courses should normally be taken in the first year of study. The second year is devoted to acquiring disciplinary competence in the cognate field, and six courses must be selected from that discipline.

Eight units of 500-series courses (excluding 597 and 598) may be applied to either the total course requirement or the minimum graduate course requirement.

Comprehensive Examination Plan

Students may elect to complete the M.A. degree through the comprehensive examination option. The examination is administered by a committee consisting of at least three faculty members appointed by the program. The examination is offered on a regular basis.

Thesis Plan

The thesis is the final report on the results of the student's original investigation. Before beginning work on the thesis, students should consult closely with their academic adviser and the thesis committee.

Afro-American Studies

Lower Division Courses

M5. Social Organization of Black Communities. (4) (Same as Sociology M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

6. Trends in Black Intellectual Thought. (4) Overview of major intellectual trends that have shaped ways in which Afro-American thinkers have interpreted experiences of blacks in the U.S., drawing from such fields as history, philosophy, and literature.

Upper Division Courses

100B. Psychology from an Afro-American Perspective. (4) Survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and future of Afro-American psychology.

C101. Special Topics in Afro-American Studies. (4) Variable topics. May be repeated for credit. Concurrently scheduled with course C201.

M102. Culture, Media, and Los Angeles. (6) (Same as Asian American Studies M197H and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

M103A. African American Theater History: Slavery to Mid-1800s. (4) (Same as Theater M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (4) (Same as Theater M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

M103E. African American Theater History: The Depression to the Present. (4) (Same as Theater M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

M104A. Early Afro-American Literature. (4) (Same as English M104A.) Preparation: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins.

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (4) (Same as English M104B.) Preparation: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

M104C. Afro-American Literature since the 1960s. (4) (Same as English M104C.) Preparation: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/ NP or letter grading.

M107. Cultural History of Rap. (4) (Same as Ethnomusicology M119 and Folklore M110.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

M109. Women in Jazz. (4) (Same as Ethnomusicology M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (4-4) (Same as Ethnomusicology M110A-M110B and Folklore M154A-M154B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

CM112D. African American Art. (4) (Same as Art History CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

M120. Race, Inequality, and Public Policy. (4) (Same as Policy Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America.

M144. Ethnic Politics: African American Politics. (4) (Same as Political Science M144B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: Political Science 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

M145. Ellingtonia. (4) (Same as Ethnomusicology M111.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

M158A. Comparative Slavery Systems. (4) (Same as History M158A.) Designed for juniors/seniors. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North America, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (4-4) (Same as History M158B-M158C.) Designed for juniors/seniors. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus.

M158E. African American Nationalism in First Half of the 20th Century. (4) (Same as History M158E.) Designed for juniors/seniors. Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

M164. Afro-American Experience in the U.S. (4) (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

M166. Afro-American Sociolinguistics: Black English. (4) (Same as Anthropology M145.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

M172. The Afro-American Woman in the U.S. (4) (Same as Psychology M172 and Women's Studies M172.) Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

M175. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (4) (Same as Women's Studies M173.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

M195. Investigative Journalism and Communities of Color. (4) (Same as Asian American Studies M163.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverages.

M197A. Topics in Afro-American Literature. (4) (Formerly numbered M197.) (Same as English M197A.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit. P/NP or letter grading.

197B. Special Studies in Comparative Literature: Caribbean Literature. (4) General introduction to literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language.

199. Special Studies in Afro-American Studies. (2 to 4) To be arranged with faculty member who directs the study. Preparation: 3.0 grade-point average in major. Limited to juniors/seniors. Intensive directed research project. Eight units may be applied toward major requirements.

Graduate Courses

M200A. Advanced Historiography: Afro-American. (4) (Same as History M200V.) Seminar, three hours. May be repeated for credit.

200B. Seminar: Political Economy of Race. (4) Seminar on political economy, with special reference to black political economy and with focus on dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socio-economic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology. (4) (Same as Sociology M262.) Seminar.

M200D. Afro-American Sociolinguistics: Black English. (4) (Same as Anthropology M243Q.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

M200E. Studies in Afro-American Literature. (4) (Same as English M262.) Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

200F. African American Psychology. (4) Seminar. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars: African philosophy, perspectives on racism in psychology, and research in the black community.

C201. Special Topics in Afro-American Studies. (4) Variable topics. May be repeated for credit. Concurrently scheduled with course C101.

M211. Seminar: African American Music. (4) (Same as Ethnomusicology M211.) Seminar, three hours. Requisites: Ethnomusicology M110A-M110B. Designed for graduate students. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music.

CM212D. African American Art. (4) (Same as Art History CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM112D. S/U or letter grading.

M240. Assessment and Treatment of African American Families. (3) (Same as Psychiatry M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family.

241. Special Topics in Afro-American Studies. (4) Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of Afro-American studies.

270A. Survey of Afro-American Research. (4) Seminar, three hours. Overview of research methodologies in humanities and social sciences, with firsthand reports from faculty in various fields. Introduction to research in and related to Afro-American studies and application of such research.

596. Directed Readings and Tutorials. (4) Provides students with umbrella under which they can pursue specialized interests from which there is insufficient demand to warrant offering a formal course.

597. Preparation for M.A. Comprehensive Examination. (4 or 8) Limited to graduate students. May not be applied toward M.A. course requirements. S/U grading.

598. Research for and Preparation of M.A. Thesis. (4 or 8) Limited to graduate students. May not be applied toward M.A. course requirements. S/U grading.

Visiting Associate Professor

Hanay Geigamah, B.F.A. (*Theater*)

Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. program in American Indian Studies was established here.

The program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. Students graduate with the training they need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program ranks

among the top Indian studies programs in the country.

Undergraduate Study

American Indian Studies Minor

The American Indian Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Science with a group of related courses from various disciplines germane to American Indian studies. The minor exposes students to Indian-related research and literature in a number of different disciplines, such as anthropology, economics, history, political science, sociology, and theater.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition at the American Indian Studies Center, 3220 Campbell Hall, (310) 206-7511. All degree requirements, including the specific requirements for this minor, must be fulfilled within 228 units.

Required Lower Division Course (four): American Indian Studies 10 with a grade of C or better.

Required Upper Division Courses (28): Seven courses selected from the following: (1) one American Indian languages and communication systems course (Anthropology 144 or Linguistics 114); (2) three history and social sciences courses from Anthropology 113Q, 113R, 114P, 114Q, 114R, 118A, 118B, 158, 172R, History 157A, 157B, 165C, Sociology M161, Women's Studies 130; (3) three humanistic perspectives on language and expressive culture courses from Art History C117A, C117B, C117C, 118D, English 106, 180X, Ethnomusicology 106A, 106B, 106C, Folklore and Mythology 130, Theater 103F, World Arts and Cultures C187.

A minimum of 20 units applied toward the minor requirements must be **in addition** to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at

<http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The American Indian Studies Program offers the Master of Arts (M.A.) degree in American Indian Studies and participates in a concurrent degree program with the School of Law.

Admission

A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program. Applicants must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, applicants must submit a detailed account of their background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but applicants are encouraged to take the examination and submit test results as part of the documents supporting their enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to Fall Quarter. Application forms and further information may be obtained from the Committee to Administer the M.A. Degree in American Indian Studies.

J.D./M.A. American Indian Studies

The American Indian Studies program and the School of Law offer a concurrent degree program whereby students may pursue the M.A. and the Juris Doctor degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. For the curriculum, 10 courses are required for the degree, of which seven must be at the graduate level. Only 12 units of law are allowed to be double-counted toward the M.A. degree by petition to the Graduate Division. Applicants interested in the program should contact the American Indian Studies Program.

Areas of Study

The American Indian Studies M.A. is an interdepartmental program with 13 participating academic schools and departments: Anthropology, Art, Education, English, Ethnomusicology, Folklore and Mythology, History, Law, Library and Information Science, Linguistics, Music, Sociology, and Theater. The disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Stud-

ies M.A. are also offered in the following departments: Political Science, Social Welfare, and Psychology.

Course Requirements

A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C, which must be taken in the first year, and one of the language/linguistics options described below, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

One of the following courses must be completed to fulfill the language/linguistics requirement: (1) Linguistics 114; (2) Anthropology 243P; or (3) for native speakers of an American Indian language, an independent study course (taken with consent of the instructor) in either linguistics or anthropology, designed and supervised by a consenting faculty member, in which the objective of the course is to impart a structural knowledge of the student's language. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Students select one area of concentration: (1) history and law, (2) expressive arts, (3) social relations, (4) language, literature, and folklore. Students can petition for optional combinations of interdisciplinary work through the committee to administer the program. In addition to the four required courses, students must complete a minimum of four courses in an area of concentration. Three of these must be graduate-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be chosen from an approved list maintained by the program.

Two courses in the 500 series may be applied toward the 10-course requirement. However, only one 596 course may be applied toward the program requirement of seven graduate courses.

Comprehensive Examination Plan

A proposed comprehensive examination committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. The comprehensive examination normally consists of a written examination in the major area of concentration and in the minor area of concentration. The written examination is typically followed by an oral discussion of the student's answers involving both the student and the committee members. The examination is designed and evaluated by the student's M.A. committee. Students should work closely with their committee members in preparing for the examination.

Thesis Plan

A proposed thesis committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. Students must also submit a thesis proposal to their M.A. committee by the end of the fourth quarter of study. The M.A. thesis should demonstrate the student's ability to define and solve a significant problem in the area of concentration. It should give evidence of mastery of theory and methodology relevant to the topic, familiarity with literature in the field, competency in research techniques, and ability to make an original contribution to the field. Copies of the thesis must be submitted to each member of the committee by the fifth week of the quarter in which students expect to graduate.

American Indian Studies

Lower Division Course

10. Introduction to American Indian Studies. (4) Lecture, four hours; discussion, one hour. Survey of selected Native North American cultures from pre-Western contact to the contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

Upper Division Courses

M161. Comparative American Indian Societies. (4) (Same as Sociology M161.) Lecture, three hours. Prerequisite: course 10 or Sociology 1. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

197. Special Topics in American Indian Studies. (4) Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult *Schedule of Classes* for topics and instructors. May be repeated twice for credit.

199. Special Studies in American Indian Studies. (2 to 4) Special individual studies on topics in American Indian studies. P/NP or letter grading.

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (4) (Same as History M200W.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

M200B. Cultural World Views of Native America. (4) (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

M200C. Contemporary Issues of the American Indian. (4) (Same as Anthropology M269 and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B.

201. Topics in American Indian Studies. (4) Discussion, three hours.

M228. Seminar: Indian Law — Tribal Legal Systems. (4) (Same as Law M528.) Study of historic and contemporary legal systems of selected tribes, with emphasis on relationships among law, religion, and social order.

M267. Indian Law. (5) (Same as Law M267.) Lecture, three hours (15 weeks). Special legal status of American Indians and Indian tribes and tension between moral/legal claims and political forces. Sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights of American Indians in relation to federal, state, and tribal governments and federal trust relationship to Indians.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (4 to 8) S/U or letter grading.

598. Research for and Preparation of M.A. Thesis. (4 to 8) Preparation of research data and writing of M.A. thesis. S/U grading.

ANESTHESIOLOGY

School of Medicine

UCLA

Chairs

Patricia A. Kapur, M.D., *Chair*
Robert D. Kaufman, M.D., *Vice Chair*
Stanley W. Stead, M.D., *Vice Chair*
Enrico Stefani, Ph.D., M.D., *Vice Chair*
Selma H. Calmes, M.D., *Chair, Olive View-UCLA*
Richard Y. Z. Chen, M.D., *Interim Vice Chair, VA Greater Los Angeles Health Care System*
Elaine C. Yang, M.D., *Acting Vice Chair, Harbor-UCLA*

Scope and Objectives

The medical student program in anesthesiology focuses on the delivery of peri-operative

care to surgical patients. During their training in the department, students develop clinical skills of medical management of surgical patients, techniques of invasive line and monitor placement, and airway management skills. They are assigned to work with a specific attending anesthesiologist and/or anesthesia resident on a daily basis in one of the operating room locations and participate in the preoperative evaluation and preparation of their patients and development of an anesthetic plan. Students then observe how to prepare for and execute their anesthetic plan. They have opportunity to perform procedures as their abilities and the situation permit. In addition, the department has established the Human Patient Simulator which provides students with a simulated operating room setting where a variety of clinical situations are initiated so they can practice their clinical skills. Students are also expected to attend clinically oriented lectures on a wide range of anesthesia topics, including physiology, pharmacology, and critical care.

For further details on the Department of Anesthesiology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Sondra Hale, Ph.D.

Scope and Objectives

Anthropology, the broadest of the social sciences, is the study of humankind. One of the strengths of anthropology as a discipline is its "holistic" or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The department recognizes the following four fields in anthropology:

Archaeology is diverse in both methodology and geographic coverage. The greatest strengths within the department lie in the study of cultural evolution, complex societies, hunters/gatherers, iconography, craft specialization, quantitative analysis, and political economy and include major programs focused on Western North America, California, and the high cultures of Mesoamerica and South America.

Biological anthropology is the study of humans and other primates from a Darwinian point of view. The program focuses on the evolutionary ecology of early hominids, extant primates, and contemporary humans and includes training in evolutionary theory, behavioral ecology, evolutionary psychology, paleoanthropology, paleoecology, primate behavior, and mathematical modeling. Faculty members associated with the program have engaged in fieldwork in Africa, Central America, and Southeast Asia where ongoing projects include work on primate behavior, hominid evolution, and evolutionary psychology.

Linguistic anthropology is an interdisciplinary field which addresses the manifold ways in which communication and culture mutually define one another in different communities worldwide. Linguistic anthropologists at UCLA have a variety of backgrounds and research interests which include the ethnography of face-to-face communication, language contact and change, verbal art and performance, and language and education. Courses are offered in ethnographic approaches to discourse analysis, field methods, conversational analysis, and urban sociolinguistics, as well as in cross-cultural pragmatics, including visual aspects of communication.

Sociocultural anthropology concerns the examination and understanding of social systems and cultural perceptions, and the human capacities which enable them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, South America, East and Southeast Asia, and Oceania. They have also engaged in ethnographic research among Americans with diverse ethnic identities and in various institutional settings.

Cutting across the four fields are three other categories of course offerings: **applied anthropology, regional cultures, and history, theory, and method.**

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

Undergraduate Study

Anthropology B.A.

Preparation for the Major

Required: Anthropology 7 (or 10 and 12), 8, 9, 33, and one elective from 10, 12, M80, 88. *All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.*

The Major

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural "holistic" and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, students must take two courses in the sociocultural anthropology field and one course in each of the other three fields (see "Scope and Objectives"). Students may take any upper division course in the given area to fulfill this requirement. *All courses must be taken for a letter grade, and students must maintain an overall 2.0 GPA.*

Students must complete 15 four-unit courses as follows:

- (1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
- (2) One upper division region and society course.
- (3) One upper division history/theory course.
- (4) One upper division methodology course.
- (5) Four additional upper division anthropology courses.
- (6) A cluster of three related fields courses that demonstrate cohesion, to be selected in consultation with the undergraduate adviser and approved by the department.

Concentrations for the Major

Concentrations, although not required, may help define and structure an Anthropology major when students want emphasis in one of the four major fields. Whether or not they opt for a concentration, the requirements for the major must still be satisfied. It is possible to use courses within their specified concentration to fulfill overlapping requirements for the major. Exceptions to the requirements below are by petition only. More detailed information on the concentrations is available from the undergraduate adviser.

(1) *Archaeology*: Anthropology 115P, 117 (fieldwork); two courses from 110, 111, 183; one methods course from M115A, M115B, C115R, M116Q, 117P, 118A, C126P, 129Q, 138; one quantitative methods course from M80, 180, 186; one area course from 112, 113P, 113Q, 113R, 114P, 114Q, 114R; three theory courses from 120, 124, 132, 133Q, 133R, 150, 152, 153, 156, 158, 186P, CM189A, CM189B, Geography 140, 148, Sociology 101

(2) *Biological Anthropology*: Anthropology 120; one quantitative methods course from M80, 180, 186; one methods course from 115P, M116Q, 117, 117P, C126P, 143; one human biology and behavioral ecology course from 124, 186P, CM189A, CM189B; one paleoanthropology course from 121A, 121B, 121C, or both 12 and 129Q (credit is not granted for both courses 7 and 12); one human genetics course from Molecular, Cell, and Developmental Biology CM156, Organismic Biology, Ecology, and Evolution C135; one primate behavior course from Anthropology 128A, 128B, Organismic Biology, Ecology, and Evolution 129

(3) *Linguistic Anthropology*: Anthropology 33, M140, Linguistics 20, Sociology CM124A; two methods courses from Anthropology 141, 142A, 143, Linguistics 103; one ethnography course from Anthropology 144, M145, 146, Linguistics 114; one course from Anthropology 133Q, 133R, 135A, 135B, 135C, Communication Studies 100, Linguistics 110, 127, Psychology M137J; one term of a non-European language

(4) *Sociocultural Anthropology*: Anthropology 130, 150; one primary course from three of the four subconcentrations listed below; two history, theory, and methods courses from M80, C126P, 139, 180, 182, 186, Sociology 101; one region and society course from 158, 171, 172R, 173Q, 174P, 175R, 175S, 175T, 175U, 175V, 177; two additional courses from one of the subconcentrations listed below:

(a) *Applied and Development Subconcentration*: Primary course: Anthropology 161; additional courses: M155Q, 167, M168, 186, International Development Studies M100B

(b) *Ecological and Evolutionist Subconcentration*: Primary course: Anthropology 153; additional courses: 128A, 128B, 132, 158, 165, 186, 186P, Geography 140

(c) *Social Processes and Practice Subconcentration*: Primary courses: Anthropology 151, 152, M154P; additional courses: 88, 128A, 128B, 153, 155, 156, 158

(d) *Psychocultural and Medical Subconcentration*: Primary courses: Anthropology 135A, 135B, 135C, 135T; additional courses: 135S, M168

Honors Program

The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted students should have a cumulative grade-point average of 3.0 overall and a 3.5 cumulative GPA in their upper division anthropology courses. The application for admission must be submitted during Fall Quarter. Ideal candidates should have junior or senior standing and have completed at least two upper division anthropology courses. The proposal, research, analysis, and writing of the paper take place over four terms through Anthropology 197HA-197HD. Course 197HA should be taken in Winter Quarter and 197HB in Spring Quarter. Research should be done in summer, and courses 197HC and 197HD should be taken in Fall and Winter Quarters of the graduation year. Students should contact the departmental honors adviser early in their studies for more information.

Anthropology B.S.

Preparation for the Major

Required: Anthropology 7 (or 10 and 12), 8, 9, 33; Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, and 30L; Life Sciences 1, 2, 3, 4; Mathematics

3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, and 6C. *All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.*

The Major

The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. *All courses must be taken for a letter grade, and students must maintain an overall 2.0 GPA.*

Students must complete 10 four-unit courses as follows:

- (1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
- (2) One upper division region and society course.
- (3) One statistics course.
- (4) One upper division history/theory course.
- (5) Two additional upper division anthropology courses.

Computing Specialization

Majors in either anthropology bachelor's degree program may select a specialization in Computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 180 or 186, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60 or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), and (4) satisfying all the other requirements for a bachelor's degree in the specified major. Students graduate with a bachelor's degree in their major and a specialization in Computing. Interested students should contact the undergraduate adviser.

Anthropology Minor

Students who wish to take a series of courses in anthropology, but major in another discipline, may be interested in the Anthropology minor. Students select courses from the four fields within anthropology (archaeology, biological anthropology, linguistic anthropology, sociocultural anthropology), although they are encouraged to focus the body of their coursework within one field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (eight): Two courses from Anthropology 7, 8, 9, 10, 12, 33.

Required Upper Division Courses (20): The core course (Anthropology 111, 120, 130, M140, or 150) from one of the four anthropology fields listed above and four additional courses. Students are encouraged to concentrate their upper division coursework within one

field and are required to consult with the undergraduate adviser in planning their program of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Anthropology offers the Master of Arts (M.A.) degree in Anthropology.

Admission

Admission to the M.A. program is restricted to the Fall Quarter. All applicants are required to have a B.A. degree or its equivalent from a recognized college or university. A minimum grade-point average of 3.0 or its equivalent is also required for the last two years of undergraduate work and for any postbaccalaureate work completed. The department does not require an applicant to have a degree in anthropology, but it is highly desirable. If a student with a B.A. or M.A. from another field is admitted, a program of background studies in anthropology is formulated. Knowledge of a foreign language is not required for admission, but completion of the M.A. language requirement is recommended before beginning graduate work. The *Application for Graduate Admission* must be submitted by December 15 for consideration for the Fall Quarter of the following year. The following supporting material must be submitted directly to the Anthropology Department by January 5: (1) official transcripts of record, in duplicate, from each college or university at which work has been completed; (2) statement of purpose; (3) three letters of recommendation (preferably from anthropologists); (4) writing sample; and (5) Graduate Record Examination (GRE) scores sent by the testing agency.

Applicants applying for readmission to the program or petitioning to change their major to anthropology are treated in the same manner as first-time applicants. These students are required to submit (1) the appropriate application form and (2) the same supporting documents as new applicants by the stated deadline date. Graduate students who have been readmitted to the program are subject to any changes in departmental policy and regulations that have been instituted since the last time they were enrolled as an anthropology major.

The department requires that two faculty members sponsor an applicant before admission is recommended. Prospective sponsors are canvassed by the Departmental Admissions Committee, but it is also appropriate for applicants to contact potential sponsors.

For further information on the departmental program, a graduate information syllabus may be obtained without charge by writing to the Anthropology department.

Areas of Study

Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

Course Requirements

The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

An M.A. degree requires 10 courses (40) taken for a letter grade, with a minimum 3.0 grade-point average. The 10 required courses are distributed as follows:

- (1) Two courses must be the graduate proseminar, Anthropology 200A-200B;
- (2) One course must be the graduate core seminar in the student's field of specialization (200 series);
- (3) Three courses must be graduate seminars (200 series),
- (4) Four courses may be upper division (100 series) designated elective courses,
- (5) Three courses may be outside the major with the approval of the three-member guidance committee,
- (6) Two courses may be independent studies. Eight units of course 596 taken for a letter grade may be applied toward the total M.A. course requirement, but only four of these eight units are applicable to the minimum graduate-course requirement.

Courses taken on a S/U basis, Anthropology 598, and 300- and 400-series courses may not be applied toward fulfillment of the M.A. unit requirement.

Core Course Requirements. The purpose of the core course requirement is to ensure that students are versed in the major fields in anthropology. Courses taken while in graduate status at UCLA may be applied toward the unit requirement of the M.A. degree. These fields and courses have been designed to meet the minimal needs of students specializing in other subfields of study.

- (1) Archaeology: Anthropology 111 or M201A
- (2) Biological: Anthropology 120G
- (3) Linguistic: Anthropology M140 or 242
- (4) Sociocultural (select one): Anthropology 130, 150, 203A, 203B, 203C

Students must demonstrate basic knowledge in all fields by exercising one or a combination of the following three options:

- (1) Taking the core course with a passing grade of B or better;
- (2) Petitioning that coursework completed elsewhere, or at UCLA as an undergraduate, constitutes the equivalent of such courses;
- (3) Passing the subfield's core course examination given in Spring Quarter.

A grade of B or better is required in any core course taken at UCLA. If students received a grade of B-, C+, or C, they may not repeat the core course, but must take the core course examination and pass or be subject to dismissal. If a grade of C- or below is received, students may repeat the course, but must receive a grade of B or better the second time the course is taken, or be subject to dismissal.

Comprehensive Examination Plan

None.

Thesis Plan

The purpose of the master's thesis is to demonstrate ability to generate and assemble a body of data, to analyze it, and to indicate its relevance to established anthropological thought as well as to write lucid prose. Students must submit an original paper based on field, laboratory, or library research to all three committee members by the end of the fifth quarter of residence. The thesis committee assists students in formulating the research paper, monitoring its progress, and evaluating the paper when submitted. It is essential that students maintain close contact with all three members while preparing the M.A. thesis. Consult the Graduate Division's publication, *Policies and Procedures for Thesis and Dissertation Preparation and Filing*, for instructions on the preparation and submission of the thesis.

Doctoral Degree

Admission

Students who enter the graduate program with an M.A. degree, whether or not in anthropology, are required to demonstrate basic knowledge of the discipline before being permitted to begin the requirements for the Ph.D degree in Anthropology. It is expected that students accomplish this during the first year of academic residence by completing (in accordance with the procedures and regulations stated in the M.A. degree section) the following:

- (1) Nominating a three-member departmental advisory committee;
- (2) Completing the core course requirement;
- (3) Establishing competency in a foreign language, equivalent to the master's level requirement;
- (4) Taking the graduate core seminar only in the student's field of specialization. This is re-

quired of all students even though they may already have a master's degree in anthropology;

(5) Taking the graduate proseminars, Anthropology 200A-200B. This is required of all entering students;

(6) Submitting to the student's departmental advisory committee, for evaluation, a prior master's paper or a research paper that was written while in graduate standing.

Only when these requisites have been met are students permitted to begin the requirements for the Ph.D. degree.

Major Fields or Subdisciplines

Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

Course Requirements

The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

Students who received their M.A. degree from this department are expected to enroll in three seminars, each with a different faculty member, between receipt of the master's degree and taking the doctoral qualifying examinations. The department does not require any specific courses or number of courses for receipt of the Ph.D.

Written and Oral Qualifying Examinations

The Ph.D. qualifying examination is composed of written and oral examinations. The timing of these examinations are set in consultation with the members of the doctoral committee and are to be taken within a 10-week period of time. Students must be registered and enrolled to take the qualifying examinations.

Written Examination. The written portion of the qualifying examination is administered by the three-member departmental doctoral committee. Students are examined in three subfields; two fields are drawn from a list maintained in the department and the third is specific to the student's dissertation interests and needs. In addition, students are expected to demonstrate competence in general anthropological theory. The format of the written examination is to be determined by the student's departmental doctoral committee. There must be a minimum of two weeks between completing the written examination and taking the oral portion of the qualifying examination.

University Oral Qualifying Examination. The oral portion of the doctoral qualifying examination is primarily a defense of the dissertation proposal and is administered by the four-member Ph.D. doctoral committee.

The committee determines the conditions for reexamination should students not pass either portion of the qualifying examination.

Anthropology

Lower Division Courses

7. Human Evolution. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Evolutionary processes and evolutionary past of the human species. P/NP or letter grading.

8. Archaeology: An Introduction. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several campus archaeologists.

9. Culture and Society. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

10. Principles of Human Evolution: Genetic Basis. (4) Lecture, three hours; discussion, one hour. Human population biology in the conceptual framework of evolutionary processes. Emphasis on genetic basis of evolution, population biology, and diversity among living populations.

12. Principles of Human Evolution: Comparative Analysis. (4) Lecture, three hours; discussion, one hour. Human population biology in conceptual framework of evolutionary processes. Emphasis on comparative primate behavior, structural anatomy, and the fossil record. P/NP or letter grading.

33. Culture and Communication. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to ways in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people's behavior and understanding of each other's actions. Topics include language socialization, cross talk, and verbal and nonverbal communication.

34. Introduction to Urban Speech Communities. (4) Lecture, three hours; discussion, one hour. Introduction to study of speech communities in metropolitan areas, with special focus on communities in Los Angeles. Emphasis on ways in which communities share and incorporate speech norms of urban society while maintaining rules for conduct and interpretation of speech within specific speech communities. Topics include language and identity, socialization, social dialects, and communication.

M70. Politics of Reproduction. (4) (Same as Psychiatry M98J.) Seminar, three hours. Preparation: satisfaction of Subject A requirement. Examination of ways that power, as it is structured and enacted in everyday activities, influences human reproductive behavior. Use of case materials from a variety of cultures, including the U.S., to study how competing interests within households, communities, and states impinge on childbearing and childrearing choices made by individual women and men.

M80. Introduction to Quantitative Methods. (4) (Formerly numbered 80.) (Same as Statistics M21A.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test). P/NP or letter grading.

88. Lower Division Seminar. (4) Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

Archaeology

110. World Archaeology. (4) Requisite: course 8. Designed for juniors/seniors. Broad survey of human culture history from its Stone Age beginnings to establishment of the primary civilizations of the Old and New Worlds. Intended for students with general interest in archaeology and in an anthropological approach to study of the past.

111. Study of Archaeology. (4) Survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.)

112. Old Stone Age Archaeology. (4) Lecture, three hours. Requisite: course 8. Development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data, Pleistocene geology and chronology, and relationship between human cultural and biological evolution.

113P. Archaeology of North America. (4) Lecture, three hours. Prehistory of North American Indians; evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology.

113Q. Prehistory and Ethnography of California. (4) Lecture, three hours. Requisite: course 8 or 9. From earliest Californians through 10,000 years of history, study of diversity in California's original peoples. Aspects of technology, ideology, ecology, and social/political organization. Historic impacts on California Indians by Euro-Americans. P/NP or letter grading.

113R. Southwestern Archaeology. (4) Examination of prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to "Great Events" (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems.

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere). (4) Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec/Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). (4) Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114R. Ancient Civilizations of Andean South America. (4) Lecture, three hours. Requisite: course 8 or 9. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Inca and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

C114S. Comparative Study of Ancient States. (4) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. Concurrently scheduled with course CM214S. P/NP or letter grading.

M115A-M115B. Historical Archaeology. (4-4) (Same as History M103A-M103B.) Lecture, three hours. Designed for juniors/seniors. P/NP or letter grading. **M115A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of discipline both in the Old World and the Americas. **M115B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some of the practical applications.

115P. Archaeological Field Training. (6 or 12) Lecture, two to three hours; fieldwork, eight (spring) or 50 (summer) hours. Requisite: course 8. Off-campus field archaeology course offered for six units in Spring Quarter and 12 units in Summer Quarter. Procedures of archaeological excavation, recording, mapping, surveying, and initial analysis of archaeological data. P/NP or letter grading.

C115R. Strategy of Archaeology. (4) Seminar, three hours; outside study, nine hours. Designed for juniors/seniors. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C215R.

M116Q. Dating Techniques in Environmental Sciences and Archaeology. (4) (Same as Geography M178.) Lecture, three hours; reading period, one hour. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.

117. Archaeological Laboratory Methods. (6) Lecture, three hours; laboratory, two to three hours. Requisite: course 8. Archaeological analysis of prehistoric cultural materials. Procedures of classification, analysis, data entry. Laboratory work with lithic artifacts, vertebrate fauna, shellfish, plant remains, bone and shell tools, ceramics, and more. Extra laboratory sessions, with focus on additional intensive training in one or more technical laboratories. P/NP or letter grading.

117P. Intensive Laboratory Training in Archaeology. (4) Lecture, three hours; laboratory, four hours. Requisite: course 117. Archaeologists with special expertise in specific analytical techniques and topics oversee intensive laboratory training on a tutorial or small-class basis on one of the following topics: zooarchaeology, ethnobotany, lithic analysis, ceramic analysis, etc. May be repeated for credit with topic change. P/NP or letter grading.

118A. Museum Studies. (4) Method and theory of museum operation. Discussion and demonstration of acquisition accession, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and funding. Lectures and demonstrations structured to illustrate how various aspects of museum operation are interrelated.

118B. Museum Studies. (4) Requisite: course 118A. Two areas of museum operation are selected by students from those discussed and demonstrated in course 118A. Students are then required to develop expertise in these areas through a combination of library research and a series of assignments carried out in the museum.

M119. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions. (4) (Same as History M175A.) Lecture, three hours; outside study, nine hours. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

Biological Anthropology

120. Survey of Biological Anthropology. (4) Lecture, three hours. Requisites: courses 7, or 10 and 12. Limited to majors and graduate anthropology students. Survey of biological anthropology including all major subareas. (Core course for biological field.) P/NP or letter grading.

120G. Biological Anthropology in Review. (6) Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate anthropology students. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation.

121A. Primate Fossil Record. (4) Lecture, three hours. Recommended requisites: courses 7, or 10 and 12. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene. P/NP or letter grading.

121B. Australopithecines. (4) Lecture, three hours. Recommended requisites: courses 7 (or 10 and 12), 121A. Morphology, ecology, and behavior of the genus *Australopithecus*. History of their discoveries and their place in human evolution. P/NP or letter grading.

121C. Evolution of Genus *Homo*. (4) Lecture, three hours. Recommended requisites: courses 7 (or 10 and 12), 121A, 121B. Origin and evolution of the genus *Homo*, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man. P/NP or letter grading.

121P. Reconstructing Hominid Behavior and Paleoecology. (4) Seminar, three hours. Use of paleontological, archaeological, ecological, and geological evidence to infer late Pliocene and early Pleistocene hominid behavior and environmental context of human evolution. P/NP or letter grading.

121Q. Paleoanthropology in Review. (6) Lecture, three hours; seminar, three hours. Corequisite: course 12. Limited to juniors/seniors. Designed for advanced students with interest in human evolution, fossil evidence, and theoretical constructs. Students attend course 12 lectures, plus three-hour seminar per week. P/NP or letter grading.

124. Evolution and Biology of Human Behavior. (4) Comparative survey of behavior patterns of preliterary and Paleolithic peoples and those of nonhuman primates. Assessment of biological variables fundamental to human and prehuman behavior with regard to theories on evolution of human culture.

124P. Evolution of Human Sexual Behavior. (4) Lecture, three hours. Recommended requisite: course 7 or 10 or 12. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex.

C126P. Introduction to Field Methods in Human Ecology. (4) Lecture, three hours. Designed for juniors/seniors and graduate students. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and laboratories. Course fee required. Concurrently scheduled with course C226P. P/NP or letter grading.

127P. Primate Evolution. (4) Designed for juniors/seniors. Survey of primate paleontological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attendant aspects of paleoecology and behavior.

128A. Primate Behavior Nonhuman to Human. (4) Lecture, three hours. Designed for juniors/seniors. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior, with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. P/NP or letter grading.

128B. Behavioral Ecology of Primates. (4) Lecture, three hours. Requisite: course 128A. Analysis of evolution of sociality, sexual strategies, parenting behavior, fighting and contests, and altruism and cooperation in primate species.

128P. Primate Behavioral Neurobiology: Evolutionary and Comparative Perspectives. (4) Lecture, three hours. Requisite: course 7 or 12. Strongly recommended: course 128A, Chemistry 14A or 20A, Life Sciences 1. Survey of use of nonhuman primates to model neurobiological bases of complex behavioral and emotional states in nonhuman primates. Attention to empathy, xenophobia, aggression, and social cognition. P/NP or letter grading.

129Q. Paleopathology. (4) Lecture, one hour; laboratory, three hours. Designed for juniors/seniors. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has worldwide scope, with some emphasis on the New World.

Cultural Anthropology

130. Study of Culture. (4) Lecture, three hours; discussion, one hour (optional). Preparation: one lower division sociocultural anthropology course. Designed for juniors/seniors. The 20th-century elaboration and development of the concept of culture. Examination of five major paradigms: culture as a human capacity, as patterns and products of behavior, as systems of meaning and cognition, as generative structure and semiotic system, as a component in social action and reality construction. (Core course for cultural field.) P/NP or letter grading.

132. Technology and Environment. (4) Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; ecological and sociological concomitants of technological systems; selected problems in material culture.

133Q. Symbolic Systems. (4) Designed for juniors/seniors. Analysis of anthropological research and theory on cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach.

133R. Aesthetic Systems. (4) Lecture, three hours. Designed for juniors/seniors. Provides framework for a cross-cultural understanding of aesthetic phenomena that meets the requirements of anthropological research. Human capacities for aesthetic experience; sociocultural formation of aesthetic production; ethno-aesthetics; experiential dimension of aesthetic production.

M134. Cultural Construction of Gender and Sexuality: Homosexualities. (4) (Formerly numbered 134.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M134.) Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

135A-135B. Introduction to Psychological Anthropology. (4-4) P/NP or letter grading:

135A. Historical Development. Lecture, three hours. Requisite: course 9. Survey of the field of psychological anthropology, with emphasis on early foundations and historical development of the field. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings.

135B. Current Topics and Research. Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings.

135C. Seminar: Psychocultural Studies. (4) Seminar, three hours. Prerequisite: course 9. Firsthand exposure to current research in psychocultural studies. Various university scholars are brought in to discuss their on-going research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

135S. Anthropology of Deviance and Abnormality. (4) Lecture, three hours. Prerequisite: course 9. Relationship between culture and recognition of, responses toward, and forms of deviant and abnormal behavior.

135T. Psychoanalysis and Anthropology. (4) Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach.

M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Psychiatry M112.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

137. Selected Topics in Cultural Anthropology. (4) Lecture, three hours. Study of selected topics in cultural anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

138. Methods and Techniques of Ethnohistory. (4) Introduction to problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. Relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely problems and challenges in this major area of anthropological concern.

139. Field Methods in Cultural Anthropology. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison.

Linguistic Anthropology

M140. Language in Culture. (4) (Same as Linguistics M146.) Lecture, three hours; discussion, one hour. Prerequisite: course 33 or Linguistics 20. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) P/NP or letter grading.

141. Ethnography of Everyday Speech. (4) Lecture, three hours. Prerequisite: course 33. Designed for juniors/seniors. Course has two interrelated objectives: (1) to introduce students to ethnography of communication — description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction.

142A-142B. Microethnography of Communication. (4) Lecture, three hours. Prerequisite: course M140. Course 142A or Sociology CM124A is requisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required.

143. Field Methods in Linguistic Anthropology. (4) Lecture, three hours. Prerequisite: course M140. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and textual analysis. Practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading.

144. American Indian Ethnolinguistics and Sociolinguistics. (4) Prerequisite: course 33 or American Indian Studies 10. Introduction and comparative analysis of sociocultural aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education.

M145. Afro-American Sociolinguistics: Black English. (4) (Same as Afro-American Studies M166.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

146. Language and Culture of Polynesia: Past, Present, and Future. (4) Lecture, three hours. Prerequisite: course M140. Introduction to Polynesian cultures and languages, with particular emphasis on past and present sociocultural systems, patterns of language structure and language use, verbal art, language socialization strategies, and forms of cultural assimilation and resistance to European contact. Fieldwork on contemporary Polynesian cultures in U.S. urban areas.

147. Selected Topics in Linguistic Anthropology. (4) Lecture, three hours. Study of selected topics in linguistic anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

Social Anthropology

150. Study of Social Systems. (4) Lecture, three hours. Prerequisite: course 9. Introduction to more specialized social anthropology courses. Evaluation of variation in sociocultural systems and how societies are organized and social relations maintained. Basic frameworks of anthropological analysis; historical context and development of social anthropology discipline.

151. Marriage, Family, and Kinship. (4) Lecture, three hours. Prerequisite: course 9. Examination of understandings of kinship in cross-cultural perspective and impact of kinship on interpersonal relationships, gender roles, and sociocultural systems. Readings from popular materials and formal ethnographic accounts.

152. Politics: Tribe, State, Nation. (4) Lecture, three hours. Cross-cultural examination of politics and political organization. Law and the maintenance of order; corporate groups; ideology. Relations of political institutions to other institutions of society and to issues of identity and representation.

153. Evolution of Human Societies. (4) Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision making, and social structure. Comparative theories discussed in context of ethnographic evidence from a wide variety of cultural systems.

153P. Economic Anthropology. (4) Lecture, three hours. Prerequisite: course 9. Introduction to anthropological perspectives for interpretation of economic life and institutions. Economic facts to be placed in their larger social, political, and cultural contexts; examination of modes of production, distribution, and consumption of goods and services in their relation to social networks, power structures, and institutions of family, kinship, and class. P/NP or letter grading.

M154P. Gender Systems: North American. (4) (Formerly numbered M154.) (Same as Women's Studies M154P.) Lecture, three hours. Prerequisite: Women's Studies 10. Designed for junior/senior social sciences majors. Comparative study of women's lives and gender systems in North American cultures from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case study, student fieldwork, internship, and presentation. P/NP or letter grading.

M154Q. Gender Systems: Global. (4) (Formerly numbered M154.) (Same as Women's Studies M154Q.) Lecture, three hours. Prerequisite: Women's Studies 10. Designed for junior/senior social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

155. Women's Voices: Their Critique of Anthropology of Japan. (4) Lecture, three hours. Preparation: introductory sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

M155Q. Women and Social Movements. (4) (Same as Women's Studies M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

156. Comparative Religion. (4) Survey of various methodologies in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally.

157. Selected Topics in Social Anthropology. (4) Lecture, three hours. Study of selected topics in social anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

158. Hunting and Gathering Societies. (4) Lecture, three hours. Prerequisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two viewpoints. Use of this synthesis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies.

158P. Pastoral Nomads. (4) Lecture, three hours. Prerequisite: course 9 or 150. Survey of pastoral nomad societies. Consideration of environmental and social demands of livestock domestication and production. Focus on ecological features, cultural practices, and social organization, with special attention to historical interactions between pastoral nomads and settled peoples.

159. Warfare and Conflict. (4) Lecture, three hours. Examination of conflict and violent confrontation as these have been treated in anthropological literature. Cross-cultural comparison of institutions such as raids, feuds, ritual warfare. Consideration of application of anthropology to study of militaries, modern warfare, and large-scale ethnic conflict.

Applied Anthropology

161. Development Anthropology. (4) Lecture, three hours. Requisite: course 9. Designed for juniors/seniors. Comparative study of planned and unplanned development, in particular as it affects rural societies. Emphasis on impact of capital, technological change and gender differences, economic differentiation and class, urban/rural relations, and migration. Discussion of theoretical issues in light of case studies.

163. Selected Topics in Applied Anthropology. (4) Lecture, three hours. Study of selected topics in applied anthropology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

M164. Afro-American Experience in the U.S. (4) (Same as Afro-American Studies M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

165. Demographic Problems in Nonindustrial Societies. (4) Lecture, three hours. Requisite: course 9. Dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. Principal theories of population change and current issues in population policy considered in light of the anthropological evidence.

166. Cross-Cultural Research on Urban Gangs. (4) Lecture, three hours. Preparation: one anthropology, psychology, or sociology course. Examination of background and contemporary traditions of gangs in three ethnic minority groups — African American, Asian American, and Mexican American. Similarities and differences to be noted in dimensions of gang formation and persistence, subcultural styles, territorial and criminal conflicts, drug use and abuse, personal motivations, dress habits, etc. Cross-cultural look at major social control institutions (e.g., family, schools, peers, law enforcement, religion) which affect their lives. P/NP or letter grading.

167. Urban Anthropology. (4) Lecture, three hours; discussion, one hour (optional). Designed for junior/senior social sciences majors. Survey of urbanization throughout the world, with emphasis on urban adaptation of rural migrants. Special focus on problems of rural/urban migration of ethnic minority groups and subsequent adaptation of them within the U.S. explored in terms of methods and perspectives of anthropology. P/NP or letter grading.

M168. Culture, Illness, and Healing. (4) (Same as Nursing M158.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

C169R. Repatriation of Native American Human Remains and Cultural Objects. (4) Lecture, two hours; discussion, one hour. Native Americans have recently been successful in obtaining passage of federal and state laws repatriating human remains and cultural objects to them. Examination of this phenomenon. Concurrently scheduled with course C269R.

Regional Cultures

Africa

171. Sub-Saharan Africa. (4) Lecture, three hours. Issues of ecology and political economy; continuing impacts of colonialism, nationalism, and current challenges for development; changes in social relations. Examination of Africa's significance to development of anthropology. Cultural background for understanding events in contemporary Africa provided.

North America

172A. Native North Americans. (4) Lecture, three hours; discussion, one hour (optional). Designed for juniors/seniors. Consideration of diversity of Native American societies north of Mexico, including their origins, formation, and development. Particular attention to subsistence systems and their relationship to social institutions and cultural practices, especially religion. Letter grading.

172B. Change and Continuity among Native North Americans. (4) Lecture, three hours. Requisite: course 172A. Consideration of tremendous change Native American societies and cultures have undergone since European contact. Emphasis on patterns of adaptation and continuity as Native Americans confronted colonization and its implications.

172R. Cultures of the Pueblo Southwest. (4) Lecture, three hours. Survey of ethnographic and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups.

M172V. Culture Change and the Mexican People. (4) (Same as Chicana and Chicano Studies M172V.) Lecture, three hours. Requisite: course 9 or Chicana and Chicano Studies 10A or 10B. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscegenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

Middle America

173Q. Latin American Communities. (4) Overview of social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in context of economic, political, and cultural environments.

South America

174P. Ethnography of South American Indians. (4) Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of man and society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement.

Asia

175R. Societies of Central Asia. (4) Lecture, three hours. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and status of women, religion and the social order in Hindu/Buddhist culture contact zone, and current problems of modernization. P/NP or letter grading.

175S. Japan. (4) Lecture, three hours. Overview of contemporary Japanese society. General introduction, kinship, marriage and family life, social mobility and education, norms and values, religions, patterns of interpersonal relations, social deviance. P/NP or letter grading.

175T. Civilizations of East Asia. (4) Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization.

175U. Cultures of the Indonesian Archipelago. (4) Lecture, three hours. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javanese, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical overview with examination of such topics as religious and political ideas and institutions, art, symbolism and ritual, illness and healing, and psychological issues and themes.

175V. Ethnology of Korea: Re-Presenting Lives in Contemporary South Korea. (4) Lecture, three hours. Examination of South Korea's contemporary structural positioning, with focus on its dynamic development out of a history of colonialism and war to capitalism; multiple and conflicting linkages of Korean people involving class, gender, family/kinship, and nation.

175W. Ideology and Social Change in Contemporary China. (4) Lecture, three hours. Introduction to sociocultural changes in China from 1949 to the present. Topics include ideology and politics in everyday life, social stratification and mobility, cultural construction of socialist person, changes in courtship, marriage, and family, and political economy of reforms in post-Mao era. P/NP or letter grading.

Middle East

176. Culture Area of the Middle East. (4) Lecture, three hours. Study of the Middle East has suggested many theories as to developmental history of humankind, evolution of human society, birth of monotheism, and origin of agriculture, trade, and the city. Presentation of anthropological material relevant to understanding the Middle East as a culture area, and Islam as basis of its shared tradition.

Pacific

177. Cultures of the Pacific. (4) Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in context of their adaptive significance.

History, Theory, and Method

180. Quantitative Methods in Anthropology. (5). Lecture, three hours; laboratory, one hour. Requisite: course M80. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, non-parametric tests, and log-linear models. Emphasis on computer-based applications of data analysis techniques.

182. History of Anthropology. (4) Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of evolutionary theory and concept of culture in the late 19th century. "Root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombroso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, perception of deviance, and our view of culture in general.

183. History of Archaeology. (4) Preparation: at least one upper division archaeology course. Development of world archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affiliation.

186. Models and Modeling in Anthropology. (4) Lecture, three hours. Modeling from both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples — decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models.

186P. Models of Cultural Evolution. (4) Lecture, two hours; discussion, one hour. Requisite: course 7 or 10. Introduction to Darwinian models of cultural evolution. How organic evolution has shaped the capacity for culture. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

CM189A-CM189B. Theoretical Behavioral Ecology. (4-4) (Formerly numbered M189A-M189B.) (Same as Organismic Biology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM289A-CM289B. Letter grading.

Special Studies

M194. Senior Seminar: Language, Interaction, and Culture. (4) (Same as Applied Linguistics and TESL M194 and Sociology M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4) (Same as Sociology M196A-M196B.) Lecture, three hours. Requisites: Honors Collegium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

197HA. Beginning Seminar. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of major research strategies in anthropology to aid honors students in developing research proposals.

197HB. Field Methods. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of major field methods in anthropology to prepare students to conduct their own field research.

197HC. Data Analysis. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of major forms of data analysis in anthropology to aid honors students in analysis of their own research data.

197HD. Writing for Anthropology. (4) Seminar, three hours. Limited to anthropology honors program students. Teaching of writing skills, with focus on how to write honors theses.

197K-197Z. Selected Topics in Anthropology. (2 to 4 each) Lecture or seminar, three hours. Study of selected topics of anthropological interest taught by resident and visiting faculty members. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

199. Special Studies in Anthropology. (2 to 8) Eight units may be applied toward upper division anthropology courses required for the major.

Graduate Courses

200. Proseminar: Practice of Anthropology. (4) (Formerly numbered 200A.) Seminar, three hours. Required of new graduate students. Discussion of anthropology as a four-field discipline and interconnections among the four major fields. Practice of anthropology as exemplified through faculty presentations of how research is conceived, formulated, and executed. Students develop individual research proposals. Letter grading.

200P. Cultural Anthropology Field Preparation. (4) Seminar, three hours. Requisites: courses 200A-200B. Follows courses 200A-200B as field preparation for summer research for cultural anthropologists. Students develop specific research methods and present them in seminar. Practical issues (visas, community entry, health concerns) also addressed. S/U grading.

M201A-M201B. Graduate Core Seminars: Archaeology. (6-6). (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretive strategies. May be repeated for credit with consent of adviser.

202. Biological Anthropology Colloquium. (4) Seminar, three hours. Selected topics on status of current research in biological anthropology. May be repeated for credit. S/U or letter grading.

203A-203B-203C. Core Seminars: Sociocultural Anthropology. (4-4-4) Seminar, three hours. Preparation: two courses from 130, 135A, 150:

203A. Historical and Philosophical Foundations of Anthropology. Examination of the theoretical writings that shaped foundations of anthropology as a scholarly discipline. Consideration of writings of Durkheim, Weber, Marx, and others.

203B. Sociocultural Systems and Ethnography: Anthropology at Mid-Century. Recommended preparation: course 203A. Examination of development of major schools of sociocultural thought during middle decades of the 20th century. Emphasis on formation of sociocultural theories, concepts, and methodologies found in contemporary anthropology.

203C. Scientific and Interpretive Frameworks in Contemporary Anthropology. Recommended preparation: course 203B. Examination of selected contemporary works and issues in the field of sociocultural anthropology.

204. Core Seminar: Linguistic Anthropology. (4) Seminar, three hours. Theoretical and methodological foundations of study of language structure and language use from a sociocultural perspective. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as a social activity embedded in culture.

Archaeology

210. Analytical Methods in Archaeological Studies. (4) Preparation: one term of statistics. Data analysis procedures in archaeology. Emphasis on conceptual framework for analysis of archaeological data, beginning at level of the attribute and ending at level of the region.

M211. Regional Analysis in Archaeology. (4) (Same as Archaeology M201C.) Lecture, three hours. Course 210 is not requisite to M211. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

212P. Selected Topics in Hunter/Gatherer Archaeology. (4) Seminar, three hours. Prehistory and ethnohistory of hunter/gatherer peoples. Consideration of range of issues, including (but not limited to) technological innovations, exchange systems, settlement and mobility, and social change. May be repeated for credit. S/U or letter grading.

212Q. Problems in Southwestern Archaeology. (4) Consideration of prehistoric cultural systems in the American Southwest, with emphasis on description and explanation of organizational variability and change. Specific research questions vary with each course offering. May be repeated for credit.

212R. Problems in Oceanic Archaeology. (4) Lecture, three hours. Prehistory of Oceania. Content may vary, but problems considered include history and process of island occupation, island adaptation, and evolution of social stratification. May be repeated for credit.

M212S. Special Topics in Archaeology. (6) (Same as Archaeology M205.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

213. Selected Topics in Old World Archaeology. (4) Seminar, three hours. May be repeated for credit.

214. Selected Topics in Prehistoric Civilizations of the New World. (4) Mesoamerican and Andean civilizations normally constitute major focus of seminar. May be repeated for credit.

CM214S. Comparative Study of Ancient States. (4) (Same as Archaeology M214.) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. Concurrently scheduled with course C114S. S/U or letter grading.

215. Field Training in Archaeology. (6 or 12) Lecture, two to three hours; fieldwork, eight to 10 (spring) or over 50 (summer) hours. Off-campus field archaeology course offered for six units in Spring Quarter and 12 units in Summer Quarter. Intensive training in archaeological excavation, mapping, surveying, recording, preliminary analysis of field data, and project organization/supervision. May be repeated for credit. S/U or letter grading.

C215R. Strategy of Archaeology. (4) Seminar, three hours; outside study, nine hours. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C115R. Complete research proposal required of graduate students.

217. Explanation of Societal Change. (4) Examination of processes of societal evolution, emphasizing usefulness of a variety of explanatory models from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit.

218. Style and Ethnicity. (4) Seminar, three hours. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style as such.

219. Complex Hunters/Gatherers in Theoretical Perspective. (4) Seminar, three hours. Examination of economic, political, and social foundations of complex hunter/gatherer societies, with focus on theory of emergence of complex cultural organization and recognition of complex middle-range societies in the archaeological record. Role of craft specialization in cultural evolution. S/U or letter grading.

Biological Anthropology

220. Current Problems in Biological Anthropology. (4) Seminar, three hours. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221B. Fossil Evidence for Human Evolution. (4-4) Examination and analysis of fossil evidence for man's evolution.

C226P. Introduction to Field Methods in Human Ecology. (4) Lecture, three hours. Designed for juniors/seniors and graduate students. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and laboratories. Course fee required. Concurrently scheduled with course C126P.

Cultural Anthropology

230Q. Theories of Culture. (4) Lecture, three hours. Exploration of aspects within culture theory: emergence of culture with modes of production, discovery of culture, and "cultural capital" and cultural change. Investigation of production of culture and transformations of meaning within cultural domains of politics, economy, and religion. S/U or letter grading.

231. Asian Americans: Personality and Identity. (4) Designed for graduate students. Effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232V. Current Issues in Ethnography. (4) Seminar, three hours. Designed for graduate students. S/U or letter grading.

233P. Symbolic Anthropology. (4) Requisite: course 133R. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit. S/U or letter grading.

233Q. Aesthetic Anthropology. (4) Requisite: course 133R. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit.

M234. Seminar: Psychocultural Studies and Medical Anthropology. (4) (Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

M234P. Transcultural Psychiatry. (4) (Same as Psychiatry M222.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

M234Q. Psychological Anthropology. (4) (Same as Psychiatry M272.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

M234T. Anthropology of Human Body. (4) (Same as Psychiatry M282.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

M235. The Individual in Culture. (4) (Same as Psychiatry M213.) Seminar, three hours. Designed for graduate students.

M236P. Cross-Cultural Studies of Socialization and Children. (4) (Same as Psychiatry M214.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

M236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Education M222A, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

M238. Native American Revitalization Movements. (4) (Formerly numbered 238.) (Same as History M260C.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

239P. Selected Topics in Field Ethnography. (4 to 8) Seminar, three hours. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

Linguistic Anthropology

M241. Topics in Linguistic Anthropology. (4) (Same as Linguistics M246C.) Problems in relations of language, culture, and society. May be repeated for credit.

242. Ethnography of Communication. (4) Designed for graduate students. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior.

243P. American Indian Ethnolinguistics and Sociolinguistics. (4) Preparation: prior coursework in either anthropology, linguistics, or American Indian studies. Social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion.

M243Q. Afro-American Sociolinguistics: Black English. (4) (Same as Afro-American Studies M200D.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

244. Field Methods in Linguistic Anthropology. (4) Seminar, three hours; work with informant, one hour. Requisite: Linguistics 20 or prior experience in linguistic analysis. Practice in eliciting and transcribing linguistic data from native informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and pragmatic analysis. Practice with native speakers of non-Indo-European languages is important aspect of student participation. S/U or letter grading.

245. Linguistic and Intracultural Variation. (4) Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objectives of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to study of intra-individual and interindividual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory.

M246A. Grammar and Discourse. (4) (Same as Applied Linguistics and TESL M272.) Requisite: Applied Linguistics and TESL 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

M246B. Grammar and Discourse Practicum. (4) (Same as Applied Linguistics and TESL M273.) Requisite: course M246A. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

M247. Topics in Semantics and Pragmatics. (4) (Same as Applied Linguistics and TESL M266.) Requisite: Applied Linguistics and TESL 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change.

M249A-M249B. Ethnographic Methods in Discourse Analysis I, II. (4-4) (Same as Applied Linguistics and TESL M270A-M270B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading. **M249A.** Devoted to skills related to collecting socially and culturally meaningful data. **M249B.** Requisite: course M249A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal.

M249P. Ethnographic Technologies Laboratory I. (4) (Same as Applied Linguistics and TESL M270P.) Corequisite: course M249A or Applied Linguistics and TESL M270A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

M249B. Ethnographic Technologies Laboratory II. (4) (Same as Applied Linguistics and TESL M270Q.) Corequisite: course M249B or Applied Linguistics and TESL M270B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

Social Anthropology

250. Selected Topics in Social Anthropology. (4) Seminar, three hours. Intensive examination of current theoretical views and literature. S/U or letter grading.

251P. Cultural Ecology. (4) May be repeated for credit.

252P. Comparative Systems of Social Inequality. (4) Seminar, three hours. Examination in historical and contemporary perspective of particular systems of structured social inequality based on rank, class, caste, ethnicity, gender, age, sexual preference, disability, etc., to develop a unified theory of social inequality. Examples from Asian, Pacific, European, African, and American cultures. S/U or letter grading.

252Q. Anthropology of Resistance. (4) Lecture, one hour; discussion, two hours. Preparation: at least one upper division sociocultural anthropology course. Exploration of recent works in anthropology and other disciplines which address practice and resistance, as part of an effort to understand processes that have shaped modern and postcolonial society and culture.

253. Economic Anthropology. (4) May be repeated for credit.

254. Kinship. (4) May be repeated for credit.

255. Comparative Political Institutions. (4) May be repeated for credit.

256. Anthropology of Conflict. (4) Seminar, three hours. Open to undergraduates with consent of instructor. Examination of events and institutions associated with large-scale or ongoing conflict in a variety of settings. Particular consideration to roots of violence, violent manifestations and cross-cultural misunderstandings, and nature and content of armed confrontation. S/U or letter grading.

Applied Anthropology

260. Urban Anthropology. (4) Requisite: course 167. Intensive anthropological examination of the urban setting as a human environment. S/U or letter grading.

261Q. Issues in Applied Anthropology. (4) Seminar, three hours. Use of seminar format to explore selected domestic and international problems from applied anthropological perspective. Consideration of history of applied anthropology, ethics, and careers strategies.

263P. Gender Systems. (4) Discussion, three hours. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideological systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

M263Q. Advanced Seminar: Medical Anthropology. (4) (Same as Community Health Sciences M244, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

M269. Contemporary Issues of the American Indian. (4) (Same as American Indian Studies M200C and Anthropology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

M269P. Politics of Reproduction. (4) (Same as Psychiatry M280.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

C269R. Repatriation of Native American Human Remains and Cultural Objects. (4) Lecture, two hours; discussion, one hour. Native Americans have recently been successful in obtaining passage of federal and state laws repatriating human remains and cultural objects to them. Examination of this phenomenon. Concurrently scheduled with course C169R.

Regional Cultures

271. Contemporary Problems in Africa. (4) (Formerly numbered 281P.) Seminar, three hours. Problematic issues in Africa in light of classical anthropological literature and recent work by anthropologists and other fieldworkers in Africa, with cases from eastern and southern Africa. S/U or letter grading.

M272. Indians of South America. (4) (Same as Latin American Studies M250A.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

273. Cultures of the Middle East. (4) Seminar, three hours. Survey of literature and problems of various cultures of the Middle East.

277. Anthropology of China. (4) Seminar, three hours. Designed for graduate students. Survey of selected literature and current developments in field of Chinese social-cultural anthropology. Main topics include family and kinship, interpersonal relations, social differences, local elite and the state, rituals and beliefs, popular culture, consumerism, and cultural globalization. S/U or letter grading.

History, Theory, and Method

281. Selected Topics in History of Anthropology. (4) Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology. (4) Primarily designed for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.

283. Formal Methods of Data Analysis in Anthropology. (4) Seminar, three hours. Current topics and issues related to formal analysis of data and representation of cultural constructs: formal models of kinship terminologies, structural models of cognitive systems, graph theoretic models of networks, models of decision making, hierarchical information systems, stability in complex adaptive systems. S/U or letter grading.

M284. Qualitative Research Methodology. (4) (Same as Community Health Sciences M216.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. S/U or letter grading.

285. Schools, Domains, and Strategies in World Archaeology. (4) Seminar, three hours. Comparative examination of schools of world archaeology, contrasting their respective databases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in history or philosophy of science.

285P. Selected Topics in Anthropological/Archaeological Theory. (4) Seminar, three hours. Designed for graduate students. Variable topics course on important theoretical subjects in anthropology and archaeology. May be repeated for credit. S/U or letter grading.

286P. Selected Topics in Computer Simulation and Modeling. (4) Seminar, three hours. Requisite: course 180. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic evolutionary, and other theoretical foci. S/U or letter grading.

287. Poststructural Theories. (4) Seminar, three hours. Designed for graduate students. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the concept of culture, narrative, ethnographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

287P. Anthropology and Colonialism. (4) Designed for graduate students. Exploration of multifaceted nature of colonialism and its cultural manifestations in a variety of geographical areas. Reconsideration of history of anthropology for, as Talal Asad argues, "anthropology emerged as a distinctive discipline at the beginning of the colonial era." S/U or letter grading.

M287Q. Native American Historical Demography. (4) (Formerly numbered 287Q.) (Same as History M260D.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence.

CM289A-CM289B. Theoretical Behavioral Ecology. (4) (Same as Organismic Biology CM295A-CM295B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM289A is requisite to CM289B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B. Letter grading.

292. Making Oral Presentations. (4) Lecture/student presentations, two hours; discussion, one hour. Designed for graduate students. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading.

297. Selected Topics in Anthropology. (2 to 4) Seminar, three hours. Designed for graduate students. Study of selected topics of anthropological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. S/U or letter grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Anthropology. (2 to 4) Seminar/workshop, three hours. Designed for graduate students. Required of all new teaching assistants. Workshop/seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 8) Directed individual studies. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. S/U grading.

598. Research for and Preparation of M.A. Thesis. (2 to 8) Preparation of research data and writing of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework.

Patricia A. Keating, Ph.D. (*Linguistics*)
Edward L. Keenan, Ph.D. (*Linguistics*)
Hilda J. Koopman, Ph.D. (*Linguistics*)
Pamela L. Munro, Ph.D. (*Linguistics*)
Elinor Ochs, Ph.D. (*Applied Linguistics and Teaching English as a Second Language*)
Emanuel A. Schegloff, Ph.D. (*Sociology*)
Russell G. Schuh, Ph.D. (*Linguistics*)
John H. Schumann, Ed.D. (*Applied Linguistics and Teaching English as a Second Language*)
Dominique L. Sportiche, Ph.D. (*Linguistics*)
Edward P. Stabler, Ph.D. (*Linguistics*)
Donca Steriade, Ph.D. (*Linguistics*)
Robert P. Stockwell, Ph.D. (*Linguistics*)
Anna Szaboltski, Ph.D. (*Linguistics*)

Professors Emeriti

George D. Bedell, Ph.D. (*Linguistics*)
William Bright, Ph.D. (*Linguistics*)
Russell N. Campbell, Ph.D. (*Applied Linguistics and Teaching English as a Second Language*)
Victoria A. Fromkin, Ph.D. (*Linguistics*)
Evelyn R. Hatch, Ph.D. (*Applied Linguistics and Teaching English as a Second Language*)
Mazisi R. Kunene, Ph.D. (*Linguistics*)
Peter N. Ladefoged, Ph.D. (*Linguistics*)
Earl J. Rand, Ph.D. (*Applied Linguistics and Teaching English as a Second Language*)
Paul M. Schachter, Ph.D. (*Linguistics*)

Associate Professors

Asif Agha, Ph.D. (*Applied Linguistics and Teaching English as a Second Language*)
Steven E. Clayman, Ph.D. (*Sociology*)
Paul B. Kroskrity, Ph.D. (*Anthropology*)
Anoop Mahajan, Ph.D. (*Linguistics*)
Marcyliena H. Morgan, Ph.D. (*Anthropology*)
Timothy A. Stowell, Ph.D. (*Linguistics*)

Assistant Professors

Sun-Ah Jun, Ph.D. (*Linguistics*)
Carson Schuetz, Ph.D. (*Linguistics*)

Lecturers

Donna Brinton, M.A. (*Applied Linguistics and Teaching English as a Second Language*)
Janet Goodwin, M.A. (*Applied Linguistics and Teaching English as a Second Language*)
Christine Holten, M.A. (*Applied Linguistics and Teaching English as a Second Language*)
Linda Jensen, M.A. (*Applied Linguistics and Teaching English as a Second Language*)

Adjunct Professor

Ian Maddieson, Ph.D. (*Linguistics*)

Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

Faculty members of the Department of Applied Linguistics and Teaching English as a Second Language, as well as professors in Anthropology, Education, Linguistics, Psychology, and Sociology, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the areas of discourse/grammar analysis, language acquisition, and language assessment. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Masters's Degree

None.

Doctoral Degree

Admission

The basic requirement for admission to the program leading to the Ph.D. degree in Applied Linguistics is the completion of the UCLA M.A. degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from an-

other recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Applicants whose graduate degree is in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit the following items by the preceding December 15: (1) a statement of purpose describing their research background and the type of dissertation they hope to prepare; (2) three letters of recommendation from professors who are well acquainted with their academic background; (3) the M.A. thesis or related research papers; (4) Graduate Record Examination (GRE) scores. International applicants should also submit their Test of English as a Foreign Language (TOEFL) scores.

The admissions committee considers all of the above criteria, as well as undergraduate and graduate grade-point averages, in deciding on the top candidates for the program.

Major Fields or Subdisciplines

Three areas of specialization are available: language acquisition, language assessment, and discourse analysis /functional grammar.

Course Requirements

Basic Preparation. Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in applied linguistics, students can choose either a phonetics and phonology track, a syntax and semantics track, or a discourse analysis track. For all tracks, students must take Linguistics 120A, 120B, and Applied Linguistics and Teaching English as a Second Language 220. Under the phonetics and phonology track, students would then take Linguistics 165A or 200A, followed by Linguistics 201 or 203 or 204. Under the syntax and semantics track Linguistics 165B, and Linguistics 200B or 215 are taken. Under the discourse analysis track, students would take Applied Linguistics and Teaching English as a Second Language 260, followed by Applied Linguistics and Teaching English as a Second Language 271 or 274 or Sociology C244A, or Anthropology 204 or 242.

Units and Courses. As a breadth requirement, students must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses, Linguistics 275, Applied Linguistics and Teaching English as a Second Language 400, or Applied Linguistics 597 or 599. No more than eight of the 32 units may be in 596 courses, and these should be in Applied Linguistics 596, if possible. The 32 units must include eight units in one area outside the area of specialization.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the eight-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as prerequisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501, 597, 599, Applied Linguistics and Teaching English as a Second Language 400, and Linguistics 275. All other courses must be taken for letter grades.

Written and Oral Qualifying Examinations

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. Students are to choose the topics of these papers in consultation with appropriate faculty members and with the consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

The doctoral committee administers the University Oral Qualifying Examination, the focus of which is a prospectus of the dissertation which must be submitted to the committee prior to the examination. The committee also has the responsibility for determining the adequacy of the student's preparation for writing the dissertation. If the prospectus and preparation are judged adequate, the choice of the dissertation topic is thereby approved, and the student becomes eligible for advancement to doctoral candidacy. In case of failure, the doctoral committee determines whether or not the student may be reexamined and if further courses must be taken before the reexamination.

Applied Linguistics

Graduate Courses

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (4 to 8) Limited to Ph.D. students. Independent study in an area of applied linguistics. Up to eight units may be applied toward Ph.D. course requirements. May be repeated for credit.

597. Preparation for Ph.D. Candidacy Examination. (4 to 8) Preparation: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4 to 16) Preparation: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading.

Course List

Discourse Analysis/Functional Grammar

Applied Linguistics and Teaching English as a Second Language

- 260. Discourse Analysis
- 263. Crosslinguistic Topics in Functional Grammar I: Typology
- 264. Crosslinguistic Topics in Functional Grammar II: Discourse
- 265. Topics in Functional Grammar
- M266. Topics in Semantics and Pragmatics
- 268. Crosslinguistic Research Laboratory
- 269. Current Issues in Discourse Analysis
- 271. Advanced Seminar: Cohesion Analysis of English Structure
- M272. Grammar and Discourse
- M273. Grammar and Discourse Practicum
- 274. Advanced Seminar: Contextual Analysis of English Structure
- 278. Discourse Laboratory

English

- 241. Studies in Structure of the English Language

Linguistics

- 201. Phonological Theory II
- 202. Language Change
- 203. Phonetic Theory
- 204. Experimental Phonetics
- 205. Morphological Theory
- 206. Syntactic Theory II
- 207. Formal Semantics
- C209A, C209B. Computational Linguistics I, II
- 210A, 210B. Field Methods I, II
- 214. Survey of Current Syntactic Theories
- 215. Syntactic Typology
- 220. Linguistic Areas
- 225. Linguistic Structures
- 251A. Topics in Phonetics and Phonology
- 252A. Topics in Syntax and Semantics
- 253A. Topics in Language Variation
- 254A. Topics in Linguistics
- 256A, 256B. Topics in Phonetics and Phonology II: Proseminar
- 257A, 257B. Topics in Syntax and Semantics II: Proseminar
- 258A, 258B. Topics in Language Variation II: Proseminar
- 259A, 259B. Topics in Linguistics II: Proseminar
- 263A-263B-263C. Seminars: Language Variation (only one of these may be applied toward the 32-unit requirement)

Additional Courses in Other Departments

Anthropology

- 204. Core Seminar: Linguistic Anthropology
- M234Q. Psychological Anthropology
- 242. Ethnography of Communication
- 245. Linguistic and Intracultural Variation
- M249A-M249B. Ethnographic Methods in Discourse Analysis I, II

Education

- 204D. Minority Education in Cross-Cultural Perspective

German (Germanic Languages)

- C238. Linguistic Theory and Grammatical Description

Sociology

- C244A-C244B. Conversational Structures I, II
- C258. Talk and Social Institutions
- 266. Selected Problems in Analysis of Conversation
- 267. Selected Problems in Communication

Spanish (Spanish and Portuguese)

- 209. Dialectology
- 256A-256B. Studies in Spanish Linguistics
- 257. Studies in Dialectology

Language Acquisition

Applied Linguistics and Teaching English as a Second Language

- 221. Experiential Seminar: Second Language Learning
- 222. Discourse-Centered Language Learning
- 223. Topics in Psycholinguistics
- 224. Language Socialization
- 229. Current Issues in Language Acquisition
- 230. Advanced Seminar: Interlanguage Analysis
- 231. Crosslinguistic Topics in Language Acquisition

Linguistics

- 213A. Grammatical Development
- 213B. Brain Bases for Language
- C235. Neurolinguistics
- 254A. Topics in Linguistics
- 259A, 259B. Topics in Linguistics II: Proseminar
- 264A-264B-264C. Seminars: Special Topics in Linguistic Theory

Additional Courses in Other Departments

Education

- 217D. Language Development and Education
- 227B. Research on Cognitive and Language Characteristics of Exceptional Individuals

Psychiatry

- 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

Psychology

- 240A-240B. Developmental Psychology
- 242F. Seminar: Developmental Psychology — Development of Language and Communication
- 260A-260B-260C. Proseminars: Cognitive Psychology
- 262. Human Learning and Memory
- 263. Psycholinguistics
- 268D. Seminar: Human Information Processing — Language and Cognition

Language Assessment

Applied Linguistics and Teaching English as a Second Language

- 240. Design and Development of Language Assessment Procedures
- 241. Analysis and Use of Language Assessment Data
- 242. Experimental Design and Statistics for Applied Linguistics
- 249. Current Issues in Language Assessment
- 250. Advanced Seminar: Language Assessment
- 258. Assessment Laboratory

Additional Courses in Other Departments

Education

- 200B. Survey Research Methods in Education
- 200C. Analysis of Survey Data in Education
- 202. Evaluation Theory
- 211A. Measurement of Educational Achievement and Aptitude
- 211B. Measurement in Education: Underlying Theory

211C. Item Response Theory
 219. Laboratory: Advanced Topics in Research Methodology
 221. Computer Analyses of Empirical Data in Education
 222C. Qualitative Data Reduction and Analysis
 230A. Introduction to Research Design and Statistics
 230B-230C. Linear Statistical Models in Social Science Research
 230X. Applied Research Design and Statistics for Social Sciences
 231A. Multivariate Analysis
 231B. Factor Analysis
 231C. Analysis of Categorical and Other Nonnormal Data
 231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis
 231E. Structural Equation Modeling
 412A. Criterion-Referenced and Norm-Referenced Test Construction

Psychology
 250A, 250B. Advanced Psychological Statistics
 252A. Multivariate Analysis
 253. Factor Analysis
 254A. Psychological Scaling
 254B. Cluster Analysis
 255. Quantitative Aspects of Assessment
 M257. Multivariate Analysis with Latent Variables
 259. Quantitative Methods in Cognitive Psychology

 Linda Jensen, M.A.

Scope and Objectives

The M.A. program in Applied Linguistics and Teaching English as a Second Language (TESL) is intended primarily for individuals who wish to pursue a career in applied linguistics research. It is designed to provide both breadth of knowledge in several areas of applied linguistics and the specialized knowledge and skills needed to plan and conduct research in one area.

The program is a two-year course of graduate study leading to a Master of Arts degree. The orientation of the program is toward research, and a thesis is required. The first year is designed to provide students with a fundamental understanding of the principles, issues, problems, and approaches to research in each of three areas within the discipline: language acquisition, assessment, and discourse analysis/functional grammar. It is expected that during the first year students identify one of these areas for specialization and begin consulting with a faculty member about areas of possible thesis research. During the second year students are expected to complete advanced courses in their selected area of specialization and to complete their thesis research.

In addition, the Department of Applied Linguistics and Teaching English as a Second Language and the Department of Linguistics offer an interdepartmental degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531.

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531.

Undergraduate Study

Language, Interaction, and Culture Minor

The Language, Interaction, and Culture minor is designed to train students in the naturalistic study of discourse in everyday interaction.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

Required Lower Division Courses (eight): Two courses from the following, with each course from a different group: group 1 — Anthropology 33 or 34; group 2 — Sociology 3 or 24; group 3 — Linguistics 1 or 2 or 20.

Required Upper Division Courses (28): Applied Linguistics and Teaching English as a Second Language M194 and six courses from the following, with at least one course from each group: group 1 — Anthropology M140, 141, 142A, 143, 144, M145, 146; group 2 — Sociol-

ogy CM124A, CM124B, CM125, 126, M176; group 3 — Applied Linguistics and Teaching English as a Second Language 100, C116, 121, 125, 161, 170, M189, Chicana and Chicano Studies 160, 161, 162, Japanese 120, CM122, Linguistics 114, 170.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two upper division elective courses may be applied toward both the students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

Teaching English as a Second or Foreign Language Minor

The Teaching English as a Second or Foreign Language minor provides students with an overview of current second language pedagogical theories and practices; the experience of observing the second language acquisition process both in and out of the classroom; a supervised practicum experience in a variety of second language classroom settings; and an opportunity to reflect on the interaction of theory and practice in the teaching of English as a second or foreign language.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

Required Lower Division Course (four): Linguistics 20 with a grade of C or better.

Required Upper Division Courses (28): (1) Three pedagogical foundation courses from Applied Linguistics and Teaching English as a Second Language 101 or C110, C116, C118; (2) a minimum of two pedagogical skill courses from C111, C112, C113, C115, C117; (3) a maximum of two courses in language and/or educational issues from English 121, English Composition 120A, 120B, 120C, 132C, Linguistics 10, C130, 140, 175. Students may complete all requirements for the minor by taking courses in items 1 and 2 above.

A minimum of 20 units applied toward the minor requirements must be **in addition** to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program*

Requirements for UCLA Graduate Degrees. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Applied Linguistics and Teaching English as a Second Language offers (1) the Master of Arts (M.A.) degree in Applied Linguistics and Teaching English as a Second Language and (2) the Master of Arts (M.A.) degree in Teaching English as a Second Language.

Applied Linguistics and Teaching English as a Second Language

Admission

Students normally apply to the M.A. program if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree. Applicants must also have taken the equivalent of Linguistics 120A and 120B (or make them up as deficiency courses).

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is a requisite for entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Students are requested to submit letters of recommendation directly to the graduate adviser, Department of Applied Linguistics and Teaching English as a Second Language, UCLA, 3300 Rolfe Hall, Box 951531, Los Angeles, CA 90095-1531. Since admission is limited to approximately 20 students per year, it is important that completed applications and supporting papers be submitted by December 15.

The admissions committee screens all applications using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English, a relevant research paper, letters of recommendation, and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study applied linguistics at UCLA; (2) area of applied linguistics in which the applicant may want to specialize and do research, reasons for this interest and qual-

ifications and professional experience relevant to doing research in this area; and (3) knowledge of other languages, dialects, or cultures.

International students who hold a bachelor's degree or higher from a university in a country where the official language is English and in which English is the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the Test of English as Foreign Language (TOEFL) and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL prior to arrival at UCLA, submitting the score as part of the application process. These students must also take the ESLPE upon arrival at UCLA. Depending on the results of this examination, students may be required to take English as a Second Language courses to improve their command of academic English.

Areas of Study

Three areas of specialization in Applied Linguistics and Teaching English as a Second Language are available: second language acquisition, assessment, and discourse analysis.

Second Language Acquisition

Research in this area focuses predominantly on second language processes, which include research on (1) interlanguage systems; (2) underlying cognitive mechanisms that account for these systems; (3) the social, affective, and neurobiological factors that influence second language development; and (4) the effect of instruction on the process. Additional areas of inquiry include the relationship between first and second language acquisition, the effect of first language transfer, the interface between various linguistic theories and second language acquisition, and the comparisons between native and nonnative linguistic systems and how speakers use them in natural discourse.

Language Assessment

Language assessment is an area of applied linguistics that is concerned with the empirical investigation of theoretical questions on the one hand, and with providing useful tools for assessment on the other. Language testing research has as its goals the formulation and empirical investigation of theories of language use in its widest sense. Specialization in the area of language assessment enables students to acquire an understanding of the conceptual foundations for language testing, the goals of language testing research and language test development, and current issues and problems in language testing. Students receive training in the development of language tests, the analysis of test results, and the interpretation and use of test results, enabling them to design and conduct research into theoretical questions in language testing.

Discourse Analysis

Discourse analysis is a broad area of research concerned with how language users produce and interpret language in context. Discourse analysts study the linguistic structure of

speech acts, conversational sequences, speech activities, oral and literate registers, and stance marking, among other constructions, and seek to relate these constructions to social and cultural norms, preferences, and expectations. The field articulates how lexicogrammar and discourse systematically vary across social situations and at the same time help to define those situations. Analysis is conducted primarily through databases or corpus-based research, supplemented by other methods as appropriate (e.g., observation, elicitation, introspection). Analysts attend to the form, meaning, and function of language whether they begin with discourse-level segments and work down to forms or begin with forms and work up to the discourse level.

Discourse analysis may be carried out as an end in itself or as a tool contributing to research in language acquisition or language assessment

Course Requirements

A total of 10 courses is required for the M.A. degree, including a minimum of seven 200-series courses. Nine of these courses are applied toward the University's nine-course minimum for the master's degree. A total of eight units of 500-series courses may be applied toward the 10 courses required by the department for the M.A.; however, only four of those units may be used to fulfill the University's nine-course minimum requirement for the degree. In addition, those students lacking a significant foreign language background are required to complete two additional foreign language electives.

Requisites: Introductory course in phonetics, phonology, and syntax equivalent to UCLA's Linguistics 103, 120A, 120B; a minimum of two quarters of a foreign language.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language 204, 206, one additional course.

Winter Quarter: Applied Linguistics and Teaching English as a Second Language 201, two additional courses.

Spring Quarter: Applied Linguistics and Teaching English as a Second Language 202, two additional courses.

Five foundation courses (Applied Linguistics and Teaching English as a Second Language 200, 202, 204, 206, C210) are required. Choice of additional coursework in the first year is flexible and is to be determined in conjunction with the faculty mentor and graduate adviser. Those students lacking the requisite linguistics courses and foreign language background are expected to take these courses within their first two quarters.

Students wishing to obtain a Certificate in Teaching English as a Second Language or who desire advanced language education training in order to serve as teaching assis-

tants might choose to take certain professional development electives. Students coming to the program from fields other than linguistics may need to take additional courses in the nature of language and language analysis, in order to better prepare themselves for advanced study in one of the three areas of specialization offered in this program. Exceptions to the above requirements are made only after consultation with the faculty mentor and graduate adviser.

Second-Year Curriculum

The typical course of study for the second year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language 200, two guided electives.

Winter Quarter: Applied Linguistics and Teaching English as a Second Language 598, two guided electives.

Spring Quarter: Applied Linguistics and Teaching English as a Second Language 400, 598.

During the second year, students complete their specialization and elective course requirements and work on their thesis. The four elective courses are to be chosen in consultation with the faculty adviser/mentor from courses in the department. Two of these electives must be 200-series courses in the student's area of specialization, beyond the foundation courses. In order to enhance an interdisciplinary perspective, students are also encouraged to take relevant electives in other departments, such as anthropology, education, linguistics, neuroscience, psychology, and sociology.

At the beginning of the fourth quarter, students must enroll in Applied Linguistics and Teaching English as a Second Language 200. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair. Once students complete the thesis proposal, they enroll in Applied Linguistics and Teaching English as a Second Language 598, which is conducted as an independent tutorial with the master's thesis committee chair as mentor until the thesis is completed, typically the end of the second year. Students may only apply course 598 once toward the 10-course requirement.

Applied Linguistics and Teaching English as a Second Language 400 is a seminar in which M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 10 courses required for the M.A. degree.

Teaching English as a Second Language Certificate

Successful completion of the following courses, by graduate students enrolled in degree programs, qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Teaching Credential: Linguistics 20; Applied Linguistics and Teaching English as a Second Language 202 or 220 or 230 or 231; C210/C110; C211/C111

or C212/C112 or C217/C117; C213/C113 or Linguistics 103; C216/C116; C218/C118; and two quarters of a foreign language.

Comprehensive Examination

None.

Thesis Plan

The culmination of the mentoring relationship during the M.A. degree is the master's thesis, which is based on research that each student plans and conducts under the supervision of a faculty mentor. The master's thesis is a substantial research report, which could provide the basis for a journal article. During the fourth quarter, each student must enroll in Applied Linguistics and Teaching English as a Second Language 598. In this course, the student prepares a thesis proposal and forms, in collaboration with a faculty mentor, a thesis committee, which consists of three members of the Academic Senate, at least two of whom must be from the department. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair.

Teaching English as a Second Language

Admission

Students normally apply for the M.A. in Teaching English as a Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required of students entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Applicants are requested to submit letters of recommendation directly to the graduate adviser in the department. Since admission is limited to approximately 25 students per year, it is important that completed applications and supporting papers be submitted by January 8.

The admissions committee screens all applications using the following criteria: grade-point average (must be 3.0 or better); Graduate Record Examination (GRE) scores; Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English; a relevant research paper; letters of recommendation; and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study Teaching English as a Second Language at UCLA; (2) spe-

cial qualifications as a researcher or a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

Areas of Study

Consult the department.

Course Requirements

Requisite: Linguistics 20 or equivalent.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language C210, 265, foreign language requirement or elective (course depends on language requirement plan).

Winter Quarter: Applied Linguistics and Teaching English as a Second Language C216 or C116, 220 or 229 or 231, foreign language requirement or elective (course depends on language requirement plan).

Spring Quarter: Applied Linguistics and Teaching English as a Second Language C211 or C111, or C212 or C112, or C217 or C117, or C218 or C118, Linguistics 103 or Applied Linguistics and Teaching English as a Second Language C213 or C113.

Exceptions to the above requirements are made only after consultation with the graduate adviser.

Of the nine courses required the first year, at least seven must be in applied linguistics and teaching English as a second language, English, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Instructional Credential.

Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Applied Linguistics and Teaching English as a Second Language C216 or C116, 220 or 229 or 231, 265, and Linguistics 103 or Applied Linguistics and Teaching English as a Second Language C113 or C213) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses to be completed in consultation with the graduate adviser during the second year.

Once the thesis proposal in course 598 is completed, the student continues to enroll in this course until the thesis is completed, typically the end of the second year. Only one 598 course may be applied toward the 14-course requirement.

A total of eight units of 500-series courses may be applied toward the 14 courses required for the degree; however, only four units may be used to fulfill the Graduate Division minimum requirement of five graduate-level courses.

Applied Linguistics and Teaching English as a Second Language 400 is a seminar in which M.A. candidates present and defend the results of their thesis research. Enrollment is required in Spring Quarter, but the course does not count as one of the 14 courses required for the M.A. degree.

The electives taken during the second year should be selected, in consultation with the faculty M.A. adviser and the chair of the thesis committee, as a sequence of related courses relevant to the student's thesis topic. Any changes in the program must be approved by both the committee chair and the M.A. adviser.

Comprehensive Examination Plan

None.

Thesis Plan

By the end of the fourth quarter, a thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established. An outside member is required.

Applied Linguistics and Teaching English as a Second Language

Upper Division Courses

100. Discourse and Society. (4) Lecture, four hours; discussion, two hours. Important contemporary perspectives for study of language in its social and cultural matrix. Topics include conversational organization, narrative, repair and grammatical organization, language in cultural settings, language socialization, and language impairment and institutional discourse. Focus on analysis of audio and video recordings of talk in a variety of natural settings. P/NP or letter grading.

101. Introduction to Language Learning and Language Teaching. (4) Lecture, two hours; discussion, two hours. Requisite: Linguistics 1. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

C110. Theories of Language Education and Learning. (4) Lecture, four hours; outside study, four to eight hours. Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. Concurrently scheduled with course C210. P/NP or letter grading.

C111. Writing for Language Education. (4) (Formerly numbered C106.) Lecture, four hours. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C211. P/NP or letter grading.

C112. Reading for Language Education. (4) (Formerly numbered C107.) Lecture, four hours. Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C212. P/NP or letter grading.

C113. Phonetics for Language Education. (4) (Formerly numbered C103.) Lecture, four hours. Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C213. P/NP or letter grading.

C115. Media for Language Education. (4) Seminar, four hours. Requisite: course 101 or C110. Rationale and pedagogical application for using media equipment and materials in the second/foreign language classroom. Training in standard classroom media equipment operation, basic materials preparation, and production techniques, and review of published media materials, with focus on their application to second/foreign language instruction. Concurrently scheduled with course C215. Letter grading.

C116. Structure of Present-Day English. (4) (Formerly numbered C122.) Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216. Letter grading.

C117. Literature in Language Education. (4) (Formerly numbered C109.) Lecture, four hours. Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C217. P/NP or letter grading.

C118. Language Teaching Practicum. (4) Seminar, four hours. Requisites: courses C110, C116. Theoretical and practical concerns regarding second language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Project required if taken for letter grade. Concurrently scheduled with course C218. P/NP or letter grading.

121. Language Learning and Immigrant Experience. (4) Seminar, four hours. Exploration of value and relevance of linguistic anthropological, ethnomethodological, sociocultural, pragmatic, and sociolinguistic approaches to study of immigration and second language acquisition. Readings from language learning memoir provide literary account of immigrant experience which illustrates intimate relationship between language and culture in second language learning. Letter grading.

125. Language Socialization. (4) Seminar, four hours. Exploration of process of socialization through language, and socialization to use language across life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Examination of ways in which verbal interaction between novices and experts is structured linguistically and culturally. Letter grading.

161. Talk and the Body. (4) Seminar, four hours. Relationship between language and human body raises a host of interesting topics. New approaches to phenomena such as embodiment become possible when the body is analyzed, not as an isolated entity, but as a visible agent whose talk and action are lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Letter grading.

170. Field Methods in Discourse and Society. (4) Seminar, four hours. Ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in community settings. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. Letter grading.

M189. Metaphor and Literal Speech. (4) (Same as Philosophy M173.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: Linguistics 1. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphorical capacity. P/NP or letter grading.

M194. Senior Seminar: Language, Interaction, and Culture. (4) (Same as Anthropology M194 and Sociology M194.) Seminar, four hours. Limited to seniors in language, interaction, and culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

Graduate Courses

200. Research in Applied Linguistics. (4) Requisites: courses 201, 202, 204, 206. Within context of a current research area in applied linguistics (language assessment, language acquisition, discourse/functional grammar), all M.A. students prepare and submit viable research proposal for M.A. thesis.

201. Functional Foundations of Language. (4) Requisite: Linguistics 20. Introduction to analysis and description of form, meaning, and function of structures (morphological and syntactic), lexical items, and linguistic features of discourse. Exploration of variety of approaches integrating form, meaning, and function.

202. Foundations of Language Acquisition. (4) Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition and second language acquisition. Linguistic nature of learners' interlanguage systems and underlying cognitive mechanisms posited to explain them, as well as various social, affective, and neurobiological factors which affect ultimate success of learner.

204. Foundations of Language Assessment. (4) Requisite: Linguistics 20. Conceptual foundations of language assessment, including nature of measurement, nature of language ability, uses of language assessment in research, types and characteristics of assessment methods, reliability, and validity. Current issues and problems in language assessment.

206. Social Foundations of Language. (4) Requisite: Linguistics 20. Basic grounding in sociolinguistic theory and methodology. Introduction to current issues in study of situated behavior, including varied ways scholars visualize relation between language and social context.

C210. Theories of Language Education and Learning. (4) (Formerly numbered 210.) Lecture, four hours; outside study, four to eight hours. Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. Concurrently scheduled with course C110. S/U or letter grading.

C211. Writing for Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C111. Additional assignments required of graduate students. S/U or letter grading.

C212. Reading for Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C112. Additional assignments required of graduate students. S/U or letter grading.

C213. Phonetics for Language Education. (4) Lecture, four hours. Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C113. Additional assignments required of graduate students. S/U or letter grading.

214. Materials Development for Language Education. (4) (Formerly numbered 220.) Preparation: at least two years of second language instruction experience. Requisite: course C210. Planning and preparation of an original set of language teaching materials geared to needs of a specified group of learners. Revisions of first drafts and evaluation of one's own work and that of one's peers. Introduction to process of publishing language teaching materials.

C215. Media for Language Education. (4) (Formerly numbered 215.) Seminar, four hours. Requisite: course C210. Rationale and pedagogical application for using media equipment and materials in the second/foreign language classroom. Training in standard classroom media equipment operation, basic materials preparation, and production techniques, and review of published media materials, with focus on their application to second/foreign language instruction. Concurrently scheduled with course C115. Letter grading.

C216. Structure of Present-Day English. (4) Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C116. Additional assignments required of graduate students. Letter grading.

C217. Literature in Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C117. Additional assignments required of graduate students. S/U or letter grading.

C218. Language Teaching Practicum. (4) (Formerly numbered 218.) Seminar, four hours. Requisites: courses C210, C216. Theoretical and practical concerns regarding second language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Project required if taken for letter grade. Concurrently scheduled with course C118. S/U or letter grading.

219. Current Issues in Language Education. (4) (Formerly numbered 229.) Requisite: course C210. Specialized topics in language education of interest to graduate students. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

220. Language Acquisition. (4) (Formerly numbered 241.) Requisite: course 202. Designed for advanced graduate students (beginning Ph.D. and second-year M.A.). Hands-on project-oriented survey of research on acquisition of both first and second languages from a crosslinguistic and interdisciplinary perspective.

221. Experiential Seminar: Second Language Learning. (4) (Formerly numbered 227.) Requisite: course 202. Students learn an uncommonly taught language with use of authentic language materials (video and audio recordings and print materials). Discussion of experience in terms of issues in language learning and language teaching. S/U or letter grading.

222. Discourse-Centered Language Learning. (4) (Not the same as course 222 prior to Fall Quarter 1997.) Requisite: course 202. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

223. Topics in Psycholinguistics. (4) (Formerly numbered 260.) Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

224. Language Socialization. (4) (Formerly numbered 285.) Requisite: course 206. Exploration of process of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Ways in which verbal interaction between novices and experts is structured linguistically and culturally.

229. Current Issues in Language Acquisition. (4) (Formerly numbered 269.) Requisite: course 202. Designed to explore current issues in language acquisition from both a theoretical and applied research perspective and to provide actual experience in addressing a current topic. Specific topics vary according to trends in the field. May be repeated for credit with topic change.

230. Advanced Seminar: Interlanguage Analysis. (4) (Formerly numbered 251.) Requisite: course 220. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects.

231. Crosslinguistic Topics in Language Acquisition. (4) (Formerly numbered 271.) Requisite: course 220. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., crosslinguistically valid) mechanisms of language development. May be repeated for credit with topic change.

240. Design and Development of Language Assessment Procedures. (4) Requisite: course 204. Considerations in design and development of language assessment procedures and major types of assessment procedures for different language abilities. Practical experience in design and construction of assessment procedures. Project required. S/U or letter grading.

241. Analysis and Use of Language Assessment Data. (4) Requisite: course 204. Collection, analysis, and use of data from language assessment procedures. Topics include collecting feedback, descriptive statistics, qualitative data reduction techniques, item analysis and approaches to estimation of reliability and to validation of data-based interpretations. Project required. S/U or letter grading.

242. Experimental Design and Statistics for Applied Linguistics. (4) (Formerly numbered 209.) Requisite: course 204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in the field. Exploration of issues in both qualitative and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical methodological trends in the field. Project required. S/U or letter grading.

249. Current Issues in Language Assessment. (4) (Formerly numbered 232.) Requisite: course 204. Designed to explore current issues in language assessment from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field. May be repeated for credit with topic change. S/U or letter grading.

250. Advanced Seminar: Language Assessment. (4) Requisites: courses 204, 241. Designed to cover application of a technical issue such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

258. Assessment Laboratory. (4) Collaborative coursework, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting and reporting results. May be repeated for credit. S/U or letter grading.

260. Discourse Analysis. (4) (Formerly numbered 283.) Requisite: course 206. Survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

263. Crosslinguistic Topics in Functional Grammar I: Typology. (4) Requisite: course 202. Survey of a particular linguistic area from typological perspective within functional grammar framework. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

264. Crosslinguistic Topics in Functional Grammar II: Discourse. (4) Requisite: course 263. Crosslinguistic study of discourse function of grammatical devices. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

265. Topics in Functional Grammar. (4) (Formerly numbered 249.) Requisite: course 201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in the field, such as voice, nominal reference, and word order. May be repeated for credit with topic change.

M266. Topics in Semantics and Pragmatics. (4) (Formerly numbered 266.) (Same as Anthropology M247.) Requisite: course 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change.

268. Crosslinguistic Research Laboratory. (4) (Formerly numbered 286.) Advanced procedures in data analysis in crosslinguistic research, including critical reading of relevant publications. Students must work toward a specific program-relevant product, such as thesis, dissertation proposal, qualifying paper, dissertation, research paper, or grant proposal. May be repeated for credit. S/U or letter grading.

269. Current Issues in Discourse Analysis. (4) (Formerly numbered 289.) Requisite: course 206. Specialized topics in discourse analysis of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical and practical concern in the field. May be repeated for credit with topic change.

M270A-M270B. Ethnographic Methods in Discourse Analysis I, II. (4-4) (Same as Anthropology M249A-M249B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading. **M270A.** Devoted to skills related to collecting socially and culturally meaningful data. **M270B.** Requisite: course M270A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal.

M270P. Ethnographic Technologies Laboratory I. (4) (Same as Anthropology M249P.) Corequisite: course M270A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and video-recording verbal interaction. S/U grading.

M270Q. Ethnographic Technologies Laboratory II. (4) (Same as Anthropology M249Q.) Corequisite: course M270B or Anthropology M249B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

271. Advanced Seminar: Cohesion Analysis of English Structure. (4) (Formerly numbered 250.) Requisite: course C216. Investigation in depth of selected linguistic features of oral and written texts that go beyond sentence level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types.

M272. Grammar and Discourse. (4) (Formerly numbered 272.) (Same as Anthropology M246A.) Requisite: course 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

M273. Grammar and Discourse Practicum. (4) (Formerly numbered 273.) (Same as Anthropology M246B.) Requisite: course M272. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

274. Advanced Seminar: Contextual Analysis of English Structure. (4) (Formerly numbered 252.) Requisite: course C216. Examination of selected words and/or structures in oral and written texts to determine when and why they occur. Beginning with frequency and distribution of the form(s), exploration of meaning and function of the form(s).

278. Discourse Laboratory. (4) (Formerly numbered 288.) Requisites: courses 206, 260, two other discourse analysis courses. Designed for applied linguistics Ph.D. students. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. May be repeated for credit. S/U or letter grading.

291. Current Issues in Applied Linguistics. (4) Specialized topics in applied linguistics of current relevance in two or more of the following areas: language acquisition, language assessment, and discourse analysis/functional grammar, and of interest to students in applied linguistics and TESL. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Applied Linguistics and TESL M.A. Colloquium. (4) Discussion, four hours. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

495. Training and Supervision of Teaching Assistants. (2) Seminar, two or more hours. Preparation: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (4) Limited to graduate students. Independent study in an area related to English as a second language. May not be repeated for credit.

598. M.A. Research and Thesis Preparation. (4 to 8) Limited to graduate students. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

English as a Second Language

Lower Division Courses

The following courses are only for students whose native language is not English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see Subject A in the Undergraduate Study section of this catalog).

Depending on the results of this examination, students may either be exempt from any special ESL requirement or may be required to take one or more courses. They are placed into the ESL track at a particular level and must enroll in one ESL course each term, beginning in their first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 35; each course must be passed with a grade of C or better (C– or a Passed grade is not acceptable). The required sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If students do not achieve a minimum score on the placement examination, they may be re-

quired to spend a term studying elementary English exclusively, through UCLA Extension, before retaking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the ELSPE.

32. Oral Communication Skills: Stress and Intonation. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33A or 33B or 33C or 35 or proficiency demonstrated on English as a Second Language Placement Examination. Course 33B, 33C, or 35 may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussions, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

33A. Low Intermediate English as a Second Language. (4) Recitation, eight hours; laboratory, two hours. Requisite: Extension course XL832 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Displaces eight units on student's Study List but yields only four units of credit toward a degree. Intensive instruction in structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

33B. High Intermediate English as a Second Language. (4) Recitation, five hours. Requisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

33C. Advanced English as a Second Language. (4) Recitation, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension.

34. Advanced Oral Communication Skills for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

35. Developmental Composition for ESL Students. (4) Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Developmental composition skills for ESL students, with focus on the writing process, grammatical structures, mechanics of writing, and practice with major forms of academic writing. Additional emphasis on academic reading skills.

36. Intermediate Composition for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 35 or proficiency demonstrated on English as a Second Language Placement Examination. Focus on major rhetorical techniques found in academic writing. Special attention to individual research, grammatical structures, and style. P/NP (undergraduates), S/U (graduates), or letter grading.

37. English Grammar and Style for Academic Purposes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33B (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Review of form and use of common grammatical structures found in academic discourse. Analysis of stylistic function of certain structures and practice in self-editing strategies. P/NP (undergraduates), S/U (graduates), or letter grading.

Upper Division Courses

103. Pronunciation for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent. P/NP (undergraduates), S/U (graduates), or letter grading.

106. Advanced Composition for ESL Students. (4) Requisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

107. Advanced Reading and Vocabulary for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP (undergraduates), S/U (graduates), or letter grading.

109. Introduction to Literature for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language. P/NP (undergraduates), S/U (graduates), or letter grading.

199. Special Studies in English as a Second Language. (4) Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in English as a second language beyond those covered in current courses. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

South and Southeast Asian Languages

Lower Division Courses

40A-40B-40C. Introductory Hindi. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 40A is enforced requisite to 40B, which is enforced requisite to 40C. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension.

41A-41B-41C. Intermediate Hindi. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 40C. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

50A-50B-50C. Introductory Vietnamese. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension.

51A-51B-51C. Intermediate Vietnamese. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 50C. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

60A-60B-60C. Introductory Thai. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension.

61A-61B-61C. Intermediate Thai. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 60C. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

70A-70B-70C. Introductory Tagalog. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Coverage of basic Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension.

71A-71B-71C. Intermediate Tagalog. (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 70C. Course 71A is enforced requisite to 71B, which is enforced requisite to 71C. Reinforcement of basic Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

Upper Division Course

199. Special Studies in South and Southeast Asian Languages. (4) Independent studies course for juniors/seniors and graduate students who desire more advanced or specialized treatment of one language offered in the program beyond introductory and intermediate courses currently offered. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

Thomas W. Plummer, Ph.D. (*Anthropology*)

Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, chemistry, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Archaeology Program offers the Master of Arts (M.A.) degree in Archaeology.

Admission

Since the M.A. program is interdisciplinary, any undergraduate major may be considered for admission, although those applicants who have had little previous archaeological educa-

tion may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required of all new applicants. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants who have not completed a course in the history of archaeology or in quantitative methods in archaeology are required to take corresponding courses at UCLA. The courses do count toward the minimum course requirements for the degree. Applicants are accepted for admission for Fall Quarter only. The program's *Study Guidelines* brochure is sent on request to the Chair, Archaeology Program.

Areas of Study

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Egypt; Islamic world; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements

A minimum of 42 units (nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26) in the 200 and 500 series, including Archaeology M201A-M201B, M201C. Students must also take a laboratory-based course. The requirement can be met in the following ways: completion of Anthropology 117, 117P; completion of Archaeology M205 (courses taught by the directors of various laboratories); and, with the approval of the student's committee, an independent study course. A minimum of two additional elective graduate courses is required. The other units may be completed by taking either graduate or upper division courses. The proportion of graduate to undergraduate courses may vary depending on the student's preparation.

Comprehensive Examination Plan

The comprehensive examination consists of three examinations, given at the completion of each section of Archaeology M201A, M201B, and M201C respectively. The examinations are graded as high pass or no pass by a committee consisting of the chair of the Archaeology Program and the professor in charge of the course. Each section of the examination may be repeated once.

Thesis Plan

None.

Doctoral Degree

Admission

Completion of a master's program is required for the Ph.D. degree in Archaeology. Applicants who do not have a UCLA M.A. in Archaeology should refer to the Admission section under Master's Degree. The Graduate Record Examination (GRE) is required of all new applicants. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on (1) written recommendation by all three members of the M.A. committee; (2) submission of a plan of study, including projected coursework, choice of foreign language, description of qualifying examination components, and dissertation topics; and (3) quality of M.A. core examination results and M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see Master's Degree section).

Students entering with an M.A. from another university are required to demonstrate the ability to read at least one foreign language relevant to the area of interest and approved by their adviser. This requirement may be met by taking a reading examination administered by the program.

Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Egypt; Islamic world; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements

Students must be enrolled in a minimum of 12 units per quarter. Formal course requirements include a graduate-level course in research design, such as Anthropology 200, 283, Archaeology M201C and M265, if not taken during the M.A. program. Anthropology 285 and C291 are recommended as electives. Other course requirements are decided by the student's committee. Archaeology M201A-M201B and M201C are required. Additional requirements may be suggested by the dissertation committee.

No graduate degree is awarded until the student has worked in the field. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met by taking a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, Classics C251E. If a student wishes to fulfill this requirement by participation in fieldwork other than that in the courses listed above, the director of the project must submit a letter

about the student's work to the chair of the Archaeology Program. Except for the courses listed above, any given formula to fulfill the requirement has to be cleared in advance with the chair of the program.

Written and Oral Qualifying Examinations

Written Qualifying Examination. By the end of the sixth quarter of the doctoral program, after the foreign language requirement has been fulfilled, students take a written qualifying examination in the following three areas: (1) topical specialization; (2) analytical theory, method, and technique; and (3) regional culture history. If the examination is passed, students may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, students may make one further attempt if their committee deems it appropriate.

Oral Qualifying Examination. The University Oral Qualifying Examination must be taken by the end of the seventh quarter of the doctoral program. Students are required to submit to the doctoral committee a formal dissertation proposal of about 10 pages, including the particular research problem on which they are to be examined during the oral qualifying examination.

Archaeology

Upper Division Course

C110. Archaeological Materials Identification and Characterization. (6) Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210.

Graduate Courses

M201A-M201B. Graduate Core Seminars: Archaeology. (6-6) (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These compulsory core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

M201C. Regional Analysis in Archaeology. (4) (Same as Anthropology M211.) Lecture, three hours. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

M205. Special Topics in Archaeology. (6) (Same as Anthropology M212S.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

C210. Archaeological Materials Identification and Characterization. (6) Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

M214. Comparative Study of Ancient States. (4) (Same as Anthropology CM214S.) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. S/U or letter grading.

259. Fieldwork in Archaeology. (2 to 12) Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser.

M265. Depositional History and Stratigraphic Analysis. (4) (Same as Ancient Near East M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 12) Hours to be arranged. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Preparation: completion of formal coursework, passing of language examinations before enrollment. May be repeated for credit with consent of adviser. S/U grading.

598. M.A. Paper Preparation. (2 to 12) May be repeated for credit with consent of adviser. S/U grading.

599. Ph.D. Dissertation Research and Preparation. (2 to 12) May be repeated for credit with consent of adviser. S/U grading.

Related Courses

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for the area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. Students are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

Methodology and History

Ancient Near East (Near Eastern Languages)

261. Practical Field Archaeology

Anthropology

Scope and Objectives

The Department of Architecture and Urban Design at UCLA offers four degree programs

tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Architecture and Urban Design offers the following degrees: Master of Architecture I (M.Arch. I), Master of Architecture II (M.Arch. II), and Master of Arts (M.A.) in Architecture. The department also participates in a concurrent degree program with the Department of Urban Planning

Master of Architecture I

Admission

The M.Arch. I program accepts applications from students holding a bachelor's degree or its equivalent, comparable in standard and content to a bachelor's degree from the University of California. Applications are accepted from students with a broad diversity of backgrounds. No academic or experiential training in architecture is required. Students without previous experience in architecture are encouraged to review certain materials before enrolling. Students with an architectural background may be able to waive certain courses.

First-year classes assume some familiarity with the history and culture of architecture, possession of basic graphics skills, and understanding of fundamental concepts of mathe-

matics and physics. Applicants are also strongly advised to become familiar with basic works in the history and theory of architecture before entering the program. A suggested reading list is available from the graduate adviser. Entry into the program is, therefore, conditional on having taken at least one college-level course in each of the following areas: Newtonian physics, mathematics (covering algebra plus geometry or trigonometry), a university survey of the history of architecture (minimum one semester or two quarters) encompassing examples from antiquity to the present, and drawing or basic design. For further information on these requisites, contact the graduate adviser.

The Admissions Committee considers applications from those who, at the time of application, do not have these requisites. If applicants do not have the requisites, they must specify in the application how they plan to complete them before entry into the program. The graduate adviser can provide guidance on how to do so. Admission is only offered on the condition that the applicant produce satisfactory evidence of having completed requisites before commencing classes. Instructors may test background in these areas before admitting students to certain courses. If applicants lack this necessary proficiency, they may need to spend an additional year fulfilling curricular requirements.

Applicants are required to submit three letters of recommendation, academic transcripts, Graduate Record Examination (GRE) test scores, a statement of purpose, and a creative portfolio. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

The M.Arch. I program is a full-time program and does not accept part-time students. All new students must enter in Fall Quarter. Additional information about the program may be obtained by writing directly to the admissions officer of the Architecture and Urban Design Department.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, on arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students should expect to spend additional time in residence.

M.A. Urban Planning/M.Arch. I Architecture

The Architecture and Urban Design Department in the School of the Arts and Architecture and the Department of Urban Planning in the School of Public Policy and Social Research

offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in architecture stresses physical, aesthetic, and technical issues in the design of buildings and building complexes. In the program, students pursue studies in both schools/departments and receive both the M.Arch. I and the M.A. in Urban Planning at the end of four years.

Students who are interested in the concurrent degree program must apply and be admitted to the M.Arch. I program in the Department of Architecture and Urban Design and to the M.A. program in the Department of Urban Planning.

During the first year a student follows the required urban planning curriculum. The second year is entirely in Architecture and Urban Design. The third and fourth year comprise a mix of both Architecture and Urban Design and Urban Planning courses, with the final design or written thesis or client or comprehensive project carried out in the fourth year. Students in the concurrent degree program must meet the thesis and comprehensive examination requirements separately for each department. This can be done with (1) an original piece of research of publishable length and quality (2) a client projects, or (3) a design project. While students are encouraged to choose a combined project topic that integrates planning and policy aspect with design, the project must have distinct Architecture and Urban Planning components which can be evaluated separately by faculty thesis committees in the respective departments. For example, a design project in architecture might be supported by a paper, for the urban planning component, explaining the community impact of the implementation of the project. Two thesis and comprehensive examination committees must be formed (one from each department) and following their approval of the proposed thesis and examination project, eight to twelve units of combined coursework is allowed towards preparation and completion of the final project. A total of 41 courses (35 four-unit and six two-unit courses) or 152 units of coursework is required to graduate. Students take at least 36 units in Urban Planning and 88 units in Architecture and Urban design to satisfy the specific requirements of each degree, including core courses in both programs and area of concentration courses from each program. To fulfill the core requirements for the M.A. in Urban Planning a student must take six core courses, plus one course related to planning practice or fieldwork. In Architecture and Urban Design a students take 23 core courses (17 four-unit and six two-unit courses). In addition a students take eight elective courses including two electives in the area of critical studies in architectural culture and six electives that fulfill the

needs of the selected area of concentration. These may be chosen from courses offered in Architecture and Urban Design and Urban Planning, which have been identified as acceptable to both programs. To fulfill final thesis, design thesis (in the form of a comprehensive examination) comprehensive or client project requirements, students need two or three courses (8-12) in the fourth year of study. Thirty-six units of coursework, or nine elective courses, are double counted in both Architecture and Urban Design and Urban Planning.

Students who decide not to complete the concurrent degree program can choose to complete either the M.Arch. I or the M.A. and must complete all the regular requirements for either program that is chosen.

For additional information, contact the graduate adviser in the Department of Urban Planning or the graduate adviser in the Department of Architecture and Urban Design.

Areas of Study

Students are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in the area of critical studies in architectural culture and one studio or project application (Architecture and Urban Design 402 or 403 series), during the second year of study.

Specializations are currently available in the following areas: architectural design; urban design and policy; critical studies in architectural culture; architectural technology; design and computation.

Course Requirements

A minimum of 116 units of coursework is required of which at least 26 four-unit courses must be taken at the graduate level (200 and 400 series). Students must take at least eight units per quarter and may take up to 16 units in a quarter.

Required Courses. All students must successfully complete the following courses:

Architecture and Urban Design 201, 291, 401, 402, 403 series, 411, 412, 413, 414, 415, 416, 421, 422, 423, 425, 426, 431, 432, 433, 436, 441, 442, 597, and an elective in professional practice.

Design Studios. Design studios offered for M.Arch. I students are classified in three levels: introductory (411), intermediate (412, 413, 414), and advanced (402, 403 series, 415, 416). Within a given level, the design studios may be taken in any sequence. Any of these studios may be repeated for credit.

If students maintain at least a B average in the studios, they automatically pass from the introductory to the intermediate level, from the intermediate level to the advanced level, and (for those students who plan to take the comprehensive examination in architectural design) from the advanced level to preparation for the comprehensive examination in architectural design. Students who do not maintain a B av-

erage in the studios are reviewed by a committee consisting of all design studio instructors and are not permitted to advance unless explicitly allowed by that committee.

Elective Sequence. Students must complete an elective sequence consisting of at least three related courses, terminating in a 402, 403 series in advanced studio (normally in the spring of the second year). The elective sequence is intended to allow students to gain in-depth knowledge of a chosen area of specialization and apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban design and policy, (2) critical studies in architectural culture, (3) architectural technology, (4) design and computation.

Details of currently available and approved elective sequences are available from the graduate adviser. Students who wish to meet the elective sequence requirement with sequences not on this standard list must secure approval from the M.Arch. I curriculum committee.

Additional Elective Courses. As well as completing an elective sequence, students are expected to explore a variety of topics by taking additional elective courses. Within the Architecture and Urban Design Department, electives are offered in the four areas listed under Elective Sequence above. In addition, elective work outside the department may be taken.

Students are required to take at least 20 units of elective coursework (including the elective sequence). At least 16 units must be taken within the Department of Architecture and Urban Design. The usual pattern is as follows:

First year: Fall, Winter, Spring — none.

Second year: Fall, Winter, Spring — four units each term.

Third year: Fall, Winter — four units each term.

Many of the elective courses are organized in sequences that begin with an introductory course in the fall, continue on to a more advanced course in the winter, and culminate with a 402 or 403 series studio in the spring. At the beginning of Fall Quarter of the second year, students should consult the academic adviser and carefully plan the elective coursework.

Waiving Required Courses. Students who can demonstrate that they already have adequate background in topics covered by specific required courses may petition to waive those courses and replace them with electives. However, permission to waive required courses does not, in itself, reduce the minimum number of 29 courses required for the M.Arch. I degree, nor does it reduce the nine-quarter residence requirement.

A petition to waive an individual required course should be addressed to the faculty member responsible for that course and may be granted at the faculty member's discretion, possibly by means of a special examination.

The petition should present evidence of adequate background in the specific topic of the course, preferably through a transcript and a syllabus of the course.

Independent Study. In addition to the eight units of Architecture and Urban Design 597, students may also apply eight units of 596 coursework toward the elective course requirements for graduation. Of this total of 16 units of 500-series courses, eight units may be applied toward the graduate course requirement.

All independent work with 500-series course numbers must be undertaken with the guidance and approval of a departmental faculty member who evaluates the work on a satisfactory/unsatisfactory basis.

Course of Study. A normal three-year path through the curriculum is listed below. Required courses other than design studios are normally only offered once a year, so failure to successfully complete one of these courses at the point shown may lengthen the time required to complete the program. Sections of Architecture and Urban Design 415 (advanced) required studios are normally available each quarter. Sections of Architecture and Urban Design 402 and the 403 series are available in spring and may be available in other quarters as well.

First YearFall: Architecture and Urban Design 201, 411, 421.

Winter: Architecture and Urban Design 412, 422, 431, 436.

Spring: Architecture and Urban Design 413, 423, 432, 442.

Second YearFall: Architecture and Urban Design 414, 424, 433, elective (in sequence), additional elective.

Winter: Architecture and Urban Design 415 (or 401 or 402), 441, elective (in sequence).

Spring: Architecture and Urban Design 401 (or 402 or 403 or M404), elective in professional practice, additional elective.

Third YearFall: Architecture and Urban Design 291, 416, 426, elective.

Winter: Architecture and Urban Design 401 (or 402 or 415), elective.

Spring: Architecture and Urban Design 597 or 598.

Comprehensive Examination Plan

All students are required to successfully complete a comprehensive examination and may choose to be examined in any one of the following areas: (1) architectural design, (2) urban design and policy, (3) critical studies in architectural culture, (4) architectural technology, (5) design and computation.

The examinations are administered by the appropriate curriculum area committees.

Students who opt to take the comprehensive examination in architectural design must enroll in eight units of preparation for the comprehensive examination. All students must enroll in

eight units of Architecture and Urban Design 597, supervised by the appropriate curriculum area committee. Course 597 may not be taken until all other required courses have been successfully completed. Details of the comprehensive examination policies, established by each curriculum area committee, are available from the graduate adviser.

Thesis Plan

None.

Master of Architecture II

Admission

The M.Arch. II is a second professional degree program in architecture and urban design. The degree can be completed in four quarters in residence. It consists of one year of coursework, plus one or more academic terms to write a thesis or comprehensive examination and enroll in additional academic work as electives. In some areas of specialization more than one year of coursework may be necessary due to the sequence of requisites.

In this advanced professional degree program, the architectural graduate or experienced professional can study in specific areas to develop specialized conceptual and methodological skills and explore particular professional issues. The program is based on the concept of a combination of advanced theoretical studies and professional applications.

The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants must hold a five-year Bachelor of Architecture degree or equivalent.

Applicants must state their major area of specialization on their application, as applicants are admitted to a specific major and option, and can only change by petition to the Advanced Graduate Studies Curriculum Committee.

Applicants are required to submit three letters of recommendation, academic transcripts, Graduate Record Examination (GRE) test scores, a statement of purpose, and a creative portfolio. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, upon arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students should expect to spend additional time in residence.

Areas of Study

Students are required to select their major area at the time of application to the program. The five major areas include architectural design; urban design and policy; critical studies in architectural culture; architectural technology; design and computation.

Course Requirements

A minimum of four academic quarters in residence is required. This is a full-time program, and students are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level. This includes eight units of Architecture and Urban Design 597 or eight units of course 598. The remaining 12 units may be either upper division (undergraduate) or graduate courses. Eight units of 596 courses may be included as part of the 44-unit requirement but may not be part of the graduate course requirement.

Major Area. Students are required to select their major area at the time of application to the program and must take a minimum of 32 units of coursework in that area. Requirements for each of the five major areas are established individually as follows:

Architectural Design

Students are required to complete at least 12 units of advanced design studio work, plus 12 units of approved seminar courses.

Urban Design and Policy

Students are required to complete a year-long sequence of related urban design studio and seminar courses, consisting of one studio and one seminar course each quarter.

Critical Studies in Architectural Culture

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402 or 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

Architectural Technology

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402 or 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

Design and Computation

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402, 403-series project course which explores

applications; and (3) 12 units of elective coursework in this area.

In partial fulfillment of the requirements for the M.Arch. II degree, students are required to complete either a thesis or a comprehensive examination.

Comprehensive Examination

The comprehensive examination consists of a design or research project on a topic approved by the comprehensive examination committee. The three-person examination committee consists of a chair and two other faculty members. The committee is established by the student at least one quarter before presentation of the comprehensive examination. Students must take at least eight units of Architecture and Urban Design 597 supervised by the chair of the examination committee.

The comprehensive examination must be submitted within two years after entry into the program.

The comprehensive examination is intended to provide the opportunity for the presentation of a design project or independent scholarly research in a professional format of the highest standard. This format must be approved in advance by the comprehensive examination committee.

The comprehensive examination differs from the thesis in three ways. First, an oral defense or public presentation may be required. Second, students submit a report of this work ready for binding for the permanent collection of the Arts Library, which may be as large as 11x17 inches and may include photographs or original drawings, if properly mounted. This report must contain the title page, abstract, signature page, and bibliography, as in a thesis. Third, the report must be submitted to and accepted by the departmental graduate adviser.

Thesis Plan

The thesis consists of a research project or a design project on a topic approved by the student's thesis committee. The three-person thesis committee consists of a chair and two other faculty members. The committee is established by the student at least one quarter before presentation of the thesis. Students must take at least eight units of Architecture and Urban Design 598 supervised by the chair of the thesis committee.

The thesis must be submitted within two years after entry into the program.

The thesis is intended to provide the opportunity for the presentation of an independent scholarly research or design project in a written format in accordance with UCLA regulations for theses and dissertations. The thesis is filed at the University Archives after it meets the approval of the thesis committee and general University thesis requirements. The copy is microfilmed, then bound and placed in the permanent collection of the Arts Library.

The thesis and comprehensive plans are identical in terms of the quality of the work that is expected and the deadlines that apply.

Master of Arts

Admission

The Master of Arts in Architecture is an academic degree and prepares students to do specialized research or teaching in fields related to the architecture profession. Applicants are required to hold a baccalaureate degree (or its equivalent) comparable in standard and content to a bachelor's degree from the University of California. Applicants should possess the experience and knowledge that would allow advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, Graduate Record Examination (GRE) test scores, and a creative portfolio. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, on arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students should expect to spend additional time in residence.

It may be possible for an M.A. student in Architecture to petition to transfer from the M.A. to the Ph.D. program. See Doctoral Degree, Admission.

Areas of Study

Students are required to focus their work on a specific academic area or professional issue. Specializations are currently available in the following areas: critical studies in architectural culture; architectural technology (including energy-conserving design); design and computation. In addition, students have the option of the open M.A. wherein they structure their own area of interest from the courses offered by the department.

Course Requirements

Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six quarters of study. Students must choose and pursue one area of specialization. A thesis or a comprehensive project is required. When the committee members have signed the thesis proposal, students may take

at least four and no more than eight units of Architecture and Urban Design 598 and begin work on the thesis itself. The course should be taken at some point during the last year of study.

Students are required to complete a minimum of 16 courses (64) of graduate or upper division work. At least five (20) of the courses must be 200-series courses and at least two (eight) must be 500-series courses. No more than 20 units of 500-level courses may be counted toward the total unit requirement for the degree. Up to seven courses may be taken from upper division (undergraduate) or graduate courses offered campuswide.

The University of California minimum requirements for the Master of Arts degree must be completed.

Students must enroll in at least four and no more than eight units of course 598. Students may also apply 12 units of course 596 toward the unit requirements for graduation. Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree, but a limited number may be applied toward elective course requirements.

Comprehensive Examination Plan

Students can choose to present a design project as a comprehensive examination (see M.Arch. I). This should be determined at least three months prior to the anticipated date of graduation.

Thesis Plan

Students can choose to do a research thesis. This should be determined at least three months prior to the anticipated date of graduation.

Doctoral Degree

Admission

Applicants to the Ph.D. degree in Architecture must hold a bachelor's degree from an accredited college or university. It is anticipated that most applicants have completed a first professional degree in architecture (a five-year Bachelor of Architecture degree or a professional Master of Architecture degree). If applicants have degrees in other fields, they are also encouraged to apply but they may, at the discretion of the Ph.D. program committee, be required to complete specific coursework in the Department of Architecture and Urban Design as a condition of admission.

Students must fulfill the requirements of the Graduate Division and the Architecture and Urban Design Department. The application dossier must include (1) a short biographical résumé; (2) transcripts of academic record; (3) examples of research and/or creative work; (4) three letters of recommendation; (5) statement of purpose and proposed program of studies; (6) Graduate Record Examination (GRE) scores.

Where feasible, the Ph.D. program committee may require an interview. Applicants whose

native language is other than English are required to pass the Test of English as a Foreign Language (TOEFL) before entering.

Admission to the program is granted to a small group each year, according to the following criteria:

- (1) Evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field.
- (2) Demonstration of an outstanding academic record through the evidence of grades (3.5 minimum grade-point average), GRE scores, and references.
- (3) Demonstration in the work submitted of adequate communication skills, particularly writing skills.
- (4) Presentation of a clear and realistic statement of purpose.

Petition to transfer from the M.A. to the Ph.D. program: M.A. students interested in applying to the Ph.D. program should work closely with an adviser in the field during the first year. Students should select courses which result in a research product (such as a seminar paper, project analysis, or computer program). In addition, they should anticipate the requirements for the Ph.D. program and begin to prepare for the language requirement and minor.

In the spring of the first year, M.A. students may petition the Ph.D. committee for acceptance into the doctoral program. The request must be accompanied by a current transcript, a research sample, a research proposal, and a short written report by the primary adviser. Based on these materials the Ph.D. committee recommends one of the following options: (a) immediate admission into the Ph.D. program; (b) completion of a thesis leading to an M.A. degree and the option thereafter to apply separately for admission into the Ph.D. program; (c) recommend the student take a terminal M.A. degree.

Major Fields or Subdisciplines

Students are required to undertake a program of study that includes one major area, normally drawn from the following: (1) critical studies in architectural culture; (2) architectural technology; (3) design and computation.

Majors outside these areas, or combinations of some of them, may be undertaken, subject to the approval of the Ph.D. program committee, if supported by qualified departmental faculty members who are available and willing to provide the necessary instruction and guidance.

Each major field is organized and coordinated by a major field committee, consisting of faculty and students with active interests in that area. It is the responsibility of each such committee to initiate research programs, organize discussions, make curriculum and staffing recommendations, and serve as a source of consultation, guidance, and stimulation for the student.

Minor Field. Students are required to include in the program of study at least one minor field, which must be from outside the Department of Architecture and Urban Design.

The objectives of the minor field requirement are to assure adequate academic breadth in students' preparation and to encourage participation by architecture Ph.D. students in the general intellectual life of the University. In planning minor fieldwork, students are advised accordingly, and the choice must be approved by the adviser.

Due to the wide diversity of backgrounds of Ph.D. students in architecture, it is appropriate to allow some flexibility in requirements for completion of the minor. The normal method of completing and demonstrating competence in the minor field is to complete at least 16 units of coursework, which represent a unified course of study in that field, with grades of B or better. If a qualified departmental faculty member is willing to provide the necessary supervision, the Ph.D. program committee, in consultation with that faculty member and the student, may accept an alternative method of completing the requirement (for example, a substantial research project). Any proposal to complete the minor by such an alternative method must explicitly demonstrate, to the satisfaction of the Ph.D. program committee, that the objectives of the minor field requirement are met.

Course Requirements

Students must be in residence in the Ph.D. program a minimum of two years. (Note: this is an absolute minimum; longer residence requirements apply to most students, as detailed below.)

Generally, students are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation. Minimum unit requirements are as follows:

All candidates are required to complete six quarters in residence and 72 units of coursework.

Students who hold a professional degree in architecture before admission to the program are required, in order to become eligible to take the qualifying examination, to complete four quarters in residence and 48 units of coursework.

Doctoral students with an M.Arch. I, M.Arch. II, or M.A. degree in Architecture and Urban Design from UCLA may petition the Ph.D. program committee to, at its discretion, reduce these requirements to a minimum of three quarters in residence and 36 units of coursework.

To be counted toward these requirements, units must be in graduate courses, at least 50 percent of the units must be courses in architecture and urban design, and an overall grade-point average of 3.0 or better must be maintained. In exceptional cases, and with the prior approval of the Ph.D. program committee,

upper division courses may be applied toward these requirements to a strictly limited extent.

Students are required to take a proseminar in architectural theory, normally in Fall Quarter of the first year.

Since the Ph.D. is an academic rather than a professional degree, it is expected that a substantial proportion of the coursework is in the 200 series. The minimum requirement is for at least 32 units to be in 200-series courses.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by the adviser and approved by the Ph.D. program committee.

No more than eight units of Architecture and Urban Design 596 may be applied toward degree requirements, but eight units of course 597 and as many units of course 599 as necessary may be applied.

Written and Oral Qualifying Examinations

After successful completion of (1) the first-year review evaluating research skills, (2) mathematics, computing, or foreign language requirement, and (3) coursework requirements, as detailed above, students may apply to take the two qualifying examinations. The application to take the qualifying examinations must be made to the Ph.D. program committee. The committee application includes an outline and brief discussion of the proposed dissertation.

The purpose of the examinations is to establish broad mastery of the field of architecture, the required levels of competence in the major and minor fields, appropriateness of the proposed dissertation, and adequate preparation to undertake it.

The examinations consist of the following parts:

- (1) A comprehensive written and oral examination in the major field.

Students fail the comprehensive oral examination in the major field if more than one committee member votes no pass regardless of the size of the committee. If a majority of the examining committee so recommends, the comprehensive examination in the major field may be repeated once within an established time frame. Students cannot replace more than one original committee member with a new member in the reconstituted committee. Students who do not meet these requirements within the time frame are recommended for termination.

- (2) A written examination in the minor field (this may be waived under certain circumstances, see following).

- (3) The University Oral Qualifying Examination focusing primarily on the subject of the proposed dissertation.

It is the normal expectation that all parts of the qualifying examinations do extend over more than two quarters.

The major and minor field examinations are conducted by a three-member examination committee appointed by the chair of the Architecture and Urban Design Department on the advice of the Ph.D. program committee. It consists of Academic Senate members who serve as the inside members of the doctoral committee.

The written examination in the major field is a substantial exercise followed by an oral presentation to the examination committee. The work must demonstrate that students have achieved the level of competence of a scholar specializing in the field, could teach an introductory course in the field, and can contribute to the progress of the field through scholarship and research.

The written examination in the minor field is a short exercise and may be waived for candidates who hold a recognized master's degree in the field in which the minor is located or, at the discretion of the examination committee, on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination explores the proposed dissertation topic and the ability to undertake the proposed work successfully.

Students may receive academic credit for preparation for the qualifying examinations by enrolling in Architecture and Urban Design 597.

Architecture and Urban Design

Lower Division Course

88. Lower Division Seminar: Special Topics in Architecture and Urban Design. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in architecture and urban design approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

M190. Human Environment: Introduction to Architecture and Urban Planning. (4) (Same as Urban Planning M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

C191. Introduction to Sustainable Architecture and Community Planning. (4) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C247A.

C192. Modern and Postmodern Architecture. (4) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C282B.

C193. City Studies: Culture and City Form. (4) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C280.

194A-194B. History of Architecture and Urban Design. (4) Lecture, three hours. Consideration of architectural and urban projects in relation to their theoretical, philosophical, and sociopolitical contexts, including issues of gender and diversity. **194A.** Introduction to history of architecture and urban design from prehistory to age of mannerism. Discussion of world at large, analyzing synchronic architectural and urban solutions. **194B.** Introduction to history of architecture and urban environments from Baroque period to the present.

199. Special Studies. (2 to 8) Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

Graduate Courses

201. Theories of Architecture. (4) (Formerly numbered 201A.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding the nature of speculative inquiry in an architectural context.

203. Decision Making in Planning and Design. (4) Lecture, three hours. Exploration of challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals' own prospects. Psychological and mathematical approaches for improving decision quality.

204. Imaging the Future. (4) Seminar, three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes.

M225A-M225B-M225C. Fundamentals of Architectonics. (4-4-4) (Same as Design CM221, CM222, CM223.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. S/U or letter grading. **M225A.** Proportion; **M225B.** Symmetry; **M225C.** Comparison and Order.

226A. Introduction to Computer-Aided Architectural Design, Two-Dimensional. (4) Lecture, three hours; laboratory, one hour. Concepts of hardware, software, and networks; paint, draft, multimedia, DTP, and presentation programs; CAD in an office environment.

226B. Introduction to Computer-Aided Architectural Design, Three-Dimensional. (4) Lecture, three hours; laboratory, one hour. Concepts of three-dimensional space, modeling, and virtual reality; file formats; modeling, rendering, and animation programs; video conference.

226C. Computer Visualization. (4) Lecture, three hours. Designed for graduate students. Concept and techniques of computer visualization of artifacts, including realistic rendering and animation.

M227A. Programming Computer Applications in Architecture and Urban Design. (4) (Same as Design CM241.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. S/U or letter grading.

M227B. Introduction to Geometric Modeling. (4) (Same as Design CM242.) Lecture, three hours; outside study, nine hours. Requisite: course M227A. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. May be repeated for credit with consent of adviser. S/U or letter grading.

M227C. User Interaction Techniques in Design. (4) Lecture, three hours; outside study, nine hours. Requisite: course M227A or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. S/U or letter grading.

227D. Design and Building Models. (4) Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured.

242. Climate Responsive Design. (4) Preparation: professional degree in architecture. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students.

243. Energy Modeling. (4) Preparation: one course in building climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

C247A. Introduction to Sustainable Architecture and Community Planning. (4) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C191.

247B. Energy/Resource-Conserving Solar Design and Practice. (4) Lecture, three hours. Preparation: one climatology course. Requisite: course C247A. Extension of concepts and sizing of integrated systems introduced in course C247A; stand-alone approaches particularly in developing countries; impacts of global warming, deforestation on architecture; recycling; programming for project studio 403B.

248A-248B. Passively Integrated Solar Systems. (4-4) Requisites: courses 242, 442. Analysis of different passively integrated solar systems for heating and cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions. **248A.** Heating; **248B.** Cooling.

255A-255B. Climatic Issues in Urban Design. (4-4) Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc.

M259. Advanced Real Estate Development for Planners and Architects. (4) (Same as Urban Planning M259.) Discussion, three hours. Requisite: Urban Planning 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

271. Elements of Urban Design. (4) Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socio-economic, and technological framework of urban systems and its dynamic interrelations.

M272. Real Estate Development for Planners and Architects. (4) (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are iteratively modified to meet economic feasibility tests.

279. Housing for Developing Countries. (4) Discussion, three hours. Considerations of sociocultural, economic, and political factors, materials, structural systems, shelter accessories, and manufacturing technologies related to priorities of developing countries in housing policies and planning and design of shelter.

C280. City Studies: Culture and City Form. (4) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C193.

282A. Roots of Modernism. (4) Lecture, three hours. Overview of developments in Western architecture during the 18th and 19th centuries, covering Romantic and historicist trends of the 1700s, eclectic preferences of the 1800s, and turn-of-the-century premodern developments including art nouveau.

C282B. Modern and Postmodern Architecture. (4) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C192.

283. Special Topics in Modern Architecture. (4) Lecture, three hours. Exploration of topics central to development of modern architecture. Examination of themes such as modernism and psychoanalysis, architecture and environment, modern domestic architecture, and windows, mirrors, and glass in modern architecture through readings from literary, artistic, theoretical, and architectural sources.

284. Architectural Culture of the French Enlightenment. (4) Lecture, three hours. Exploration of French architectural culture of the 18th century. Examination of urban places and activities, intersection of new social and architectural formations, transformation of architectural institutions, and developments in theories of architecture, as well as techniques of their dissemination.

286A-286B. Ancient Architecture. (4-4) Lecture, three hours. Study of architectural developments from archaic Greece to the late Roman Empire. Examination of ancient buildings as functional constructs whose appearance was determined by aesthetic, religious, social, political, urban, and technological factors.

287. Architecture in Europe and the Middle East, 400 to 1500. (4) Lecture, three hours. Study of East/West relationships, cultural concerns, and social interactions as seen through some major urban and architectural developments in Europe and the Middle East.

288A-288B. Renaissance and Baroque Architecture. (4-4) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics.

289. Special Topics in Architecture and Urban Design. (2 to 4) Selected academic topics initiated by students, student teams, or faculty and directed by a faculty member. May be repeated for credit.

290. Landscape Studies. (4) Lecture, three hours. Introduction to cultural geography of American built environment. Exploration of key issues through case studies of settlement patterns, vernacular and political landscapes, origin myths, Enlightenment rationales, technological change, market forces, historic preservation, gardens, horticulture, and landscape design. Letter grading.

291. Theory of Architectural Programming. (4) Lecture, three hours. Exploration of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of solution types for given situations.

292. Social Meaning of Space. (4) Discussion, three hours. Evolution of concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving conception of space, literature on perceptual development, and studies of adaptation to spatial order of the human-made environment.

293. Politics, Ideology, and Design. (4) Lecture, three hours. Exploration of cultural and political context of architecture and planning work. Examination of theory and practice from variety of perspectives applied to a set of varied physical environments and to a set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete case studies where politics and ideology shape design process.

294A-294B. Environmental Psychology. (4-4) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

296. Proseminar: Critical Studies in Architectural Culture. (4) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

297. Group Process in Design. (4) Lecture, two hours; discussion, two hours; laboratory, two hours. Designed to equip students with knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes.

298A-298B-298C. Research Practicum in Architecture. (2 to 4 each) (Formerly numbered 298A-298D.) In-depth examination of research methods in the various major fields. May be repeated for credit.

298A. Research Practicum in Critical Studies in Architectural Culture; **298B.** Research Practicum in Technology; **298C.** Research Practicum in Design Theory and Methods.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

401. Projects in Architecture. (4) Studio, eight hours. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

402. Projects in Urban Design. (4) Studio, eight hours. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

403A-403D. Projects with Specific Topics. (2 to 4 each) Studio, eight hours. Preparation: prior courses of particular sequence. **403A.** Projects in Policy, Programming, and Evaluation; **403B.** Projects in Architectural Technology; **403C.** Projects in Design and Computation; **403D.** Projects in History and Theories of Architecture.

M404. Joint Planning/Architecture Studio. (4) (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

411. Introductory Design Studio. (4) Studio, 12 hours. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of closely controlled exercises dealing with combining the elements. Design of a small building in which previously acquired knowledge is synthesized into a single design in latter part of course.

412. Building Design Studio. (4) Studio, 12 hours. Requisite: course 411. Design of project starts with exploration of architectural program in relation to design process and, particularly, implications of program on architectural forms and concepts. In second phase, structural elements are introduced to fulfill program requirements and to support and further develop intended forms and concepts.

413. Building Design with Landscape Studio. (4) Studio, 12 hours. Requisite: course 412. Building design and site planning in relation to water, landforms, and plants in natural landscape, with special attention to natural light, heat, and ventilation.

414. Major Building Design. (4) Studio, 12 hours. Designed for second-year graduate students. Design projects which enable students to concentrate specifically on architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental control, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form.

415. Major Building Design II. (4) Studio, 12 hours. Requisite: course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, mechanical systems, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on integration of environmental control systems.

416. Comprehensive Design Studio. (4) Studio, 12 hours. Preparation: completion of required coursework up to first term of third year. Course completes regular required sequence of design work, preparing students for third-year thesis preparation. Comprehensive design projects are structured to test students on integration of structural aspects, mechanical systems, site planning, and climatic considerations within their design solutions.

421. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 411, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

422. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 412, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

423. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 413, which introduces theoretical and technical issues such as site planning, urban design, landscape design, design with climate, and building typology, etc., through lectures, seminars, and independent or studio-related exercises.

424. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 414, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

425. Studio Support. (2) Lecture/studio, 90 minutes. Design development of project initiated in preceding studio (usually course 414). One room or part of building is developed in detail, with integration of a range of technical systems such as structures, mechanical systems, etc.

426. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 416, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

428. Advanced Architectural Drawing. (4) Discussion, three hours; studio, three hours. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation.

431. Structures I. (4) Lecture, three hours. Preparation: basic algebra, geometry, trigonometry. Introduction to structural behavior and structural statics. Operations with forces and factors, both algebraically and graphically. Equilibrium of force systems; polygon of forces and funicular polygon. Internal actions; axial force and bending moment. Reactions, stability, and statical determinacy. Determinate frames. Plane trusses; analysis and design.

432. Structures II. (4) (Lecture, three hours. Requirement: course 431. Mechanics of structures and structural elements. Elastic materials: stress, strain, and stress-strain relations. Theory of bending: curvature, stress and strain distributions, centroid, moments of inertia, resisting and plastic moments. Design of beams for bending, shear, and deflections. Torsion members. Instability and design of columns. Design for combined bending and compression. Tensile structures; cables, pneumatic structures. Slabs and plates; shells and folded plates.

433. Structures III. (4) Lecture, three hours. Requirement: course 432. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural case studies in timber and steel. Introduction to earthquakes: seismology, magnitude, intensity, history. Seismic instrumentation. Case studies of recent earthquakes and damage. Earthquake design concepts and seismic code requirements.

434. Structures IV. (4) Lecture, three hours. Requirement: course 433. Considerations of concrete structures. Materials of construction: cement aggregates, concrete mix design. Construction methods and structural systems. Reinforced concrete theory: elastic and ultimate strength analysis and design of beams, columns, and slabs. Case studies of concrete structures. Economics of high-rise concrete apartment buildings.

436. Building Construction. (4) Limited to M.Arch. I students. Principles of structure and enclosure; basic nature, production, classification of primary building materials. Building elements explored for formal and functional properties; production and assembly possibilities in factory and field, application and role within building. Hands-on project.

437. Construction Documents. (4) Studio, eight hours. Preparation: one course in basic building construction (such as 436). Office/field communications explored through design of simple structure and creation of key working drawings and outline specifications. Introduction to CADD (computer-aided design and drafting) systems.

438. Systems Building. (4) Discussion and survey of past and present developments in Europe, the U.S.S.R., and the U.S. Impacts, demands, socioeconomic and legal constraints, user needs, performance specifications. Systems engineering and design. Measurement regulation, modular coordination, closed systems, open systems, design of systems, subsystems, components, elements, and materials.

441. Environmental Control Systems. (4) Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building.

442. Building Climatology. (4) Preparation: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate.

444. Light and the Visual Environment. (4) Preparation: one course in building climatology. Exploration of extent to which physical form of a building controls the luminous environment of its occupants; design of naturally and artificially illuminated interior spaces; parameters of human visual comfort.

445. Architectural Acoustics. (2 to 4) Lecture, three hours. Applied course in acoustical designing in architecture, including design of partitions to provide good sound insulation. Acoustical materials. Acoustical design of auditoriums. Control of noise in HVAC systems.

448. Communication and Diffusion of Innovation. (4) Seminar, three hours. Innovation in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips.

461. Architectural Practice. (4) Seminar, three hours. Historical development of the profession; role of architect in contemporary society, current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of practical process.

496. Special Projects in Architecture. (2 to 8) Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

497. Special Projects in Urban Design. (2 to 8) Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Architecture and Urban Design. (2 to 8) May be repeated for credit. S/U grading.

597. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) May be repeated for credit. S/U grading.

598. Preparation in Architecture/Urban Design for Master's Thesis. (2 to 8) May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research in Architecture. (2 to 8) Limited to doctoral students. May be repeated for credit. S/U grading.

Mary Kelly, M.A., *Chair*

Professors

Chris Burden, M.F.A.
Roger Herman, M.F.A.
Henry T. Hopkins, M.A.
Mary Kelly, M.A.
Paul McCarthy, M.F.A.
Lari Pittman, M.F.A.
Charles Ray, M.F.A.
Nancy Rubins, M.F.A.
Adrian Saxe, B.F.A.

Professors Emeriti

Samuel Amato, B.F.A.
Laura F. Andreson, M.A.
William J. Brice
Raymond B. Brown, M.A.
Elliot J. Elgart, M.F.A.
Robert F. Heineken, M.A.

Associate Professors

Barbara Drucker, M.F.A.
James Welling, M.F.A.
Patricia Wickman, M.F.A.

Lecturers

Anne Marie Karlsen, M.F.A.
Don Suggs, M.F.A.

Scope and Objectives

The Department of Art offers professional art training which emphasizes experimentation and encourages students to draw from many disciplines in their creative process. The department provides a strong background in theory and criticism to support contemporary studio practice. Bachelor of Arts and Master of Fine Arts degrees are offered in painting/drawing, new genres, photography, sculpture, and ceramics. An interdisciplinary studio option is offered within the M.F.A. program. In addition, a Master of Arts degree is offered in critical and curatorial studies. All programs have access to the art resources at UCLA and in the Los Angeles community.

Undergraduate Study

Art B.A.

Preparation for the Major

Required: Art 1A, 1B, 11A, 11B, 11D, 11E, 31, 32, and one course from Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57.

The Major

Required: A minimum of 13 upper division courses, including Art 100, 150, six courses from at least four of the following: 130, 133, 137, 140, 145, 147, 148, one course from Art History 101A through C119B, and four art electives.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Art offers the Master of Arts (M.A.) degree in Art and the Master of Fine Arts (M.F.A.) degree.

Master of Arts

Admission

Students are admitted to the M.A. program in Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work in February. Applicants must submit slides (maximum 20) or videotape (if applying to the video field).

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

Areas of Study

Drawing, painting, sculpture, photography, ceramics, and alternative media. No limit to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 36 quarter units in the department in courses numbered 130 through 280 is required, with a B average or better.

Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in the field of specialization, including four units of Art 276. In addition, four units of Art 280 are required as part of the 36 units.

A minimum total of 36 quarter units of art history, theory, and criticism in undergraduate or graduate study is also required, including Art 280. Art history courses completed as an undergraduate count toward fulfilling the Art Department's 36-unit art history requirement, but do not count toward the 36 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 36-unit art history requirement and toward the total units required for the degree. Subjects re-

lated to the special interests of the student may be substituted by petition.

A maximum of two 596 courses (eight units) may be applied toward the 36 units required for the degree.

Comprehensive Examination Plan

Each degree is granted on the basis of the quality of the student's work as demonstrated in the exhibition which accompanies the final comprehensive examination. The number of units of credit attained is irrelevant to this.

A review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

Thesis Plan

None.

Master of Fine Arts

Admission

Students are admitted to the M.F.A. program in Fall Quarter only. See Admission section for the M.A. in Art above. The M.A. is not prerequisite to the M.F.A., but may be elected as a stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of accumulative art history units.

Areas of Study

Painting and drawing, sculpture, photography, ceramics, new genres, and interdisciplinary studio. No limits to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 72 quarter units in the department in courses numbered 130 through 280 is required, with a B average or better.

Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken, including four units of Art 276 and a minimum of 24 quarter units in the field of specialization. In addition, eight units of Art 280 are required as part of the 72 units.

A minimum total of 40 quarter units of art history in undergraduate or graduate study is also required (including Art 280). Art history courses completed as an undergraduate count toward fulfilling the Art Department's 40-unit art history requirement but do not count toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 40-unit art history requirement and toward the total units required for the degree. Subjects related to the special interests of the student may be substituted by petition.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four

units may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination plan is the same as the plan offered for the Master of Arts in Art.

Thesis Plan

None.

Art

Lower Division Courses

1A. Drawing. (4) Studio, eight hours; five hours arranged. Course in basic drawing skills intended as preparation for work in a variety of media.

1B. Sculpture. (4) Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists.

11A. Painting. (4) Studio, eight hours; five hours arranged. Basics of painting: introduction to technical procedures, tools, and materials. Discussion of fundamental conceptual and formal concerns. P/NP or letter grading.

11B. Photography. (4) Studio, eight hours; five hours arranged. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of the photographic medium within the context of art, supported by studies in theory, aesthetics, and history of photography. P/NP or letter grading.

11C. Printmaking. (4) Studio, eight hours; five hours arranged. Introductory survey of various technical and conceptual concerns in a variety of printmaking media as preparation for more focused study in particular media at upper division level. P/NP or letter grading.

11D. New Genres. (4) Studio, eight hours; five hours arranged. Introduction to projects in installation, performance, video, film, intermedia, and other nontraditional media and processes. P/NP or letter grading.

11E. Ceramics. (4) Studio, eight hours; five hours arranged. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art. Letter grading.

31. Modernism. (4) Discussion, three hours. Survey of 20th-century European/American art, its antecedents, and its social and political context.

32. Survey of Critical Thought. (4) Discussion, three hours. Overview of premodern, modern, and postmodern theory as reflected in critical writing and artistic practice, with emphasis on the 1940s to the present.

Upper Division Courses

100. Issues in Contemporary Art. (4) Discussion, three hours. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for a maximum of 16 units.

130. Advanced Drawing. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Drawing as both an independent expressive medium and as a means of visualization. May be repeated for a maximum of 16 units.

133. Advanced Painting. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Varied media and subjects to further develop students' technical and expressive means to implement their ideas. May be repeated for a maximum of 16 units.

137. Advanced New Genres. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Emphasis to be selected by faculty from one or more of the following media: installation, performance, video, film, other nontraditional media and processes. May be repeated for a maximum of 16 units.

140. Advanced Printmaking. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected studies in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units.

145. Advanced Sculpture. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

147. Advanced Photography. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected projects in photography and related media, concentrating on development of individual students' artwork. Studio emphasis with special topics in theory and critical analysis. May be repeated for a maximum of 16 units.

148. Advanced Ceramics. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11E, 31, 32. Selected studies in ceramics, with emphasis on individualized creative experimentation with materials and techniques introduced in course. Methods and processes to be selected from a range of possibilities, including handforming and modeling, preparation and use of molds, slipcasting, and use of potter's wheel. May be repeated for a maximum of 16 units.

150. Senior Studio. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Limited to seniors. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. May be repeated once for credit.

M186A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186A and World Arts and Cultures M166A.) Studio/lecture, six hours. Corequisite: course M186AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

M186AL-M186BL-M186CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2) (Same as Chicana and Chicano Studies M186AL-M186BL-M186CL and World Arts and Cultures M166AL-M166BL-M166CL.) Laboratory, two hours. Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M186AL.** Beginning; **M186BL.** Intermediate; **M186CL.** Advanced.

M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186B and World Arts and Cultures M166B.) Studio/lecture, six hours. Requisites: courses M186A/M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186C and World Arts and Cultures M166C.) Studio/lecture, six hours. Requisites: courses M186B/M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M188. Whose Monument Where: Course on Public Art. (4) (Same as Chicana and Chicano Studies M188 and World Arts and Cultures M167.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

197. Honors Course. (4) Hours to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

271. Painting. (2 to 8) Studio, eight hours. Study in painting and associated media. May be repeated for credit with consent of adviser.

272. Graduate Printmaking. (2 to 8) Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. May be repeated for credit with consent of adviser.

273. Graduate Sculpture. (2 to 8) Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation. May be repeated for credit with consent of adviser.

274. Photography. (2 to 8) Studio, eight hours. Studies concentrating on development of individual students' artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. May be repeated for credit with consent of adviser.

275. New Genre. (2 to 8) Studio, eight hours. Studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes. May be repeated for credit with consent of adviser.

276. Graduate Group Critique. (4) Discussion, four hours; tutorial, to be arranged. Group critique/discussion of students' research. Additional tutorial meetings by arrangement with instructor. May be repeated for credit.

277. Graduate Ceramics. (2 to 8) Studio, eight hours. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of a significant body of original work reflecting student's expressive and theoretical concerns. May be repeated for credit.

278. Interdisciplinary Studio. (2 to 8) Studio, eight hours. Tutorial focused on directed research, studio visits, and group discussions of recommended readings. May be repeated for credit. S/U or letter grading.

280. Graduate Seminar: Art. (4) Discussion, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit.

281. Exhibition and System. (4) Examination of temporary exhibition and its associated field of publications as an intertextual system of meaning, beginning with individual works and proceeding to on-site analysis of current exhibitions. May be repeated for credit. S/U or letter grading.

282. Exhibitions and Public Programs. (4) Seminar, four hours. Introduction to principles of program planning and community development in relation to visual arts and work of art museums. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. May not be applied toward M.A. course requirements. May be repeated. S/U grading.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Irene A. Bierman, Ph.D.

Assistant Professor

Miwon Kwon, Ph.D.
 Barbara Zeitler, Ph.D.

Lecturers

Shelley M. Bennett, Ph.D.
 Jean S. Weisz, Ph.D., *Senior Emerita*

Scope and Objectives

The department offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees. Art history courses survey Western and non-Western art from earliest human history to the present. Students learn to treat artistic monuments and trends from a historical point of view, analytically rather than subjectively. The curriculum prepares students for careers in which broad knowledge of art is important and provides students preparing for graduate study with a foundation for research requiring independent critical judgment.

The rich and varied art resources available at UCLA and throughout Southern California offer students extraordinary opportunities to supplement the formal curriculum.

Undergraduate Study

Art History B.A.

Preparation for the Major

Required: Two courses from Art History 50, 51, 54, 57 and two courses from 55A, 55B, 56A, 56B. It is strongly recommended that these courses be taken prior to enrollment in upper division courses.

The Major

Required: Eleven upper division art history courses as follows:

(1) A total of six courses (24 units) from the following 12 areas, distributed as follows: one course from three different areas in Group A (three courses total) and one course from three different areas in Group B (three courses total):

Group A: (1) 101A, 101B, M102A through M102E, (2) M102F through M102K, (3) 105A through 105E, (4) 106A through 106D, 108A, 108B, (5) 108C, 109A through 109D, (6) 110A through 110G, C150A through 150D, (7) C112A through CM112D.

Group B: (8) 104A, 104B, C104C, (9) 114A, 114D, 114F, C115A, (10) 114C, 114E, C115B

through C115F, (11) C117A, C117B, C117C, 118D, 118E, (12) 118A, 118C, C119A, C119B.

(2) Five art history electives from the above 12 areas; courses 127, 197, and 199 may also be included.

Two terms of one foreign language or equivalent are also required. The language is in addition to the college foreign language requirements.

Art History majors should be aware that the upper division course requirements in the major (44 units) do not meet the upper division requirement of 60 units for graduation. Additional upper division units must be taken to reach the 60-unit total.

It is recommended that students have each term's program approved by the departmental adviser.

Honors Program

The honors program is designed for Art History majors who are interested in carrying out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Art History majors who have completed a minimum of four upper division art history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Art History 195A-195B with a grade of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete courses 195A-195B with a grade of A.

Museum Studies Minor

The Museum Studies minor introduces undergraduate students to the history, theory, and practice of museums and museology through a group of linked and related courses from various disciplines in the College of Letters and Science and School of the Arts and Architecture. The program exposes students to museum studies as historically and currently practiced in the visual arts, in anthropology and ethnography, and in history and cultural studies more broadly. The minor complements and in part may serve as an introduction to the recently approved M.A. concentration in museum studies.

To enter the minor students must be in good academic standing (minimum 3.0 cumulative grade-point average), have completed 45 units at UCLA, and file a petition with the program adviser, 100 Dodd Hall, (310) 206-6905.

Required Lower Division Courses (eight units): Anthropology 9 or 33 and one course from Art History 50 through 57, with grades of B or better.

Required Upper Division Courses (28 units): Art History C103A-C103B, World Arts and Cultures 165A, 165B, and three elective courses selected from Art History 100, C103C, World Arts and Cultures 165C, and a wide range of other courses from various departments and programs, with approval of the program director. Courses from other departments and programs may be applied as electives on an individual case basis only.

A minimum of 20 units applied toward the minor requirements must be in **addition** to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Transfer credit for any of the above is subject to departmental approval; consult the departmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Art History offers the Master of Arts (M.A.) degree in Art History.

Admission

A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required of applicants to the M.A. program. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about the applicant's interests in art history. Also required are two writing samples (two 10-page research papers). In addition, applicants must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses in

Fields A and B noted below. Specific areas may not be offered in satisfaction of more than one requirement.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during the first two quarters of residence and may not be applied toward the required courses for the degree. Instead of taking a course, students may elect to substitute a competency examination in the deficient area.

Prospective students may contact the graduate counselor, Department of Art History, for brochures and information. The department has no special departmental application.

Areas of Study

Sixteen areas in four fields:

Field A: (1) Aegean; (2) Greek and Roman; (3) medieval and Byzantine; (4) Renaissance and baroque; (5) modern and contemporary; and (6) American.

Field B: (7) African; (8) oceanic; (9) Native North American; (10) pre-Columbian; (11) Islamic; (12) Indian and Southeast Asian; (13) Chinese; and (14) Japanese.

Field C: (15) Critical theory.

Field D: (16) Museum Studies

Course Requirements

The M.A. degree requires the completion of a major and two minors within the art history major. There are four major/minor options available to M.A. students.

Option I: Western Major

Major from Field A, areas 1-6 — four courses in one area.

First minor from Field A, areas 1-6, or from Field C, area 15 — two courses from one area other than the major selected from Field A areas 1-6, or two courses from Field C, area 15.

Second minor from Field B, areas 7-14 — two courses in one area.

Option II: Non-Western Major

Major from Field B, areas 7-14 — four courses in one area.

First minor from Field B, areas 7-14, or from Field C, area 15 — two courses in one area other than the major selected from Field B, areas 7-14, or two courses from Field C, area 15.

Second minor from Field A, areas 1-6 — two courses in one area.

Option III: Critical Theory Major

Major from Field C, area 15 — two courses from Field C, area 15, plus four courses in one area from Field A or B, areas 1-6 or 7-14.

The first and second minors for this option are chosen as in options I and II based on the major selection from Field A or B, areas 1-6 or 7-14 — two courses in one area for each minor.

Instructors from the student's major and two minor areas normally serve on the thesis committee. If the student wishes to complete two of the three areas with one instructor, a petition explaining the reasons for this must be approved by the graduate review committee.

For major/minor options I and II, students are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

For major/minor option III, students are required to take a minimum of 13 graduate and upper division courses but may be required to take up to 14 courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

Option IV: Museum Studies Major

Major from Field D, area 16—two courses from Field D, area 16, plus four courses in one area from Field A, B, or C, areas 1-6 or 7-14 or 15.

The first and second minors for this option are chosen as in options I and II based on the major selection from areas 1-6 or 7-14 or 15—two courses in one area for each minor. Language requirements: The language of the student's major historical field is required, in conformity with foreign language requirements listed above.

For major/minor option IV, students are required to take a minimum of 13 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. Courses C203A-C203B are required. Of the courses taken from outside the department, a minimum of three must be from a museum studies- or museology-related subject in another department, taken for graduate or upper division credit. No more than two of the graduate courses may be directed studies (596) projects. A list of recommended courses from which the student may select is provided by the student's adviser.

All students must take (1) Art History 200 and (2) either course 201 or 202. Courses should be determined in consultation with students' major and minor advisers with the stipulation that progress toward the M.A. may not be impeded by requiring a course not offered at least once every two years.

On completion of all course and foreign language requirements, the department requests the Graduate Division to appoint the thesis committee. After the committee has been appointed, students may petition for advancement to candidacy for the M.A. degree. Candidates have one calendar year after advance-

ment to candidacy to complete all requirements for the degree.

Comprehensive Examination Plan

None.

Thesis Plan

The thesis committee consists of the student's major adviser and two other University of California faculty, one of whom must be a UCLA Art History Department faculty member. Normally, students' two minor advisers serve in this capacity. For details on the acceptable status of these members, see the publication, *Standards and Procedures for Graduate Study at UCLA*, available in Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Students and the major adviser must be in agreement on the members of the thesis committee.

At this time, the student selects, in consultation with and with the written consent of the thesis committee, a thesis topic in the major field. This thesis should deal succinctly with the topic in an independent, critical, and original fashion while taking fully into account the present state of research on the problem. It must be clearly written, correctly documented, and illustrated and must meet the minimum standards for the master's thesis as set out by the UCLA Graduate Division in *Standards and Procedures for Graduate Study at UCLA*. It should not exceed 50 pages in length and must be researched and written in consultation with the thesis committee members. If the thesis is rejected by one member of the committee, it may, at the request of the major adviser, be submitted to the graduate review committee for final judgment; otherwise, the student's candidacy must be terminated.

Doctoral Degree

Admission

The M.A. in Art History is usually required for admission to the program leading to the Ph.D. degree in Art History. However, students with an M.A. degree in other disciplines can apply for admission. The graduate review committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate review committee. All incoming Ph.D. students must show evidence of having taken and passed with a grade of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in M.A. course requirements). Deficiencies must be made up during the first two quarters of residence and may not be applied toward the eight courses required for the Ph.D. degree.

The application must include, in addition to official transcripts, all of the following: (1) a standard statement of purpose (approximately 400 words); (2) a copy of the applicant's M.A. thesis or, if no thesis was written, one major research

paper written at the M.A. level in the major or intended major field; (3) three or more letters of recommendation from individuals familiar with the applicant's scholarly work, of which one must be a detailed letter of assessment and endorsement from the individual who served as the major adviser for the M.A.; (4) a written statement from the intended Ph.D. major adviser of willingness to supervise the applicant's Ph.D. work; (5) evidence of reading fluency in two appropriate foreign languages; (6) Graduate Record Examination (GRE) scores.

If an applicant is applying directly to the Ph.D. program from the M.A. in Art History program at UCLA, there is a slightly modified procedure. For details, see the graduate counselor.

A reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian (i.e., Chinese, Japanese, South Asian, Southeast Asian), pre-Columbian and Latin American, Native North American, oceanic, Islamic, and Italian art history. An applicant may demonstrate this knowledge by (1) submitting proof of a GSFLT (Graduate School Foreign Language Test) score of 600 or better (for French, German, and Spanish only; examination not given for Italian); (2) taking and passing the relevant UCLA department language examinations; or (3) submitting proof of completion of UCLA's German 6 and/or French 5 with a grade of B or better. If an applicant plans on majoring in Japanese or Chinese art history, substitute either Chinese or Japanese respectively for either French or German. If an applicant plans on majoring in South Asian, Southeast Asian, or Islamic art history, substitute for either French or German an appropriate research language of South Asia, Southeast Asia, or the Islamic Middle East. The choice must be made in consultation with, and with the consent of, the major adviser. The Asian and Islamic requirements, however, are normally satisfied by enrolling in an appropriate course sequence for six consecutive quarters (normally beginning with the first quarter of graduate study) and by maintaining a grade of B or better. If one intends to major in pre-Columbian and Latin American art history, applicants must demonstrate reading fluency in Spanish plus one additional foreign language. In the case of Spanish, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement. Applicants intending to major in Native North American or oceanic art must master one European language and one additional foreign language. If an applicant intends to focus on Italian art history, competency in German and either French or Italian must be demonstrated. For the latter, UCLA's Italian 5, passed with a grade of B or better, satisfies the requirement.

If the applicant has passed a required foreign language at another institution, the relevant UCLA departmental foreign language examination must be taken and passed nonetheless, or an official recent (within two years) GSFLT score of 600 or better in the language must be submitted. Exceptions are granted only when

the examination taken at another institution (1) has been passed within the past two years and (2) can be demonstrated to have been equivalent in nature to that of the UCLA departmental foreign language examination. Coursework in foreign languages taken at another institution may not be used as evidence of reading competence.

Major Fields or Subdisciplines

Twenty-two areas in three fields:

Field A: (1) Aegean; (2) American; (3) baroque; (4) Byzantine; (5) contemporary (post-1945); (6) 18th century; (7) Greek; (8) medieval; (9) 19th century; (10) Renaissance; (11) Roman; and (12) 20th century.

Field B: (13) African; (14) Chinese; (15) Indian; (16) Islamic; (17) Japanese; (18) Native North American; (19) oceanic; (20) pre-Columbian; (21) Southeast Asian.

Field C: (22) critical theory.

Course Requirements

At the time of application to the Ph.D. program, the student selects a major field of study within art history; by the end of the second quarter of residence, an additional minor (or minors) is selected. The faculty member responsible for the minor serves as the minor adviser. The major and minor advisers are responsible for the student's course of study and completion of requirements within the field. In addition, the major adviser must be consulted regarding the student's overall course of study at least once each quarter. A change of adviser and of either the major or minor field must be changed by the graduate review committee.

If a student enters the Ph.D. program deficient in Art History 200 or its equivalent, it must be added to the total requirements. In some cases, course 201 may also be required if recommended by the faculty adviser.

The department offers three options in the selection of majors and minors.

Option I

Major from Field A, areas 1-12, or Field B, areas 13-21 — five courses in one area.

Minor from Field A or B, areas 1-12 or 13-21 — three courses in one area other than the major field, or from Field C, three courses from area 22.

Option II

Major from Field A, areas 1-12, or Field B, areas 13-21 — five courses in one area.

Minor from an extra-departmental area such as history, anthropology, or film — three courses in one area.

Option III

Major from Field C, area 22 — four courses from Field C, area 22, plus four courses in one area from Field A or B, areas 1-12 or 13-21.

Minor from Field A or B, areas 1-12 or 13-21 — three courses in one area not chosen as part

of the major or three courses in one area from an extra-departmental area.

For major/minor options I and II, a minimum total of eight graduate and upper division courses is required, of which at least four must be art history courses at the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses with approval of the major or minor advisers (where applicable).

For option III, a minimum total of 11 graduate and upper division courses is required, of which at least four must be art history courses at the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses with approval of the major or minor advisers (where applicable).

Written and Oral Qualifying Examinations

After completion of coursework and language study, students must take the Ph.D. written comprehensive examination to test breadth and depth of knowledge in the major and minor fields of study. If the examination is failed, or any part thereof, that portion may be repeated during the subsequent quarter of residence. No further repetition is allowed.

After passing the written comprehensive examination, students select a dissertation topic. The members of the doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, students then take the University Oral Qualifying Examination, given by the doctoral committee. Assuming there is no more than one no pass vote, students may initiate the procedure to become advanced to candidacy.

Art History

Lower Division Courses

50. Ancient Art. (4) Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture.

51. Medieval Art. (4) Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

54. Modern Art. (4) Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

55A. Introduction to African Art. (4) Lecture, three hours; discussion, one hour. Introduction to field of African art history, with focus on selected traditions. P/NP or letter grading.

55B. Arts of Pre-Columbian America. (4) Lecture, three hours; discussion, one hour. Survey of sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.

56A. Art of India and Southeast Asia. (4) Lecture, three hours; discussion, one hour. Survey of major artistic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical problems, as well as social and political conditions under which artworks were patronized and produced.

56B. Introduction to Chinese Art. (4) Lecture, three hours; discussion, one hour. Introduction to discipline of Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and textual sources, peculiarities of patronage, traditional art history and criticism, and approaches to representation in premodern China.

57. Renaissance and Baroque Art. (4) Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Buddha's Life and Teachings in Art, Texts, and Worship. Development of Buddhist art in India through Buddha's teachings, expressed in art, architecture, texts, and ritual. Re-creation of Buddha's life by analyzing art and reading Buddhist texts of his life.

Upper Division Courses

100. Art Historical Theories and Methodologies. (4) Discussion, three hours. Requisites: three courses from 50 through 57. Critical examination of history of discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts.

101A. Egyptian Art and Archaeology. (4) Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during the Predynastic period and Old Kingdom.

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms. (4) Lecture, three hours. Requisite: course 50. Study of architecture, sculpture, painting, and minor arts during the Middle and New Kingdoms.

M102A. Minoan Art and Archaeology. (4) (Same as Classics M153A.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

M102B. Mycenaean Art and Architecture. (4) (Same as Classics M153B.) Lecture, three hours. Requisite: course 50 or Classics 10. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. P/NP or letter grading.

M102C. Archaic Greek Art and Archaeology. (4) (Same as Classics M153C.) Lecture, three hours. Requisites: course 50, Classics 10. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M102D. Classical Greek Art and Archaeology. (4) (Same as Classics M153D.) Lecture, three hours. Requisites: course 50, Classics 10. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M102E. Hellenistic Greek Art and Archaeology. (4) (Same as Classics M153E.) Lecture, three hours. Requisites: course 50, Classics 10. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

M102F. Etruscan Art. (4) (Same as Classics M153F.) Lecture, three hours. Requisite: course 50 or Classics 20. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

M102G. Roman Art. (4) (Same as Classics M153G.) Lecture, three hours. Requisite: course 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

M102H. Late Roman Art. (4) (Same as Classics M153H.) Lecture, three hours. Requisites: courses 50, M102G. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

M102I-M102J-M102K. Classical Archaeology. (4-4-4) (Same as Classics M153I-M153J-M153K.) Lecture, three or four hours. Requisite: course 50 or Classics 10 or 20 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M102I.** Greco-Roman Architecture; **M102J.** Greco-Roman Sculpture; **M102K.** Greco-Roman Painting.

C103A-C103B. Museum Studies. (4-4) (Formerly numbered 110F.) Lecture, three hours; demonstrations/field trips. Concurrently scheduled with courses C203A-C203B. In Progress and P/NP or letter grading. **C103A.** Introduction to historical evolution of museums and museology, theories and methods of their operations, historical and critical relationships between museology, art history, and new technologies for archiving and exhibiting artifacts and historical materials. **C103B.** Lectures and discussions organized to foster active critical engagement with museum policies, operations, and productions involving focused study and on-site research on particular museum institutions and exhibitions.

C103C. Museum Studies Practicum (2 to 4). Lecture, three hours. Requisites: courses C103A-C103B. On-site examination and discussion of selected artworks, exhibitions, and associated published and distributed materials, and of museum and gallery institutions, practices, and policies. Concurrently scheduled with course C203C. Letter grading.

104A. Western Islamic Art. (4) Lecture, three hours. From the Tigris and Euphrates Rivers to Spain, 7th to 16th century.

104B. Eastern Islamic Art. (4) Lecture, three hours. From the Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire.

C104C. Problems in Islamic Art. (4) Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C214.

105A. Early Christian Art. (4) Lecture, three hours. Requisite: course 51. Origins and development of architecture, sculpture, and painting of early Christianity to the iconoclastic controversy.

105B. Early Medieval Art. (4) Lecture, three hours. Requisite: course 51. Art and architecture of Western Europe from the Migration period until A.D. 1000.

105C. Romanesque Art. (4) Requisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries.

105D. Gothic Art. (4) Lecture, three hours. Requisite: course 51. Art and architecture of Europe in the 13th century.

105E. Byzantine Art. (4) Lecture, three hours. Requisite: course 51. Theory and development of Byzantine art from the iconoclastic controversy to 1453 and diffusion of Byzantine art in Armenia, Georgia, the Caucasus, and Russia.

105F. Late Gothic Art and Architecture. (4) Lecture, three hours. Strongly recommended preparation: course 51. Art and architecture of Europe in the 14th and early 15th centuries. P/NP or letter grading.

106A. Italian Art of the Trecento. (4) Lecture, three hours. Requisite: course 57. Art and architecture of the 14th century.

106B. Italian Art of the Quattrocento. (4) Lecture, three hours. Requisite: course 57. Art and architecture of the 15th century.

106C. Italian Art of the Cinquecento. (4) Lecture, three hours. Requisite: course 57. Art and architecture of the 16th century.

106D. Late Renaissance Art: Counter-Reformation. (4) Lecture, three hours. Requisite: course 57. Painting, sculpture, and architecture of the late 16th and early 17th centuries considered in context of the Counter-Reformation.

108A-108B. Northern Renaissance Art. (4-4) Lecture, three hours. Requisite: course 57. Course 108A is requisite to 108B. Painting and sculpture in the Northern Renaissance.

108C. From Bruegel to Rubens. (4) Lecture, three hours. Requisite: course 57. Art and history in the Spanish southern Netherlands (i.e., present-day Belgium), circa 1550 to 1650, in context of Spanish rule and revolt against it (1568 to 1585), truce with the northern independent (Dutch) Netherlands (1609 to 1621), and renewal of war (1621 to 1648). P/NP or letter grading.

109A. Baroque Art. (4) Lecture, three hours. Requisite: course 57. Art and architecture of Italy and Spain, 16th to late 17th century.

109B. Baroque Art. (4) Lecture, three hours. Requisite: course 109A. Art and architecture of Northern Europe, 16th to late 17th century.

109C. European Art of the 18th Century. (4) Lecture, three hours. Requisite: course 57. Painting, architecture, and sculpture of the 18th century examined in light of political and intellectual developments. Special emphasis on effect of the rise of democratic institutions, especially the French Revolution.

109D. Art and Architecture of Georgian England. (4) Lecture, three hours.

110A. European Art of the 19th Century. (4) Lecture, three hours. Requisite: course 54. Neoclassicism and Romanticism, with emphasis on France — development and influence of David, Ingres, and Delacroix.

110B. European Art of the 19th Century: Realism and Impressionism. (4) Lecture, three hours. Requisite: course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in England and Germany.

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. (4) Lecture, three hours. Requisite: course 54. Study of major developments in modern art, 1880s to 1930, including Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism.

110E. Art and Politics in the Contemporary Americas: Post-World War II U.S. Art and Politics. (4) Requisite: course 54. Selective survey of media and art supporting, condoning, and resisting U.S. capitalism and imperialism, with special emphasis on Vietnam era and arts of protest.

110F. Selected Topics in Modern Art. (4) Lecture, three hours. Requisite: course 54. Changing topics in modern art (post-1780) which reflect interests of individual regular and visiting faculty members. May be repeated once for credit. P/NP or letter grading.

110G. Art and Politics in the Contemporary Americas: Latin America. (4) Requisite: course 54. Nationalist and revolutionary responses of Latin America to U.S. imperialism. Discussion of the cases of Mexico, Cuba, Chile, and Nicaragua.

C110H. Latin American Art of the 20th Century. (4) Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. Concurrently scheduled with course C254. P/NP or letter grading.

C112A. American Art before the Civil War. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C212A.

C112B. American Art in the Gilded Age, 1860 to 1900. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212B.

C112C. American Art, 1900 to 1945. (4) Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. Concurrently scheduled with course C212C. P/NP or letter grading.

CM112D. African American Art. (4) (Same as Afro-American Studies CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

114A. Early Art of India. (4) Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts.

114C. Japanese Art. (4) Lecture, three hours. Not open to freshmen. Japanese art from its beginning in prehistory through the 19th century. Emphasis on development of Buddhist art and its relationship with the culture.

114D. Later Art of India. (4) Lecture, three hours. Not open to freshmen. Survey of Indian art from the 10th to 19th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/NP or letter grading.

114E. Arts of Korea. (4) Lecture, three hours. Art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting.

114F. Arts of Southeast Asia. (4) Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

C115A. Advanced Indian Art. (4) Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257.

C115B. Advanced Chinese Art. (4) Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C258.

C115C. Advanced Japanese Art. (4) Lecture, three hours. Requisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C259.

C115D. Art and Material Culture, Neolithic to 210 B.C. (4) Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C261A. P/NP or letter grading.

C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4) Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. Concurrently scheduled with course C261B. P/NP or letter grading.

C115F. Art and Material Culture of Late Imperial China, 906 to 1911. (4) Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). Concurrently scheduled with course C261C. P/NP or letter grading.

C117A. Pre-Columbian Art of Mexico. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A.

C117B. Pre-Columbian Art of the Maya. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C218B.

C117C. Pre-Columbian Art of the Andes. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C218C.

C117D. Aztec Art. (4) Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahuatl-speaking peoples of central Mexico in the centuries before the Spanish conquest, with emphasis on their social and historical context and major scholarly debates. Concurrently scheduled with course C218D. P/NP or letter grading.

118A. Arts of Oceania. (4) Lecture, three hours. Requisite: course 55A. Survey of arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relationships.

118C. Arts of Sub-Saharan Africa. (4) Lecture, three hours. Survey, with emphasis on sculpture, of selected traditions within a style-region framework.

118D. Arts of Native North America. (4) Lecture, three hours. Requisite: course 55A. Survey of painting, sculpture, and other arts from the Eskimo to peoples of the Caribbean and Southwestern U.S.

118E. Advanced Studies in Non-Western Art. (4) Lecture, three hours. Requisite: course 118A or 118C or 118D. Selected topics in arts of non-Western peoples which reflect interests of individual regular and visiting faculty members. P/NP or letter grading.

C119A. Advanced Studies in African Art: Western Africa. (4) Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

C119B. Advanced Studies in African Art: Central Africa. (4) Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C216B.

127. Undergraduate Seminar. (4) Seminar, three hours. Designed for juniors/seniors. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice.

C150A. Contemporary Art, 1940s to 1950s. (4) Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe, covering abstract expressionism to pop art. Concurrently scheduled with course C250A. P/NP or letter grading.

C150B. Contemporary Art, 1960s to 1970s. (4) Lecture, three hours. Requisite: course 54. Study of ambitions and contexts of pop art, minimalism, conceptual art, feminist art, performance, land art, and more. Concurrently scheduled with course C250B. P/NP or letter grading.

C150C. Contemporary Art, 1980s to the Present. (4) Lecture, three hours. Requisite: course 54. Study of politics of representation at end of the century, covering dominant strategies and trends in postmodernist art. Concurrently scheduled with course C250C. P/NP or letter grading.

150D. Selected Topics in Contemporary Art. (4) (Formerly numbered 110D.) Lecture, three hours. Requisite: course 54. Changing topics in contemporary art (post-1945) which reflect interests of individual regular and/or visiting faculty members. May be repeated once for credit. P/NP or letter grading.

195A-195B. Departmental Honors Courses. (4) Preparation: completion of minimum of four upper division art history courses with 3.5 departmental grade-point average and overall 3.0 grade-point average. Limited to junior/senior Art History and History/Art History majors. Two-term independent research project under supervision of an appropriate faculty member, culminating in departmental honors thesis of approximately 30 pages. In Progress grading.

197. Honors Course. (4) Hours to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. Eight units may be applied toward the major. P/NP or letter grading.

Graduate Courses

200. Art Historical Theories and Methodologies. (4) Discussion, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present. May be repeated for credit with consent of adviser.

201. Topics in Historiography of Art History. (4) Discussion, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or the work of one or more authors. May be repeated for credit with consent of adviser.

202. Topics in Theory and Criticism in Art History. (4) Discussion, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies either within or across historical and cultural areas. May be repeated for credit with consent of adviser.

C203A-C203B. Museum Studies. (4) (Formerly numbered 203.) Lecture, three hours; demonstrations/field trips. May be repeated for credit with consent of adviser. Concurrently scheduled with courses C103A-C103B. In Progress and S/U or letter grading.

C203A. Introduction to historical evolution of museums and museology, theories and methods of their operations, historical and critical relationships between museology, art history, and new technologies for archiving and exhibiting artifacts and historical materials. **C203B.** Lectures and discussions organized to foster active critical engagement with museum policies, operations, and productions involving focused study and on-site research on particular museum institutions and exhibitions.

C203C. Museum Studies Practicum. (2 to 4) Lecture, three hours. Requisites: courses C203A-C203B. On-site examination and discussion of selected artworks, exhibitions, and associated published and distributed materials, and of museum and gallery institutions, practices, and policies. Concurrently scheduled with course C103C. Letter grading.

203D. Selected Topics in Museum Studies. (4) Discussion, three hours. Changing topics in museological, curatorial, and exhibition practices which reflect interests of regular and visiting faculty members. S/U or letter grading.

204. Restoration, Preservation, and Conservation. (4) Seminar, two hours. May not be repeated.

205. Studies in Prints. (4) Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

206. Studies in Drawings. (4) Seminar, two hours. Critical studies in history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

210. Egyptian Art. (4) Seminar, two hours. Requisites: courses 101A, 101B, M102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures. May be repeated for credit with consent of adviser.

211. Topics in Aegean Art. (4) Seminar, two hours. Requisites: courses M102A, M102B. Art and architecture of Aegean Bronze Age (3000 to 1000 B.C.). Monuments or theoretical problems related to art and culture of Crete, Greece, the Cyclades, or Western Anatolia. May be repeated for credit with consent of adviser.

C212A. American Art before the Civil War. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112A.

C212B. American Art in the Gilded Age, 1860 to 1900. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112B.

C212C. American Art, 1900 to 1945. (4) Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112C. S/U or letter grading.

CM212D. African American Art. (4) (Same as Afro-American Studies CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. May be repeated for credit with consent of adviser. Concurrently scheduled with course CM112D. S/U or letter grading.

213. Advanced Studies in Islamic Art. (4) Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from the 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser.

C214. Problems in Islamic Art. (4) Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser. Concurrently scheduled with course C104C.

C216A. Advanced Studies in African Art: Western Africa. (4) Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119A.

C216B. Advanced Studies in African Art: Central Africa. (4) Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119B.

217. Primitivism and Art. (4) Lecture, three hours. History of primitivism in visual arts and its institutional base from ancient Greece to the present, with emphasis on relevance to contemporary issues, critiques, and theory. May be repeated for credit with consent of adviser. S/U or letter grading.

C218A. Pre-Columbian Art of Mexico. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117A.

C218B. Pre-Columbian Art of the Maya. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117B.

C218C. Pre-Columbian Art of the Andes. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117C.

C218D. Aztec Art. (4) Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahuatl-speaking peoples of central Mexico in the centuries before the Spanish conquest, with emphasis on their social and historical context and major scholarly debates. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117D. S/U or letter grading.

219A. Oceanic Art. (4) Discussion, two hours. Studies in selected topics in the art of Pacific islands. May be repeated for credit with consent of adviser.

219B. Pre-Columbian Art. (4) Discussion, two hours. Studies in selected topics in art of pre-Hispanic Latin America. May be repeated for credit with consent of adviser.

219C. African Art. (4) Discussion, two hours. Studies in selected topics in art of sub-Saharan Africa. May be repeated for credit with consent of adviser.

219D. Native North American Art. (4) Discussion, two hours. Studies in selected topics in art of the American Indian. May be repeated for credit with consent of adviser.

220. Oceanic, Pre-Columbian, African, and Native North American Art. (4) Discussion, two hours. Studies in selected topics comparing arts of Oceania, Africa, and pre-Columbian and Native North America. May be repeated for credit with consent of adviser.

221. Topics in Classical Art. (4) Lecture, two to three hours. Studies in Parthian art. Site-by-site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during period of Greek and Parthian control. May be repeated for credit with consent of adviser.

223. Classical Art. (4) Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or artistic media. May be repeated for credit with consent of adviser.

225. Medieval Art. (4) Seminar, two hours. Studies in selected topics in Byzantine and European medieval art. May be repeated for credit with consent of adviser.

226A-226B. Medieval Art and Architecture. (4) Studies in selected topics in Byzantine and European medieval art. Seminar extends over two consecutive terms. May be repeated for credit with consent of adviser. In Progress grading.

229. Renaissance and Baroque Paleography. (4) Seminar. Preparation: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions. May be repeated for credit with consent of adviser.

230. Italian Renaissance Art. (4) Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser.

231. Leonardo and Renaissance Theory of Art. (4) Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser.

235. Northern Renaissance Art. (4) Seminar, two hours. Preparation: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. May be repeated for credit with consent of adviser.

240. Baroque Art. (4) Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus. May be repeated for credit with consent of adviser.

M241A-M241B. Seminars: Modern European History. (4) (Same as History M230A-M230B.) Seminar, three hours. May be repeated for credit with consent of adviser. In Progress and S/U or letter grading.

244. Topics in European Art from 1700 to 1900. (4) Lecture, two to three hours. May be repeated for credit with consent of adviser.

245. European Art from 1700 to 1900. (4) Seminar, two hours. May be repeated for credit with consent of adviser.

246. Art and Architecture of Georgian England. (4) Seminar, two hours. May be repeated for credit with consent of adviser.

C250A. Contemporary Art, 1940s to 1950s. (4) Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe, covering abstract expressionism to pop art. Concurrently scheduled with course C150A. S/U or letter grading.

C250B. Contemporary Art, 1960s to 1970s. (4) Lecture, three hours. Requisite: course 54. Study of ambitions and contexts of pop art, minimalism, conceptual art, feminist art, performance, land art, and more. Concurrently scheduled with course C150B. S/U or letter grading.

C250C. Contemporary Art, 1980s to the Present. (4) Lecture, three hours. Requisite: course 54. Study of politics of representation at end of the century, covering dominant strategies and trends in postmodernist art. Concurrently scheduled with course C150C. S/U or letter grading.

251. Contemporary Art. (4) Discussion, three hours. Selected topics in contemporary art, criticism, and theory. S/U or letter grading.

253. Modern Art. (4) Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) which reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times. May be repeated for credit with consent of adviser.

C254. Latin American Art of the 20th Century. (4) Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. May be repeated for credit with consent of adviser. Concurrently scheduled with course C110H. S/U or letter grading.

255. American Art. (4) Seminar, two hours. Requisite: course C112A or C112B or C112C, depending on topic. Topics in American art from Colonial period to the present. Discussion of weekly readings, student oral presentations, and papers. May be repeated for credit with consent of adviser.

C257. Advanced Indian Art. (4) Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115A.

C258. Advanced Chinese Art. (4) Lecture, three hours. Study in Chinese painting and sculpture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115B.

C259. Advanced Japanese Art. (4) Lecture, three hours. Requisite: course 114C. Study in Japanese painting and sculpture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115C.

260A. Indian Art. (4) Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. May be repeated for credit with consent of adviser. S/U or letter grading.

260B. Chinese Art. (4) Lecture, two hours. Advanced studies in secular and religious artistic traditions of China. May be repeated for credit with consent of adviser. S/U or letter grading.

260C. Japanese Art. (4) Lecture, two hours. Advanced studies in secular and religious artistic traditions of Japan. May be repeated for credit with consent of adviser. S/U or letter grading.

C261A. Art and Material Culture, Neolithic to 210 B.C. (4) Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115D. Extensive research paper required of graduate students. S/U or letter grading.

C261B. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4) Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115E. S/U or letter grading.

C261C. Art and Material Culture of Late Imperial China, 906 to 1911. (4) Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115F. S/U or letter grading.

265. Fieldwork in Archaeology. (2 to 8) Participation in archaeological excavations or other archaeological research under supervision of the staff. May be repeated for credit with consent of adviser.

M270. Art Law. (4) (Same as Law M301.) Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distinguished guest speakers and one field trip.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Art History. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Designed for graduate students. Required of all new teaching assistants during Fall Quarter of their teaching assistant appointment. Workshop/seminar in teaching techniques and pedagogical issues, consisting of readings, discussions, and guest speakers on selected topics. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) S/U grading.

598. Research for and Preparation of M.A. Thesis. (2 to 12) S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) S/U grading.

ARTS AND ARCHITECTURE

School of the Arts and Architecture

UCLA
1100 Dickson Art Center
Box 951620
Los Angeles, CA 90095-1620

(310) 206-3564
<http://www.arts.ucla.edu>

Scope and Objectives

There is no major in arts and architecture; however, the following courses are part of the schoolwide curriculum.

Arts and Architecture

Upper Division Courses

100. Selected Topics in the Arts. (4) Lecture, four hours; discussion and/or laboratory, three hours; outside study, five hours. Selected topics in the arts explored through a variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics to be announced in advance. May be repeated for a maximum of eight units. P/NP or letter grading.

101. Aesthetics of Multimedia. (4) Lecture, three hours; laboratory, one hour; outside study, eight hours. The arts stand at expressive center of new forms of digital expression described as "multimedia." Historical roots of this new expression traced over 1,500 years of world culture as preparation for collaborative multimedia student projects.

ASIAN AMERICAN STUDIES

Interdepartmental Program College of Letters and Science

Henry Yu, Ph.D. (*History*)

Adjunct Associate Professor

Yuji Ichioka, Ph.D. (*History*)

Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian American and Pacific Island peoples in the U.S. from several disciplines. An undergraduate major leading to a B.A. degree is available for those students who wish to pursue their studies about Asian Pacific Americans in more depth, while the graduate program leads to the M.A. degree. Students enrolled in an organized undergraduate major other than Asian American Studies may pursue a minor in the field.

A major goal of the program is to communicate the experiences of Asian Pacific Americans as an ethnic group. Courses examine the important issues and concerns of Asian Pacific Americans, including their history, social organization, and culture.

Undergraduate Study

Asian American Studies B.A.

The B.A. program in Asian American Studies provides a general introduction for students who anticipate advanced work at the graduate level or careers in research, public service, and community work related to Asian Pacific Americans. An overall grade-point average of 2.0 is required for admission to the major.

Preparation for the Major

Required: Asian American Studies 21 or Social Sciences 20.

The Major

Required: A total of 14 upper division courses, including Asian American Studies 100A-100B, one research methods course, two Asian American theme courses, two courses with focus on an Asian Pacific American subgroup, two ethnic/race/gender relations courses, two courses on Asian or an Asian Pacific subgroup's history/culture/social or political institutions, and three elective courses selected from Asian American studies or the approved list of interdepartmental courses. At least seven of

the courses taken for the major must be from the approved list of interdepartmental courses (available in the program office each term).

Students must also demonstrate proficiency equivalent to the completion of a one-year course of study in an Asian language prior to graduation.

No more than eight units of course 199 may be applied toward the major.

All courses applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must maintain an overall grade-point average of 2.0 in all courses.

Asian American Studies Minor

The Asian American Studies minor is designed for students who wish to gain understanding of and competence in Asian American studies.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the program counselor, Asian American Studies Center, 3230 Campbell Hall.

Required Upper Division Courses (28 units): Asian American Studies 100A-100B; one Asian American theme course selected from M110, M112A, M112B, 113, 115, M117, M119, M123, M129A, M163, 196, 197A through 197Z, 199; one course with focus on an Asian Pacific American subgroup selected from 130A through 130E, M132A, M132B, M153, M154, 171A through 171E, 196, 197A through 197Z, 199; and three Asian American studies elective courses. No more than four units of course 199 may be applied toward the minor, and only courses in Asian American studies or those multiple-listed with the program may be taken to fulfill requirements for the minor.

All minor courses must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Asian American Studies Specialization

The specialization in Asian American Studies was discontinued effective Winter Quarter 1998. Students currently participating in this program (1) must complete both a departmental major and the Asian American studies specialization by Winter Quarter 2000 or (2) may modify their programs to fit the minor requirements.

Students must take Asian American Studies 100A-100B, one Asian American theme course, one course with focus on an Asian American subgroup, and two Asian American studies elective courses. No more than four units of course 199 may be applied toward the specialization.

All courses applied toward the specialization must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must maintain an overall grade-point average of 2.0 in all courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

In addition to the University's minimum requirements, applicants for the Master of Arts program in Asian American Studies are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the program as part of the application. Three letters of recommendation are also required.

Areas of Study

Since the Asian American Studies program is interdepartmental, its major fields are determined by the participating faculty from various departments.

Course Requirements

A total of 11 graduate and upper division courses is required for the degree. Of that number, seven must be graduate level (200 or 500 series). Three of the graduate courses must be selected from Anthropology 231, Education 204D, 253G, English M260A, History 201H, 245, Law M315, Sociology 235, 261, 263.

The remaining four of the minimum 11 courses must be approved by the faculty adviser. These four courses, three of which may be upper division, should be selected to give the student additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the 11 courses; only one of the two may be applied toward the required seven graduate courses.

Comprehensive Examination Plan

The M.A. degree may be completed through a written comprehensive examination. The written examination is administered by a committee consisting of at least three faculty members appointed annually by the administrative head of the interdepartmental program in Asian

American Studies. The examination is based on an annually updated "Approved List of Core Works in Asian American Studies," a collection of books, novels, articles, and reports in the field of Asian American studies. The examination is normally offered during the break between Winter and Spring Quarters. Students must notify the administrative head of the interdepartmental program of their intention to take the written examination at least one academic quarter before it is administered. Students are given two chances to pass the examination. Academic credit for examination preparation is given through Asian American Studies 596.

Thesis Plan

Plan A (Thesis). The thesis is intended to provide the opportunity for independent scholarly research on the historical and contemporary experiences of the Asian American population and should be an original contribution to the field. It should be the length and quality of a publishable journal article. A thesis committee of three faculty members is normally constituted at the beginning of the student's second year in residence in the Fall Quarter, at which time the student is expected to submit a plan of research for approval. After approval and completion of the thesis, the committee conducts an oral examination on its subject, usually in the Spring Quarter of the second year. The approved thesis must be typed and filed according to University regulations governing master's theses. Academic credit for thesis research and preparation is given through Asian American Studies 598.

Plan B (Field Research Thesis). A field research thesis is recommended for students who are interested in the practical application of what they have learned in their graduate coursework or who are intending to pursue careers with Asian American community organizations and agencies. A field research thesis committee, consisting of three faculty members (one of whom is designated as the chair) and possibly the chief administrative officer of the client community organization, meets with the student and approves the project plan at the beginning of the student's second year in residence in the Fall Quarter. The chief administrative officer of the client community organization may either be appointed as an additional member of the committee, in which case the officer would be expected to read and sign the thesis as the fourth member, or serve as an unofficial and unappointed consultant for the student, in which case the officer would not sign the thesis. After the thesis is completed, the committee conducts an oral examination on the written report of the thesis, usually in the Spring Quarter of the student's second year. The approved thesis report must be typed and filed according to University regulations governing master's theses. Academic credit for field research is given through course 596 or 598.

Asian American Studies

Lower Division Courses

21. Asians and Pacific Islanders in American Society. (4) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and cultures of Asians and Pacific Islanders in the U.S. Topics include origins and history of migration to the U.S., social movements, ethnic images in literature and art, communities in the U.S. and California, and their current issues. P/NP or letter grading.

99. History of Asians in America. (4) (Formerly numbered 100A.) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history of Asians and Pacific Islanders in the U.S. P/NP or letter grading.

Upper Division Courses

100. Contemporary Asian American Communities. (4) (Formerly numbered 100B.) Lecture, three hours; discussion, one hour. Multidisciplinary introduction to Asian American communities in the U.S. Topics include demographics and social, political, and economic issues. P/NP or letter grading.

101A. Field Studies Methods in Asian Pacific Communities. (4) Lecture, three hours. Preparation: one course from Asian American Studies 100 through 197Z. Development of community profiles on Asian Pacific American communities of students' choice, using various field studies techniques of data collection. P/NP or letter grading.

101B. Internships in Asian Pacific Communities. (4) Discussion, 90 minutes; fieldwork, eight hours minimum. Prerequisite: course 101A or another Asian American studies course (except 199). Integrates academic and empirical work by providing students the challenge of performing public service and community work in Asian Pacific or other multicultural communities, and of bringing their ongoing internship experiences back to classroom. P/NP grading.

103. Social Science Research Methods. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Introduction to fundamentals of conducting social research on Asian Americans, providing experience in using some research methods and exercises in evaluating nature and quality of scientific research on Asian American issues. P/NP or letter grading.

105. Asian American Historiography. (4) Seminar on exploration of how works of history are written about Asian Americans. Focus on problems of historiography and method when considering source materials related to history and experience of Asian Americans. P/NP or letter grading.

107A. Introductory Video Ethnography and Documentary Workshop. (4) (Formerly numbered 107.) Laboratory, three hours. Introduction to concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

107B. Advanced Video Ethnography and Documentary Workshop. (4) Laboratory, three hours. Prerequisite: course 107A. Advanced concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scriptwriting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems. (4) (Same as Health Services M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

M112A. Asian American Literature to 1980. (4) (Formerly numbered M112.) (Same as English M102A.) Preparation: satisfaction of Subject A requirement. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

M112B. Asian American Literature since 1980. (4) (Formerly numbered M112.) (Same as English M102B.) Preparation: satisfaction of Subject A requirement. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

113. Asian Americans and the Law. (4) Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include anti-Asian labor legislation, legal prohibitions against Asians' right to testify, Japanese relocation orders, and equal educational opportunity for Asians. P/NP or letter grading.

115. Asian American Women. (4) Lecture, three hours. Condition of Asian women in America. Topics include women in Asian American history, racial and cultural stereotypes, and contemporary issues. Methodological approaches to study of gender issues presented and evaluated. P/NP or letter grading.

M117. Asian American Personality and Mental Health. (4) (Same as Psychology M107.) Lecture, three hours. Prerequisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

M119. Asian American Aesthetics. (4) (Same as World Arts and Cultures M152.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

121B. Exploring Asian American Theater: Special Problems. (4) Study of an Asian American play; students required to compose one act based on their own experience using lessons learned in class. Exploration of scene study and acting exercises. P/NP or letter grading.

M123. Asian Pacific Americans in the U.S. Economy. (4) (Same as Economics M189.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

M129A. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4) (Formerly numbered M197.) (Same as Community Health Sciences M140.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

130A-130E. Asian American History and Experience. (4 each) Lecture, three hours. Not open to freshmen. Survey of immigration history, settlement patterns, and experiences of specific Asian American populations. Examination of historical and contemporary sociocultural, economic, and political issues as they affect formation and character of various Asian American communities. P/NP or letter grading. **130A.** Filipino American Experience; **130B.** Korean American Experience; **130C.** Vietnamese American Experience; **130D.** Japanese American History; **130E.** Chinese American Experience.

131A. Filipino American Community and Family. (4) Lecture, three hours; discussion, one hour. Prerequisite: course 130A. Introduction to Filipino American families and communities. Examination of interaction of Filipino American families and the larger social and political environment. P/NP or letter grading.

M132A. Korean American Literature. (4) (Same as Comparative Literature M168.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

M132B. Chinese Immigrant Literature and Film. (4) (Same as Chinese M153 and Comparative Literature M171.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

M133. Indian Identity in the U.S. and the Diaspora. (4) (Same as History M189B.) Lecture, three hours. Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

135A. Asian Pacific American Communities in Hawaii: Critical Issues Past and Present. (4) Lecture, four hours. Through perspectives of history, economy, politics, education, ethnicity, and critical issues in Asian and Pacific Islander communities, study of Hawaii as a model for multiculturalism. Selected guest lectures by prominent Hawaii residents. Interaction with faculty and students at University of Hawaii. Field trips. Given in Hawaii. P/NP or letter grading.

135B. Asian Pacific Communities in Hawaii: Field Studies. (4) Lecture, one hour; discussion, three hours; internship, 10 hours minimum. Prerequisite or co-requisite: course 135A. Participation in academic internships (minimum 50 hours) in social service, cultural, political, educational, and community organizations to gain experiential learning experience in Hawaii's multicultural society. Given in Hawaii. P/NP or letter grading.

M153. The U.S. and the Philippines. (4) (Same as History M153.) Lecture, three hours. Recommended preparation: History 190A-190B, 190C. Designed for juniors/seniors. Examination of complex interrelationship between U.S. colonialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in the 20th century.

M154. Chinese Immigration. (4) (Same as Sociology M153.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

M163. Investigative Journalism and Communities of Color. (4) (Same as Afro-American Studies M195.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverage.

171A-171E. Critical Issues in U.S.-Asia Relations. (4 each) Lecture/seminar, three hours. Not open to freshmen. Critical examination of U.S. involvement in specific Asian countries, including study of historical, cultural, political, and socioeconomic factors that shape relations between Asia and the U.S. Examination of impact of relationships in the Pacific Rim and Asian Americans and their communities. P/NP or letter grading. **171A.** U.S.-Philippine Relations; **171B.** U.S.-Korea Relations; **171C.** U.S.-Vietnam Relations; **171D.** U.S.-Japan Relations; **171E.** U.S.-China Relations.

196. Seminar: Asian American Studies. (4) Seminar, three to four hours. Limited to senior Asian American Studies majors. Organized on a topics basis with readings, discussions, and papers. Consult Asian American Studies Center for topics to be offered in a specific term. P/NP or letter grading.

197A-197Z. Topics in Asian American Studies. (4 each) Lecture, three to four hours. Limited to juniors/seniors. Variable topics in Asian American studies on selected issues in education, literature, social process, public policy, and economic development. P/NP or letter grading:

M197C. Topics in Asian American Literature. (Same as English M197C.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

M197H. Culture, Media, and Los Angeles (6 units). (Same as Afro-American Studies M102 and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality.

199. Special Topics in Asian American Studies. (2 to 4) Requisite: course 100A or 100B or comparable knowledge in Asian American studies. Limited to juniors/seniors. Special individual studies on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies. (4) Designed for graduate students. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues.

200B. Critical Issues in Asian American Communities. (4) Lecture, three hours. Designed for graduate students. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns.

200C. Critical Issues in Asian American Studies. (4) Lecture, three hours. Designed for graduate students. Critical review of research methods, strategies, and philosophies in Asian American studies.

203. Asian American Research Methods. (4) Seminar, three hours. Introduction to empirical research methods, stressing uses and relevancy in research with ethnic minority populations. Review of characteristics and logical processes of research and applicability of scientific and scholarly inquiry in advancing knowledge. S/U or letter grading.

M239. Race and Ethnicity as a Concept in Practice and Research. (4) (Same as Community Health Sciences M239.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

M261. Theorizing the Third World. (4) (Same as Comparative Literature M274.) Seminar, three hours; outside study, nine hours. Investigation of politics of power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

M290Q. Social Welfare Policy in Asian American Communities. (4) (Same as Social Welfare M290Q.) Seminar, three hours. Overview of social welfare policy in Asian American communities. Introduction to major social welfare policies and programs in the U.S. and impact on Asian American communities. Policy development, approaches, processes of implementation, evaluation, and strategies to effect policy. S/U or letter grading.

M297A-297Z. Topics in Asian American Studies. (4 each) Designed for graduate students. Selected topics in Asian American studies:

M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit.

297B. Asian Migration to the U.S. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

297C. Urbanization in Asia — Policy Issues and Problems. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

M297D. Asian Americans and Legal Ideology. (Same as Law M315.) Exploration of Asian American experience as it relates to American legal system, considering both dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (2) Lecture, one hour; discussion, one hour. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Hours to be arranged.

598. Research for and Preparation of M.A. Thesis. (2 to 8) Preparation of research data and writing of M.A. thesis. S/U grading.

Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, depredations caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts and climate change, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Undergraduate Study

Atmospheric, Oceanic, and Environmental Sciences B.S.

Preparation for the Major

Required: Atmospheric Sciences 2, 3, 6, 10; Chemistry and Biochemistry 20A; Mathematics 3A, 3B, and 3C, or 31A, 31B, 32A, 32B, 33A, and 33B; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4AL, 4BL; Program in Computing 3 or 10A.

To be admitted as Atmospheric, Oceanic, and Environmental Sciences majors, **transfer students** should have completed one year of calculus and one year of calculus-based physics with laboratory, with grades of C or better.

The Major

Required: Atmospheric Sciences 101, 102, 103, 104, three additional upper division atmospheric sciences courses selected in consultation with the undergraduate advisers, and two courses from a list of chemistry, mathematics, and physics courses selected in consultation with the undergraduate advisers.

Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 20B, 103, Mathematics 115A, 135A, 136, Physics 131, 132; students preparing for graduate studies in upper atmosphere and space physics should take Mathematics 115A, 135A, Physics 110A, 110B, M122; students preparing for graduate studies in atmospheric dynamics and physics should take Atmospheric Sciences 101, CM120, C125, Mathematics 115A, 135A, 136, Physics 131, 132.

Atmospheric and Oceanic Sciences Minor

The Atmospheric and Oceanic Sciences minor provides a formal vehicle for students specializing in other science fields to pursue interests in the atmospheric and oceanic environment. It is designed to be flexible, recognizing that many topics in this field cross traditional disciplinary boundaries.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must make an appointment with a departmental undergraduate adviser for approval in selecting a coordinated program of courses from within the department and related disciplines. For further information, contact the department at (310) 825-1217.

Required Courses (28 units): Seven four-unit courses, including (1) three from Atmospheric Sciences 101, 102, 103, 104, C110, C115, CM120, C125, 130, M140, C145, 160, C165, C170, 180, C185 and (2) four additional courses, two of which must be upper division, from any of the above atmospheric sciences courses beyond the minimum three required or from Atmospheric Sciences 2, 3, 6, 10, 190 (must be taken twice), Chemistry and Biochemistry 103, 110A, 110B, 113A, C113B, 114, Earth and Space Sciences 15, Mathematics 115A, 115B, 132, 135A, 135B, 136, 146, M170A, 170B, Organismic Biology, Ecology, and Evolution C109, C119, 122, 123, 133, 147, 148, Physics 110A, 110B, 112, M122, 131, 132, Statistics 110A, 110B. Other relevant courses from related disciplines may be substituted with prior approval of the department.

Groups of courses relevant to specific subareas of atmospheric sciences include (1) *atmospheric chemistry*: Atmospheric Sciences 104, M140, Chemistry and Biochemistry 103, 110A, 110B, C113B, 114; (2) *atmospheric chemistry and biology*: Atmospheric Sciences 101, 104, Organismic Biology, Ecology, and Evolution C109, C119, 122, 133; (3) *atmospheric dynamics*: Atmospheric Sciences 101, 102,

C125, Physics 112, 131, 132; (4) *atmospheric dynamics and mathematical modeling*: Atmospheric Sciences 101, C125, 180, Mathematics 115A, 115B, 132, 135A, 135B, 136, 142, 146; (5) *oceanography and biology*: Atmospheric Sciences 101, 103, 104, Organismic Biology, Ecology, and Evolution C109, 123, 147, 148; (6) *upper atmosphere*: Atmospheric Sciences 101, CM120, C125, C170, Physics 110A, 110B, M122.

One course may be taken on a Passed/Not Passed basis; all other minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Atmospheric Sciences offers the Master of Arts (M.A.) degree in Atmospheric Sciences.

Admission

For the M.A. program, there are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to the Department of Atmospheric Sciences. In addition to students holding bachelors' degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Areas of Study

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

A total of nine courses must be completed in graduate status, five of which must be in the 200 or 500 series. Students must attain a grade of B (3.0) or better in one course in each

of two fields other than the field of specialization.

Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Core Courses. General core: Atmospheric Sciences C200A, C200B; dynamic and synoptic core: C201A, 201B, 201C; atmospheric physics and chemistry core: M203A, C203B, 203C; upper atmosphere and space physics core: C205A, 205B, 205C.

Atmospheric Sciences C200A is required of all students without formal background in fluid dynamics. Atmospheric Sciences C200B is required of all students without formal background in the atmospheric sciences.

Dynamic/Synoptic Specialization. Students are required to answer five questions — one from the general core, two from the dynamic/synoptic core, one from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core or, for those students with prior formal study in fluid dynamics and the atmospheric sciences, three questions from the dynamic/synoptic core and one each from the other two core groups.

Atmospheric Physics and Chemistry Specialization. Students are required to answer five questions (two questions from the combined general core and dynamic/synoptic core question alternatives, two from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core).

Upper Atmosphere and Space Physics Specialization. Students are required to answer five questions (two questions from the combined general core and dynamic/synoptic core question alternatives, one from the atmospheric physics and chemistry core, and two from the upper atmosphere and space physics core).

The special oral examination for each student is designed based on an individual list of topics selected in consultation with the graduate advisers. The list should represent the equivalent of two courses in the student's area of research specialization. The oral examination for each student is conducted by a Departmental Guidance Committee of three members, appointed by the chair of the department at the conclusion of the first year of study.

Comprehensive Examination Plan

The comprehensive examination, based on selected coursework, is conducted at the end of Fall and Spring Quarters. Grading of the examination is based on a 4.0 scale, with a 3.0 required for a pass at the M.S. level, and a 3.5 or better to continue for the Ph.D. Students are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. Students are encouraged to take the examination as soon as possible. The examination must, however, be attempted by the end of the student's first

two years of study and, if necessary, be retaken at the earliest available time.

Thesis Plan

Students who have a grade-point average of 3.5 or better may petition the department to obtain the M.S. by writing an original thesis. The petition must be received by the graduate advisers at least one year before completion of the degree (at the end of the first year of study). Provided a high academic standard in coursework is maintained, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. degree.

Doctoral Degree

Admission

For the Ph.D. degree in Atmospheric Sciences, there are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to the Department of Atmospheric Sciences. In addition to students holding bachelors' degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

For students entering the department with an M.S. degree, there are no specific course requirements other than Atmospheric Sciences 270 in which a formal seminar attended and graded by all faculty members must be presented. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background in order to help them pass the comprehensive examination.

Written and Oral Qualifying Examinations

Students who selected the M.S. comprehensive examination plan must also take an in-depth oral examination in their area of research specialization. Subsequently, a doctoral committee is appointed to conduct the University Oral Qualifying Examination on the selected dissertation topic and related areas, and the final dissertation defense which is required of all students. Each of these examinations must be passed in no more than two attempts.

Atmospheric Sciences

Lower Division Courses

1. Introduction to Weather Maps and Weather Forecasting. (4)

Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

2. Air Pollution. (4) Lecture, three hours; discussion, one hour. Causes and effects of high concentrations of pollution in the atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

2E. Air Pollution. (5) Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 2; discussion section focuses on intersection of science and policy for issues in local, regional, and global air pollution; use of case-study approach and participation of experts from social, health, and life sciences in class discussions. Letter (majors) or P/NP or letter (nonmajors) grading.

3. Introduction to the Atmospheric Environment.

(4) Lecture, three hours; discussion, one hour. Nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; ionosphere and auroras; causes of air pollution; proposed methods and status of weather modification.

3A. Introduction to the Atmospheric Environment. (5) Lecture, three hours; discussion, three hours. Enforced prerequisite: Physics 1B. Course for majors parallel to course 3; discussion section includes use of calculus. Discussion topics include atmospheric thermodynamics, extratropical synoptic-scale disturbances, atmospheric aerosol and microphysical processes, clouds and storms, radiative processes, atmospheric dynamics. Letter grading.

3E. Introduction to the Atmospheric Environment. (5) Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 3; discussion section emphasizes environmental aspects of atmospheric phenomena, with focus on scientific issues of severe weather and climate change and particular attention to those topics that are relevant to policy issues. Letter (majors) or P/NP or letter (nonmajors) grading.

4. California Weather and Climate. (4) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 3 or 3A. Sequel to course 3 dealing in greater detail with atmospheric phenomena relevant to the weather of California, and nature of weather and climate of various regions of the state. Topics include extratropical cyclones and fronts, thunderstorms, severe weather, sea and land breezes, Santa Ana winds, low-level temperature inversions, air pollution, climate change, and discussion of present weather.

5. Climates of Other Worlds. (4) Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. Elementary description of origin and evolution of atmospheres on the planets. Climates on the planets, conditions necessary for evolution of life, and its resulting effect on planetary environment.

6. Climate and Climatic Change. (4) Lecture, three hours; discussion, one hour. Introduction to physical causes of climate, classification of climate, and global distribution of climate types. Description of climate changes over time scales ranging from lifetime of Earth to el niño events. Discussion of causes of climatic change (e.g., long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in Earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO_x and nuclear war). State of the art in modeling and predicting climate.

6A. Climate and Climatic Change. (5) Lecture, three hours; discussion, three hours. Enforced prerequisite: Physics 1B. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Letter grading.

6E. Climate and Climatic Change. (5) Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 6; discussion section places scientific and technological aspects of climate and climate change in context of societal impacts of climate variations. Discussion of modern methods used to predict climate change and their impact. Letter (majors) or P/NP or letter (nonmajors) grading.

8. Clouds, Rain, and Storms. (4) Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

10. Introduction to the Earth System. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Overview of Earth as a system of distinct, yet connected, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Effects of biological processes in shaping the physical environment. Mechanisms that drive climate of Earth and that have produced a protective ozone shield around the planet. Exploration of possibility of technological solutions to global pollution problems.

88. Lower Division Seminar. (4) Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

101. Fundamentals of Atmospheric Dynamics and Thermodynamics. (5) (Formerly numbered 104A, 104B, C142.) Lecture, four hours; discussion, one hour. Prerequisites: Mathematics 3B or 31B, Physics 1B or 6B. Recommended: course 3. Introduction to atmospheric environment, with emphasis on thermodynamics, dynamics, and structure of atmosphere. Laws of thermodynamics; work, heat, and cyclic processes. Adiabatic processes, moisture, and atmospheric stability. Hydrostatic balance. Fundamental equations of motion, with applications to atmospheric flow. Circulation and vorticity. Letter grading.

102. Climate Change and Climate Modeling. (4) Lecture, three hours. Prerequisites: Mathematics 3C or 32A, Physics 1C or 6C. Global environmental issues in climate change due to human activities or natural climate variations. Quantitative introduction to new science of climate modeling to understand and predict these changes. Heat balance of Earth and Greenhouse effect. Physical processes in climate system. Atmospheric and oceanic circulation. El Niño and year-to-year climate prediction. P/NP or letter grading.

103. Physical Oceanography. (4) (Formerly numbered 143.) Lecture, three hours; discussion, one hour. Requisite: Mathematics 3B or 31B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Observations of temperature, salinity, density, and currents. Methods. Wind-driven and geostrophic currents. California Current and Gulf Stream. Internal waves. Surface waves and tides. Air/sea interactions. Coastal upwelling. Biological/physical interactions. El Niño. Role of ocean in climate and global change. Santa Monica Bay field trip. Letter grading.

104. Fundamentals of Air and Water Pollution. (4) (Formerly numbered 2A, 144.) Lecture, three hours; discussion, one hour. Requisite: Chemistry 20B. Chemistry and physics of air and water pollution, including photochemistry, acid rain, air pollution meteorology and dispersion, groundwater and surface water pollution, chemical cycling, air/water interface, global atmospheric change. Letter grading.

C110. Advanced Dynamic and Synoptic Meteorology. (6) (Formerly numbered 104C, C105.) Laboratory, six hours. Requisite: course 101. Weather map analysis, thermodynamic diagrams, satellite interpretation, severe weather forecasting, isentropic analysis, frontogenesis, quasi-geostrophic omega equation. Concurrently scheduled with course C227. P/NP or letter grading.

C115. Mesometeorology. (4) Lecture, three hours. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. Concurrently scheduled with course C228. P/NP or letter grading.

CM120. Introduction to Fluid Dynamics. (4) (Formerly numbered CM140.) (Same as Earth and Space Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course C200A. Letter grading.

C125. Introduction to Geophysical Fluid Dynamics. (4) (Formerly numbered C141.) Lecture, three hours. Requisite: Physics 131. Recommended: course CM120. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C201A. Letter grading.

130. Circulation of Santa Monica Basin. (4) (Formerly numbered 147.) Lecture, four hours. Requisite: course 103. Design and construction of physical oceanographic measurement program to describe large-scale geostrophic circulation in Santa Monica Basin, which has depths as large as 1,000 meters and extends 50 kilometers offshore from Los Angeles. Letter grading.

M140. Environmental Chemistry Laboratory. (4) (Formerly numbered M151.) (Same as Chemistry M104.) Lecture, two hours; laboratory, three hours. Requisite: Chemistry 20B. Laboratory experience for students who wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment. P/NP or letter grading.

C145. Microphysics of Clouds, Precipitation, and Aerosols. (4) (Formerly numbered C152.) Lecture, three hours; discussion, one hour. Requisites: Physics 1A, 1B, and 1C, or 6A and 6B. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol processes — formation, diffusion, sedimentation, condensation; precipitation; and thunderstorms. Concurrently scheduled with course C203B. Letter grading.

160. Remote Sensing of the Environment. (4) (Formerly numbered 146.) Lecture, three hours. Requisite: Physics 1C or 6B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Introduction to properties of radiation in the atmosphere and principles of active and passive remote sensing of atmospheres and surfaces as it applies to monitoring of Earth's environment and global change. Letter grading.

C165. Atmospheric Radiation. (4) Lecture, three hours. Requisite: Physics 1C or 6B. Principles of radiative transfer. Absorption, emission, and scattering processes. Transfer of solar and thermal infrared radiation in the atmosphere. Radiation and climate. Radiation and ozone formation. Applications of radiation principles to remote sensing. Concurrently scheduled with course C203C. Letter grading.

C170. Introduction to Solar System Plasmas. (4) (Formerly numbered C154.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 33A, Physics 1C. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C205A. Letter grading.

180. Numerical Methods in Atmospheric Sciences. (4) (Formerly numbered 161.) Lecture, three hours; discussion, one hour. Preparation: one course in C or FORTRAN programming. Requisite: Mathematics 33B. Survey of numerical methods employed in atmospheric and related sciences: theory, application, and programming. Letter grading.

C185. Statistics in Atmospheric Sciences. (4) (Formerly numbered C162.) Lecture, three hours; discussion, one hour. Requisite: Mathematics M170A or Statistics M100A. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C213. P/NP or letter grading.

190. Operational Meteorology. (2) (Formerly numbered 198.) Laboratory, six hours. Requisite: course C110. Limited to junior/senior atmospheric sciences majors. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Letter grading.

195. Senior Paper. (4) Limited to senior atmospheric sciences majors. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing honors thesis.

199. Special Studies in Meteorology (2 or 4). Special individual studies.

Graduate Courses

C200A. Introduction to Fluid Dynamics. (4) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course CM120. Letter grading.

C201A. Introduction to Geophysical Fluid Dynamics. (4) Lecture, three hours. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C125. Letter grading.

201B. Atmospheric Wave Motions. (4) Lecture, three hours. Requisite: course C125/C201A. Wave motions in a compressible, stratified, and rotating atmosphere. Acoustic and gravity waves, anelastic and quasi-static approximations. Kelvin/Helmholtz instability. Quasi-static oscillations of a planetary atmosphere. Quasi-geostrophic motions. Baroclinic and barotropic instabilities. Propagation of planetary waves. Letter grading.

201C. Introduction to Atmospheric Turbulence and Convection. (4) Lecture, three hours. Requisite: course C200A. Small-scale nonhydrostatic motions in the atmosphere. Introduction to turbulence and thermal convection. Planetary boundary layer, effects of moisture on atmospheric motions, theory of moist convection, cumulus convection.

M203A. Introduction to Atmospheric Chemistry. (4) (Same as Civil Engineering M262A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

C203B. Microphysics of Clouds, Precipitation, and Aerosols. (4) Lecture, three hours; discussion, one hour. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol processes — formation, diffusion, sedimentation, condensation; precipitation; and thunderstorms. Concurrently scheduled with course C145. Letter grading.

C203C. Atmospheric Radiation. (4) (Formerly numbered 203C.) Lecture, three hours. Principles of radiative transfer. Absorption, emission, and scattering processes. Transfer of solar and thermal infrared radiation in the atmosphere. Radiation and climate. Radiation and ozone formation. Applications of radiation principles to remote sensing. Concurrently scheduled with course C165. Letter grading.

C205A. Introduction to Solar System Plasmas. (4) Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C170. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

205B. Descriptive Solar-Terrestrial Physics. (4) Lecture, three hours; discussion, one hour. Solar, interplanetary, magnetospheric, ionospheric, auroral, geomagnetic phenomenological background for studies in space physics. Complements theoretical space physics courses. Contextual understanding and literacy in space physics terminology provided. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

205C. Planetary Upper Atmospheres. (4) Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites — thermospheric structure and morphology, circulations, and disturbances; ionospheres as collisional and magnetized (unmagnetized) plasmas: currents, drifts, and instabilities. Examples of upper atmospheric interaction with lower atmosphere and magnetosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Dynamic and Synoptic Meteorology

210. Dynamics of Planetary Circulations. (4) Lecture, three hours. Requisite: course 201B. Interaction between waves and mean zonal and meridional circulations. Vacillation. Regimes of thermally forced planetary circulations and their stability. Frontogenesis. Geostrophic turbulence. Forced planetary waves. Persistent anomalies of atmospheric circulation. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212A. Numerical Methods in Geophysical Fluid Dynamics. (4) Lecture, three hours. Requisite or corequisite: course C201A. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Nonlinear shallow-water equation model. Spectral methods. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212B. Numerical Modeling of the Atmosphere I. (4) Lecture, three hours. Requisites: courses 201B, 212A. Dynamics of numerical weather prediction and climate models and their computational design. Basic governing equations. Vertical and horizontal coordinates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation models. Limited-area modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212C. Numerical Modeling of the Atmosphere II. (4) Lecture, three hours. Requisite: course 201C. Formulation of physical processes in numerical weather prediction and climate models. Planetary boundary layer processes. Turbulence closure models. Condensation processes. Parameterization of moist-convective processes. Cloudiness parameterization. Parameterization of gravity wave drag. S/U grading.

C213. Statistics in Atmospheric Sciences. (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics M170A or Statistics M100A. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C185. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

214. Theoretical Climatic Dynamics. (4) Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Multiple equilibrium climates and their stability. Coupled EBMs of the atmosphere and oceans. Climatic history of our planet. Continuum mechanics of ice sheets and mantle. Oscillatory models of Quaternary glaciation cycles. Transitions from equilibrium to periodic and aperiodic climate behavior. Climatic predictability. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

215. Ocean Circulation. (4) Lecture, three hours. Requisites: courses C200A, C201A. Phenomena, theory, and modeling of ocean circulations with global to regional scope. Circulation types include thermohaline and wind-driven currents. Examination of relationships between ocean circulations and smaller-scale motions, atmospheric climate, and biogeochemical transport. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

216A. Tropical Motions with Moist Processes. (4) Lecture, three hours. Requisite: course 201C. Cumulus convection and the boundary layer in the tropics. Cloud clusters and mesoscale convection systems. Interaction of cumulus convection with large-scale environment. Tropical cyclones. Monsoon meteorology. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

216B. Wave Motions in the Tropical Atmosphere. (4) Lecture, three hours. Requisite: course 201B. Basic theory of equatorially trapped waves. Observations of tropical wave disturbances. Generation mechanisms of tropical waves. Tropical 30-50 day oscillation. Quasi-biennial and semiannual oscillations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

218. Dynamics of the Atmosphere/Ocean System. (4) Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air/sea interactions. Effects of oceans on climate. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

220. Dynamics of the Middle Atmosphere. (4) Lecture, three hours. Requisite: course C201A. Structure and composition of the middle atmosphere. Waves in the middle atmosphere, including tides, planetary waves, and gravity waves. Quasi-biennial oscillations. Stratospheric sudden warnings. Semiannual oscillations. Wave-mean flow interactions. Interactions between middle and lower atmosphere. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

221. Geophysical Turbulence. (4) Lecture, three hours. Requisites: courses C200A, C201A. Phenomena, theory, and modeling of turbulence in Earth's oceans and atmosphere — from fine structure to planetary scale motions. Regimes of turbulence include homogeneous flows in two and three dimensions, shear flows, convection, stably stratified flows, and geostrophic motions. Examination of relationships between turbulence and its transport effects on general circulations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

224A. Atmospheric Turbulence. (4) Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

M224B. Atmospheric Diffusion and Air Pollution. (4) (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C227. Advanced Dynamic and Synoptic Meteorology. (6) Laboratory, six hours. Requisite: course 101. Weather map analysis, thermodynamic diagrams, satellite interpretation, severe weather forecasting, isentropic analysis, frontogenesis, quasi-geostrophic omega equation. Concurrently scheduled with course C110. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C228. Mesometeorology. (4) (Formerly numbered 228.) Lecture, three hours. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. Concurrently scheduled with course C115. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

229. Mesoscale Modeling. (4) Lecture, three hours. Requisites: courses 201C, C228. Numerical and analytical modeling of convective and mesoscale motions, from shallow heat sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in understanding dynamic structure and behavior of systems. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Atmospheric Physics and Chemistry

230A-230B. Atmospheric Chemistry I, II. (4-4) Lecture, three hours. Requisite: course M203A. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

230A. Photochemistry of troposphere; physical chemistry of surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biogeochemical cycles; current issues in global change.

230B. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results.

232. Chemical Transport Modeling. (4) Lecture, three hours. Requisites: courses M203A, 230A-230B. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234A-234B. Cloud and Precipitation Physics I, II. (4-4) Lecture, three hours. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234A. Requisite: course C203B. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals.

234B. Requisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision.

240A. Radar Meteorology. (4) Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

240B. Remote Sensing. (4) Lecture, three hours. Requisites: courses 203C, 240A. Theory and techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surfaces and biosphere; remote sensing of planetary atmospheres. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

244. Methods of Radiative Transfer. (4) Lecture, three hours; laboratory, one hour. Requisites: courses 203C, 240B. Analytical and numerical methods of radiative transfer, pure scattering atmospheres, and Chandrasekhar's solution; discrete ordinates; n-stream representations; exponential sums; Monte Carlo techniques and three-dimensional problems; computational laboratory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Upper Atmosphere and Space Physics

250A. Solar System Magnetohydrodynamics. (4) Lecture, three hours. Requisite: course C205A. Derivation of MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

250B. Solar System Microscopic Plasma Processes. (4) Lecture, three hours. Requisite: course C205A. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

256. Ionospheric Electrodynamics. (4) Lecture, three hours. Ionospheric structure, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

257. Radiation Belt Plasma Physics. (4) Lecture, three hours. Requisite: course 250B. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for source, loss, and transport of energetic radiation belt particles. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

258. Sources and Losses of Magnetospheric Plasma. (4) Lecture, three hours. Transfer of plasma across magnetopause, sources for magnetotail, ionospheric plasma flow to magnetosphere, precipitation of magnetospheric particles, plasmasphere, and ring current. S/U or letter grading.

259. Space Weather. (4) Lecture, three hours. Identification, description, and theories for major disturbances in magnetosphere/ionosphere/thermosphere system. Storms, substorms, convection bays, and other disturbances. Connections to interplanetary conditions, particle injection and precipitation, currents and fields. S/U or letter grading.

Special Studies

270. Seminar: Atmospheric Sciences. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar: Atmospheric Dynamics. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

M272A-M272B-M272C. Seminars: Climate Dynamics (2 to 4 each). (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

273. Seminar: Atmospheric Physics. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar: Atmospheric Chemistry. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

M275A-M275B-M275C. Seminars: Space Physics. (2 each) (Same as Earth and Space Sciences M288A-M288B-M288C.) Seminar, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U or letter grading.

276. Seminar: Mesoscale Processes. (2) Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

281. Special Topics in Dynamic Meteorology. (2 to 4) Individual meetings with instructor to be arranged. Content varies from year to year. S/U or letter grading.

283. Special Topics in Atmospheric Physics. (2 to 4) Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry. (2 to 4) Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations. (2 to 4) Individual meetings with instructor to be arranged. Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

296A-296K. Advanced Topics in Atmospheric Sciences. (2 each) Advanced study and analysis of current topics in atmospheric sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U or letter grading.

296A. Numerical Modeling of the Atmosphere.

296B. Synoptic and Mesoscale Meteorology.

296C. Numerical Mesoscale Modeling.

296D. Climate Dynamics.

296E. Numerical Modeling of the Atmosphere and Ocean.

296F. Hierarchical Modeling of Ocean/Atmosphere System.

296G. Upper Atmosphere and Space Physics.

296H. Recent Advances in Atmospheric Chemistry.

296I. Upper Atmospheric Dynamics.

296J. Experimental Mesoscale Meteorology.

296K. Tropical Meteorology.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U or letter grading.

596. Directed Studies for Graduate Students. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

597. Preparation for Comprehensive Examinations. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

598. Research and Preparation of M.S. Thesis. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

599. Research for Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

Scope and Objectives

The biological chemistry graduate program prepares students for careers as independent research scientists and scholars. Laboratory research is the central element. Biological chemistry has grown to include studies of cellular, molecular, and developmental biology, molecular genetics and genetic engineering, and many aspects of the health sciences. The research activities of the department include these areas as well as the "classic" topics of metabolism, enzymology, and biomolecular structure. Courses and seminar programs are designed to provide students with the necessary background and approach to encourage their continuing growth in these rapidly changing areas of science.

Interaction with other graduate programs provides access to scientists in a variety of related disciplines. Through its primary affiliation with the School of Medicine, the department is also involved in the basic education of students who will be physicians, dentists, and other health professionals. Many of these students become involved in laboratory research in the department. In part because of this breadth of experience students find careers in many aspects of basic and applied scientific research and education. The department emphasizes study for the Ph.D., but candidates for the M.S. degree may be accepted under special circumstances.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Biological Chemistry offers the Master of Science (M.S.) degree in Biological Chemistry.

Admission

The department only rarely and under special circumstances accepts students into the M.S. program.

Areas of Study

Consult the department.

Course Requirements

All graduate students must take the first-year UCLA ACCESS curriculum. See course requirements in the Doctoral Degree section below. In addition to the core course requirements, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With the consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to the program. Course 596 may be graded on an S/U or letter basis; 597 and 598 are graded S/U only.

Comprehensive Examination Plan

In general, the department prefers students to enter directly into the Ph.D. program, but if they enter the master's program, the comprehensive examination plan is preferred. Only in exceptional situations are students approved for the thesis plan. In either plan students must pass a departmental written examination. Only course requirements and the written examination are needed to complete the comprehensive examination plan.

Thesis Plan

In addition to coursework, a written thesis is required. A thesis committee helps students plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is

appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Doctoral Degree

Admission

Students are admitted to the program leading to the Ph.D. degree in Biological Chemistry through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. In addition, under special circumstances, the department may admit students directly to the program in the first year. Application materials may be obtained from the UCLA ACCESS Program Office, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

M.D./Ph.D. Program. Applicants may apply for the M.D./Ph.D. program by making simultaneous applications for graduate status in the Biological Chemistry Department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

Students are required to take four didactic courses: Biological Chemistry CM248, CM253, and Neurobiology M209A or Biological Chemistry CM267 or Microbiology and Immunology M229, and one additional four- to six-unit graduate-level course selected according to the student's preference. Three of these courses are taken in the first year as part of the ACCESS program, which also requires two three-unit seminar courses and Molecular, Cell, and Developmental Biology M201.

First-year students must arrange for at least three rotations in the laboratories of different faculty members to help in the selection of a research adviser through UCLA ACCESS.

After the first year, students spend most of their time on dissertation research. In addition to the general course requirements listed above, Ph.D. students are expected to complete Biological Chemistry 596, 597, and/or 599 during quarters in which research (596, 599) or study for written or oral examinations (597) is part of the program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

Written and Oral Qualifying Examinations

A satisfactory performance in rotations and the first-year courses as judged by the graduate student guidance committee and department faculty is required before students can select their doctoral committee.

The University Oral Qualifying Examination, which must be passed before students can be advanced to candidacy, is administered by a doctoral committee of four faculty members.

The purpose is to evaluate students' ability to formulate and defend two short research proposals. The proposals are submitted in a written form and defended orally. One proposal is an original research proposal that is not directly related to the dissertation research. This also fulfills the requirements for the written examination. The other proposal should discuss the proposed dissertation research. The doctoral committee determines whether students pass the examination and whether reexamination is allowed in case of failure. The examination may be repeated only once. The University Oral Qualifying Examination should be completed before the beginning of the third year of graduate work.

Biological Chemistry

Upper Division Courses

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

M140. Cell Biology: Cell Cycle. (5) (Same as Molecular, Cell, and Developmental Biology M140.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A and 14B/14BL, or 20 series, Life Sciences 3, 4. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion.

CM153G. Macromolecular Structure. (6) (Same as Chemistry CM153G and Human Genetics CM153G.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

CM159A. Mechanisms in Regulation of Transcription I. (2) (Same as Chemistry CM159A.) First five weeks. Lecture, four hours; outside study, two hours. Requisites: Chemistry 153B, 154. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

CM159B. Mechanisms in Regulation of Transcription II. (2) (Same as Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

CM169. Cell Structure, Signaling, and Differentiation. (6) (Same as Human Genetics CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM267. Letter grading.

CM178. Molecular Genetics. (6) (Same as Human Genetics CM178 and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

195. Current Research in Biological Chemistry. (2) Limited to juniors/seniors. Personal interview required. Readings, discussion of current research results, and presentation of recent literature on topics under investigation within a research group in biological chemistry. P/NP or letter grading.

199. Directed Individual Research Studies in Biological Chemistry. (2 to 8) Laboratory, four to 20 hours. Preparation: submission of written research proposal and consultation with instructor. Limited to juniors/seniors. Individual research projects carried out under direction of a faculty member. P/NP or letter grading.

Graduate Courses

201A-201B. Biological Chemistry (5 each). Preparation: organic chemistry. Open to nonmedical students with consent of instructor. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress and S/U grading.

204. Human Biological Chemistry and Nutrition Laboratory. (3) Laboratory, four hours. Open to nonmedical students with consent of instructor. Experiments illustrating techniques and procedures in medically related biochemistry and nutrition, analysis of experimental results. S/U or letter grading.

205. Biological Chemistry and Nutrition Lecture (Dental Students). (6) Lecture, six hours; computer laboratory. Designed for dental students. Biochemical and genetic factors influencing normal and disease states: structure and metabolism of cellular constituents, intermediary metabolism and its regulation, endocrine and neurobiochemical mechanisms, connective tissue/mineralization. Includes computer laboratory and self-instruction on dietary assessment in dentistry.

220A-220B-220C. Research Laboratory Rotations (2 to 8 each). Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U grading.

M221. Cellular and Molecular Neurochemistry. (4) (Same as Neurobiology M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

M223. Membrane Molecular Biology. (4) (Same as Physiology M223.) Lecture, two hours; discussion, two hours. Requisite: course CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

M234. Genetic Control of Development. (4) (Same as Molecular, Cell, and Developmental Biology M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

M237. Molecular and Cellular Foundations of Disease. (4) (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

CM248. Molecular Genetics. (6) (Same as Human Genetics CM248, Microbiology M248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: course CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

251A-251B-251C. Seminars: Transcriptional Regulation. (2 each) Advanced courses on mechanics of gene transcription in both eukaryotes and prokaryotes intended for students actively working or highly interested in transcription. S/U grading.

CM253. Macromolecular Structure. (6) (Same as Chemistry CM253 and Human Genetics CM253.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

M255. Biological Catalysis. (4) (Same as Chemistry CM255, Molecular, Cell, and Developmental Biology CM252, and Pharmacology M255.) Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

M257. Physical Chemistry of Biological Macromolecules. (2) (Same as Chemistry M257.) Requisites: Chemistry 110A, 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

CM259A. Mechanisms in Regulation of Transcription I. (2) (Same as Chemistry CM259A.) First five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM253 or CM267. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. S/U or letter grading.

CM259B. Mechanisms in Regulation of Transcription II. (2) (Same as Chemistry CM259B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B. S/U or letter grading.

M263. Metabolism and Its Regulation. (4) (Same as Chemistry M263.) Lecture, three hours. Requisites: courses 201A-201B, or Chemistry 153B, 153C, or 156, and 110A. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics. (2 each) (Same as Chemistry M264A-M264B-M264C and Microbiology M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

M266A-M266B-M266C. Seminars: Molecular Embryology. (2 each) (Same as Molecular, Cell, and Developmental Biology M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

CM267. Cell Structure, Signaling, and Differentiation. (6) (Same as Chemistry M267, Human Genetics CM267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study and Research. (2 to 12) Hours to be arranged. S/U grading.

597. Preparation for Examinations. (2 to 4) Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

598. Preparation of M.S. Thesis. (4) Preparation of research data and writing of M.S. thesis. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) Preparation of research data and writing of Ph.D. dissertation. S/U grading.

Alan B. Forsythe, Ph.D.

Adjunct Associate Professors

Eli Engel, M.D., Ph.D.

Karim F. Hirji, Ph.D.

Adjunct Assistant Professor

Timothy D. Johnson, Ph.D.

Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers — such as genetics, molecular biology, oncology, pharmacology, neurosciences, and physiology — biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.

The department's orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on. The master's program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Biomathematics offers the Master of Science (M.S.) degree in Biomathematics.

Admission

High academic achievement in one scientific or mathematical field is required for admission to the M.S. program. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) are recommended. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the *Application for Graduate Admission*, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics.

Admission to the M.S. program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Areas of Study

Consult the department.

Course Requirements

Master's candidates must complete five graduate-level courses in biomathematics, three of which must be chosen from Biomathematics 201, 202, 203, and 204. If any of the five courses were completed as an undergraduate, students may petition the department to count them in fulfillment of this requirement; however, in accord with Academic Senate regulations, they cannot be applied toward the minimum requirements stated below for the master's degree.

Master's candidates must complete the University minimum requirement of nine (36 units) of graduate and upper division courses taken in graduate standing, five (20 units) of which must be graduate courses. No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

Comprehensive Examination Plan

A written comprehensive examination administered by a committee consisting of at least three faculty members appointed by the chair, with approval of the advising committee chair, covers material presented in the coursework. This is usually given during the summer.

Thesis Plan

Generally, students are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advising committee, which must approve the thesis committee, as well as plans for the thesis.

Doctoral Degree

Admission

High academic achievement in one scientific or mathematical field is required for admission to the program leading to the Ph.D. degree in Biomathematics. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the *Application for Graduate Admission*, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics.

Admission to the doctoral program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Major Fields or Subdisciplines

Students must complete the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to requests from students.

Course Requirements

The following courses are required: Biomathematics 201, 202, 203, 204, and eight units from 205, 206, M207B, 208A, 220, M230.

Applied Mathematics. Five graduate courses with a grade-point average of 3.6 or better from an approved list, with two substitutions possible if especially appropriate to the student's research field. The courses should be approved in advance by the graduate advising committee. Consent may be given by the advising committee to count prior graduate courses for full or partial completion of this requirement. Pluses attached to a letter grade add .3 and minuses subtract .3. Students who take more than the minimum five courses are allowed to average their best five grades to meet the standard. At the discretion of the departmental advising committee, the grade-point standard can be relaxed if there is evidence of superior attainments in all other aspects of a student's training.

Biology. No formal requirement beyond preparation for the field of major biological emphasis.

Independent Research. Students are encouraged to take at least four units of Biomathe-

tics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As students progress, there is an increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:

Mathematics. By individual study or coursework, students should have strength at the upper division level in linear algebra, differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

Statistics. Additional training in biostatistics is highly recommended.

Computer Methods. Students must be facile programmers and acquainted with numerical methods needed for their area of research. The numerical analysis sequence in the Department of Mathematics or supervised independent study is suggested.

Biology and Biological Chemistry. A broad background is expected, from molecular to organ-system levels. This probably is provided in requirements for the field of major biological emphasis; supplemental coursework is advised, if needed.

Written and Oral Qualifying Examinations

In the summer, the department offers a written comprehensive examination to test competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three. (The brochure, *Policies for the Written Comprehensive Examinations for the Doctorate in Biomathematics*, is available from the department.)

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in the field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by the advising committee.

If a medical school's basic sciences curriculum is approved by the advising committee, a student who has completed the first two years of that curriculum at a level of academic performance acceptable for continuation to clinical training and who has passed Part I of the National Board Examinations is deemed to have met the biological sciences requirements for the doctoral degree in biomathematics.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasibility

ity of the student's proposed dissertation work. It also explores the strength and integration of the student's biomathematical, mathematical, and biological research knowledge in the intended area of research. Advancement to candidacy follows, after passing this examination.

Biomathematics

Upper Division Courses

106. Introduction to Cellular Modeling. (4) Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requirement: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Introduction to modeling cells and cell systems, including intracellular biochemical networks, applications to cancer research. How to develop one's own computer models using IMSL mathematics subroutines.

108. Introduction to Modeling in Neurobiology. (4) Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requirement: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Survey of wide variety of topics in neurobiological modeling, current neuronal modeling systems. Development of skills to formulate and program one's own studies using IMSL mathematics subroutines. P/NP or letter grading.

C108C. Introduction to Neural Networks: Modeling and Applications. (4) Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. Concurrently scheduled with course CM208C. P/NP or letter grading.

110. Elements of Biomathematics. (4) Lecture, three hours; laboratory, three hours. Preparation: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology.

M153A-M153B. Regression Analysis (4-4). (Same as Biostatistics M153A-M153B and Statistics M120A-M120B.) Lecture, three hours; discussion, one hour. Requirements: Mathematics 115A, Statistics 100B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

160. Introductory Biomathematics for Medical and Biological Research. (4) Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation.

170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters. (4)

Lecture, four hours; discussion, 90 minutes. Intensive elementary statistics course emphasizing design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning.

170B. Statistical and Mathematical Modeling in Medical and Biological Research. (4) Lecture, four hours; discussion, 90 minutes. Second course in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data.

172. Clinical Trials. (4) Lecture, three hours; discussion, two hours. Requirement: Biostatistics 100C or Statistics 100B. Topics include steps in bringing a possible therapy to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of prognostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management. P/NP or letter grading.

190HA-190HB. Honors Research in Biomathematics. (4-4) Limited to juniors/seniors. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for a total of at least eight units. Thesis required.

199. Special Studies in Biomathematics. (2 to 8) Limited to juniors/seniors. Special studies in biomathematics, including either reading assignments or laboratory work or both, designed for proper training of students.

Graduate Courses

200. Research Frontiers in Biomathematics. (2) Series of presentations by faculty members on research frontiers in biomathematics. S/U grading.

201. Deterministic Models in Biology. (4) Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models.

202. Fourier Analysis in Biology. (4) Preparation: knowledge of calculus, linear algebra, probability. Introduction to theory of Fourier transforms and Fourier series from point of view of generalized functions. Elementary applications to differential equations, quantum mechanics, image reconstruction, X-ray crystallography, branching processes, and time series. Brief review of computational techniques based on fast Fourier transform.

M203. Stochastic Models in Biology. (4) (Formerly numbered 203.) (Same as Human Genetics M203.) Lecture, four hours. Requirement: Mathematics M170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. S/U or letter grading.

204. Biomedical Data Analysis. (4) Quantity and quality of observations have been greatly affected by present-day extensive use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research.

205. Electric Potential Problems in Membranes, Cells, and Tissues. (4) Preparation: knowledge of differential equations and electrostatics. Review of electrostatics; potential problems in rectangular, spherical, and cylindrical coordinates; modeling sub-threshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical cells and syncytia; computation of potential barriers for ions traversing a membrane pore.

206. Introduction to Mathematical Oncology. (4) Lecture, four hours; computer laboratory, two hours. Preparation: ordinary partial differential equations, one computer programming course. Deterministic and stochastic modeling of cell metabolism, colony growth, and responses to radio-, chemo-, and immuno-therapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature review. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) (Formerly numbered 207.) (Same as Biostatistics M237A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Biostatistics M237B and Human Genetics M207B.) Lecture, two hours; laboratory, two hours. Preparation: coursework equivalent to Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

208A. Modeling in Neurobiology for Mathematicians. (4) Lecture, four hours; laboratory, two hours. Preparation: introductory ordinary partial differential equations, programming experience. Introduction to electrochemical bases for nerve function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

208B. Modeling in Neurobiology for Biologists. (4) Lecture, four hours; laboratory, two hours. Preparation: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one's own simple programs that use IMSL subroutines. Survey of current leading research areas. S/U or letter grading.

CM208C. Introduction to Neural Networks: Modeling and Applications. (4) (Same as Psychiatry M209.) Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. Concurrently scheduled with course C108C. S/U or letter grading.

211. Tissue and Cell Dynamics. (4) Lecture, three hours; discussion, one hour. Preparation: knowledge of differential equations to level of course 201, some mathematical modeling, computer programming. In-depth mathematical modeling of problems in tissue and cell dynamics to level of research literature. Analytical and numerical techniques for solving partial differential equations. S/U or letter grading.

220. Kinetic and Steady State Models in Pharmacology and Physiology. (4) Recommended preparation: knowledge of linear algebra, differential equations, statistics. Designed for biologists and theoreticians. Modeling and data analysis in pharmacokinetics, enzyme kinetics, and endocrinology. Topics include compartmental and noncompartmental approaches, steady state analysis of transport and binding processes, and optimal experiment design.

M230. Computed Tomography: Theory and Applications. (4) (Same as Biomedical Physics M230.) Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

M231. Statistical Methods for Categorical Data. (4) (Same as Biostatistics M210.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

M232. Statistical Analysis of Incomplete Data. (4) (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Requisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Applied Bayesian Inference. (4) (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: Biostatistics 115 or Statistics 100C, 200A. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

M260A-M260B. Methodology in Clinical Research I, II (6-6). (Same as Medicine M260A-M260B.) Lecture, three hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M270. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Computer Science M296B and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: Computer Science M296A. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design. S/U or letter grading.

273. Stochastic Modeling in Molecular Cellular Biophysics. (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics M170A or equivalent experience in probability, lower division physics, or physical chemistry. Most molecular systems are large collections of molecules; behavior of such a system is stochastic. Mathematical descriptions of biochemical reactions with and without energy dissipation, molecular structures, and biophysical techniques which measure various biological processes. S/U or letter grading.

M280. Statistical Computing. (4) (Same as Biostatistics M280 and Statistics M230.) Lecture, three hours. Requisites: Mathematics 115A, Statistics 100C. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

M281. Survival Analysis. (4) (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 110B, Statistics 100B. Statistical methods for analysis of survival data. S/U or letter grading.

M282. Analysis of Repeated Measures Designs. (4) (Same as Biostatistics M236.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

596. Directed Individual Study or Research in Biomathematics. (2 to 12) Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change.

597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Individual study. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) S/U grading.

Scope and Objectives

The Biomedical Engineering Interdepartmental Program is designed to train engineers and scientists who are specially qualified to work on engineering applications in either medicine or biotechnology.

Graduates are able to apply engineering principles to current needs and contribute to future advances in the fields of medicine and biotechnology. Fostering careers in industry or academia, the program offers students the choice of an M.S. or Ph.D. degree in seven distinct fields of biomedical engineering. In addition to selected advanced engineering courses, students are required to take specially designed biomedical engineering courses to ensure a minimal knowledge of the appropriate biological sciences. Students receive practical training via an M.S. or Ph.D. research thesis in biomedical engineering. Faculty members have principal appointments in departments across campus and have well-equipped laboratories for graduate student research projects.

New courses are currently being developed. In the interim, biomedical engineering students take selected courses in other departments. Students should contact the program office for the latest details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Biomedical Engineering Program offers the Master of Science (M.S.) degree in Biomedical Engineering.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program in Biomedical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

All applicants need to submit a statement of purpose relating their reasons for seeking admission, in addition to three letters of recommendation detailing their academic preparation, industrial or research laboratory training, and potential for future professional development. To apply for the M.S. degree, applicants should have a B.S. degree in engineering, life sciences, or physical science, with a grade-point average (GPA) of not less than 3.0 in the last two years of undergraduate study.

Meeting the above minimum requirements does not guarantee admission; the actual standard for admission is set by the current pool of applicants and is generally much higher.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.biomedengr.ucla.edu>, or by writing to the Biomedical Engineering IDP, School of Engineering and Applied Science, UCLA, 7523 Boelter Hall, Box 951600, Los Angeles, CA 90095-1600, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study

Bioacoustics, speech, and hearing; biochemical engineering; biocybernetics; biomaterials and tissue engineering; biomechanics; biomedical instrumentation; biomedical signal and image processing.

Course Requirements

At least nine courses are required, of which at least five must be graduate courses. For the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. Lower division courses may not be applied toward a graduate degree.

Comprehensive Examination Plan

The comprehensive examination plan requires a passing grade on the first part (four hours) of the written comprehensive preliminary examination for the Ph.D.

Thesis Plan

A research thesis, completed through enrollment in eight units of Biomedical Engineering 598, is to be written on a biomedical engineering topic approved by the field committee, which consists of the student's thesis supervisor and two other UCLA faculty; the thesis supervisor and at least one other member are selected from a current list of designated members for the interdepartmental program that is approved by the Graduate Division.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Biomedical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

All applicants need to submit a statement of purpose relating their reasons for seeking admission, in addition to three letters of recommendation detailing their academic preparation, industrial or research laboratory training, and potential for future professional development. To apply for the Ph.D. degree, applicants should meet the requirements for the M.S. and hold an M.S. degree in engineering, life science, physical science, or the equivalent, with a grade-point average (GPA) of not less than 3.25.

Meeting the above minimum requirements does not guarantee admission; the actual standard for admission is set by the current pool of applicants and is generally much higher.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.biomedengr.ucla.edu> or by writing to the Biomedical Engineering IDP, School of Engineering and Applied Science, UCLA, 7523 Boelter Hall, 951600, Los Angeles, CA 90095-1600, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major fields or Subdisciplines

Bioacoustics, speech, and hearing; biochemical engineering; biocybernetics; biomaterials and tissue engineering; biomechanics; biomedical instrumentation; biomedical signal and image processing.

Course Requirements

To complete the Ph.D., all students must fulfill minimum University requirements. Students must pass a written preliminary examination, an oral qualifying examination, and complete the coursework for two minor fields of study. At least one minor field of study should be one of the other major fields in the Biomedical Engineering Program. Each minor field requirement consists of three four-unit courses, at least two of which are graduate (200-level) courses. Students must maintain a grade-point average of 3.25 or better for all courses. For the written preliminary examination in the major field, Ph.D. students are responsible for the material covered in required courses specified by the field committee. The examination is given at a time and date to be decided by the field committee but no later than two academic years after the student has been formally admitted to the Ph.D. program.

Written and Oral Qualifying Examinations

The written qualifying examination is known as the Ph.D. preliminary examination in the School of Engineering and Applied Science. After mastering the body of knowledge defined in the major field, students take a preliminary examination in the major field. The examination typically consists of both a written part and an oral part, and students pass the entire examination and not in parts. The oral part does not exceed two hours, and in some major fields need not be required at all. Students who fail the examination may repeat it once only, subject to the approval of the major field committee. This major field examination, together with the three courses in each of the two minor fields, should be completed within six quarters after admission to the Ph.D. program.

After passing the written qualifying examination described above, students are ready to take the University Oral Qualifying Examination, which should occur within three quarters after completing the written examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are selected from a current list of designated "inside" members for the interdepartmental program that is approved by the Graduate Division. The "outside" member must be a UCLA faculty member who does not appear on the "inside" list.

Biomedical Engineering

Upper Division Courses

M101. Introduction to Biomedical Engineering (4) Lecture, three hours; outside study, nine hours. Designed for physical sciences, life sciences, and engineering students. Introduction to wide scope of biomedical engineering via treatment of selected important individual topics by small team of specialists. Letter grading.

M102. Human Anatomy for Biomedical Engineers. (4) (Same as Physiological Science M102.) Lecture, three hours; laboratory, two hours. Not open for credit to physiological science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Letter grading.

M103. Human Physiology for Biomedical Engineers. (4) (Same as Physiological Science M103.) Lecture, three hours; laboratory, two hours. Not open for credit to physiological science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Letter grading.

M140. Introduction to Biomechanics. (4) (Same as Mechanical and Aerospace Engineering M140.) Lecture, four hours; outside study, eight hours. Requisites: Mechanical and Aerospace Engineering 131A, 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Letter grading.

M180. Introduction to Biomaterials. (4) (Same as Materials Science M180.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: Materials Science 14. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Letter grading.

Graduate Courses

M217. Biomedical Imaging. (4) (Same as Electrical Engineering M217.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: Electrical Engineering 114 or 211A. Mathematical principles of medical imaging modalities: X-ray, computed tomography, positron emission tomography, single photon emission computed tomography, magnetic resonance imaging. Topics include basic principles of each imaging system, image reconstruction algorithms, system configurations and their effects on reconstruction algorithms, specialized imaging techniques for specific applications such as flow imaging. Letter grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate biomedical engineering students. Petition forms to request enrollment may be obtained from program office. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate biomedical engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate biomedical engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate biomedical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate biomedical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate biomedical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Peter J. Rosemark, Ph.D.

Scope and Objectives

The Biomedical Physics M.S./Ph.D. Program is an AAPM-accredited interdepartmental graduate program supported by the Depart-

ments of Molecular and Medical Pharmacology, Radiation Oncology, and Radiological Sciences. It offers training in four specialties: biophysics, medical imaging, medical physics, and radiation biology. Specialized facilities for training and research are available in the departmental clinical laboratories, the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes two biomedical cyclotrons, the radiation oncology cyclotron, the picture archiving and communication system (PACS), four positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and SUN computers with image processor systems. In addition, clinical equipment is available to supervised students for practicums and research purposes. The program prepares students for careers as independent researchers or professional medical physicists, and graduates are qualified to work in a clinical environment and to pursue board certification as medical physicists or to apply for a clinical medical physics residency.

Graduates in biomedical physics can expect to engage in any combination of research, teaching, clinical service, and consultation. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high-technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Biomedical Physics Program offers the Master of Science (M.S.) degree in Biomedical Physics.

Admission

In addition to the University's minimum requirements, applicants to the M.S. program are required to hold a bachelor's degree with a major in a science or engineering program. Also, it is expected that applicants have completed (1) one year of college physics (calculus-based); (2) two years of college mathematics through differential equations, including calculus equivalent to Mathematics 31A, 31B, 32A, 32B,

33A, 33B; (3) one year of college chemistry; and (4) at least one course in computer science. Deficiencies in the above courses must be removed prior to advancement to candidacy.

In addition, applicants to the specialty fields of biophysics, medical imaging, and therapeutic medical physics must have a strong foundation in basic physics or a degree in engineering, mathematics, or other sciences with physics training equivalent to a minor in physics (upper division courses in electricity and magnetism, quantum mechanics, atomic structure, statistical mechanics, and mechanics). Applicants may be accepted with some deficiencies in entrance requirements which must be removed prior to advancement to candidacy.

Scores on the Graduate Record Examination (GRE) General Test, taken in the last three years, should be sent to the department. Three letters of recommendation are required. If applicants already have a master's degree, one of the letters should be from their thesis adviser.

A brochure describing the program in biomedical physics may be obtained from the department.

Areas of Study

Therapeutic medical physics; medical imaging; biophysics; and radiation biology and experimental radiation therapy.

Course Requirements

The courses required for the M.S. degree are nine common core courses (Biomedical Physics 200A, 204, 205, 216, 217, 218, 260A-260B-260C) and the following nine courses, along with any special direction by the graduate adviser: Biomedical Physics 200B, 202A-202B-202C, 203, 208A, 208B, 209, 221.

For students with a medical physics background or a career objective other than a practicing medical physicist, a more sharply focused curriculum may be advised.

Biomedical Physics 596 and 598 may be applied toward the degree. Eight units of 500-series courses may be applied toward the total course requirements, four units toward the minimum graduate course requirement.

Comprehensive Examination Plan

Students may pass a comprehensive examination (Plan II) that consists of the materials from the common core courses. The examination is offered at least once a year, and students have two chances to pass the examination.

Students who plan to continue on the Ph.D. study track may request approval from their faculty adviser for the Ph.D. written specialty examination to be used to satisfy the requirement for the M.S. comprehensive examination (Plan II). Students could then receive the M.S. in addition to the Ph.D.

Thesis Plan

Students satisfy the requirement by writing a thesis (Plan I) based on a research project. Af-

ter students complete the course requirements, they must choose a faculty member to guide their research and chair the thesis committee.

Doctoral Degree

Admission

Admission to the program leading to the Ph.D. degree in Biomedical Physics requires a bachelor's degree with a major in a science or engineering program and (1) selecting a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Biomedical Physics 221 is required of all students. Completion of a master's program is not required.

Major Fields or Subdisciplines

Therapeutic medical physics; medical imaging; biophysics; and radiation biology and experimental radiation therapy.

Course Requirements

After selecting a specialty, students acquire sufficient knowledge by taking courses recommended for the specialty; these include the common core courses. The courses form a basis for the Ph.D. written specialty examination. Students must pass all core courses with grades of B (a B- or lower is not acceptable) or better or pass the entire M.S. comprehensive examination.

Transfer students can either take the core courses or pass an M.S. comprehensive examination.

The following specialties are offered:

Biophysics. Minimum course requirements of 60 hours. The biophysics specialty includes the core courses within the department, graduate courses from physics, engineering, chemistry/biochemistry, biological chemistry, pharmacology, and biomathematics, and research study and seminar courses.

Medical Imaging. Minimum course requirements of 60 hours. The courses for the medical imaging specialty include the nine common core courses (Biomedical Physics 200A, 204, 205, 216, 217, 218, 260A-260B-260C), as well as the medical imaging specialty core courses (Biomedical Physics 209, 210, 219). A minimum of four elective courses are required from the following two lists: (a) two to four elective courses (Biomedical Physics 208A, 211, 214, 215, 222, M230) and (b) zero to two electives from the following courses outside the program:

Computer Science (School of Engineering and Applied Science) 112, 118, 141, 161, 171, 171L, 174, 212A, 212B, 214, 215, 241A, 241B, 267A, 268, 270A, 276A, 276B.

Electrical Engineering (School of Engineering and Applied Science) 113, 113L, 115A, 115B, 115C, 212A, 213A, 215A, 230D.

Mathematics (College of Letters and Science) 142, 149, 151A, 151B, 270A, 270F.

Appropriate elective courses are selected by the student and the adviser. Students wishing to pursue a hospital-based career should prepare to be board certified after graduation by taking additional clinical courses: Biomedical Physics 200B, 202A-202B-202C, 203, 208A, 208B.

Therapeutic Medical Physics. Students must demonstrate competence in the subject matter covered in the core courses. In addition, students are required to take the three clinical rotations (Biomedical Physics 202A-202B-202C), 201, 203, 208B, 210, M230, and some advanced mathematics courses. Additional coursework is recommended by faculty in accordance with students' specific needs.

Radiation Biology and Experimental Radiation Therapy. Students must demonstrate competence in the subject matter covered in the core courses. Because of the breadth of radiation biology and experimental radiation oncology, it is not feasible to design a single curriculum for all students. Instead, additional coursework is recommended by faculty in accordance with specific needs.

Written and Oral Qualifying Examinations

Each specialty structures its own examination, which is written and graded by more than two faculty members.

Each specialty can request that its own students pass a major topic(s) from other specialties. Students must demonstrate competence in the common core courses and pass the Ph.D. written specialty examination before they can proceed to the Ph.D. This demonstration of competence must be reviewed and approved by faculty-at-large. Students are permitted two opportunities to pass the Ph.D. written specialty examination which is given at least once a year.

Biophysics. A written specialty examination is given on areas covered by courses students have taken, with emphasis on questions based on course topics but directed at determining the personal ability of students for scholarship rather than factual knowledge per se.

Medical Imaging. A written specialty examination is directed at determining the personal ability of students for scholarship rather than factual knowledge per se. While the material covered may be related to courses taken, it need not be limited to material covered in the courses. The questions are based on both knowledge of the topics and the ability to think creatively in medical imaging.

Therapeutic Medical Physics. Students must demonstrate knowledge both of the material presented in the coursework and of current research in the field by passing a written specialty examination.

Radiation Biology and Experimental Radiation Therapy. Students must demonstrate knowl-

edge both of the material presented in the basic radiation biology course and of current research in the field by passing a written specialty examination.

Oral Qualifying Examination. The written specialty examination for admission to the Ph.D. program should be taken by the end of the sixth quarter in residence. Once this examination is passed and students have chosen a research area for the dissertation, they should, within a reasonable time frame agreed on with the dissertation adviser, form a doctoral committee and schedule the University Oral Qualifying Examination. This examination is based on a proposed dissertation topic. Passing the examination is a requirement for continuance in the doctoral program. The format of the oral qualifying examination is consistent with University requirements. A final oral dissertation defense is required.

Biomedical Physics

Lower Division Course

88. Lower Division Seminar: Special Topics in Biomedical Physics. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in biomedical physics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

199. Directed Individual Studies or Research for Undergraduate Students. (2 to 4) Preparation: submission of written proposal outlining course of study or research. Directed individual studies in biomedical physics for undergraduate students to be structured by faculty member and student at time of initial enrollment.

Graduate Courses

200A. Physics and Chemistry of Nuclear Medicine. (4) Lecture, three hours; discussion, one hour. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Basic principles of nuclear medicine imaging, SPECT, and PET.

200B. Nuclear Medicine Instrumentation. (4) Lecture, one hour; laboratory, three hours. Requisite: course 200A. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography.

201. Medical Radiation Accelerator Design. (4) Lecture, three hours. Requisite: course 216. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design.

202A-202B-202C. Applications of Medical Physics to Clinical Problems. (4-4-4) Selected studies in clinical use of radioisotopes:

202A. Nuclear Medicine. Requisite: course 200B.

202B. Diagnostic Radiology. Requisites: courses 200A, 205.

202C. Radiation Therapy. Requisites: courses 203, 204, 208B, 221.

203. Physics of Radiation Therapy. (4) Lecture, three hours; discussion, one hour. Requisites: courses 216, 221. Radiation quantities and units. Radiation dosimetry, clinical applications in treatment planning. Methods of measuring radiation quantities. Calibration of radiation therapy equipment.

204. Introductory Radiation Biology. (4) Effect of ionizing radiation on chemical and biological systems.

205. Physics of Diagnostic Radiology. (4) Lecture, three hours; discussion, one hour. Production of X rays, basic interactions between X rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory.

206. Advanced Instrumentation. (4) Lecture, three hours; discussion, one hour. Requisite: course 205. Introduction to recent advances in digital diagnostic imaging systems, with topics centered on instrumentation including digital subtraction angiography (DSA) methods of producing three-dimensional images.

208A. Medical Physics Laboratory: Medical Imaging. (4) Discussion, two hours; laboratory, four hours. Requisite: course 205. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and computed radiography.

208B. Medical Physics Laboratory: Radiation Therapy. (4) Discussion, two hours; laboratory, four hours. Requisite: course 203. Hands-on experience calibrating treatment planning and radiation therapy equipment.

209. Digital Techniques in Radiological Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: one course in C or another computer language. Basic principles of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis. C language programming taught.

210. Principles of Medical Imaging. (4) Lecture, three hours; discussion, one hour. Requisite: course 209. Study of image representation, computational structures for imaging, linear systems theory, image enhancement and restoration, image compression, segmentation, and morphology. Special topics include visualization techniques, three-dimensional modeling, computer graphics, and neural net applications. Laboratory projects apply concepts developed in class.

211. Medical Ultrasound. (4) Lecture, 90 minutes; laboratory, two hours. Preparation: one calculus course. Production of real-time ultrasound images, transducer modeling and design, Doppler and color flow instrumentation, biohazards of ultrasound, ultrasound phantom design, and ultrasound tissue characterization techniques. Laboratory included.

212. Biochemical Basis of Positron Emission Tomography (PET). (4) Lecture, three hours; discussion, one hour. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET.

213. Quantitative Autoradiography. (4) Lecture, three hours; discussion, one hour. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; iodoantipyrine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation.

214. Medical Image Processing Systems. (4) Lecture, three hours; discussion, one hour. Requisites: courses 209, 210. Advanced image processing and image analysis techniques applied to medical images. Discussion of approaches to computer-aided diagnosis and image quantitation, as well as application of pattern classification techniques (neural networks and discriminant analysis). Examination of problems from several imaging modalities (CT, MR, CR, and mammography).

215. Breast Imaging Physics and Instrumentation. (4) Lecture, three hours; laboratory, two hours. Requisite: course 205. Special requirements of mammography, design of dedicated mammography X-ray units from generators and tubes through screen/film cassettes. Stereotactic biopsy units, cost/benefit controversy of screening mammography, digital mammography, computer-aided diagnosis, telemammography, breast MRI, and breast ultrasound.

216. Fundamentals of Dosimetry. (4) Lecture, three hours; laboratory, one hour. Review of fundamental interactions of radiation and matter and introduction to fundamentals of radiation dosimetry. Overview of dosimetry instrumentation as well as radiation sources.

217. Statistics and Data Analysis in Biomedical Physics. (4) Lecture, three hours; laboratory, two hours. Requisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to computer-based statistical concepts, data analysis, and experimental design within biomedical physics research. Standard statistical packages and various statistical computing algorithms on relevant data sets within the radiological sciences.

218. Radiologic Functional Anatomy. (4) Lecture, three hours; discussion, two hours. Introduction to human anatomy as visualized through radiological and nuclear medicine imaging modalities such as X ray, CT, MRI, sonogram, PET, and SPECT.

219. Principles and Applications of Magnetic Resonance Imaging. (4) Lecture, three hours; laboratory, one hour. Basic principles of magnetic resonance (MR), imaging physics, and contrast mechanisms. Emphasis on hardware, Fourier transform imaging methods, structure of pulse sequences, various scanning parameters and reduction of artifacts. Introduction to MR spectroscopy, MR angiography, and fast imaging techniques.

220A-220D. Laboratory Rotations in Biomedical Physics. (2 each) Laboratory projects to provide students with introduction to the field. One oral and one written presentation required. S/U grading. **220A.** Biophysics; **220B.** Medical Imaging; **220C.** Therapeutic Medical Physics; **220D.** Radiation Biology and Experimental Radiation Therapy.

221. Applied Health Physics. (4) Lecture, three hours; discussion, one hour. Requisite: course 216. Basics of radiation safety as applied to medical applications. Introduction to all regulatory issues pertaining to medical uses of radioactivity.

222. Advances in Medical Magnetic Resonance: Clinical MR Spectroscopy and Fast MRI Techniques. (4) Lecture, three hours; laboratory, one hour. Requisites: course 219, Physics 8E. Basic principles of NMR spectroscopy, localized spectroscopic sequences on a wholebody environment, single/multishot localization, water/fat suppression, chemical shift imaging sequences, processing with multidimensional Fourier transforms, gradient/spin-echo based echo-planar imaging, diffusion/perfusion imaging techniques.

223. Seminar: Radiation Biology. (1) Requisite or corequisite: course 204. Topics of current interest in radiation biology presented by faculty members, post-doctoral fellows, and graduate students from various departments and other universities. Discussion of ongoing research, as well as relevant journal articles. Topics vary from term to term. One student oral presentation required. S/U grading.

M230. Computed Tomography: Theory and Applications. (4) (Same as Biomathematics M230.) Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

M248. Introduction to Biological Imaging. (4) (Same as Pharmacology M248.) Lecture, three hours; laboratory, one hour. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories.

260A-260B-260C. Seminars: Biomedical Physics (1-1-1). Joint critical study by students and instructors in fields of knowledge pertaining to biomedical physics. Periodic contributions by visiting scientists. Discussion of research in progress. Student presentations required in spring term. May be repeated. S/U (260A, 260B) and letter (260C) grading.

M266. Advanced Magnetic Resonance Imaging. (4) (Same as Neuroscience M267 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

268. Radiopharmaceutical Chemistry. (4) Lecture, two hours; discussion, two hours. Current concepts in radioactive pharmaceutical agents in clinical use, including promising investigational agents. Utilization of short-lived, cyclotron-produced isotopes in radiopharmaceuticals. Rational design of radiodiagnostic agents.

269. Seminar: Medical Imaging. (1) Continuous registration required of students in medical imaging specialty. Topics of current interest in medical imaging, with lecturers from the department, other universities, and private industry.

M285. Functional Neuroimaging: Techniques and Applications. (4) (Same as Psychiatry M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

M424. Functional Magnetic Resonance Imaging Journal Club. (1) (Same as Psychiatry M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

495. Special Studies in Biomedical Physics. (4) Seminar, two hours; laboratory, four hours. Teaching assistance in graduate laboratory courses under supervision of a faculty member. S/U grading.

596. Research in Biomedical Physics. (4 to 12) Directed individual study or research. Only one 596 course may be applied toward M.S. degree requirements. May be repeated for credit.

597. Preparation for Ph.D. Qualifying Examinations. (4) May not be applied toward M.S. degree requirements. May not be repeated. S/U grading.

598. Research for and Preparation of M.S. Thesis. (4 to 12) Two 598 courses (or 598 and 596 combined) may be applied toward M.S. degree requirements. May be repeated. S/U grading.

599. Research for Ph.D. Dissertation. (4 to 12) Preparation: successful completion of screening examinations. Research for and preparation of Ph.D. dissertation. May be repeated. S/U grading.

Potter C. Chang, Ph.D.
Virginia A. Clark, Ph.D.
Wilfrid J. Dixon, Ph.D.
Olive Jean Dunn, Ph.D.
Donald Guthrie, Ph.D., *in Residence*
Robert I. Jennrich, Ph.D.
Raymond J. Jessen, Ph.D.

Associate Professors

Virginia F. Flack, Ph.D.
Nathaniel Schenker, Ph.D.
Robert E. Weiss, Ph.D.
Weng Kee Wong, Ph.D.

Assistant Professors

Thomas R. Belin, Ph.D., *in Residence*
Gang Li, Ph.D.
Janet Sinsheimer, Ph.D., *in Residence*

Lecturers

Jeffrey Gornbein, Dr.P.H.
Jean L. Mickey, Ph.D., *Emerita*

Adjunct Professor

Frederick J. Dorey, Ph.D.
James W. Sayre, Dr.P.H.

Adjunct and Visiting Associate Professors

Nancy G. Berman, Ph.D., *Adjunct*
Karim F. Hirji, D.Sc., *Adjunct*
Martin L. Lee, Ph.D., *Visiting*
David W. Gjerston, Ph.D., *Adjunct*

Adjunct Assistant Professors

Cheryl L. Faucett, Ph.D.
Stella Grosser, Ph.D.

Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics (see Public Health Schoolwide Programs). All students receive a balanced education, blending theory and practice.

A degree in biostatistics prepares students for work in a wide variety of challenging positions in government, industry, and education. Graduates have found careers involving teaching, research, and consulting in such fields as medicine, public health, life sciences, survey research, and computer science. There has always been a strong demand for well-trained biostatisticians; graduates have had little difficulty finding employment well suited to their particular interests.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Biostatistics offers the Master of Science (M.S.) degree in Biostatistics. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission

Applicants to the M.S. program must have completed a bachelor's degree. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Undergraduate preparation for the program should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or equivalent.

Additional admission requirements for the M.S. in Biostatistics are the same as for the M.P.H. See the M.P.H. admission section under Public Health Schoolwide Programs.

Areas of Study

Consult the graduate adviser for the areas of specialization. Typical course plans are listed below.

Course Requirements

The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses (200 and 500 series). The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

Unless previously taken, the following courses must be included in the degree program: Biostatistics 110A, 110B, 115, 200A, 200B-200C, M215, 240, 402A, 402B, 596; Statistics M100A, 100B; and 12 units of special topics courses from Biostatistics M210 through M237B (except M215), M250A through 285, 403A, or 404 through 419 (except 406). At least four of the 12 units must be in the 200 series.

For exceptional students who have had a year course in probability and theoretical statistics plus one or more courses in applied statistics, it may be possible to complete the degree in one year.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with the adviser's consent and approved by the chair.

A written report and written comprehensive examination covering the above course material must be passed. A failed examination can be repeated only once.

Comprehensive Examination Plan

The written comprehensive examination which covers the content of the required courses must be passed. No more than one reexamination after failure is allowed. Students who do not take the reexamination at the time specified by the department forfeit their right to reexamination.

Thesis Plan

None.

Doctoral Degree**Admission**

Qualifications for admission to the program leading to the Ph.D. degree in Biostatistics are those currently specified by the Graduate Division.

Consult the department for further information.

Major Fields or Subdisciplines

Consult the graduate adviser.

Course Requirements

Students must complete the following courses, unless previously taken: Biostatistics M250A-M250B, 251, 255; Statistics 200A-200B; and at least three special topics courses from the Biostatistics 230, 270, and 280 series. Some substitution is accepted from courses in statistics and biomathematics. For students who have not completed a master's degree or equivalent in mathematics, computer science, or a field of application in biostatistics, the following additional courses must be included in the degree program, unless previously taken: Biostatistics 200A, 200B-200C, M215. In addition, the student's full program of study must be approved by the department and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field such as AIDS, biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. Students are required to participate in Biostatistics 402B (consulting laboratory) for one quarter each year and in course 245 (the advanced seminar) every quarter.

After advancement to candidacy, students are no longer required to enroll in Biostatistics 402B.

Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass two written examinations and the University Oral Qualifying Examination. A failed examination may only be repeated once.

The written mathematical statistics examination is taken in the spring of the first year in residence; if failed, it must be retaken the following Spring Quarter. The written qualifying examination is taken in Fall Quarter of the second year.

The University Oral Qualifying Examination is taken before advancement to candidacy and after successful completion of the written examinations. Administered by the doctoral committee, it is usually a defense of the dissertation proposal.

The timing of reexaminations is specified by the department in the case of written examinations or by the student's committee in the case of the oral examination. Students who do not take the reexaminations at the specified time forfeit their right to reexamination.

Biostatistics

Upper Division Courses

100A. Introduction to Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: one biological or physical sciences course. Designed for juniors/seniors. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size. P/NP or letter grading.

100B. Introduction to Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 100A. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, linear regression, and correlation analysis. P/NP or letter grading.

110A. Basic Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: Mathematics 31B. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimates, statistical inference. P/NP or letter grading.

110B. Basic Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 110A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression; topics related to analysis of variance and experimental designs. P/NP or letter grading.

115. Topics in Estimation. (4) Lecture, three hours; discussion, one hour. Requisites: Statistics M100A, 100B. Small and large sample properties of common estimation techniques arising in biostatistical application. Letter grading.

M153A-M153B. Regression Analysis (4-4-4). (Same as Biomathematics M153A-M153B and Statistics M120A-M120B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, Statistics 100B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

199. Special Studies. (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term. P/NP or letter grading.

Graduate Courses

200A. Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 100A and 100B, or 110A and 110B. Topics in methodology of applied statistics, such as design, analysis of variance, regression. S/U or letter grading.

200B-200C. Biostatistics (4-4). Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses M153A, 200A. S/U or letter grading. **200B.** Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis and clinical trials. **200C.** Measures of association and analysis of categorical data, theory of generalized linear models.

201. Topics in Applied Regression. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 200A. Further studies in multiple linear regression, including model assessment principle components and errors in variables. Additional topics include estimation hypothesis testing in K4 matching for propensity score and introduction to logistic regression and its usefulness in propensity methodology. Letter grading.

M206A-M206B-M206C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2) (Same as Psychiatry M286A-M286B-M286C.) Seminar, 90 minutes. Requisite: course 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

M209. Statistical Modeling in Epidemiology. (4) (Same as Epidemiology M212.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: Epidemiology 204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

M210. Statistical Methods for Categorical Data. (4) (Same as Biomathematics M231.) Lecture, three hours; discussion, one hour. Requisites: course 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

M211. Statistics for Epidemiology. (4) (Same as Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as courses 100A, 100B). Requisites: Epidemiology 201A-201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 201A-201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

212. Distribution Free Methods. (4) Lecture, three hours; discussion, one hour. Requisites: course 100B or 110B, Statistics 100B. Theory and application of distribution free methods in biostatistics. S/U or letter grading.

213. Statistical Simulation Techniques. (4) Lecture, three hours; discussion, one hour. Requisites: course 110B, Statistics 100B. Techniques for simulating important statistical distributions, with applications in biostatistics. S/U or letter grading.

214. Finite Population Sampling. (4) Lecture, three hours. Requisites: course 110B, Statistics 100B. Theory and methods for sampling finite populations and estimating population characteristics. S/U or letter grading.

M215. Survival Analysis. (4) (Same as Biomathematics M281.) Lecture, three hours; discussion, one hour. Requisites: course 110B, Statistics 100B. Statistical methods for analysis of survival data. S/U or letter grading.

216. Introduction to Statistical Methods for Biological Assays. (4) Lecture, three hours. Requisite: course 110B. Topics include standard statistical procedures for estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays. S/U or letter grading.

219. Special Topics: Supplemental Topics. (4) Lecture, three hours; discussion, one hour. Requisite: course 115. Topics in biostatistics not covered in other courses. Letter grading.

M220. Experimental Statistics. (4) (Same as Physiological Science CM200.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. S/U or letter grading.

230. Statistical Graphics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 110A, 110B. Graphical data analysis emphasizes use of visual displays of quantitative data to gain insight into data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues. S/U or letter grading.

231. Simultaneous Statistical Inference. (4) Lecture, three hours; discussion, one hour. Requisites: course 200C, Statistics 100B. Methods and theory of simultaneous statistical inference. Letter grading.

M232. Statistical Analysis of Incomplete Data. (4) (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Requisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

233. Statistical Methods in AIDS. (2) Lecture, two hours. Requisites: courses 110A, 110B, M215. Coverage of methods necessary to address statistical problems in AIDS research, including projection methods for the size of AIDS epidemic and methods for estimating incubation distribution. S/U or letter grading.

M234. Applied Bayesian Inference. (4) (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 115 or Statistics 100C, 200A. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

M235. Causal Inference. (4) (Formerly numbered 235.) (Same as Psychiatry M232.) Lecture, three hours; discussion, one hour. Requisite: course 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed. Letter grading.

M236. Analysis of Repeated Measures Designs. (4) (Same as Biomathematics M282.) Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

M237A. Theoretical Genetic Modeling. (4) (Same as Biomathematics M207A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M237B. Applied Genetic Modeling. (4) (Same as Biomathematics M207B and Human Genetics M207B.) Lecture, two hours; laboratory, two hours. Preparation: coursework equivalent to courses 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M237A; students may take either and are encouraged to take both. S/U or letter grading.

240. Master's Seminar and Research Resources for Graduating Biostatistics M.S. Students. (4) (Formerly numbered 240A, 240B.) Seminar, three hours. Introduction to resources for finding statistical literature. Discussion of principles of making statistical presentations and how to write statistical reports, including writing abstracts and choice of key words. Discussion of journal article preparation and submission format and refereeing process to help students make progress on their master's reports. Letter grading.

245. Advanced Seminar: Biostatistics. (2) Seminar, two hours. Requisite: course 200C. Current research in biostatistics. May be repeated for credit. S/U grading.

M250A-M250B. Linear Statistical Models (4-4). (Same as Statistics M215A-M215B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

251. Multivariate Biostatistics. (4) Lecture, three hours; discussion, one hour. Requisite: course M250A. Multivariate analysis as used in biological and medical situations. Topics from multivariate distributions, component analysis, factor analysis, discriminant analysis, MANOVA, MANCOVA, longitudinal models with random coefficients. S/U or letter grading.

255. Advanced Topics and Probability in Biostatistics. (4) Lecture, three hours; discussion, one hour. Requisites: Statistics 200A-200B. Topics include conditioning, modes of convergence, basic limit results for empirical processes, von-Mises calculus, and notions of efficiency in statistics. Applications cover M-L-R estimation in two-sample and regression models, goodness of fit methods, smoothing techniques, and bootstrap. S/U or letter grading.

270. Stochastic Processes. (4) Lecture, three hours. Preparation: upper division mathematics (including statistics and probability). Stochastic processes applicable to medical and biological research. Letter grading.

271. Mathematical Epidemiology. (4) Lecture, three hours. Preparation: upper division mathematics (including statistics and probability). Mathematical theory of epidemiology with deterministic and stochastic models and problems involved in applying the theory. Letter grading.

272. Statistical Genetics. (4) Lecture, three hours; discussion, one hour. Preparation: upper division probability and statistics; knowledge of basic genetics principles helpful but not required. Introduction to statistical analysis of genetic data from experimental crosses, populations, and human pedigrees. Topics include segregation analysis, recombination and linkage, genetic mapping, inbreeding systems, population genetics, pedigree analysis, quantitative trait analysis, and molecular phylogeny. Letter grading.

275. Advanced Survival Analysis. (4) Lecture, three hours; discussion, one hour. Requisites: course 255, Statistics 200A-200B. Recommended: course M215. Censoring and truncation, single sample problems, K-sample comparisons, Cox regression model, hazard rate and density estimation, estimation in Markov chains and Markov renewal processes, multivariate models, competing risks. S/U or letter grading.

276. Inferential Techniques that Use Simulation. (4) Lecture, three hours; discussion, one hour. Requisites: Statistics 200A-200B. Recommended: Biostatistics 213. Theory and application of recently developed techniques for statistical inference that use computer simulation. Topics include bootstrap, multiple imputation, data augmentation, stochastic relaxation, and sampling/importance resampling algorithm. S/U or letter grading.

277. Robustness and Modern Nonparametrics. (4) Lecture, three hours. Requisite: Statistics 200A. Topics include M-estimation, influence curves, breakdown point, bootstrap, jackknife, smoothing, nonparametric regression, generalized additive models, density estimation. S/U or letter grading.

279. Optimal Design Theory and Application. (4) Lecture, three hours. Preparation: basic programming skills. Requisite: Statistics 200B. Presentation of design methodology for regression problems, with applications to biostatistical problems. Letter grading.

M280. Statistical Computing. (4) (Same as Biomathematics M280 and Statistics M230.) Lecture, three hours. Requisites: Mathematics 115A, Statistics 100C. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

285. Advanced Topics: Recent Developments. (4) Lecture, three hours; discussion, one hour. Advanced topics and developments in biostatistics not covered in Biostatistics M210 through 219 or 270 through 276 or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc. S/U or letter grading.

288. Seminar: Statistics in AIDS. (2) Seminar: two hours. Requisite: course 200C. Designed for doctoral students. Recent statistical developments in analysis of AIDS data. Participants or outside speakers present their own research or discuss articles from the literature. S/U grading.

295. Application of Statistical Theories in Biomedical Research. (4) Lecture, three hours; discussion, one hour. Requisite: Statistics 100B. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations. Letter grading.

296. Seminar: Research Topics in Biostatistics. (4) Seminar, two hours. Advanced study and analysis of current topics in biostatistics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

400. Field Studies in Biostatistics. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

402A. Principles of Biostatistical Consulting. (2 units) Lecture, one hour; discussion, one hour. Requisite: course 100B or 110B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician/client interactions and case studies. S/U or letter grading.

402B. Biostatistical Consulting. (4) Discussion, two hours; laboratory, two hours. Requisite: course 402A. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading.

403A-403B. Computer Management of Health Data (4-4). (Formerly numbered 403.) Lecture, three hours; laboratory, two hours. Preparation: at least one statistics course, two research methodology courses. Requisite: Program in Computing 1. Concepts of health data management, design and maintenance of large databases on tapes or disks; computing tools and techniques facilitating data entry transmission, data retrieval for statistical analysis, tabulation and report generation useful to biostatisticians, health planners, and other health professionals. Letter grading.

404. Principles of Sampling. (4) Lecture, three hours; discussion, one hour. Requisites: course 100B, Epidemiology 100. Statistical aspects of design and implementation of a sample survey. Techniques for analysis of data, including estimates and standard errors. Avoiding improper use of survey data. Letter grading.

405. Demographic Materials and Methods. (4) Lecture, three hours; laboratory, two hours. Requisite: course 100A or 110A. Sources of demographic information; description of human populations; calculation and interpretation of statistics used to measure and describe population growth, structure, geographic distribution, mortality, natality, and migration. Letter grading.

406. Applied Multivariate Biostatistics. (4) Lecture, three hours; laboratory, one hour. Preparation: at least two upper division research courses. Requisite: course 100B. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U grading optional for nondivision majors.

409. Doctoral Statistical Consulting Seminar. (2) (Formerly numbered 289.) Seminar, one hour; laboratory, four hours. Designed for doctoral students. Development of experience and expertise in collaborating with faculty in Schools of Public Health and Medicine. Students meet with investigators and develop design and protocol for data analysis, implement data protocol when data is obtained, and write up the study with lead investigators. S/U grading.

410. Statistical Methods in Clinical Trials. (4) Lecture, three hours; discussion, two hours. Requisite: course 200A. Design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, and stratification in human experimentation; various types of controls; prognostic factors, survivorship studies, and design of prognostic studies; organization of clinical trials — administration, comparability, protocols, clinical standards, data collection and management. S/U grading optional for nonmajors.

411. Statistical Methods for Longitudinal Data. (4) Lecture, three hours. Requisite: course 200A. Design and analysis of longitudinal or panel studies. Letter grading (S/U grading optional for nonmajors).

412. Statistical Methods for Case-Control Studies. (4) Lecture, three hours. Requisite: course 200A. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample performances of variance estimators, measurement error in the covariates, and incomplete data. S/U or letter grading.

419. Special Topics: Applied Statistics. (4) Lecture, three hours; discussion, one hour. Requisite: course 100C. Special topics in applied statistics not covered in other courses in professional series. S/U or letter grading.

420. Database Management Systems. (4) Lecture, three hours; laboratory, two hours. Requisite: course 403. Database and database models applied to medical and public health studies; design of databases for efficient data retrieval and statistical analysis using package database management and statistical package programs. S/U or letter grading.

495. Teacher Preparation in Biostatistics. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. Letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

BUSINESS AND ADMINISTRATION

College of Letters and Science

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 825-3382

Faculty Advisory Committee

Joel D. Aberback, Ph.D. (*Political Science*)
Michael R. Darby, Ph.D. (*Management*)
Harold Demsetz, Ph.D. (*Economics*), *Emeritus*
Benjamin Klein, Ph.D. (*Economics*), *Chair*
Mary A. Yeager (*History*)
Lynne Goodman Zucker, Ph.D. (*Sociology*)

Scope and Objectives

The Business and Administration specialization is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science or the School of the Arts and Architecture, as well as a sequence of courses.

For example, students interested in international business might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might add this program to a social sciences major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may **not** be taken with any economics major.)

Completion of this program in addition to a Letters and Science or Arts and Architecture major gives students the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

Undergraduate Study

Business and Administration Specialization

Note: Admission to the Business and Administration specialization is suspended effective December 30, 1999. Students applying from July 1, 1999 through December 30, 1999 must have completed Economics 1, 2, and Management 1A-1B with grades of C– or better by December 30, 1999.

A minimum grade of C– is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. Students may satisfy one of the field studies course requirements by completing an independent studies course (199), taken in an appropriate department with prior consent of the program faculty adviser. Students also are required to seek guidance from a field studies coordinator in choosing and researching their topic.

To enter the specialization, students must file a petition with the College Counseling Service in the College of Letters and Science or the Student Services Office in the School of the Arts and Architecture. Students who do not complete the program prior to graduation must petition out of the program to be eligible to graduate. (Such petitions are automatically granted; there is no penalty for not completing the program.) All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units. A statement of completion is noted on the transcript and diploma when students have successfully completed the requirements for this specialization and for graduation.

For further information and help in assessing the appropriateness of this program and how it relates to career/education goals, contact the College Counseling Service in the College of Letters and Science.

Core Courses

Required: Economics 1 and 2; Management 1A-1B; one statistics course; one mathematics course (except Mathematics 1, 38A, 38B, 104); two courses from English 4, English Composition 100, 110W, 129A through 129D, 131A through 131D, 132A through 132D, 136A, 136B, 136C (136A and 136B are In Progress courses; credit is given only on completion of both courses).

Analytical Skills

Required: Three courses from one of the following areas: (1) *quantitative methods and for-*

mal reasoning: Anthropology 180, 186, Computer Science 141, Economics 147A, 147B, Geography 171, Mathematics 61, 113, 164, 167, M170A, 170B, Philosophy 9, 31, 32, Political Science 102, Program in Computing 10A, 10B, 10C, Psychology 142H, 144, 150, 151, Sociology 104, 112, 113, Statistics M100A, 100B, 110A, 110B; (2) *administration:* Political Science M105, 142C, 143A, 143B, 145D, 146B, 146C, 146D, 167B.

Field Studies

Required: Any three courses listed below, preferably from within **one** of the 10 fields (courses marked with an asterisk may **not** be applied toward this area if taken as part of the core):

(1) *Communications:* Communication Studies 100, 101, Sociology CM124A, CM124B, 135

(2) *Urban and Regional Development Studies:* Geography 148, M149, 150, 155, 157

(3) *Applied Psychology:* Linguistics 1 or 20, 10, Psychology 110, 111, 120, 121, 136A, 137A, 187A

(4) *Economy and Society:* Anthropology 150, 167, History 149A, 149B, Political Science M141D, 142B, 143A, 143B, Psychology 175, Sociology 158, 168, 173

(5) *Economic Systems:* Economics 110, 180, 190, Political Science 124, 129, 130, Sociology 173

(6) *Professional Writing:* English Composition *100, *131A through *131D, *136A, *136B

(7) *Accounting:* Management 120A, 120B, 122, 123, 124, 127A, 128

(8) *Artificial Intelligence:* Economics 142, 148, Mathematics 142, 149, 172A, 172B

(9) *Operations Research:* Mathematics 115A, 115B, 151A, 151B

(10) *Labor Studies:* History 155A, 155B, Political Science 142C, Psychology M137E, Sociology 171

 Max Benavidez, B.A.
 Adolfo Bermeo, Ph.D.
 Amalia Cabezas, Ph.D.
 Fernando Gapasín, Ph.D.

Scope and Objectives

The strength of the undergraduate major in Chicana and Chicano Studies is the cross-disciplinary approach to teaching and the critical skills approach to learning. Interdisciplinarity is the mainstay of the Chávez Center's academic objectives, achieved through the strengths and expertise of a core faculty that represents the fields of art, cultural studies, history, Latin American literature, sociolinguistics, and urban planning, and an associated faculty from a variety of disciplines. The center's location in Los Angeles, home to the largest community of Mexican origin in the nation as well as to several other Latino groups, places it in a unique position to draw from this large and diverse population — social experiences, historical realities, cultural practices, linguistic attributes, and literary and artistic productions.

The interdisciplinary program is an effective environment for teaching fundamental academic skills such as critical thinking and writing, as well as for exposing students to the wide range of theories, methodologies, technologies, and pedagogies that intersect the discipline. The major prepares students for graduate education in professional and academic fields and for a variety of positions that involve community and social service in the U.S. and abroad. To that end, the bilingual curriculum is learner-centered, writing-intensive, and academically rigorous.

The Chávez Center is committed to the practice of different forms of scholarship and pedagogy and to the promotion of critical thinking about such issues as gender, sexuality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions. The literary and visual arts often function as vehicles for social change and creative empowerment, and so they constitute one major focus of the center's curriculum. The center, in its teaching, research, and service, aims to strike a balance among the social sciences, humanities, and the arts.

Undergraduate Study**Chicana and Chicano Studies B.A.**

The B.A. program in Chicana and Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicana/Chicano experience. Viewed as developmental, the program subjects the Chicana/Chicano reality to critical investigation, including social, economic, educational, historical, and political analysis. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major

Required: Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

The Major

Required: A total of 15 upper division courses, including Chicana and Chicano Studies 101, nine courses from the approved list of Chicana and Chicano Studies courses (available in the program office each term), one term of field studies, and three related study courses and one advanced seminar from the approved list of courses or by petition to the program director or undergraduate counselor. Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Recommended: English Composition 110W; Information Studies 111C; the introductory course in two of the following: anthropology, economics, history, political science, sociology; one or more courses in Chicana/Chicano history, literature, feminism, social science.

Optional Multidisciplinary Senior Thesis

Chicana and Chicano Studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing an undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and writing of the thesis.

Course Limitations

No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the program director. No more than two CED courses may be applied toward the major concentration.

Chicana and Chicano Studies Specialization

The Chicana and Chicano Studies specialization complements study in a traditional field. Students participating in this specialization are required to complete both a departmental major and the Chicana and Chicano Studies specialization. Students must take Chicana and Chicano Studies 10A, 10B, 101, and four courses from the approved list of Chicana and Chicano Studies courses (available in the program office each term).

Chicana and Chicano Studies**Lower Division Courses**

10A. Introduction to Chicano Life and Culture. (4) Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano Studies majors. Introduction to central concepts and historical experiences which define Chicano culture, from exploring indigenous roots to examining current trends. Emphasis on diversity of the Chicano experience, gender as a central cultural variable, and particular socioeconomic conditions which have shaped cultural response.

10B. Chicanos in American Society. (4) Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano Studies majors. Examination of conditions of Chicanos in the U.S., with particular attention to socioeconomic aspects of their experience. Additional emphasis on examination of role of women in both a family context and the workplace.

Upper Division Courses

101. Theoretical Concepts in Chicana and Chicano Studies. (4) Lecture, three hours. Enrollment priority to Chicana and Chicano Studies majors and students in the specialization. Examination of following theoretical concepts and practical concerns: self-definition, relationship between educational institutions and the Chicana/Chicano community, nature of critical Chicana/Chicano specific research, basic issues in Chicana/Chicano culture, and current problems facing the Chicano/Latino community.

M102. The Mexican American and the Schools. (4) (Same as Education M102.) Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

M103C. Origins and Evolution of Chicano Theater. (4) (Same as Theater M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

- M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4)** (Same as Theater M103D and World Arts and Cultures M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.
- M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4)** (Same as Theater M103H and World Arts and Cultures M103H.) Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.
- M105A. Early Chicana/Chicano Literature. (4)** (Formerly numbered M105.) (Same as English M105A.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.
- M105B. Recent Chicana/Chicano Literature. (4)** (Formerly numbered M105.) (Same as English M105B.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.
- M108A. Music of Latin America: Mexico, Central America, and the Caribbean Isles. (4)** (Same as Ethnomusicology M108A.) Lecture, four hours; discussion, one hour. Survey of traditional and contemporary musical culture.
- 109. Chicana/Chicano Folklore. (4)** Lecture, four hours. Examination of roots of Chicana/Chicano folklore in Mexican oral tradition in the mid-19th century and development of Chicana/Chicano folklore to the present day. P/NP or letter grading.
- M110. Chicana Feminism. (4)** (Same as Women's Studies M132A.) Lecture, three hours. Requisite: Women's Studies 10. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.
- M114. Chicanos in Film/Video. (6)** (Same as Film and Television M117.) Lectures/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent "greaser" films, social problem films, the Western, and the gang films — which are major genres that account for films "about" or "with" Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or "signify" on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.
- M115. Musical Aesthetics in Los Angeles. (4)** (Same as Ethnomusicology M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.
- M116. Chicano/Latino Music in the U.S. (4)** (Same as Ethnomusicology M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples that have inhabited present geographical boundaries of the U.S.
- 120. Immigration and the Chicano Community. (4)** Lecture, three hours. Discussion on relationship between international immigration and development of the Chicana/Chicano community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants.
- 121. Issues in Latina/Latino Poverty. (4)** Lecture, three hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in the U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on the underclass.
- 122. Planning Issues in Latina/Latino Communities. (4)** Lecture, three hours. Exploration of socio-economic, demographic, and political forces that shape low-income communities and analyses of planning intervention strategies. Emphasis on community and economic development and environmental equity.
- 123. Applied Research Methods in Latino Communities. (4)** Lecture, three hours. Through combination of lectures, key readings, and several experiments, introduction to several applied research methods that are highly effective in producing sound and methodologically rigorous studies on poor and/or Latino communities, including important data that can be used for critical analysis and policy recommendations.
- 125. U.S./Mexico Relations. (4)** Lecture, three hours. Examination of complex dynamics in relationship between Mexico and the U.S., using a political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries.
- 131. Barrio Popular Culture. (4)** Lecture, three hours. Construction of a model by which to organize study of Chicano/Chicana popular culture by focusing on the barrio as a metaphor for community. Examination of beliefs, myths, and values of Chicano/Chicana culture and representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history.
- 132. Border Consciousness. (4)** Lecture, three hours. Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and the U.S. Special attention to border consciousness as site of conflict and resistance.
- M133. Chicana Lesbian Literature. (4)** (Formerly numbered 133.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.
- 134. Exhibiting Cultures. (4)** Lecture, three hours. Analysis, through a cultural studies perspective, of exhibitions of Chicana/Chicano and Latina/Latino art that have occupied space in mainstream museums across the U.S. since the mid-1980s. Examination of how these shows both serve and subvert a multicultural agenda in the art world and how political identities are packaged and produced in process of exhibition-making. Field trips to local museums.
- M145A-M145B. Introduction to Chicano Literature. (4-4)** (Same as Spanish M145A-M145B.) Lecture, three hours. Requisite: Spanish 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. **M145A.** Literature to 1960; **M145B.** Literature after 1960.
- M146. Chicano Narrative. (4)** (Same as Spanish M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.
- M147A. Ethnic Politics: Chicano/Latino Politics. (4)** (Same as Political Science M144A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: Political Science 40. Designed for juniors/seniors. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.
- M154. Contemporary Issues among Chicanas. (4)** (Same as Women's Studies M132B.) Requisite: Women's Studies 10. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas.
- M155. Latinos in the U.S. (4)** (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Requisite: Sociology 1. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.
- M159A. History of the Chicano Peoples. (4)** (Same as History M159A.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.
- M159B. History of the Chicano Peoples. (4)** (Same as History M159B.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.
- 160. Introduction to Chicana/Chicano Speech in American Society. (4)** Lecture, three hours. Survey course presenting (1) basic elements of Chicano language use, including history of Chicano languages, types and social functions of Chicano speech (*pachuco*, *caló*, Spanglish), sexist language, and multilingualism and monolingualism and (2) major social issues associated with language use by Chicanos and other urban ethnic populations.

161. Chicano Sociolinguistics. (4) Lecture, three hours. Requisite: course 160. Exploration of various theories of sociolinguistics, social/cultural change, ethnicity, and power to develop a cohesive model of Chicano sociolinguistics. Topics include histories and typology of Chicano language varieties, language change and maintenance/loss, language attitude studies, and American social institutional (media, educational, legal) responses to Chicano presence.

162. Language Research in the Barrio. (4) Lecture/practicum, three hours. Requisite: course 160. Group-oriented practicum to gather, record, and analyze languages spoken in the Chicano community, using scientific methods. Development of research agenda and research instrument, gathering of actual speech and its analysis, and writing of final report under guidance of instructor. Student-selected research topics have included language use in the barrio, media portrayals of Latinos, and societal and educational attitudes toward language use of Latinos. Introduction to oral history, sociolinguistic interviewing, and social science methodology.

165. Language in Education. (4) Lecture, three hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and socialization, as well as institutional ideologies.

168. Representations of Latinos in Print Media. (4) Lecture/research, three hours. Examination of systemic (mis)representations of Latinos by a print media source (*Los Angeles Times*) by means of critical discourse analysis and metaphor theory. Investigation of empirical basis for theories of racism in language in this context. Student projects range from immigration to education and crime to culture.

M172V. Culture Change and the Mexican People. (4) (Same as Anthropology M172V.) Lecture, three hours. Requisite: course 10A or 10B or Anthropology 9. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscegenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

180. City and Community: History of Chicana/Chicano Los Angeles, 1848 to 1945. (4) Lecture, three hours. Examination of history of Los Angeles from 1848 to 1945, with emphasis on formation of disparate and adverse communities within larger urban region of Southern California.

181. City and Community: History of Chicana/Chicano Los Angeles, 20th Century. (4) Lecture, three hours. History of Mexican American people in 20th-century Los Angeles. Readings and lectures emphasize formation of a regional identity among Mexican Americans in Los Angeles and their significance to emergence of a multicultural metropolis.

182. Understanding Whiteness in American History and Culture. (4) Seminar, three hours. History, construction, and representation of whiteness in American society. Readings and discussions trace evolution of a "white" identity and explore its significance to historical construction of race class in American history.

M186A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4) (Formerly numbered M166.) (Same as Art M186A and World Arts and Cultures M166A.) Studio/lecture, six hours. Corequisite: course M186AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

M186AL-M186BL-M186CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2) (Same as Art M186AL-M186BL-M186CL and World Arts and Cultures M166AL-M166BL-M166CL.) Laboratory, two hours. Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M186AL.** Beginning; **M186BL.** Intermediate; **M186CL.** Advanced.

M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Art M186B and World Arts and Cultures M166B.) Studio/lecture, six hours. Requisites: courses M186A/M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Art M186C and World Arts and Cultures M166C.) Studio/lecture, six hours. Requisites: courses M186B/M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M188. Whose Monument Where: Course on Public Art. (4) (Formerly numbered M167.) (Same as Art M188 and World Arts and Cultures M167.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

197A-197Z. Special Topics in Chicana and Chicano Studies. (4) Lecture, three hours. Some sections may require prior coursework. Lecture or seminar format on selected topics in Chicana and Chicano studies. May be repeated for credit.

M197B. Topics in Chicana/Chicano Literature. (Same as English M197B.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Chicana/Chicano literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

199. Independent Studies. (2 to 4) Requisites: courses 10A, 10B. Limited to juniors/seniors. Intensive directed research program. May be repeated for a maximum of eight units.

Related Courses

Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Anthropology

- 113Q. Prehistory and Ethnography of California
- 113R. Southwestern Archaeology
- 114P. Ancient Civilizations of Western Middle America (Nahautl Sphere)
- 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)
- M154P. Gender Systems: North American
- M154Q. Gender Systems: Global
- 172R. Cultures of the Pueblo Southwest

Art History

- C117A. Pre-Columbian Art of Mexico
- C117B. Pre-Columbian Art of the Maya

English

- M102A. Asian American Literature to 1980
- M104A. Early Afro-American Literature
- 106. Native American Literary Studies

Ethnomusicology

- 106A-106B-106C. Music of the American Indians
- 108B. Music of Latin America: Latin South America
- M110A-M110B. African American Musical Heritage

Film and Television

- 112. Film and Social Change

Folklore and Mythology

- 130. North American Indian Folklore and Mythology Studies
- M149. Folk Literature of the Hispanic World

Geography

- 144. Ethnicity in the American City
- 156. Metropolitan Los Angeles
- 181. Mexico, Central America, Caribbean

History

- 157A-157B. North American Indian History
- M158B. Introduction to Afro-American History
- 161. Asians in American History
- 162. American West
- 163. History of California
- 164. History of Los Angeles
- 165A. Early Latin America
- 165C. Indians of Colonial Mexico
- 166. Latin America in the 19th Century
- 168. History of Latin American International Relations
- 169. Latin American Elitology
- 170A. Latin American Cultural History
- 171. Mexican Revolution since 1910

Political Science

- 130. Politics of Latin American Economic Development
- 131. Latin American International Relations
- M144B. Ethnic Politics: African American Politics

Sociology

- 107. Urban Poverty and Public Policy in the U.S. (Field Component)
- 144. Urban Poverty and Public Policy in the U.S.
- 156. Ethnic and Status Groups
- 160. Intergroup Conflict and Prejudice
- M161. Comparative American Indian Societies
- 186. Latin American Societies
- M196A-19M6B. Contemporary Issues in Urban Poverty Research

Spanish (Spanish and Portuguese)

- 107. The Spanish of Southern California
- 144. Mexican Literature
- M149. Folk Literature of the Hispanic World

World Arts and Cultures

- 150. Viewing Native American Culture
- M152. Asian American Aesthetics

Panagiotis Christofides, Ph.D.
Michael W. Deem, Ph.D.

Scope and Objectives

The Department of Chemical Engineering conducts undergraduate and graduate programs of teaching and research in the areas of thermodynamics, statistical mechanics, mass transfer, catalysis, semiconductor materials processing, plasma processing, electrochemistry and corrosion, high-temperature chemical kinetics, reaction engineering, combustion science, environmental reaction engineering, cryogenics and low-temperature processes, biochemical engineering, process systems engineering, process integration, computer-aided process design and control, particle technology, pollution control, pollution prevention, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes bioengineering, biomedical engineering, and environmental options. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

Undergraduate Study

Chemical Engineering B.S.

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering, biomedical engineering, and environmental options exist as subsets of courses within the accredited curriculum. Balance is sought between science and engineering practice.

The Major

Course requirements are as follows (194 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30, 113A, 130A/130AL, 171.

(3) Two elective courses from Chemical Engineering 110, C111, 112, 113, C114, C115, C116, C118, 119, C125, C140, CM165, and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A). An upper division life or physical sciences course may be substituted for one chemistry elective with the approval of the faculty adviser.

(4) Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Bioengineering Option

Course requirements are as follows (200 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30, 130A/130AL, 153A, 156; Life Sciences 4 or Microbiology and Molecular Genetics 101.

(3) Two elective courses from Chemical Engineering C115, C125, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser); one upper division microbiology or molecular, cell, and developmental biology elective that requires one year of chemistry as a requisite.

(4) Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 2, 3; Mathematics 31A, 31B,

32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Biomedical Engineering Option

Course requirements are as follows (198 minimum units required):

(1) One general engineering course: Chemical Engineering M105A.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30, 130A/130AL, 153A, 156; Life Sciences 4 or Microbiology and Molecular Genetics 101.

(3) Two elective courses from Chemical Engineering C115, C125, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser); one upper division microbiology or molecular, cell, and developmental biology elective that requires one year of chemistry as a requisite and contains a laboratory component (laboratory component may be taken from a separate course).

(4) Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Environmental Option

Course requirements are as follows (199 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 30, 113A, 130A/130AL, 171.

(3) Two elective courses from Chemical Engineering 113, C118, 119, C140, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser) and three advanced chemistry electives in the environmental field from Atmospheric Sciences M203A, Chemistry and Biochemistry 103, 110B, Environmental Health Sciences 240, 241, 261, Organismic Biology, Ecology, and Evolution M127 (other advanced chemistry courses may be selected in consultation with the faculty adviser).

(4) Atmospheric Sciences 2A; Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A,

31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Chemical Engineering offers the Master of Science (M.S.) degree in Chemical Engineering.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.chemeng.ucla.edu>. In addition, the forms may be obtained by writing to the Chemical Engineering Department, UCLA, 5531 Boelter Hall, Box 951592, Los Angeles, CA 90095-1592, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study

Consult the department.

Course Requirements

The requirements for a M.S. degree are a thesis, nine courses (36 units), and a 3.0 grade-point average in the graduate courses. Chemical Engineering 200, 210, and 220 are required for all master's degree candidates. Two courses must be taken from offerings in the Chemical Engineering Department, while two Chemical Engineering 598 courses involving work on the thesis may also be selected. The remaining two courses may be taken from

those offered by the department or any other field in life sciences, physical sciences, mathematics, or engineering. At least 24 units must be in letter-graded 200-level courses.

All master's degree candidates are required to enroll in the seminar, Chemical Engineering 299, during each quarter of residence.

A program of study which encompasses these requirements must be submitted to the departmental Student Affairs Office for approval before the end of the student's second quarter of residence.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Comprehensive Examination Plan

None.

Thesis Plan

Consult the graduate adviser.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the program leading to the Ph.D. degree in Chemical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program that can remedy any deficiencies.

Application forms, including a departmental supplement to the application, may be obtained online at <http://www.chemeng.ucla.edu>. In addition, the forms may be obtained by writing to the Chemical Engineering Department, 5531 Boelter Hall, Box 951592, Los Angeles, CA 90095-1592, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

All Ph.D. students are required to take six courses (24 units). Three of these are Chemical Engineering 200, 210, and 220. Two additional courses must be taken from those of-

fered by the Chemical Engineering Department. The third course can be selected from offerings in life sciences, physical sciences, mathematics, or engineering. All of these units must be in letter-graded 200-level courses. Students are encouraged to take more courses in their field of specialization. These minor field courses should be selected in consultation with their research adviser. A 3.33 grade-point average in graduate courses is required. A program of study to fulfill the course requirements must be submitted for approval to the departmental Student Affairs Office no later than one quarter after successful completion of the preliminary oral examination.

All Ph.D. students are required to enroll in the Chemical Engineering Department's graduate seminar during each quarter of residence.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations

All Ph.D. students are required to take a preliminary oral examination that tests their understanding of chemical engineering fundamentals in the areas of thermodynamics, transport phenomena, chemical kinetics and reactor design. Students are provided problems in writing, and are then asked to solve them orally in front of a faculty committee. Students are required to take Chemical Engineering 200, 210, and 220 in preparation for the examination. Students whose first degree is in chemical engineering take the examination at the end of the second quarter in residence. Students whose first degree is not in chemical engineering (for example, chemistry) may petition to postpone the examination to the following year. Any student failing the Ph.D. preliminary examination may petition to reenter the Ph.D. program after successfully completing the master's thesis. If the petition is granted, then the student takes the preliminary examination concurrently with the master's thesis defense.

After successfully completing the required courses and the preliminary oral examination, students must pass the written and oral qualifying examinations. The examinations focus on the dissertation research and are conducted by a doctoral committee consisting of at least four faculty members nominated by the Department of Chemical Engineering, in accordance with University regulations.

The written qualifying examination consists of a dissertation research proposal that provides a clear description of the problem considered, a literature review of the current state of the art, and a detailed explanation of the approach to be followed to solve the problem. Students first present their ideas for the dissertation research at a precandidacy seminar administered by departmental faculty members of the doctoral committee. The seminar is held during the early part of the Winter Quarter of the second year of residency. Following the seminar,

students submit the dissertation research proposal to the doctoral committee. The written examination is due in the seventh week of the Winter Quarter.

The University Oral Qualifying Examination consists of an oral defense of the dissertation research proposal and is administered by the doctoral committee. The oral examination is held within two weeks of submitting the written examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

Chemical Engineering

Lower Division Course

2. Technology and the Environment. (4) Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO₂ cycles), stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of life-cycle methods for evaluating environmental impact of processes and products. P/NP or letter grading.

Upper Division Courses

100. Introduction to Chemical Engineering. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 11C/11CL, Mathematics 32B (may be taken concurrently), Physics 8B. Introduction to analysis and design of industrial chemical processes. Material and energy balances. Letter grading.

101A. Momentum Transfer. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: course M105A, Mathematics 33A, 33B. Corequisite: course 109. Introduction to analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton law of viscosity, Navier/Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects. Letter grading.

101B. Heat Transfer. (4) Lecture, four hours; discussion, one hour. Requisite: course 101A. Introduction to analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal energy transport, Fourier law of heat conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis. Letter grading.

101C. Mass Transfer. (4) Lecture, four hours; discussion, one hour. Requisites: courses 100, 101B, 102. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport, Fick law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems. Letter grading.

102. Chemical Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium. Chemical reaction equilibrium. Letter grading.

103. Separation Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. Letter grading.

104A. Chemical Engineering Laboratory I. (6) Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 100, 101B, 102. Measurements of temperature, pressure, flow rate, viscosity, and fluid composition in chemical processes. Methods of data acquisition, equipment selection and fabrication, and laboratory safety. Development of written and oral communication skills. Letter grading.

104B. Chemical Engineering Laboratory II. (6) Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Letter grading.

M105A. Introduction to Engineering Thermodynamics. (4) (Same as Mechanical and Aerospace Engineering M105A.) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: Mathematics 32B, Physics 1B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

106. Chemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to analysis and design of homogeneous and heterogeneous chemical reactors. Letter grading.

107. Process Dynamics and Control. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C, 103, 106. Principles of dynamics modeling and start-up behavior of chemical engineering processes. Chemical process control elements. Design and applications of chemical process computer control. Letter grading.

108A. Process Economics and Analysis. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. Letter grading.

108B. Chemical Process Computer-Aided Design and Analysis. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 106, 108A, Computer Science 10F. Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations. Letter grading.

109. Mathematical Methods in Chemical Engineering. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Preparation: working knowledge of FORTRAN programming. Discussion of theory and applications of mathematics to chemical engineering problems, with focus on numerical and analytical techniques encompassing linear and nonlinear algebraic equations, finite difference methods, and ordinary and partial differential equations. Letter grading.

110. Intermediate Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 102. Principles and engineering applications of statistical and phenomenological thermodynamics. Determination of partition function in terms of simple molecular models and spectroscopic data; nonideal gases; phase transitions and adsorption; nonequilibrium thermodynamics and coupled transport processes. Letter grading.

C111. Cryogenics and Low-Temperature Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C211. Letter grading.

112. Polymer Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: course 101A, Chemistry 30. Formation of polymers, criteria for selecting a reaction scheme, polymerization techniques. Polymer characterization. Mechanical properties. Rheology of macromolecules, modeling and experimental methods to characterize non-Newtonian fluids. Polymer process engineering. Letter grading.

113. Air Pollution Engineering. (4) Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Integrated approach to air pollution, including concentrations of atmospheric pollutants, air pollution standards, air pollution sources and control technology, and relationship of air quality to emission sources. Links air pollution to multimedia environmental assessment. Letter grading.

C114. Electrochemical Processes and Corrosion. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C214. Letter grading.

C115. Biochemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C215. Letter grading.

C116. Surface and Interface Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and surfaces, structures adopted by crystalline materials, analysis of structure and composition of crystals and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C216. Letter grading.

C118. Multimedia Environmental Assessment. (4) Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C218. Letter grading.

119. Pollution Prevention for Chemical Processes. (4) Lecture, four hours; recitation, one hour; preparation/outside study, seven hours. Requisite: course 108A. Waste audits and emission inventories, process design and process flowsheeting for waste minimization, economic analysis of environmental projects, life-cycle analyses. Letter grading.

C125. Bioseparations and Bioprocess Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C225. Letter grading.

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

C140. Fundamentals of Aerosol Technology. (4) Lecture, four hours; outside study, eight hours. Requisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C240. Letter grading.

CM165. Bioprocess Technology. (4) (Same as Microbiology CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Requisites: course C115, Chemistry 156, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

200. Advanced Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 102. Phenomenological and statistical thermodynamics of chemical and physical systems with engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas. S/U or letter grading.

210. Advanced Chemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C, 106. Principles of chemical reactor analysis and design. Particular emphasis on simultaneous effects of chemical reaction and mass transfer on noncatalytic and catalytic reactions in fixed and fluidized beds. S/U or letter grading.

C211. Cryogenics and Low-Temperature Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C111. Letter grading.

C214. Electrochemical Processes and Corrosion. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C114. S/U or letter grading.

C215. Biochemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115. Letter grading.

C216. Surface and Interface Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and surfaces, structures adopted by crystalline materials, analysis of structure and composition of crystals and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C116. Letter grading.

217. Electrochemical Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: course C114. Transport phenomena in electrochemical systems; relationships between molecular transport, convection, and electrode kinetics, along with applications to industrial electrochemistry, fuel cell design, and modern battery technology. S/U or letter grading.

C218. Multimedia Environmental Assessment. (4) Lecture, four hours; preparation, two hours; outside study, six hours. Requisites: courses 101C, 102. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C118. Letter grading.

220. Advanced Mass Transfer. (4) Lecture, four hours; outside study, eight hours. Requisite: course 101C. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport. S/U or letter grading.

223. Design for Environment. (4) Lecture, four hours; outside study, eight hours. Limited to graduate chemical engineering, materials science and engineering, or Master of Engineering program students. Design of products for meeting environmental objectives; life-cycle inventories; life-cycle impact assessment; design for energy efficiency; design for waste minimization, computer-aided design tools, materials selection methods. Letter grading.

C225. Bioseparations and Bioprocess Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C125. Letter grading.

230. Reaction Kinetics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 106, 200. Macroscopic descriptions: reaction rates, relaxation times, thermodynamic correlations of reaction rate constants. Molecular descriptions: kinetic theory of gases, models of elementary processes. Applications: absorption and dispersion measurements, unimolecular reactions, photochemical reactions, hydrocarbon pyrolysis and oxidation, explosions, polymerization. S/U or letter grading.

231. Molecular Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 106 or 110. Analysis and design of molecular-beam systems in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis. S/U or letter grading.

232. Combustion Processes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 106, 200, or Mechanical and Aerospace Engineering 132A. Fundamentals: change equations for multicomponent reactive mixtures, rate laws. Applications: combustion, including burning of (1) premixed gases or (2) condensed fuels. Detonation. Sound absorption and dispersion. S/U or letter grading.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

234. Plasma Chemistry and Engineering. (4) Lecture, four hours; outside study, eight hours. Designed for graduate chemistry or engineering students. Application of chemistry, physics, and engineering principles to design and operation of plasma and ion-beam reactors used in etching, deposition, oxidation, and cleaning of materials. Examination of atomic, molecular, and ionic phenomena involved in plasma and ion-beam processing of semiconductors, etc. Letter grading.

C240. Fundamentals of Aerosol Technology. (4) Lecture, four hours; outside study, eight hours. Requisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C140. Letter grading.

250. Computer-Aided Chemical Process Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal design and operation of large-scale chemical processing systems. S/U or letter grading.

260. Non-Newtonian Fluid Mechanics. (4) Lecture, four hours; outside study, eight hours. Requisite: course M105A. Principles of non-Newtonian fluid mechanics. Stress constitutive equations. Rheology of polymeric liquids and dispersed systems. Applications in viscometry, polymer processing, biorheology, oil recovery, and drag reduction. S/U or letter grading.

CM265. Bioprocess Technology. (4) (Same as Microbiology CM265.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Requisites: course C115, Chemistry 156, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165. Letter grading.

M280A. Linear Dynamic Systems. (4) (Same as Electrical Engineering M240A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

M280C. Optimal Control. (4) (Same as Electrical Engineering M240C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 240B or Mechanical and Aerospace Engineering 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

M282A. Nonlinear Dynamic Systems. (4) (Same as Electrical Engineering M242A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requisite: course M280A or Electrical Engineering M240A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

290A-290Z. Special Topics. (2 to 4 each) Seminar, to be arranged. Requisites for each offering announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit with topic change. S/U or letter grading.

M290U. Toxics Reduction: Science, Engineering, and Policy Issues. (4) (Same as Environmental Health Sciences M249 and Urban Planning M262A.) Lecture, three hours. Requisites: Urban Planning 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. S/U or letter grading.

298A-298Z. Research Seminars. (2 to 4 each) Seminar, to be arranged. Requisites for each offering announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.

299. Departmental Seminar. (2) Seminar, two hours. Limited to graduate chemical engineering students. Seminars by leading academic and industrial chemical engineers on development or application of recent technological advances in the discipline. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate chemical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Seminar, to be arranged. Limited to graduate chemical engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate chemical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate chemical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate chemical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Adjunct Associate Professor

Robert W. Armstrong, Ph.D. (*Organic and Bioorganic Chemistry*)

Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

Undergraduate Study

Admission

Students entering UCLA directly from high school who declare a Chemistry or Biochemistry major at the time of application are automatically admitted to that major.

UCLA students who wish to enter one of the majors must have a minimum grade of C– in each of the preparation for the major courses completed **and** a combined grade-point average of at least 2.0 in those courses. Grades in any completed courses for the major must also average at least 2.0.

Transfer students with more than 105 quarter units are accepted into the departmental majors only if they have completed one year of general chemistry with laboratory, one year of calculus, and either one year of calculus-based physics or one year of organic chemistry with laboratory. *Biochemistry* majors also should have completed courses equivalent to Life Sciences 2 and 3; *Chemistry* majors should have completed the equivalent of Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 30. Transfer students should consult the department's Undergraduate Advising Office in 4009 Young Hall for assistance with the articulation of transfer coursework.

Chemistry Diagnostic Examination for First-Term General Chemistry

Students planning to enroll in Chemistry and Biochemistry 14A or 20A are required to pass the Chemistry Diagnostic Examination, which is administered at all first-year sessions of the summer Orientation Program and prior to the beginning of each term. For the dates and times of future examinations and a list of topics, refer to <http://www.chem.ucla.edu/dept/Ugrad/chemexam.html>. Scores are valid for two academic years only.

Students who do not pass the examination may enroll in Chemistry 17, offered only during Fall Quarter on a Passed/Not Passed basis. Chemistry 17 carries no graduation credit but does displace four units on the UCLA Study

List. Students who pass this course are not required to retake the Chemistry Diagnostic Examination.

Advanced Placement in Chemistry

Students who have taken the Advanced Placement (AP) Chemistry Test and obtained a score of 4 or 5 receive eight units of chemistry credit and may petition for chemistry and biochemistry equivalency, or may take course 20A at UCLA. Everyone planning to take Chemistry and Biochemistry 14A or 20A **must** take the Chemistry Diagnostic Examination. If students received a score of 3 on the AP Chemistry Test, they receive eight units of chemistry credit but no course equivalency.

Credit Limitations

Students may not take or repeat a chemistry or biochemistry course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Chemistry and Biochemistry 20A, they must do so before completing course 20B).

Undergraduate Majors

The department offers three majors: Chemistry (with concentrations in chemistry and physical chemistry), Biochemistry, and General Chemistry. The Chemistry and Biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The General Chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Requirements for the majors are outlined below. For additional information, contact the Undergraduate Advising Office in 4009 Young Hall.

Chemistry B.S.

The B.S. degree program is for students who intend to pursue a career in chemistry.

Chemistry Concentration

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4BL.

The Major

Required: Chemistry and Biochemistry 30, 110A, either 110B or 113B, 113A, 114 (or 114H), 130A/130AL, 130B/130BL, either 136 or 144, 153A, 153L, 171, 172, and two other upper division or graduate courses in the de-

partment, including at least one additional laboratory course from 136, 144, 154, 174, 184.

Physical Chemistry Concentration

The physical chemistry concentration is designed primarily for students who are interested in attending graduate school in physical chemistry/physics.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4BL. To be admitted, students must complete the preparation courses with a grade-point average of 3.0 or better and file a petition with the Undergraduate Advising Office.

The Major

Required: Chemistry and Biochemistry 30, 110A, 110B, 113A, 113B, 114 (or 114H), 130A/130AL, 153A, 171, 172; one additional upper division chemistry, electrical engineering, or physics laboratory course; and three additional elective courses selected from upper division or graduate courses in biophysical chemistry, electrical engineering, mathematics, physical chemistry, physical inorganic chemistry, physical organic chemistry, or physics and approved by the physical chemistry adviser. Refer to the Undergraduate Advising Office website at <http://www.chem.ucla.edu/dept/Ugrad/> for a list of approved electives.

By the junior year, students are strongly encouraged to join a research group within the physical chemistry division to obtain firsthand experience with state-of-the-art physical chemistry research.

Biochemistry B.S.

The B.S. degree program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17) and 4BL, or 6A, 6B, and 6C.

The Major

Required: Chemistry and Biochemistry 30, 110A, 130A/130AL, 130B/130BL, 153A, 153B, 153C, 153L, 154, 156, 171; one additional upper division or graduate course in chemistry and biochemistry; four elective upper division or graduate courses (16 units) approved by the undergraduate adviser (Microbiology and Molecular Genetics 101 and 101L highly recommended). Refer to the Undergraduate Advising Office website at <http://www.chem.ucla.edu/dept/Ugrad/> for a list of approved electives.

General Chemistry B.S.

The B.S. degree program is for students who wish to acquire considerable chemical back-

ground in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of pharmacy, dentistry, or public health. This major cannot be taken as part of a double major. Students must declare the major before reaching 135 units.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4BL.

Students must complete the preparation courses with at least a 2.0 grade-point average.

The Major

Required: Chemistry and Biochemistry 30, 110A, 130A/130AL, 130B/130BL, 153A, 153L, 171; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 grade-point average is required in all upper division courses in the department. Acceptance into the major is based on an original written proposal that is coherent in terms of student interests and objectives. The proposal should specify which courses students plan to apply toward the major and requires the approval of the faculty adviser.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Chemistry and Biochemistry offers Master of Science (M.S.) degrees in Chemistry and in Biochemistry and in Molecular Biology.

Admission

Applicants planning to work toward the Ph.D. degree should not seek an M.S. degree first but should apply directly to the Ph.D. program.

Application materials for the M.S. programs in Chemistry and in Biochemistry and Molecular Biology may be obtained by contacting the department directly.

Areas of Study

Biochemistry and molecular biology; inorganic, organic, and physical chemistry.

Course Requirements

Chemistry. At least nine quarter courses (36 units) are required, of which at least five (20 units) must be graduate courses and the re-

mainder upper division courses. Students must take a minimum of two courses in their major area and one course in an outside area. Choices may be made from the following:

Inorganic: Chemistry and Biochemistry 174, 207, 271A through 271Z, C275, C276A, 276B, 277, 279, C280, C281.

Organic: Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, C281.

Physical: Chemistry and Biochemistry C215A, C215B, 215C, 215D, C223A, C223B, 223C, 225.

Substitutions may be made with consent of the area adviser. With the consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Biochemistry and Molecular Biology. Thirty-six units of coursework are required. At least 20 of the 36 units must be at the graduate level (courses numbered 200 and above), while the remaining units may be upper division undergraduate courses (courses numbered from 100 to 199). Required courses include Chemistry and Biochemistry CM253 (six units) and at least six additional units of graduate level lecture courses chosen from a list of approved graduate courses available from the graduate adviser. Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement. Up to six units of graduate-level seminar courses may be applied to the graduate course requirement.

Comprehensive Examination Plan

Chemistry. In exceptional cases, the comprehensive examination plan is used in lieu of a thesis. Under this plan, students may apply an additional six units of Chemistry and Biochemistry 597 and six units of Chemistry and Biochemistry 228, 248, or 278 toward the graduate course requirement and the total course requirement. The comprehensive examination plan requires the satisfactory completion of three cumulative examinations.

Biochemistry and Molecular Biology. In exceptional cases, a comprehensive examination is administered in lieu of a thesis. The written examination is administered and graded by a faculty committee selected by the graduate adviser and is graded pass or fail. For students who fail, recommendation for or against a second examination is made by the graduate adviser.

Thesis Plan

Chemistry. The thesis plan is the preferred method of attaining the M.S. in Chemistry.

Biochemistry and Molecular Biology. The thesis plan is the preferred method of attaining the M.S. in Biochemistry and Molecular Biology. By the sixth week of the first quarter in residence, a master's committee is appointed for each student consisting of the faculty research adviser and two additional faculty members chosen by the graduate adviser. The committee has the responsibility for approving or disapproving the master's thesis. By the end of the first quarter, the student is required to submit a brief written research proposal for approval by the master's committee. Students have five academic quarters after the submission of the proposal to complete the degree.

Doctoral Degrees

Admission

In addition to the University minimum requirements, an excellent undergraduate record is required of all applicants to the programs leading to the Ph. D. degrees in Chemistry and in Biochemistry and Molecular Biology. Graduate Record Examination (GRE) General and Subject Tests are recommended. The GRE and the Test of English as a Foreign Language (TOEFL) are required for international students.

Each student admitted to graduate standing in chemistry is given orientation examinations at the beginning of the first quarter. This is designed to help the student and the adviser plan a course program. The examinations include material covered in upper division courses in physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

There are no orientation examinations in biochemistry and molecular biology; the student plans a course program in consultation with the biochemistry graduate adviser. Preference in admission is given to those students who have already identified a faculty research adviser under whose direction the thesis research is conducted.

Chemistry students are encouraged to become familiar with research activities of all faculty in their area of interest and to join a research group as soon as possible.

Biochemistry and molecular biology students rotate through three research groups during the Fall, Winter, and Spring Quarters, with a final selection made at the end of the Spring Quarter.

Application materials may be obtained by writing to the department. Students may also be admitted to the biochemistry and molecular biology program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, Box 951570, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

Biochemistry; inorganic, organic, and physical chemistry.

Course Requirements

Chemistry. Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If the projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, students may be permitted appropriate modifications.

Inorganic Chemistry: (1) Required background material: Chemistry and Biochemistry 172; (2) Chemistry and Biochemistry 174, C275, C276A, 276B; (3) two courses from Chemistry and Biochemistry 153C, 207, C213B, C215A, C215B, 215D, C223A, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 271A through 271Z, 279, C280, C281, or other graduate courses with the approval of the area adviser; (4) Chemistry and Biochemistry 278.

Organic Chemistry: (1) Required background material: Chemistry and Biochemistry 30, 130A, 130B, 136; (2) Chemistry and Biochemistry C243A, C243B, 244A, 244B; (3) four courses from Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, 245, C281, or outside areas with approval of the organic area adviser; (4) Chemistry and Biochemistry 248.

Physical Chemistry: (1) Required background material: Chemistry and Biochemistry 110A, 110B, 113A; (2) Chemistry and Biochemistry C215A-C215B, C223A-C223B, or equivalent; (3) Chemistry and Biochemistry 228 each term; (4) one term of Chemistry and Biochemistry 218 (for presentation of research).

Biochemistry and Molecular Biology. Candidates should normally complete as a minimum the coursework indicated below. Some of the requirements can be met on the basis of courses taken prior to entry into the graduate program with consent of the graduate adviser. Required coursework must be completed prior to advancement to candidacy.

(1) Required background material: one year of organic chemistry, one course in physical chemistry or biophysical chemistry, one year of biochemistry, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission.

(2) Chemistry and Biochemistry CM253 (six units), which should be taken in the first year.

(3) Fourteen units of additional upper division or graduate-level lecture courses, at least 10 of which should be completed in the first year. These courses are to be chosen from the following three categories: (a) cell biology and metabolism; (b) biophysical, bioorganic, and bioinorganic chemistry; (c) genetics and integrative biology. A list of available courses in these three categories is maintained by the graduate adviser. No more than 10 units from any one of the three categories may be applied.

(4) Chemistry and Biochemistry 258 during the first four quarters. Seminars offered in other departments may be substituted with permission of the graduate adviser.

(5) Chemistry and Biochemistry 268 during the first three quarters.

(6) Three laboratory rotations (Chemistry and Biochemistry 596) during the first year.

Written and Oral Qualifying Examinations

Chemistry. Rather than a single comprehensive examination, the department gives all chemistry Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per quarter at approximately monthly intervals. Students entering directly into the Ph.D. program who perform satisfactorily on the orientation examination in their special area may begin writing the examinations immediately. Students must begin by the start of their second quarter of residence and must continue until they have passed five. To remain in good standing, students should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum. Students with a master's degree from an American university are required to pass three examinations out of nine attempts.

Biochemistry and Molecular Biology. The written examination requirement is coupled to the graduate student seminars (Chemistry and Biochemistry 258 or others). Seminars offered in other departments may be substituted with permission of the graduate adviser. Beginning with Winter Quarter of the first year, each quarter students are required to submit written reports based on the seminar course to the instructor and other designated faculty members.

(1) Winter Quarter: A presentation and written report based on the Fall Quarter rotation research experience or other designated topic is to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter: A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field is to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year: At the end of the preceding Spring Quarter, a research topic is selected from a list prepared by the division. An in-depth seminar of this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the

seminar and should propose specific experiments.

A failed report may be revised once. The written examination requirement for the biochemistry and molecular biology Ph.D. program is fulfilled after the student satisfactorily completes all three different types of reports.

Oral Qualifying Examination

The University Oral Qualifying Examination is based on the student's research proposal which should represent independent work and should offer the doctoral committee the opportunity to judge the student's ability to think creatively and to formulate significant ideas for research. The examination is to be attempted during the sixth quarter of residence by all biochemistry and molecular biology students and by chemistry students who completed the written qualifying examinations during the first year. All others must take the oral examination by the end of the seventh quarter. Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance students to candidacy, to allow them to repeat the oral, or to disqualify them is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework and examinations, and research ability and productivity.

Chemistry and Biochemistry

Lower Division Courses

2. Introductory Chemistry. (4) Lecture, two hours; discussion, two hours. Not open to students with credit for course 14A or 20A or former course 10A or 11A. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter. P/NP or letter grading.

9. Beginning a Career in Molecular Sciences. (1) Limited to 50 freshmen/sophomores. Recommended for students considering a career in chemical sciences. Introduction to and discussion of research and career opportunities in molecular sciences; establishment of a faculty/student mentorship for each student to help in preparing a paper on a student-selected research topic. May be repeated twice.

10C. Organic Chemistry for Life Sciences Majors. (2) Enforced requisite: former course 10B (C- or better) or one year of general chemistry. Introduction to organic compounds, functional groups, transition metal coordination chemistry, bioorganic and bioinorganic chemistry, isomerism, and stereochemistry. P/NP or letter grading.

10E. Intermediate Organic Chemistry. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: former course 10D (C- or better). Structural aspects of biologically and medically important organic molecules. Organic reactions involved in metabolism, biosynthesis, and pharmaceutical synthesis. Intermolecular forces involved in interactions of drugs with receptors and interactions of biological regulators with enzymes and nucleic acids. P/NP or letter grading.

14A. Chemical Structures and Equilibria. (4) (Formerly numbered 10A.) Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Examination. Not open to students with credit for course 20A or former course 11A. Introduction to physical and general chemistry needed for the life sciences. Quantum chemistry, atoms, atomic properties, and chemical bonding in molecules, phase changes, equilibria, and acids and bases. P/NP or letter grading.

14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 14A or former course 10A (C- or better). Not open to students with credit for course 10C, 10E, 20B, or 30 or former course 10B or 10D. Introduction to physical and organic chemistry for life sciences students. First and second laws of thermodynamics, thermochemistry, free energy, electrochemistry, kinetics, mechanisms, and catalysis. General classes of organic molecules and functional groups, stereoisomers, spectroscopy. P/NP or letter grading.

14BL. General and Organic Chemistry Laboratory I. (2) (Formerly numbered 10BL.) Lecture, one hour; laboratory, three hours. Enforced requisites: courses 14A or former course 10A (C- or better), 14B (corequisite). Not open to students with credit for course 20L. Introduction to volumetric, spectrophotometric, and potentiometric analysis. Use and preparation of buffers and pH meters. Synthesis and kinetics techniques using compounds of interest to students in life sciences. P/NP or letter grading.

14C. Organic Molecular Structures and Interactions. (4) Lecture, three hours; discussion, one hour. Enforced requisites: course 14B or former courses 10B and 10C (C- or better). Not open to students with credit for course 10E, 30, or 130A or former course 10D. NMR and mass spectrometry, conformational analysis, aromatics, oxygen- and nitrogen-containing organic molecules, transition metals and organometallics, supramolecular chemistry and molecular interactions. P/NP or letter grading.

14CL. General and Organic Chemistry Laboratory II. (3) (Formerly numbered 10DL.) Lecture, one hour; laboratory, six hours. Enforced requisites: courses 14B (or former courses 10B and 10C) and 14BL (or former course 10BL) (C- or better), 14C (corequisite). Synthesis and analysis of compounds; purification by extraction, chromatography, recrystallization, and sublimation; characterization by mass spectroscopy, UV, NMR, and IR spectroscopy, optical activity, electrochemistry, pH titration. P/NP or letter grading.

15. Survey of Organic Chemistry and Biochemistry. (4) Enforced requisite: former course 11A (C- or better). Not open to students with credit for former course 132A. Recommended for students in prenursing, prephysical therapy, and pre dental hygiene. Does not satisfy requirements for admission to medical and dental schools. Introduction to structures and reactions of organic compounds, particularly with respect to their roles and transformations in living systems.

15L. Laboratory in Elementary Organic Chemistry and Biochemistry. (1) Laboratory, four hours. Enforced corequisite: course 15 (C- or better). Does not satisfy requirements for admission to medical and dental schools. Introduction to quantitative work with aqueous solutions and to preparation, isolation, and characterization of organic compounds, particularly some of those important in living systems.

17. Chemical Principles (No credit). Lecture, four hours; laboratory, two hours. Chemistry 17 displaces four units on student's Study List but yields no credit toward a degree. Introduction to chemical principles: numbers, measurements, chemical calculations, gas laws, solutions, acids, bases, and salts, molecular structure, and nomenclature. Collaborative learning and problem solving; introduction to chemistry laboratory practice. P/NP or letter grading.

20A. Chemical Structure. (4) Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. Enforced requisite: successful completion of Chemistry Diagnostic Examination. First term of general chemistry. Survey of chemical processes, quantum chemistry, atomic and molecular structure and bonding, molecular spectroscopy. P/NP or letter grading.

20B. Chemical Energetics and Change. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 20A (C- or better). Second term of general chemistry. Intermolecular forces and organization, phase behavior, chemical thermodynamics, solutions, equilibria, reaction rates and laws. P/NP or letter grading.

20L. General Chemistry Laboratory. (2) Lecture, one hour; laboratory, three hours. Enforced requisites: courses 20A (C- or better), 20B (corequisite). Use of the balance, volumetric techniques, volumetric and potentiometric analysis; Beer's law, applications for environmental analysis and materials science. P/NP or letter grading.

30. Chemical Dynamics and Reactivity: Introduction to Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 20B (C- or better). First term of organic chemistry. Mechanisms of organic and inorganic reactions, including redox, elimination, addition, substitution, and radical processes. P/NP or letter grading.

30L. General Chemistry Laboratory. (3) Lecture, one hour; laboratory, six hours. Enforced requisites: courses 20B and 20L (C- or better), 30 (corequisite). Qualitative and quantitative analysis of chemical reactions and compounds, kinetics, separations, and spectroscopy. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (2 each) Seminar, two hours; outside study, four hours. Limited to freshmen/sophomores. General introduction to frontiers of molecular sciences or intensive exploration of a particular theme or topic. Consult *Schedule of Classes* for topics and instructors. P/NP or letter grading.

88A. Serendipity in Science. Limited to 20 freshmen. Inquiry into unexpected discoveries in science that have had significant impact on society and analysis of circumstances which brought these about, beginning with discovery of helium in the sun by Janssen in 1868 (using the newly developed field of spectroscopy). Discovery of X rays by Röntgen in 1895 and of radioactivity by Becquerel in 1896. Other topics include discoveries important to medicine, such as penicillin by Fleming in 1928 and *cis-platin* by Rosenberg in 1969.

96. Special Courses in Chemistry. (1 to 4) To be arranged. May be repeated for a maximum of eight units.

Upper Division Courses

103. Environmental Chemistry. (4) Lecture, four hours; discussion, one hour. Requisites: courses 110A, 130A/130AL or former courses 132B/132BL, 153A, 153L. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticide effects. Chemical reactions in the environment and effect of chemical processes on the environment. P/NP or letter grading.

M104. Environmental Chemistry Laboratory. (4) (Same as Atmospheric Sciences M140.) Lecture, two hours; laboratory, three hours. Requisite: course 20B. Laboratory experience for students who wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment. P/NP or letter grading.

110A. Physical Chemistry: Chemical Thermodynamics. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 31A, 31B, 32A or 3C (for life sciences majors), Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C. Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry. P/NP or letter grading.

110B. Physical Chemistry: Introduction to Statistical Mechanics and Kinetics. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: courses 110A, 113A, Mathematics 32B. Kinetic theory of gases, principles of statistical mechanics, statistical thermodynamics, equilibrium structure and free energy, relaxation and transport phenomena, macroscopic chemical kinetics, molecular-level reaction dynamics. P/NP or letter grading.

113A. Physical Chemistry: Introduction to Quantum Mechanics. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 20B, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C. Departure from classical mechanics: Schrödinger vs. Newton equations; model systems: particle-in-a-box, harmonic oscillator, rigid rotor, and hydrogen atom; approximation methods: perturbation and variational methods; many-electron atoms, spin, and Pauli principle, chemical bonding. P/NP or letter grading.

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C213B. P/NP or letter grading.

114. Physical Chemistry Laboratory. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 30L (or former course 11CL), 110A, 110B or 113B, 113A. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics. P/NP or letter grading.

114H. Physical Chemistry Laboratory (Honors). (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 30L (or former course 11CL), 110A, 110B or 113B, 113A, with grades of B or better. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor. P/NP or letter grading.

C115A-C115B. Quantum Chemistry. (4) Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is requisite to C115B. Students entering course C115A are normally expected to take course C115B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

121. Special Topics in Physical Chemistry. (4) Lecture, four hours. Requisite: course 110B. Recommended: course 113A. Topics of considerable research interest presented at level suitable for students who have completed junior-year courses in physical chemistry. P/NP or letter grading.

C123A-C123B. Classical and Statistical Thermodynamics. (4-4) Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Rigorous presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C223A-C223B.

125. Computers in Chemistry. (4) Lecture, three hours. Preparation: working knowledge of FORTRAN IV or PL/I. Requisites: courses 110A, 110B, 113A. Discussion of computer techniques, including matrix manipulation, solution of differential equations, data acquisition, and instrumental control, and their applications to chemical problems in quantum mechanics, thermodynamics, and kinetics.

130A. Organic Chemistry: Reactivity and Synthesis, Part I. (4) Lecture, three hours; discussion, one hour. Requisite: course 30 with a grade of C- or better. Second term of organic chemistry. Synthesis, properties, and reactions of organic functional groups, including alcohols, alkenes, alkynes, aromatic compounds, aldehydes, ketones, carboxyl derivatives, and amines. P/NP or letter grading.

130AL. Organic Chemistry Laboratory. (2) (Formerly numbered 132BL.) Lecture, one hour; laboratory, four hours. Requisites: courses 30, 30L, with grades of C- or better. Corequisite: course 130A. Basic experimental techniques in organic synthesis (distillation, extraction, crystallization, and performing reactions) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). Single and multistep synthesis of known organic molecules on microscale level. P/NP or letter grading.

130B. Organic Chemistry: Reactivity and Synthesis, Part II. (4) Lecture, three hours; discussion, one hour. Requisite: course 130A with a grade of C- or better. Third term of organic chemistry. Organic spectroscopy, including proton and carbon NMR, infrared mass and UV/Vis; pericyclic reactions and molecular orbital theory; dicarbonyl compounds; polyfunctional aromatic chemistry; heterocyclic compounds; and carbohydrates. P/NP or letter grading.

130BL. Organic Chemistry Laboratory. (2) (Formerly numbered 132CL.) Lecture, one hour; laboratory, four hours. Requisites: courses 130A/130AL with grades of C- or better. Corequisite: course 130B. Modern techniques in synthetic organic and analytical organic chemistry. Micro-preparative and semi-preparative scale multistep synthesis of known organic molecules. One- and two-dimensional multi-nuclear NMR techniques. Written reports and proposals. P/NP or letter grading.

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

136. Organic Structural Methods. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 130B/130BL or former courses 132C/132CL with grades of C- or better. Laboratory course in organic structure determination by chemical and spectroscopic methods; microtechniques. P/NP or letter grading.

140. Organic Reactions, Pharmaceutical Structures, and Activities. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 14C (C- or better). Not open to students with credit for course 10E or former course 10D. Organic reactions, nucleophilic and electrophilic substitutions and additions; electrophilic aromatic substitutions, carbonyl reactions, catalysis, molecular basis of drug action, and organic chemistry of pharmaceuticals. P/NP or letter grading.

C143A. Structure and Mechanism in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110B, 113A, and 130B/130BL or former courses 132C/132CL (may be taken concurrently), with grades of C- or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A. P/NP or letter grading.

C143B. Mechanism and Structure in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course C143A with a grade of C- or better. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B.

144. Practical and Theoretical Introductory Organic Synthesis. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 130B/130BL or former courses 132C/132CL with grades of C- or better. Lectures on modern synthetic reactions and processes, with emphasis on stereospecific methods for carbon-carbon bond formation. Laboratory methods of synthetic organic chemistry, including reaction techniques, synthesis of natural products, and molecules of theoretical interest. P/NP or letter grading.

153A. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Enforced requisite: course 130A or 140 (or former course 10D or 132B) with a grade of C- or better. Recommended: Life Sciences 2, 3. Structure of proteins, carbohydrates, and lipids; enzyme catalysis and principles of metabolism, including glycolysis, citric acid cycle, and oxidative phosphorylation. P/NP or letter grading.

153AH. Biochemistry: Introduction to Structure, Enzymes, and Metabolism (Honors). (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 130A or former course 10D or 132B with a grade of C- or better. Recommended: Life Sciences 2, 3. Honors course parallel to course 153A. P/NP or letter grading.

153B. Biochemistry: DNA, RNA, and Protein Synthesis. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 153A, Life Sciences 2, 3. Nucleotide metabolism; DNA replication; DNA repair; transcription machinery; regulation of transcription; RNA structure and processing; protein synthesis and processing. P/NP or letter grading.

153BH. Biochemistry: DNA, RNA, and Protein Synthesis (Honors). (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisites: course 153A, Life Sciences 2, 3. Honors course parallel to course 153B. P/NP or letter grading.

153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation. (4) Lecture, three hours; discussion, one hour. Requisite: course 153A. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes.

153CH. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation (Honors). (4) Lecture, three hours; discussion, two hours. Requisite: course 153A. Honors course parallel to course 153C.

CM153G. Macromolecular Structure. (6) (Same as Biological Chemistry CM153G and Human Genetics CM153G.) Lecture, five hours. Requisites: courses 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

153L. Biochemical Methods I. (4) Lecture, one hour; discussion, one hour; laboratory, four hours; outside study, seven hours. Enforced requisites: courses 14CL/140 or 130A/130AL (or former courses 10D/10DL or 132B/132BL), 153A (may be taken concurrently), with grades of C- or better. Integrated term-long project involving characterization of an enzyme purified from meat obtained at local butcher. Techniques include ammonium sulfate fractionation, affinity chromatography, protein and enzyme assays, polyacrylamide gel electrophoresis, gel exclusion chromatography, and enzyme kinetic analysis. P/NP or letter grading.

154. Biochemical Methods II. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 153A, 153B, 153L. Recommended: course 156. Two to three major laboratory projects using biochemical laboratory techniques to investigate contemporary problems in biochemistry. Topics include transcription activation, molecular basis of DNA-protein interactions, biochemical basis of platelet activation, and initiation of blood clotting cascade. Experiments entail characterizing function of proteins, nucleic acids, and lipids involved in these processes.

CM155. Biological Catalysis. (4) (Same as Molecular, Cell, and Developmental Biology CM160.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM255.

156. Physical Biochemistry. (4) Lecture, four hours; discussion, one hour. Requisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamics; energy levels, spectroscopy, and bonding; topics from structural, statistical, and electrochemical methods of biochemistry.

CM159A. Mechanisms in Regulation of Transcription I. (2) (Same as Biological Chemistry CM159A.) First five weeks. Lecture, four hours; outside study, two hours. Requisites: courses 153B, 154. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

CM159B. Mechanisms in Regulation of Transcription II. (2) (Same as Biological Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

C161A. Plant Biochemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C261A.

C165. Metabolic Control by Protein Modification. (2) First five weeks. Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C265.

CM170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4) (Same as Molecular, Cell, and Developmental Biology M170.) Lecture, two to three hours; discussion, zero to two hours; outside study, four to seven hours. Requisites: courses 153A and 153B, or Life Sciences 3, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course C270. P/NP or letter grading.

171. Intermediate Inorganic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 130A with a grade of C- or better. Chemical bonding; structure and bonding in the solid state; main group, transition metal, lanthanide and actinide compounds and reactions; catalysis, spectroscopy, special topics. P/NP or letter grading.

172. Advanced Inorganic Chemistry. (4) (Formerly numbered 173.) Lecture, three hours; discussion, one hour. Requisite: course 171 with a grade of C- or better. Structure and bonding of inorganic molecules and solids, electronic spectra of complexes, reaction mechanisms of metal complexes, d- and f-block organometallic compounds, bioinorganic chemistry. P/NP or letter grading.

174. Inorganic and Metalorganic Laboratory Methods. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 130A/130AL or former courses 132B/132BL, and 172 or former course 173. Synthesis of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenk methods; chromatographic and ion exchange separations. P/NP or letter grading.

C175. Inorganic Reaction Mechanisms. (4) Lecture, three hours. Requisites: courses 110A, 110B, 113A, and 172 or former course 173. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275. P/NP or letter grading.

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Requisites: courses 113A, and 172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A. P/NP or letter grading.

C180. Solid-State Chemistry. (4) Lecture, three hours. Requisite: course 172 or former course 173. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C280. P/NP or letter grading.

C181. Polymer Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A, and 130A or former course 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C281. P/NP or letter grading.

184. Chemical Instrumentation. (4) Lecture/quiz, two hours; laboratory, eight hours. Requisite: course 110A. Theory and practice of instrumental techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods.

190. Undergraduate Thesis Research. (4) Requisites: two terms of course 199 on related material. Final term of integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, comprehensive review of a given area. Thesis embodying totality of year's work to be submitted and oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation.

191. Advanced Undergraduate Research. (1) Requisite: course 199B (four units). To be arranged with faculty member who directs the research. Additional information may be obtained from undergraduate office. May be repeated for a maximum of four units.

196A-196F. Special Courses in Chemistry. (1 to 4 each) Hours to be arranged.

199A. Directed Individual Studies or Research for Undergraduate Students. (2 to 8) Designed for departmental juniors with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of eight units. P/NP grading.

199B. Directed Individual Studies or Research for Undergraduate Students. (2 to 4) Requisite: course 199A (eight units). Designed for departmental juniors with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of four units. P/NP or letter grading.

Graduate Courses

203. Research Ethics Seminar. (2) Seminar, 90 minutes. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all first- and second-year students in program. Informal discussions on case histories for responsible conduct of research. May be repeated for credit. S/U grading.

204. Student Research Seminar. (2) Seminar, one hour. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all third-year students. Research seminar presented by students in their third year of support in program. S/U grading.

205. Introduction to Chemistry of Biology. (4) Lecture, three hours. Overview of biochemistry, pharmacology, and physiology, with emphasis on chemical interactions at molecular level.

206. Chemistry of Biology Seminar. (2) Discussion, three hours; outside study, three hours. Limited to students supported by UCLA program in Chemistry/Biology Interface Predoctoral Training. Current research topics at interface of chemistry and biology. May be repeated for credit. S/U grading.

207. Organometallic Chemistry. (4) Lecture/discussion, three hours. Requisite or corequisite: course C243A. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis.

C213B. Physical Chemistry: Molecular Spectroscopy. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C113B. Independent study project required of graduate students. S/U or letter grading.

C215A-C215B. Quantum Chemistry: Methods. (4-4) Lecture, four hours; discussion, one hour. Requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is requisite to C215B. Students entering course C215A are normally expected to take course C215B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.

215C. Advanced Quantum Chemistry: Applications. (4) Lecture, three hours; discussion, one hour. Requisites: course C215B, Physics 131. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.

215D. Molecular Spectra, Diffraction, and Structure. (4) Lecture, three hours; discussion, one hour. Requisites: course C215B, Physics 131. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

218. Physical Chemistry Student Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

219A-219Z. Seminars: Research in Physical Chemistry. (2each) Discussion, three hours. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

219B. Chemistry and Physics of Surfaces.

219C. Physical Chemistry of Complex Fluids.

219D. Computer Simulation in Chemistry.

219E. Dynamics of Molecule-Molecule and Molecule-Surface Reactions.

219F. Environmental Chemistry and Global Cycling.

219G. Gas Phase Kinetics and Photochemistry.

219H. Spectroscopy and Dynamics of Molecules, Clusters, and Biological Systems.

219I. Spectroscopy of Isolated Molecules, Complexes, and Clusters.

219J. Chemistry and Biophysics of Interfaces.

219K. Statistical Mechanics of Disordered Systems.

219L. Modern Methods for Molecular Reactions and Structure.

219M. Chemistry of Materials at High Pressures.

219N. Cosmochemistry.

219O. Chemistry and Physics of Nanostructures.

219P. Statistical Mechanics of Complex Fluids.

219Q. Ultrafast Studies of Chemical Reaction Dynamics in Condensed Phase.

219R. Kinetic, Thermodynamic, and Interfacial Effects in Materials.

221A-221Z. Advanced Topics in Physical Chemistry. (2 to 4 each) Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

C223A-C223B. Classical and Statistical Thermodynamics. (4-4) Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.

223C. Statistical Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses C215B, C223B, Physics 131. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

225. Chemical Kinetics. (4) Lecture, three hours; discussion, one hour. Requisites: courses C215B, C223B. Classical experimental and theoretical approaches to study of rates and mechanisms of chemical reactions. Modern experimental techniques and molecular-level theory of reaction dynamics. Examples of well-studied elementary reactions. S/U or letter grading.

M227. Molecular Genetics of Bacteria and Phage. (4) (Same as Microbiology M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Requisite: course CM253 or Biological Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

228. Chemical Physics Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

229. Introduction to Physical Chemistry Research. (2) Lecture, 90 minutes. Designed primarily for entering graduate physical chemistry students. S/U grading.

M230B. Structural Molecular Biology. (4) (Same as Molecular, Cell, and Developmental Biology M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory. (2) (Same as Molecular, Cell, and Developmental Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

232. Stereochemistry and Conformational Analysis. (4) Lecture/discussion, three hours. Requisite or corequisite: course C143A. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

235A-235Z. Seminars: Research in Organic Chemistry. (2 each) Discussion, three hours. Advanced study and analysis of current topics in organic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

235A. Synthesis of Natural Products and Biopolymers.

235B. Design, Preparation, and Characterization of New Organic Materials.

235C. Supramolecular Chemistry.

235D. Modern Photochemistry and Biooxidants.

235E. Theoretical and Physical Organic Chemistry.

235F. Synthetic Methods and Synthesis of Natural Products.

235G. Organometallic Chemistry and Organic Synthesis.

235H. Reaction Mechanisms in Molecular Biology.

235I. Fullerene Chemistry and Materials Science.

235J. Organic and Bioorganic Chemistry.

235K. Organic Chemistry in Organized and Restricted Media.

235L. Supramolecular and Macromolecular Chemistry.

235M. Organic Solid-State Chemistry.

236. Spectroscopic Methods of Organic Chemistry. (4) Lecture, three hours. Requisite or corequisite: course C243A. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR.

241A-241Z. Special Topics in Organic Chemistry. (2 to 4 each) Requisite or corequisite: course C243A. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

242. Organic Photochemistry. (4) Lecture/discussion, three hours. Requisite or corequisite: course C243A. Interactions of light with organic molecules; mechanistic and preparative photochemistry.

C243A. Structure and Mechanism in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110B, 113A, and 130B/130BL or former courses 132C/132CL (may be taken concurrently), with grades of C- or better. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

C243B. Organic Chemistry: Mechanism and Structure. (4) Lecture, three hours; discussion, one hour. Requisite: course C243A. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.

244A. Organic Synthesis: Methodology and Stereochemistry. (4) Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules.

244B. Strategy and Design in Organic Synthesis. (4) Lecture, three hours. Requisite or corequisite: course C243A. Theory behind the planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in the synthetic process. Reasoning and art involved in organic synthesis.

245. Applications of Electronic Theory in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisite or corequisite: course C243A. Review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Hückel and Möbius conjugation; Woodward/Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.

247. Organic Colloquium. (2) Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

248. Organic Chemistry Student Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

249A. Problems in Advanced Organic Chemistry. (4) Designed primarily for first-year graduate students as preparation for cumulative examinations. Introduction to organic chemistry research. Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry. S/U grading.

249B. Problems in Advanced Organic Chemistry. (2) Designed primarily for first- and second-year graduate students as preparation for cumulative examinations. Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. May be repeated for credit. S/U grading.

250. Topics in Biochemistry and Molecular Biology of Animal Cells. (4) Lecture, three hours. Preparation: courses in genetics and molecular biology. Requisites: courses 130B/130BL (or former courses 132C/132CL), 153A, 153B, 153C. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization. S/U or letter grading.

251A-251Z. Advanced Topics in Biochemistry. (2 each) Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

CM253. Macromolecular Structure. (6) (Same as Biological Chemistry CM253 and Human Genetics CM253.) Lecture, five hours. Requisites: courses 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

254. Advanced Biochemical Methods. (4) Lecture, two hours; laboratory, eight hours. Requisite: course 156. Recommended: courses 153B, 153C. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.

CM255. Biological Catalysis. (4) (Same as Biological Chemistry M255, Molecular, Cell, and Developmental Biology CM252, and Pharmacology M255.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM155. Graduate students required to write research paper and present oral report on it.

256A-256Z. Seminars: Research in Biochemistry. (2 each) Discussion, three hours. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

256A. Biochemistry of Plasma Proteins.

256B. Biochemistry of Protein Function.

256C. Biochemistry and Molecular Genetics of Fungi.

256D. Transcriptional Control Mechanisms in *Drosophila* Embryogenesis.

256E. Secondary Metabolites in Higher Plants: Biosynthesis, Regulation, and Physiological Functions.

256F. Current Topics in Prokaryotic Development.

256G. Nucleic Acid Structure Determination by NMR.

256H. Basic Mechanisms of Promoter Activation.

256J. Contractile Proteins in Muscle Contraction and Cell Motility.

256K. Biochemistry and Molecular Biology of *Chlamydomonas*.

256L. Literature of Structural Biology.

256M. Mechanism and Regulation of Transcription Termination in Eukaryotic Organisms.

256N. Advanced Topics in Structural Biology.

256O. Membrane Biophysics.

256P. Analysis of Protein Structure.

256Q. Biochemistry and Function of Ubiquinone in Yeast and Higher Eukaryotes.

256R. Biomolecular Nuclear Magnetic Resonance Spectroscopy and Protein Structure.

256S. Proteome Bioinformatics.

M257. Physical Chemistry of Biological Macromolecules. (2) (Same as Biological Chemistry M257.) Requisites: courses 110A, 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

258. Advanced Topics in Biochemistry and Molecular Biology. (2) Lecture, two hours. Critical analysis of experimental design and methods in biochemistry and molecular biology. In-depth analysis of literature in one or more areas of current research. May be repeated for credit. S/U or letter grading.

CM259A. Mechanisms in Regulation of Transcription I. (2) (Same as Biological Chemistry CM259A.) First five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM253 or M267. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. S/U or letter grading.

CM259B. Mechanisms in Regulation of Transcription II. (2) (Same as Biological Chemistry CM259B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B. S/U or letter grading.

C261A. Plant Biochemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C161A.

262. Biological Energy Transductions. (4) Lecture, three hours. Requisites: courses 153B, 153C. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions.

M263. Metabolism and Its Regulation. (4) (Same as Biological Chemistry M263.) Lecture, three hours. Requisites: course 110A, one course from 153B, 153C, 156, or Biological Chemistry 201A-201B. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics. (2-2-2) (Same as Biological Chemistry M264A-M264B-M264C and Microbiology M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

C265. Metabolic Control by Protein Modification. (2) First five weeks. Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C165.

266. Seminar: Techniques for Study of Gene Regulation. (2) Requisites: courses CM259A, CM259B. Seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis on specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

M267. Cell Structure, Signaling, and Differentiation. (6) (Same as Biological Chemistry CM267, Human Genetics CM267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: courses 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Letter grading.

268. Biochemistry Research Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U or letter grading.

C270. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4) Lecture, two to three hours; discussion, zero to two hours; outside study, four to seven hours. Requisites: courses 153A and 153B, or Life Sciences 3, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course CM170. S/U or letter grading.

271A-271Z. Advanced Topics in Inorganic Chemistry. (2 to 4 each) Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

272A-272Z. Seminars: Research in Inorganic Chemistry. (2 each) Discussion, three hours. Advanced study and analysis of current topics in inorganic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

272A. Chemistry of Materials.

272B. Metalorganic, Inorganic Biometalorganic Chemistry.

272C. Inorganic Spectroscopy.

272D. Bioinorganic Chemistry and Biology of Transition Metals and Oxygen.

272E. Organometallic Synthesis and Chemical Vapor Deposition.

272F. Porphyrin-Based Lattice Clathrates.

272G. Issues in Chemical Education.

272H. Catalysis and Small Molecule-Activation Mediated by Transition-Metal Complexes.

C275. Inorganic Reaction Mechanisms. (4) Lecture, three hours. Requisites: courses 110A, 110B, 113A, and 172 or former course 173. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free/radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175. S/U or letter grading.

C276A. Group Theory and Applications to Inorganic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 113A, and 172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

276B. Physical Methods for Characterization of Inorganic Compounds. (4) Lecture, three hours. Requisite: course C276A. Applications of spectroscopic techniques, including IR, Raman, visible, UV, NMR, ESR, and NQR, to elucidation of structure and bonding in inorganic and organometallic compounds.

277. Crystal Structure Analysis. (4) Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

278. Inorganic Chemistry Student Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

279. Bioinorganic Chemistry. (4) Lecture, three hours. Requisites: courses 110A, and 156 or 172 or former course 173. Role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ion interactions with nucleic acids; metal ion metabolism. S/U or letter grading.

C280. Solid-State Chemistry. (4) Lecture, three hours. Requisite: course 172 or former course 173. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C180. S/U or letter grading.

C281. Polymer Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A, and 130A or former course 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C181. S/U or letter grading.

282. Introduction to Inorganic Chemistry Research. (2) Lecture, 90 minutes. Discussion of current research in inorganic chemistry, designed primarily for entering graduate inorganic chemistry students. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Safety in Chemical and Biochemical Research. (2) Survey of safe laboratory practices for experimental research in organic, inorganic, and physical chemistry and biochemistry. Topics include laser safety, cryogenic hazards, high- and low-pressure experimentation, gas and carcinogen handling, chemical spills, fire extinguishing, and chemical disposal. S/U grading.

495. Teaching College Chemistry. (2) Seminar, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assistants designed to deal with problems and techniques of teaching college chemistry. S/U grading.

596. Directed Individual Study or Research. (2 to 16) To be arranged with faculty member who directs the study or research. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 4) S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 16) Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.

Assistant Professor

Sarah H. Tolbert, Ph.D. (*Chemistry and Biochemistry*)

Scope and Objectives

The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Undergraduate Study

Chemistry/Materials Science B.S.

Preparation for the Major

Required: Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, English Composition 3, Materials Science and Engineering 14, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 1A, 1B, 1C, 4BL, Program in Computing 10A.

The Major

Required: Chemistry and Biochemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 132A, 171, 172, eight units from C123A, C123B, 130A/130AL, 130B/130BL, 174, C175, C176; Materials Science and Engineering 120, 131L or 161L, 131, 150, 160, eight units from 110, 111, 121, 122, 130, 132, 143A, 162.

For further information, contact Leslie Hinman, Materials Science and Engineering, 6531 Boelter Hall, (310) 825-8916.

Ne-Zheng Sun, Ph.D.

Scope and Objectives

The civil and environmental engineering programs at UCLA include structural engineering, structural mechanics, geotechnical engineering, earthquake engineering, water resources engineering, and environmental engineering.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, water resources engineering, and environmental engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of structures (including structural/earthquake engineering and structural mechanics), geotechnical engineering, water resources engineering, and environmental engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

Undergraduate Study

Civil Engineering B.S.

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

The Major

Course requirements are as follows (181 minimum units required):

(1) Eight core courses: Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A, Civil and Environmental Engineering 11, 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103.

(2) Civil and Environmental Engineering 120, 121, 130, 135A, 151, 153; one mathematics course from Mechanical and Aerospace Engineering 174, 191A, 192A, 192B, 192C.

(3) Thirty-two elective units, to be selected from the courses listed below, which must include eight units of laboratory:

Engineering Mechanics: Civil and Environmental Engineering 130F, 130L, Mechanical and Aerospace Engineering 166C, 168.

Geotechnical Engineering: Civil and Environmental Engineering 125, 128L, Earth and Space Sciences 100, 139.

Structures: Civil and Environmental Engineering 135B, 135C, 135L, 137, 137L, 141, 142, 142L, 143, 144, 147, 180.

Systems Analysis: Civil and Environmental Engineering 106A, M140.

Water Resources and Environmental Engineering: Civil and Environmental Engineering 150, 154, 155, 156A, 156B, 157A, 157B, 157C, 160, 163, 164, 166.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Civil and Environmental Engineering offers the Master of Science (M.S.) degree in Civil Engineering.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that

cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.cee.ucla.edu>. Forms are also available by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study

Environmental engineering; geotechnical engineering; structural mechanics; structural/earthquake engineering; water resource systems engineering.

Course Requirements

At least nine courses are required, a majority of which must be in the Civil and Environmental Engineering Department. At least five of the courses must be at the 200 level. In the thesis plan, seven of the nine must be formal 100- or 200-series courses. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, 500-series courses may not be applied toward the nine-course requirement. A minimum 3.0 grade-point average is required in all coursework.

Each major field has a set of required preparatory courses which are normally completed during undergraduate studies. Equivalent courses taken at other institutions can satisfy the preparatory course requirements. The preparatory courses cannot be used to satisfy course requirements for the master's degree; courses must be selected in accordance with the lists of required graduate courses and elective courses for each major field.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Environmental Engineering

Required Preparatory Courses. Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 33A, 33B; Mechanical and Aerospace Engineering 103, M105A; Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

Required Graduate Courses. Civil and Environmental Engineering 254A, 255A, 255B.

Elective Courses. Civil and Environmental Engineering 155, 157B, 157C, 163, 164, 253, 254B, 254C, 258A, 261, 265A, 265B; a maximum of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan: Civil and Environmental Engineering 150, 250A, 250B, 250C, 251, 252, 260, M262A, M262B; Chemical Engineering 101C or Mechanical and Aerospace Engineering 105D; Chemical Engineering 106, 210, C240; Computer Science 270A, 271A, 271B; Electrical Engineering 236A, 236B, 236C; Environmental Health Sciences 240, 241, 252D, 255, 262, 264, 410A, 410B; Mechanical and Aerospace Engineering 175, 274, 275.

Geotechnical Engineering

Required Preparatory Courses. Civil and Environmental Engineering 108, 120, 121, 128L.

Required Graduate Courses. Civil and Environmental Engineering 220, 221, 222, 223, 228L.

Elective Courses. Civil and Environmental Engineering 135A, 142, 229, 235A, 235B, 235C, 250B; Mechanical and Aerospace Engineering 256A; Earth and Space Sciences 139.

Structural Mechanics

Required Preparatory Courses. Civil and Environmental Engineering 130, 135A, 135B.

Required Graduate Courses. Civil and Environmental Engineering 232, 235A, 235B, 236, M237A.

Elective Courses. Civil and Environmental Engineering 130F, 130L, 135C, 137, M140, M230, 231, 233, 234, 235C, M240, 275, 276; Mechanical and Aerospace Engineering 269B.

Structural/Earthquake Engineering

Required Preparatory Courses. Civil and Environmental Engineering 135A, 135B, 141, 142.

Required Graduate Courses. Civil and Environmental Engineering 235A, 246; at least three of the following courses: Civil and Environmental Engineering 241, 242, 244.

Elective Courses. Civil and Environmental Engineering 120, 121, 130, 135C, 137, 142L, 143, 175, 221, 222, 223, 232, 235B, 236, M237A, M240, 275, 276.

Water Resource Systems Engineering

Required Preparatory Courses. Chemistry and Biochemistry 20A, 20B, 20L, Mathematics 33A, 33B; Mechanical and Aerospace Engineering 103, M105A; Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

Required Graduate Courses. A minimum of five of the following courses: Civil and Environmental Engineering 250A, 250B, 250C, 251, 252, 253, 260, 265A, 265B.

Elective Courses. Civil and Environmental Engineering 150, 164, 255A, 255B; a maximum

of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan: Atmospheric Sciences C200B, M203A, 218; Computer Science 270A, 271A, 271B; Electrical Engineering 236A, 236B, 236C, 237; Environmental Health Sciences 225, 264; Mathematics 269A, 269B, 269C; Mechanical and Aerospace Engineering 274, 275.

Students may petition the department for permission to pursue programs of study which differ from the above norms.

Comprehensive Examination Plan

In addition to the course requirements, under this plan there is a comprehensive written examination covering the subject matter contained in the program of study. The examination is administered by a comprehensive examination committee, which may conduct an oral examination in addition to the written examination. In case of failure, the examination may be repeated once with the consent of the graduate adviser.

Thesis Plan

In addition to the course requirements, under this plan students are required to write a thesis on a research topic in civil and environmental engineering supervised by the thesis adviser. An M.S. thesis committee reviews and approves the thesis. No oral examination is required.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Civil Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies. For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.cee.ucla.edu>. Forms are also available by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601,

Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major Fields or Subdisciplines

Environmental engineering; geotechnical engineering; structural/earthquake engineering; water resource systems engineering.

Course Requirements

There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. The major field has a scope corresponding to a body of knowledge contained in a detailed Ph.D. field syllabus available on request from the department office. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B- or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are chosen to support the major field and are usually subsets of other major fields.

Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the three fields, the students take a written preliminary examination in the major field. When the examination is passed and all coursework is completed, students proceed to take an oral preliminary examination which encompasses the major and minor fields. Both preliminary examinations should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice.

After passing both preliminary examinations, students are ready to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

Civil and Environmental Engineering

Lower Division Courses

1. Introduction to Civil Engineering. (2) Lecture, two hours. Introduction to scope of civil engineering profession, including earthquake, environmental, geotechnical, structural, transportation, and water resources engineering. Letter grading.

3. Fundamentals of Environmental Engineering Science. (4) Lecture, four hours; outside study, eight hours. Quantitative analysis of sources, transformations, and effects of pollutants in water, air, and soil. Topics include drinking water, wastewater, hazardous wastes, radioactive wastes, and atmospheric emissions. P/NP or letter grading.

11. Patterns of Problem Solving. (4) Lecture, four hours; outside study, eight hours. Introduction to creative patterns of problem solving and decision making. Discussion of attitudes and techniques productive in problem solving. Heuristic guides for knowledge acquisition, problem presentation, and problem solution. Tools and concepts for decision making that include technology and human values. Letter grading.

15. Introduction to Computing for Civil Engineers. (4) (Formerly numbered 15A, 15B.) Lecture, four hours; laboratory, four hours; outside study, four hours. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering programs. Letter grading.

Upper Division Courses

106A. Problem Solving in Engineering Economy. (4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Problem-solving and decision-making framework for economic analysis of engineering projects. Foundation for understanding corporate financial practices and accounting. Decisions on capital investments and choice of alternatives for engineering applications in all fields. Introduction to use of engineering economics in analysis of inflation and public investments. Letter grading.

108. Introduction to Mechanics of Deformable Solids. (4) Lecture, three hours; recitation, two hours; outside study, seven hours. Prerequisite: Mathematics 33A. Review of equilibrium principles; forces and moments transmitted by slender members. Concepts of stress and strain. Material constitution (stress-strain relations). Yield criteria. Structural applications to trusses, beams, shafts, columns, and pressure vessels. Letter grading.

120. Principles of Soil Mechanics. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: course 108. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, soil compaction, earth pressures, consolidation, and shear strength. Letter grading.

121. Design of Foundations and Earth Structures. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: course 120. Design methods for foundations and earth structures. Site investigation, including evaluation of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Letter grading.

125. Fundamentals of Earthquake Engineering. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 121, 137. Designed for seniors. Representations of earthquake ground motion, including response and Fourier spectra. Response of simple soil deposits and structures to ground motion. Hazard analysis by deterministic and probabilistic methods. Seismic design codes. Letter grading.

128L. Soil Mechanics Laboratory. (4) Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite or corequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size distribution, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, laboratory report writing. Letter grading.

130. Elementary Structural Mechanics. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 108. Analysis of stress and strain, phenomenological material behavior, extension, bending, and transverse shear stresses in beams with general cross-sections, shear center, deflection of beams, torsion of beams, warping, column instability and failure. Letter grading.

130F. Experimental Fracture Mechanics. (4) Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite: course 108. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, fracture characterization, compliance calibration, surface flaws, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and individual projects. Letter grading.

130L. Experimental Structural Mechanics. (4) Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 130. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners. Letter grading.

135A. Elementary Structural Analysis. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisites: courses 11, 15, 108. Introduction to structural analysis; classification of structural elements; analysis of statically determinate trusses, beams, and frames; deflections in elementary structures; virtual work; analysis of indeterminate structures using force method; introduction to displacement method and energy concepts. Letter grading.

135B. Intermediate Structural Analysis. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Analysis of truss and frame structures using matrix methods; matrix force methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution. Letter grading.

135C. Computer Analysis of Structures. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: courses 135A, 135B. Direct stiffness method of structural analysis, with emphasis on its application in computer analysis. Development of approximate analysis techniques for estimation/verification of computer results. Discussion of structural principles, including symmetry/antisymmetry, superposition, Mueller/Breslau principle for influence lines, and deflected shapes. Numerical procedure for linear algebraic equations. Letter grading.

135L. Structural Design and Testing Laboratory. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 15, 135A. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior. Letter grading.

137. Elementary Structural Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135B. Basic structural dynamics course for civil engineering students. Elastic free, forced vibration, and earthquake response spectra analysis for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams. Letter grading.

137L. Structural Dynamics Laboratory. (4) Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite or corequisite: course 137. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similitude. Letter grading.

M140. Numerical Optimization Methods for Engineering Design. (4) (Same as Mechanical and Aerospace Engineering M192F.) Lecture, four hours; outside study, eight hours. Requisites: course 15 or Mechanical and Aerospace Engineering 20, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design; one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications. Letter grading.

141. Steel Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135B. Introduction to building codes. Fundamentals of load and resistance factor design of steel elements. Design of tension and compression members. Design of beams and beam columns. Simple connection design. Introduction to computer modeling methods. Letter grading.

142. Design of Reinforced Concrete Structures. (4) Lecture, three hours; recitation, three hours; outside study, six hours. Requisite: course 135A. Beams, columns, and slabs in reinforced concrete structures. Properties of reinforced concrete materials. Design of beams and slabs for flexure, shear, anchorage of reinforcement, and deflection. Design of columns for axial force, bending, and shear. Ultimate strength design methods. Letter grading.

142L. Reinforced Concrete Structural Laboratory. (4) Lecture, two hours; laboratory, six hours; outside study, four hours. Requisite: course 142. Limited enrollment. Design considerations used for reinforced concrete beams, columns, slabs, and joints evaluated using analysis and experiments. Links between technical theory, building codes, and experimental results. Letter grading.

143. Design of Prestressed Concrete Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Load balancing design of continuous beams and slabs. Letter grading.

144. Structural Systems Design. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 142. Design course for civil engineering students, with focus on design and performance of complete building structural systems. Uniform Building Code dead, live, wind, and earthquake loads. Design of concrete masonry building. Computer analysis of performance of designed building. Letter grading.

147. Design and Construction of Tall Buildings. (4) Lecture, four hours; outside study, eight hours. Requisite: course 141. Limited enrollment. Introduction to total design process and professional participants. Systematic presentation of advantages and limitations of different structural forms and systems. Identification of critical design factors influenced by tallness. Foundation systems. Construction site visits, costing, and scheduling. Letter grading.

150. Engineering Hydrology. (4) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Recommended: elementary probability. Precipitation, climatology, stream flow analysis, flood frequency analysis, groundwater, snow hydrology, hydrologic simulation. Possible field trips. Letter grading.

151. Introduction to Water Resources Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power. Introduction to system analysis and design applied to water resources engineering. Letter grading.

153. Introduction to Environmental Engineering Science. (4) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 103. Water, air, and soil pollution: sources, transformations, effects, and processes for removal of contaminants. Water quality, water and wastewater treatment, waste disposal, air pollution, global environmental problems. Field trip. Letter grading.

154. Introduction to Environmental Aquatic Chemistry. (4) Lecture, four hours; outside study, eight hours. Requisites: course 153, Chemistry 20A, 20B, Mathematics 31A, 31B, Physics 1A, 1B. Description of chemical behavior of metals and anthropogenic/natural inorganic/organic compounds in natural fresh/marine surface waters and water treatment; acid-base chemistry, alkalinity, complexation, precipitation, sorption, redox, photochemistry, disinfection by-products, ozonation. Selected global chemical cycle(s). Letter grading.

155. Unit Operations and Processes for Water and Wastewater Treatment. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 153. Biological, chemical, and physical methods used to modify water quality. Fundamentals of phenomena governing design of engineered systems for water and wastewater treatment systems. Field trip. Letter grading.

156A. Environmental Chemistry Laboratory. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 153 (may be taken concurrently), Chemistry 20A, 20B. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrimetry spectrophotometry, redox systems, pH and electrical conductivity. Concepts to be applied to analysis of "real" water samples in course 156B. Letter grading.

156B. Water Quality Control Laboratory. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 156A, Chemistry 20A, 20B. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include solids, nitrogen species, oxygen demand, chlorine, alkalinity, hardness, and trace analysis. Discussion of relevance of these measurements to water resource engineering. Letter grading.

157A. Design of Water Resource Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: course 151, Mechanical and Aerospace Engineering 103. Review design of hydraulic structures, pertinent fluid mechanics, and hydraulic theory and applications. Examples of failures and successes of hydraulic structures. Class project and field trip required. Letter grading.

157B. Design of Water Treatment Plants. (4) Lecture, two hours; discussion, two hours; laboratory, four hours; other, four hours. Requisite: course 155. Water quality standards and regulations, overview of water treatment plants, design of unit operations, pre-design of water treatment plants, hydraulics of plants, process control, and cost estimation. Letter grading.

157C. Design of Wastewater Treatment Plants. (4) Lecture, four hours; outside study, eight hours. Requisite: course 155. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics. Letter grading.

160. Environmental Monitoring and Data Analysis. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 11, 15, 153, Mathematics 32A, 33A. Random and multistage sampling of environmental systems, empirical models and curve fitting, estimation of trends and statistical parameters, regression and correlation, factor analysis of multivariate data, kriging, monitoring network design and field experimental design, visual representation and computational mapping of environmental data. Letter grading.

163. Introduction to Atmospheric Chemistry and Air Pollution. (4) Lecture, four hours; outside study, eight hours. Requisites: course 153, Chemistry 20A, 20B, Mathematics 31A, 31B, Physics 1A, 1B. Description of processes affecting chemical composition of troposphere: air pollutant concentrations/standards, urban and regional ozone, aerosol pollution, formation/deposition of acid precipitation, fate of anthropogenic/toxic/natural organic and inorganic compounds, selected global chemical cycle(s). Control technologies. Letter grading.

164. Hazardous Waste Site Investigation and Remediation. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150, 153, Mechanical and Aerospace Engineering 103. Overview of hazardous waste types and potential sources. Techniques in measuring and modeling subsurface flow and contaminant transport in the subsurface. Design project illustrating a remedial investigation and feasibility study. Letter grading.

166. Environmental Microbiology. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

180. Introduction to Transportation Engineering. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Designed for juniors/seniors. General characteristics of transportation systems, including streets and highways, rail, transit, air, and water. Capacity considerations including time-space diagrams and queueing. Components of transportation system design, including horizontal and vertical alignment, cross sections, earthwork, drainage, and pavements. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

220. Advanced Soil Mechanics and Stability of Slopes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 120. State of stress. Consolidation and settlement analysis. Shear strength of granular and cohesive soils. In situ and laboratory methods for soil property evaluation. Static slope stability. Letter grading.

221. Advanced Foundation Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 121, 220. Stress distribution. Hydro-compression and swell of earth fills. Bearing capacity and settlement of shallow foundations. Performance of pile and pier foundations under vertical and lateral loading. Construction considerations for pile foundations. Letter grading.

222. Soil Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 120. In-depth study of stress-strain behavior of soils under cyclic and dynamic loads caused by earthquakes, ocean waves, machine foundations, and similar items. Analysis of laboratory and field tests for determination of cyclic and dynamic soil properties. Effects of type of soil, degree of saturation, and loading conditions on cyclic properties. Letter grading.

223. Earth Retaining Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 121. Basic concepts of theory of earth pressures behind retaining structures, with special application to design of retaining walls, bulkheads, sheet piles, and excavation bracing. Effects of flexibility, creep in soils, and construction techniques on stability of bulkheads and sheet piles. Mechanical stabilization of soils, such as with soil nails and geosynthetics. Letter grading.

225. Geotechnical Earthquake Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 137. Analysis of earthquake ground motions, including seismic source modeling, travel path effects, and site response effects. Soil/structure interaction. Liquefaction susceptibility and mitigation. Undrained residual strength. Seismic slope stability. Seismic earth pressures. Letter grading.

228L. Advanced Soil Mechanics Laboratory. (4) Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 120, 121. Lectures and laboratory studies covering more advanced aspects of laboratory determination of soil properties and their application to design. Tests to determine permeability, consolidation, and shear strength. Review of advanced instrumentation and measurement techniques. Letter grading.

229. Seminar: Advanced Topics in Soil Mechanics. (4) Seminar, four hours; outside study, eight hours. Topics may vary each term to cover subjects such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories. Letter grading.

M230. Elasticity. (4) (Same as Mechanical and Aerospace Engineering M256B.) Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 256A. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy's stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Letter grading.

231. Inelastic Effects in Structures and Materials. (4) Lecture, four hours; outside study, eight hours. Requisite: course 130. Analogy between inelastic strain and applied force in stress analysis. Mathematical and physical theories of plasticity and creep and their basic assumptions. Static and dynamic analysis of inelastic beams, columns, frames, and plates. Localized plastic deformation in materials. S/U or letter grading.

232. Theory of Plates and Shells. (4) Lecture, four hours; outside study, eight hours. Requisite: course 130 or Mechanical and Aerospace Engineering 156B. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending. Letter grading.

233. Mechanics of Composite Material Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: courses M230, 232. Elastic, anisotropic stress-strain-temperature relations. Analysis of prismatic beams by three-dimensional elasticity. Analysis of laminated anisotropic plates and shells based on classical and first-order shear deformation theories. Elastodynamic behavior of laminated plates and cylinders. Letter grading.

234. Advanced Topics in Structural Mechanics. (4) Lecture, four hours; outside study, eight hours. Limited to graduate engineering students. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear mechanics, and structural mechanics in general. Topics may vary from term to term. S/U or letter grading.

235A. Advanced Structural Analysis. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis. Letter grading.

235B. Finite Element Analysis of Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 130, 235A. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects. S/U or letter grading.

235C. Nonlinear Structural Analysis. (4) Lecture, four hours; outside study, eight hours. Requisite: course 235B. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods. S/U or letter grading.

236. Stability of Structures I. (4) Lecture, four hours; outside study, eight hours. Requisite: course 130 or 135B. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Buckling of plates. S/U or letter grading.

M237A. Dynamics of Structures. (4) (Same as Mechanical and Aerospace Engineering M269A.) Lecture, four hours; outside study, eight hours. Requisite: course 137. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. S/U or letter grading.

M239. Plasticity. (4) (Same as Mechanical and Aerospace Engineering M256C.) Lecture, four hours; outside study, eight hours. Requisites: Mechanical and Aerospace Engineering 256A, M256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvant/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

M240. Optimum Structural Design. (4) (Same as Mechanical and Aerospace Engineering M267A.) Lecture, four hours; outside study, eight hours. Requisite: course 235A or Mechanical and Aerospace Engineering 261A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. S/U or letter grading.

241. Advanced Steel Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 235A. Performance characterization of steel structures for static and earthquake loads. Behavior state analysis and building code provisions for special moment resisting, braced, and eccentric braced frames. Composite steel-concrete structures. Letter grading.

242. Advanced Reinforced Concrete Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 142. Design of building and other structural systems for vertical and lateral loads. Earthquake forces. Ductility in elements and systems. Columns: secondary effects and biaxial bending. Slabs: code and analysis methods. Footings, shear walls, diaphragms, chords, and collectors. Detailing for ductile behavior. Retrofitting. Letter grading.

243A. Behavior and Design of Reinforced Concrete Structural Elements. (4) Lecture, four hours; outside study, eight hours. Requisite: course 142. Advanced topics on design of reinforced concrete structures, including stress-strain relationships for plain and confined concrete, moment-curvature analysis of sections, and design for shear. Design of slender and low-rise walls, as well as design of beam-column joints. Introduction to displacement-based design and applications of strut-and-tie models. Letter grading.

243B. Response and Design of Reinforced Concrete Structural Systems. (4) (Formerly numbered 243.) Lecture, four hours; outside study, eight hours. Requisites: courses 243A, 246. Information on response and behavior of reinforced concrete buildings to earthquake ground motions. Topics include use of elastic and inelastic response spectra, role of strength, stiffness, and ductility in design, use of prescriptive versus performance-based design methodologies, and application of elastic and inelastic analysis techniques for new and existing construction. Letter grading.

244. Structural Loads and Safety for Civil Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 141 or 142 or 143 or 144. Modeling of uncertainties in structural loads and structural mechanics; structural safety analysis; and calculation of capacity reduction factors. Letter grading.

246. Structural Response to Ground Motions. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 141, 142, 235A. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations. Letter grading.

247. Advanced Structural Dynamics for Civil Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 137, 235A, 235B, M237A or 246. Dynamic response of linear structures with proportional and nonproportional damping using modal superposition methods. Dynamic response of inelastic systems using numerical integration. Introduction to base isolation and active structural control. Earthquake engineering applications. Letter grading.

249. Selected Topics in Structural Engineering and Mechanics. (2) Lecture, two hours; outside study, six hours. Review of recent research and developments in structural engineering and mechanics. Structural analysis, finite elements, structural stability, dynamics of structures, structural design, earthquake engineering, ground motion, elasticity, plasticity, structural mechanics, mechanics of composites, and constitutive modeling. May be repeated for credit. S/U grading.

250A. Surface Water Hydrology. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150. In-depth study of surface water components of hydrologic cycle. Hydrologic mass balance analysis, hydrologic error analysis using systems investigation and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflows. Applications. Letter grading.

250B. Groundwater Hydrology. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150. Theory of movement and occurrence of water in subterranean aquifers. Steady flow in confined and unconfined aquifers. Mechanics of wells; steady and unsteady radial flows in confined and unconfined aquifers. Theory of leaky aquifers. Parameter estimation. Seawater intrusion. Numerical methods. Applications. Letter grading.

250C. Mathematical Modeling of Contaminant Transport in Groundwater. (4) Lecture, four hours; laboratory, eight hours. Requisites: courses 250B, 253. Phenomena and mechanisms of hydrodynamic dispersion, governing equations of mass transport in porous media, various analytical and numerical solutions, determination of dispersion parameters by laboratory and field experiments, coupled and multiphase pollution problems, computer programs and applications. S/U or letter grading.

251. Water Resources Systems Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiobjective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity. Letter grading.

252. Engineering Economic Analysis of Water and Environmental Planning. (4) Lecture, four hours; outside study, eight hours. Requisites: course 106A, one or more courses from Economics 1, 2, 11, 100, 101. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning. Letter grading.

253. Mathematical Models for Water Quality Management. (4) Lecture, four hours; outside study, eight hours. Requisite: course 153. Development of mathematical models for simulating environmental engineering problems. Emphasis on numerical techniques to solve nonlinear partial differential equations and their application to environmental engineering problems. Letter grading.

254A. Environmental Aquatic Inorganic Chemistry. (4) Lecture, four hours; outside study, eight hours. Requisites: Chemistry 20B, Mathematics 31A, 31B, Physics 1A, 1B. Equilibrium and kinetic descriptions of chemical behavior of metals and inorganic ions in natural fresh/marine surface waters and in water treatment. Processes include acid-base chemistry and alkalinity (carbonate system), complexation, precipitation/dissolution, absorption oxidation/reduction, and photochemistry. Letter grading.

254B. Environmental Aquatic Organic Chemistry. (4) Lecture, four hours; outside study, eight hours. Requisites: Chemistry 11A, 11B, Mathematics 31A, 31B, Physics 8A, 8B. Equilibrium and kinetic descriptions of anthropogenic and natural organic compounds in natural fresh/marine surface waters and in water treatment. Processes include sorption, air/water exchange, hydrolysis, photolysis, photooxidation, oxidation/reduction, disinfection, by-products, and ozonation. Letter grading.

254C. Aerosol, Fog, and Cloud Chemistry of Air Pollution. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 11A, 11B, Mathematics 31A, 31B, Physics 8A, 8B. Chemical/physical properties of aerosols (inorganic, metals, organic). Ionic composition. Equilibrium/dynamic gas-to-drop partitioning of water and semivolatile inorganic/organic compounds. Aqueous/condensed-phase transformations of inorganic/organic compounds and metals. Condensed-phase oxidant cycles. Letter grading.

255A. Physical and Chemical Processes for Water and Wastewater Treatment. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 155, 254A. Review of momentum and mass transfer, chemical reaction engineering, coagulation and flocculation, granular filtrations, sedimentation, carbon adsorption, gas transfer, disinfection, oxidation, and membrane processes. Letter grading.

255B. Biological Processes for Water and Wastewater Treatment. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-film processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal. Letter grading.

258A. Membrane Separations in Aquatic Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 254A. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints. S/U or letter grading.

259A. Selected Topics in Environmental Engineering. (2) Lecture, two hours; outside study, four hours. Review of recent research and developments in environmental engineering. Water and wastewater treatment systems, nonpoint pollution, multimedia impacts. May be repeated for credit. S/U grading.

259B. Selected Topics in Water Resources. (2 to 4) Lecture, four hours; outside study, eight hours. Review of recent research and developments in water resources. Water supply and hydrology, global climate change, economic planning, optimization of water resources development. May be taken for a maximum of four units. S/U or letter grading.

260. Advanced Topics in Hydrology and Water Resources. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 250A, 250B, 251. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multiobjective water resources planning, and optimization of water resource systems. Topics may vary from term to term. S/U or letter grading.

261. Colloidal Phenomena in Aquatic Systems. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 254A, 255A. Colloidal interactions, colloidal stability, colloidal hydrodynamics, surface chemistry, adsorption of pollutants on colloidal surfaces, transport of colloids in porous media, coagulation, and particle deposition. Consideration of applications to colloidal processes in aquatic environments. Letter grading.

M262A. Introduction to Atmospheric Chemistry. (4) (Same as Atmospheric Sciences M203A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. S/U or letter grading.

M262B. Atmospheric Diffusion and Air Pollution. (4) (Same as Atmospheric Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

263A. Physics of Environmental Transport. (4) (Formerly numbered 263.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Transport processes in surface water, groundwater, and atmosphere. Emphasis on exchanges across phase boundaries: sediment/water interface; air/water gas exchange; particles, droplets, and bubbles; small-scale dispersion and mixing; effect of reactions on transport; linkages between physical, chemical, and biological processes. Letter grading.

263B. Advanced Topics in Transport at Environmental Interfaces. (4) Lecture, four hours; outside study, eight hours. Requisite: course 263A. In-depth treatment of selected topics involving transport phenomena at environmental interfaces between solid, fluid, and gas phases, such as aquatic sediments, porous aggregates, and vegetative canopies. Discussion of theoretical models and experimental observations. Application to important environmental engineering problems. Letter grading.

265A. Mass Transfer in Environmental Systems. (4) Lecture, four hours; computer applications, two hours; outside study, eight hours. Designed for graduate environmental engineering program students. Physical chemistry and mass transfer fundamentals related to contaminant fate and transport in soil, air, and water systems, including soil/water sorption and desorption, contaminant retardation, vaporization and dissolution of nonaqueous phase liquids (NAPL), and other environmental systems. Letter grading.

265B. Contaminant Transport in Soils and Groundwater. (4) Lecture, four hours; computer applications, two hours; outside study, six hours. Requisites: courses 250B, 265A. Principles of mass transfer as they apply in soil and groundwater, independent estimation of transport model parameters; remediating hazardous waste sites. Letter grading.

266. Environmental Biotechnology. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 153, 254A. Environmental biotechnology — concept and potential, biotechnology of pollutional control, bioremediation, biomass conversion: composting, biogas and bioethanol production. Letter grading.

296. Advanced Topics in Civil Engineering. (2 to 4) Seminar, to be arranged. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297. Seminar: Current Topics in Civil Engineering. (2 to 4) Seminar, to be arranged. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate civil engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours. Preparation: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate civil engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate civil engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Sarah P. Morris, Ph.D., *Chair*

Professors

Ann L.T. Bergren, Ph.D.
David L. Blank, Ph.D.
Andrew R. Dyck, Ph.D.
Bernard D. Frischer, Ph.D.
Sander M. Goldberg, Ph.D.
Michael W. Haslam, Ph.D.
Steven Lattimore, Ph.D.
Sarah P. Morris, Ph.D.
Brent H. Vine, Ph.D.

Professors Emeriti

Philip Levine, Ph.D.
Bengt T.M. Löfstedt, Ph.D.
Jaan Puhvel, Ph.D.
Albert H. Travis, Ph.D.

Associate Professors

Robert A. Curval, Ph.D.
Katherine C. King, Ph.D.
Kathryn A. Morgan, Ph.D.
Carole E. Newlands, Ph.D.

Scope and Objectives

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, linguistics, mythology, philosophy, and religion. The department is also strong in two fields which are not universally taught in classics departments, namely medieval Latin and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in Greek and Latin. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

Undergraduate Study

Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses.

Classical Civilization B.A.

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the classical civilization major is to provide a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

Preparation for the Major

Required: Classics 10, 20, and one course from 40, 41, 42.

The Major

Required: (1) Greek 3 or Latin 3; (2) two courses in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B, 118); (3) two courses in classical art or archaeology (Classics M153A through M153K); (4) seven upper division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser) — no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 195 may be applied as only one course toward the major; (5) one senior seminar (Classics 197); with approval of the undergraduate adviser, a senior paper (Classics 195 or 199) may be substituted for the senior seminar.

Greek B.A.

Preparation for the Major

Required: Classics 10, 20; Greek 1, 2, 3, or equivalent.

The Major

Required: Eight upper division Greek courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

Greek and Latin B.A.

Preparation for the Major

Required: Classics 10, 20; Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: Ten upper division Greek and/or Latin courses (of which at least four must be in each language), including Greek 110 or Latin 110, and three courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

Latin B.A.

Preparation for the Major

Required: Classics 10, 20; Latin 1, 2, 3, or equivalent.

The Major

Required: Eight upper division Latin courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek 200A-200B-200C and Latin 200A-200B-200C with consent of the instructor.

English/Greek B.A.

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

English/Latin B.A.

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Latin 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105A and 113, selected in consultation with an adviser in the Department of Classics (of these seven courses,

at least two must be in poetry and two in prose). Total courses required: 14.

Honors Program

The honors program is open to students in each of the departmental majors. To qualify for graduation with departmental honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Classics 195 with a grade of A- or better.

To qualify for graduation with departmental highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete Classics 195 with a grade of A.

Classical Civilization Minor

The Classical Civilization minor is designed to recognize a serious commitment to the study of the cultures and civilizations of ancient Greece and Rome. Lower division survey courses in historical studies, classical literature, mythology, and film provide an essential introduction to the imagination and power of the ancient world. Students may fulfill upper division requirements from a variety of courses in classical civilization and related fields, including political and social history, literature, art and archaeology, religion, mythology, philosophy, and cultural studies of ethnicity, gender, and sexuality in antiquity.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units): Classics 10, 20, and one course from 30, 40, 41, 42.

Required Upper Division Courses (20 units): Five courses selected from Classics 140 through 197. One course in a related field may be substituted with approval of the faculty undergraduate adviser.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Greek Minor

The Greek minor is designed to recognize a serious commitment to the study of the Greek language. After a year of elementary Greek (Greek 1, 2, 3) or its equivalent, students select departmental upper division reading courses in ancient Greek prose and poetry which provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Homeric epic, lyric poetry, tragedy and comedy, history, rhetoric, philosophy, and the New Testament.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (15 units): Greek 1, 2, 3, or equivalent.

Required Upper Division Courses (20 units): Five courses selected from Greek 100 through 133.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Latin Minor

The Latin minor is designed to recognize a serious commitment to the study of the Latin language. After a year of elementary Latin (Latin 1, 2, 3) or its equivalent, students select departmental upper division reading courses in classical (and/or late antique and medieval) Latin prose and poetry which provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Roman comedy, epic, lyric, elegy, satire, history, rhetoric, philosophy, epistolography, and the novel.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (15 units): Latin 1, 2, 3, or equivalent.

Required Upper Division Courses (20 units): Five courses selected from Latin 100 through 133.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Classics offers the Master of Arts (M.A.) degrees in Classics, in Greek, and in Latin.

Admission

Requirements for admission to the M.A. programs are a UCLA B.A. degree, or the equivalent, with a major in classics for the Classics M.A., Greek for the Greek M.A., or Latin for the Latin M.A.; a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and Graduate Record Examination (GRE) scores. Applicants

for the Classics M.A. program who are deficient in Greek or Latin may be admitted to the Greek or Latin program, then permitted to transfer into the classics program when the deficiencies have been removed.

Areas of Study

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Course Requirements

The courses presented for the Classics M.A. must include (1) Classics 287, (2) Greek or Latin 210, and (3) five courses from Greek 200A-200B-200C/Latin 200A-200B-200C. Courses for the Greek M.A. are (1) Classics 287, (2) Greek 210, and (3) Greek 200A-200B-200C. Courses for the Latin M.A. are (1) Classics 287, (2) Latin 210, (3) Latin 200A-200B-200C. The six-unit 200A-200B-200C courses test the appropriate part of the departmental reading lists in a one-hour translation examination. The remaining courses are to be selected in consultation with the graduate adviser.

No more than two half seminars, each counting as two units, may be applied toward the M.A. course requirements. No more than one course in the 500 series may be applied toward the M.A. course requirements.

No more than one 596 course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Before the examination, students are expected to complete the departmental reading lists in Greek authors for the Greek M.A., or Latin authors for the Latin M.A., or in Greek and Latin authors for the Classics M.A. The examination consists of a three-hour written test in Greek and Latin literature (Greek for Greek M.A., Latin for Latin M.A., Greek and Latin for Classics M.A.) in two parts: (1) passages for translation at sight and for generic identification and comparison; (2) an essay question combining periods kept separate in the 200A-200B-200C courses (for Classics M.A., combining Greek and Latin). It is to be taken no later than one quarter after the fulfillment of the M.A. course requirements. It may be repeated once, in the quarter following the first attempt; in exceptional cases and with the consent of the departmental faculty, more than once. For admission into the Ph.D. program, a grade of B+ or better is required.

Thesis Plan

None.

Doctoral Degree

Admission

A UCLA M.A. degree in Classics, Greek, or Latin with a comprehensive examination grade of B+ or better, or an equivalent degree from another university is required for admission to the program leading to the Ph.D. degree in Classics.

In addition to an M.A. degree, the department requires a statement of purpose. If applicants do not have a UCLA M.A., they must also submit three letters of recommendation, normally from previous instructors in the classics, and Graduate Record Examination (GRE) scores. While there is no minimum required score, the GRE is used as a criterion in uncertain cases, and to assess applications for teaching assistantships and other financial assistance from the department. The application may be obtained by writing to the department.

Major Fields or Subdisciplines

The department offers the Ph.D. in Classics with major fields in classical literature and philology; classical linguistics; Byzantine Greek; and medieval Latin.

Course Requirements

Classical Literature and Philology. M.A. degree holders in Greek only or Latin only must take two 200A-200B-200C courses in the other language. In addition, five (or more) 200-series courses are required of all Ph.D. students, including Greek 210 and Latin 210 unless taken previously. Required courses, except for Greek 210 and Latin 210, are in addition to those taken for the M.A.

Classical Linguistics. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking two 200A-200B-200C courses in the other language. A minimum of five (full) seminars is required for this major field: Classics 180 (or an equivalent undergraduate or graduate course taken at UCLA or elsewhere), Classics 240, Greek 242, 243, Latin 242, and either Classics 230A-230B or one quarter of Vedic (Indic M222A, presupposing three quarters of upper division classical Sanskrit).

Byzantine Greek. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in the other language. A minimum of five (full) seminars is required: Greek 210, at least two seminars from 231A-231B-231C, 240A-240B, 245, History 216A-216B.

Medieval Latin. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in the other language. A minimum of five (full) seminars is required: Latin 130 or 120, 131, 133 (or equivalent undergraduate or graduate courses taken at UCLA or elsewhere); Latin 210; at least two seminars from Latin 231A-231B, 243 or History 219A or 219B; Greek 231A or 231B or 231C (or an upper division medieval language course such as French 115A, 115B, 115C, German 152, Italian 113, 114A, 114B, 190, Spanish M118A, M118B, 122, 123, or an equivalent undergraduate or graduate course taken at UCLA or elsewhere); History 217.

Most classics, Greek, and Latin seminars may be taken in one of two ways: (1) as full seminars, with the requirement of a final paper (or

an equivalent workload, such as a final examination, as designated by the instructor) to be presented to the instructor and assessed as part of the final grade; full seminars carry four units, with letter grading or (2) as half seminars, requiring full participation in the course but no paper (or equivalent as described above). Half seminars carry two units and are normally taken for an S/U grade only, except that arrangements may be made with the instructor beforehand, at the instructor's discretion, for a letter grade to be given.

Written and Oral Qualifying Examinations

The major fields have separate reading lists. All lists include the reading list in Greek and in Latin authors required for the M.A. in Classics. The major fields have the following examination structure:

Classical Literature and Philology: (1) Two one and one-half hour translation examinations, one in Greek, one in Latin, which may be taken concurrently or separately, consisting of passages from the Ph.D. reading list and other literature (M.A. degree holders in Greek only or Latin only take an additional two-hour examination in sight translation from the other language); (2) a 15- to 22-page research paper on a field or author of the student's choosing outside the area of specialization (submitted either before or after the comprehensive examination); (3) a written three-hour examination in the area of the student's specialization and prospective dissertation topic.

Classical Linguistics: (1) A written three-hour translation examination in classical Greek or Latin (half from the reading list and half at sight); (2) a written three-hour examination consisting of passages of ancient texts covered in the required course, for translation and comment; (3) a two-hour written examination in comparative grammar.

Byzantine Greek: (1) A written three-hour translation examination in classical Greek (half from the reading list and half at sight); (2) a written three-hour examination on Byzantine Greek (translation from the reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Medieval Latin: (1) A written three-hour translation examination in classical Latin (half from the reading list and half at sight); (2) a written three-hour examination on medieval Latin (translation from the reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Each qualifying examination may normally be retaken twice. Promptly on the completion of the last qualifying examination, the University Oral Qualifying Examination is administered by the doctoral committee, probing the candidate's knowledge of the major field (and possible stipulated areas outside the specialization) and discussing a formal dissertation proposal.

Classics

Lower Division Courses

10. Survey of Classical Greek Culture. (4) Lecture, two to three hours; discussion, 90 minutes; outside study, seven and one-half hours. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology. P/NP or letter grading.

20. Survey of Roman Civilization. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Latin not required. Study of life and culture of Rome from time of its foundation to end of antiquity. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation. P/NP or letter grading.

30. Introduction to Classical Mythology. (4) (Formerly numbered 161.) Lecture, three hours; discussion, one hour. Introduction to myths and legends of ancient Greece and Rome, role of those stories in their societies, and modern approaches to studying them. P/NP or letter grading.

40. Survey of Greek Literature in Translation. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

41. Survey of Latin Literature in Translation. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.

42. Cinema and the Ancient World. (4) Lecture, three hours; discussion, 90 minutes. Use of popular cinema to introduce students to ancient Greek and Roman culture; limits of investigation set by individual instructor. P/NP or letter grading.

50F. Power and Imagination in Ancient Rome. (4) Lecture, 90 minutes; discussion, 90 minutes. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

51A. Art and Archaeology of Classical World: Greece. (4) (Formerly numbered 51.) Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek art and archaeology at discretion of instructor. P/NP or letter grading.

51B. Art and Archaeology of Classical World: Rome. (4) (Formerly numbered 51.) Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Roman art and archaeology at discretion of instructor. P/NP or letter grading.

55. Origins and Nature of English Vocabulary. (4) Lecture, three hours. Origins and nature of English vocabulary, from Proto-Indo-European prehistory to current slang. Topics include the Greek and Latin component in English (including technical terminology), the alphabet and English spelling, semantic change and word formation, vocabulary in literature and film.

M70. Survey of Medieval Greek Culture. (4) (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Socrates. Examination of evidence for Socrates' life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him.

88C. Comparative Mythology. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and genetic models. Reconstruction of protomyths common to prehistoric Western Asia and Europe.

88D. The Greek Symposium. Freshman seminar on the topic of the Greek symposium, an institution that permits students to understand many major features of Greek culture and society.

Upper Division Courses

140. Topics in History of Greek Literature. (4) Lecture, three hours. Requisites: courses 10, 40. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

141. Topics in History of Latin Literature. (4) Lecture, three hours. Requisites: courses 20, 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

142. Ancient Epic. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Homer's *Iliad* and *Odyssey*, Vergil's *Aeneid*, and Ovid's *Metamorphoses*, studied in translation.

143. Ancient Drama. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

144. Topical Studies in Ancient Culture. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Investigation of a problem in ancient culture that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

M145A. Ancient Greek and Roman Philosophy. (4) (Same as Philosophy M103A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

M145B. Later Ancient Greek Philosophy. (4) (Same as Philosophy M103B.) Lecture, three hours; outside study, nine hours. Requisite: one course from M145A, Philosophy 1, 100A, M101B, M102. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

M146A. Plato — Earlier Dialogues. (4) (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

M146B. Plato — Later Dialogues. (4) (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M146A. Study of selected topics in middle and later dialogues of Plato.

M147. Aristotle. (4) (Same as Philosophy M102.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected works of Aristotle.

150A. Origins of the Western View of Women: The Female in Greek Thought. (4) Lecture, three hours. Requisite: course 10. Interdisciplinary study of concept of the female in various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women.

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. (4) Lecture, three hours. Requisite: course 20. Interdisciplinary study of concept of the female in Roman and early Christian thought. Special emphasis on status of the female with regard to sexuality, procreation, and the sacred.

C151E. Archaeological Field Techniques. (12) Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

152. The Ancient City. (4) Lecture, three to four hours. Requisites: courses 10 and 20, or History 1A. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of form, design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources.

M153A. Minoan Art and Archaeology. (4) (Same as Art History M102A.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

M153B. Mycenaean Art and Architecture. (4) (Same as Art History M102B.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Mycenaean Greece from 2000 to 1000 B.C. P/NP or letter grading.

M153C. Archaic Greek Art and Archaeology. (4) (Same as Art History M102C.) Lecture, three hours. Requisites: course 10, Art History 50. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M153D. Classical Greek Art and Archaeology. (4) (Same as Art History M102D.) Lecture, three hours. Requisites: course 10, Art History 50. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M153E. Hellenistic Greek Art and Archaeology. (4) (Same as Art History M102E.) Lecture, three hours. Requisites: course 10, Art History 50. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

M153F. Etruscan Art. (4) (Same as Art History M102F.) Lecture, three hours. Requisite: course 20 or Art History 50. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

M153G. Roman Art. (4) (Same as Art History M102G.) Lecture, three hours. Requisite: Art History 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

M153H. Late Roman Art. (4) (Same as Art History M102H.) Lecture, three hours. Requisites: course M153G, Art History 50. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

M153I-M153J-M153K. Classical Archaeology. (4) (Same as Art History M102I-M102J-M102K.) Lecture, three or four hours. Requisite: course 10 or 20 or Art History 50 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M153I.** Greco-Roman Architecture; **M153J.** Greco-Roman Sculpture; **M153K.** Greco-Roman Painting.

160. Legal Advocacy in Ancient World. (4) Lecture, three hours. Study of theory and practice of legal advocacy in classical Greece and Rome, with emphasis on speeches of Cicero.

162. Classical Myth in Literature. (4) Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures.

165. Ancient Athletics. (4) Requisite: course 10 or History 1A. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art.

166A. Greek Religion. (4) Requisite: course 10. Study of the religion of the ancient Greeks.

166B. Roman Religion. (4) Requisite: course 20. Study of the religion of the ancient Romans.

167. Greek and Roman Magic. (4) Lecture, three hours. Requisite: course 10 or 20. Study of beliefs about supernatural phenomena in the ancient world, including witches, ghosts, vampires, and magic spells, attested in both literary and archaeological sources. P/NP or letter grading.

168. Comparative Mythology. (4) Lecture, three hours. Requisite: course 30. Religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies.

M170. Power and Imagination in Byzantium. (4) (Same as History M122.) Lecture, three hours. Requisites: course M70 or History 123A-123B. Designed for juniors/seniors. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

180. Introduction to Classical Linguistics. (4) Requisites: Greek 3, Latin 3. Basics of comparative grammar of Greek and Latin in relation to one another and in the frame of Indo-European linguistics.

190. The Medieval Book. (4) Seminar, three hours. Requisites: courses 10, 20, and 40 or 41. Limited to senior Greek and Latin, Greek, Latin, and Classical Civilization majors. History of the book from manuscript to printing, with attention to construction, layout, decoration, and script, as well as changing cultural and historical contexts, medieval methods of information retrieval, and transition from script to print culture.

195. Senior Honors Paper. (4) Supervised through individual consultation with an appropriate faculty member, students revise paper written in a prior upper division course into substantial piece of academic writing.

197. Senior Seminar. (4) Seminar, three hours. Limited to seniors. Seminar on important themes, periods, genres of ancient Greek and Roman world that take an innovative interdisciplinary approach to questions old and new. Class presentations and papers.

199. Special Studies in Classics. (2 to 8) Limited to seniors.

Graduate Courses

200. History of Classical Scholarship. (4) Lecture, four hours. S/U or letter grading.

201B. Topics in Ancient History: Roman World (2 or 4). Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

M223. Introduction to Transmission of Ancient Latin Literature. (4) (Same as History M223.) Discussion, three hours. Designed for graduate students. Examination of role of Latin classical authors in history of Middle Ages and Renaissance to understand processes by which Latin literature has been preserved.

230A-230B. Language in Ancient Asia Minor. (4) Survey of the language situation in Anatolia in 2nd and 1st millennia B.C. Readings in Hittite, Palaic, Luwian, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times.

244. Textual Criticism: Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. (4) Seminar, three hours. Different steps required in preparation of a critical edition of an ancient text: localizing manuscripts; collation; establishing the stemma; selecting the right reading on basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of *apparatus criticus* and *apparatus fontium*.

245. Computing and Classics. (4) Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism.

246. Greek and Latin Meter. (4) Comprehensive study of meter as it functions in classical poetry.

251A. Seminar: Classical Archaeology — Aegean Bronze Age. (2 or 4) Seminar, three hours. S/U or letter grading.

251B. Seminar: Classical Archaeology — Greco-Roman Architecture. (4) Seminar, three hours. S/U or letter grading.

251C. Seminar: Classical Archaeology — Greco-Roman Sculpture. (4) Seminar, three hours. S/U or letter grading.

251D. Seminar: Classical Archaeology — Greco-Roman Painting. (2 or 4) Seminar, three hours. Studies in style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor.

C251E. Archaeological Field Techniques. (12) Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading.

252. Topography and Monuments of Athens. (2 or 4) Lecture, two or four hours. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. S/U or letter grading.

253. Topography and Monuments of Rome. (4) Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains.

260. Topics in Ancient Religion. (4) Seminar, three hours.

268. Seminar: Comparative Mythology. (4) Requisite: course 168. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies.

287. Graduate Colloquium in Classical Literature. (4) Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. S/U grading.

Greek

Lower Division Courses

1. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours.

2. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 1.

3. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 2.

15. Elementary Modern Greek. (12) Lecture, 18 to 19 hours. Eight-week intensive introduction to principles of speaking, reading, and writing modern (demotic) Greek. Offered in summer only. P/NP or letter grading.

16. Intensive First-Year Greek. (12) Lecture, 15 hours. Ten-week intensive introduction to Greek language equivalent to courses 1, 2, and 3. Offered in summer only. Letter grading.

Upper Division Courses

100. Readings in Greek Prose. Requisite: course 3. Reading of Plato's *Apology* or a text of comparable difficulty.

101A. Homer: *Odyssey*. (4) Requisite: course 100.

101B. Homer: *Iliad*. (4) Requisite: course 100.

102. Lyric Poets. (4) Requisite: course 100. Selections from Archilochus to Bacchylides.

103. Aeschylus. (4) Requisite: course 100.

104. Sophocles. (4) Requisite: course 100.

105. Euripides. (4) Requisite: course 100.

106. Aristophanes. (4) Requisite: course 100.

107. Hesiod. (4) Lecture, three hours. Requisite: course 100. Reading of *Theogony* and excerpts from *Works and Days*, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology.

110. Study of Greek Prose. (4) Requisite: course 100. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose.

111. Herodotus. (4) Requisite: course 100.

112. Thucydides. (4) Requisite: course 100.

113. Attic Orators. (4) Requisite: course 100.

115. Xenophon. (4) Lecture, three hours. Requisite: course 100. Reading of one major work of Xenophon — the *Memorabilia*, *Cyropaedia*, *Anabasis*, *Hellenica*, or *Oeconomicus* — in Greek. P/NP or letter grading.

121. Plato. (4) Requisite: course 100.

122. Plato: *Republic*. (4) Requisite: course 100.

123. Aristotle: *Poetics* and *Rhetoric*. (4) Requisite: course 100.

124. Aristotle: *Ethics*. (4) (4) Requisite: course 100.

130. Readings in the New Testament. (4) Requisite: course 3.

131. Readings in Later Greek. (4) Requisite: course 100. Topics vary from year to year and include "Longinus," On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolography Graeci.

132. Survey of Byzantine Literature. (4) Requisite: course 100. Readings based on (1) *Anthology of Byzantine Prose*, ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse*, ed. C.A. Trypanis, or if unavailable, *Poeti bizantini*, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures.

133. Readings in Byzantine Literature. (4) Requisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the *Alexiad* of Anna Comnena, and Digenis Akritas.

199. Special Studies in Greek. (2 to 8) Limited to seniors.

Graduate Courses

200A-200B-200C. History of Greek Literature (6-6-6). Lectures on history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in original language.

201A-201B. Homer: *Iliad*. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

202A-202B. Homer: *Odyssey* and the Epic Cycle. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

203. Hesiod. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

204. Homeric Hymns. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205. Seminar: Aeschylus. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

206A-206B. Sophocles. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

207A-207B. Euripides. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

208A-208B. Aristophanes. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

209A-209B. Seminars: Hellenistic Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

210. Advanced Greek Prose Composition. Requisite: course 110.

211A-211B. Herodotus. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

212A-212B. Thucydides. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

213. Seminar: Greek Historiography. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

214. Demosthenes. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

215. Early Greek Orators. (2 or 4) Studies in works of Antiphon, Andocides, and Lysias. S/U (two-unit course) or letter (four-unit course) grading.

216. Menander. (2 or 4) Preparation: reading knowledge of classical Greek. S/U (two-unit course) or letter (four-unit course) grading.

217A-217B. Greek Lyric Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading. **217A.** Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. **217B.** Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of the epinician.

220. Seminar: Greek Novel. (2 or 4) Seminar, three hours. Study of the Greek romance and its place in Greek literature. Two texts (Chariton: *Chaereas and Callirhoe* and Longus: *Daphnis and Chloe*) studied in some detail. S/U (two-unit course) or letter (four-unit course) grading.

221. Seminar: Pre-Socratic Philosophers. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

222A-222B. Plato. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

223A-223B. Aristotle. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

224. Seminar: Post-Aristotelian Philosophy. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

229. Sight Translation (2 to 4). Discussion, three hours. Designed for graduate students. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions.

231A-231B-231C. Seminars: Later Greek and Byzantine Literature. (2 or 4) Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

233. Byzantine Poetry. (2 or 4) Study of main representatives of both religious and secular poetry. S/U (two-unit course) or letter (four-unit course) grading.

240A-240B. History of the Greek Language. 240A. Linguistic history of classical Greek. **240B.** Postclassical, medieval, and modern Greek.

241. Greek Epigraphy. (4) Survey of Greek historical inscriptions, chiefly Attic.

242. Greek Dialects and Historical Grammar. (4) Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics.

243. Mycenaean Greek. (2 or 4) Seminar, three hours. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. S/U or letter grading.

244. Greek Papyrology. (4) Preparation: reading knowledge of Greek. Introduction to Greek papyri, considered both as historical documents and as carriers of literature.

245. Greek Paleography. (4) Studies in development of book hand in Greek manuscripts earlier than the invention of printing.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. S/U grading.

Latin

Lower Division Courses

1. Elementary Latin. (5) Lecture, five hours; outside study, 10 hours.

1G. Elementary Latin for Graduate Students (No credit). Concurrently scheduled with course 14.

2. Elementary Latin. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 1.

3. Elementary Latin. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 2 or 14.

14. Elementary Latin: Intensive. (10) Lecture, 10 hours; outside study, 20 hours. Declensions of nouns and adjectives, conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose. P/NP or letter grading.

16. Intensive First-Year Latin. (12) Lecture, 15 hours. Ten-week intensive introduction to Latin language equivalent to courses 1, 2, and 3. Offered in summer only. Letter grading.

Upper Division Courses

100. Readings in Latin Prose and Poetry. (4) Lecture, three hours. Requisite: course 3. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally requisite to other courses in the Latin 100 series.

101. Plautus. (4) Requisite: course 100.

102. Terence. (4) Requisite: course 100.

103. Lucretius. (4) Requisite: course 100.

104. Ovid. (4) Requisite: course 100.

105A. Beginning Vergil: Selections from *Aeneid* I-VI. (4) Lecture, three hours. Requisite: course 100. Reading of one or more books from first half of the *Aeneid*, designed especially for students with only limited experience in reading Latin poetry.

105B. Advanced Vergil. (4) Lecture, three hours. Requisite: course 105A. Reading and discussion of Vergil's *Eclogues*, *Georgics*, and/or second half of the *Aeneid*. May be repeated for credit with change in readings. P/NP or letter grading.

106. Catullus. (4) Requisite: course 100.

107. Horace. (4) Requisite: course 100.

108. Roman Elegy. (4) Requisite: course 100. Selections from Catullus, Tibullus, and Propertius.

109. Roman Satire. (4) Requisite: course 100. Selections from *Epistles* of Horace, *Satires* of Juvenal, and *Epigrams* of Martial.

110. Study of Latin Prose. (4) Lecture, three hours. Requisite: course 100. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose.

111. Livy. (4) Requisite: course 100.

112. Tacitus. (4) Requisite: course 100.

113. Cicero: *The Orations*. Requisite: course 100.

114. Roman Epistolography: Cicero and Pliny. (4) Requisite: course 100.

115. Caesar. (4) Requisite: course 100.

116. Roman Novel. (4) Lecture, three hours. Requisite: course 100. Reading and discussion of either Petronius' *Satyricon* or Apuleius' *Metamorphoses* and development of the genre of prose novel in antiquity. May be repeated for credit with change in author and text.

117. Sallust. (4) Requisite: course 100.

118. Seneca. (4) Requisite: course 100. Selection of Seneca's works read in Latin.

120. The Vulgate. (4) Lecture, three hours. Requisite: course 3. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin.

121. Patristic Texts. (4) Lecture, three hours. Requisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin.

130. Introduction to Medieval Latin. (4) Requisite: course 3. Reading of easy prose texts, with emphasis on basic language training.

131. Medieval Latin Prose. (4) Requisite: course 130. Extensive reading of selected texts in prose, with emphasis on idiosyncrasies of medieval Latin.

133. Medieval Latin Poetry. (4) Preparation: one upper division Latin language course.

199. Special Studies in Latin. (2 to 8) Limited to seniors.

Graduate Courses

200A-200B-200C. History of Latin Literature (6-6-6). Lectures on history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original.

201. Roman Epic Tradition. (2 or 4) Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

202. Seminar: Catullus. (2 or 4) Detailed consideration of entire Catullan corpus. S/U (two-unit course) or letter (four-unit course) grading.

203A. Elegiac Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

203B. Propertius. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

204A-204B. Vergil's *Aeneid*. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205A. Seminar: Vergil's *Bucolics*. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205B. Seminar: Vergil's *Georgics*. (2 or 4) Close reading of Vergil's text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work's place within the tradition of rural poetry. S/U (two-unit course) or letter (four-unit course) grading.

206. Horace. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

207. Roman Comedy. (2 or 4) Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (two-unit course) or letter (four-unit course) grading.

208. Ovid. (2 or 4) Preparation: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

209. Seminar: Roman Satire. (2 or 4) Detailed study of an individual satirist, with attention to his position in development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (two-unit course) or letter (four-unit course) grading.

210. Advanced Latin Prose Composition. (4) Requirement: course 110.

211A-211B-211C. Seminars: Roman Historians. (2 or 4 each) Study of considerable portions of writings of the following. S/U (two-unit course) or letter (four-unit course) grading. **211A.** Sallust; **211B.** Livy; **211C.** Tacitus.

215. Seminar: Roman Novel. (2 or 4) Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses*: study of literary problems. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

216. Roman Rhetoric. (2 or 4) Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in rhetorical tradition. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

220. Cicero's Orations. (2 or 4) Seminar, three hours. S/U (two-unit course) or letter (four-unit course) grading.

221A. Cicero's Philosophical Works. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

221B. Cicero: De Natura Deorum. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

222. Seminar: Roman Stoicism. (2 or 4) Preparation: reading knowledge of Greek and Latin. S/U (two-unit course) or letter (four-unit course) grading.

223. Lucretius. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

224. Seneca. (2 or 4) Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philological problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

229. Sight Translation (2 to 4). Discussion, three hours. Designed for graduate students. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions.

231A-231B. Seminars: Medieval Latin. (2 or 4) Preparation: at least one upper division Latin course. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (two-unit course) or letter (four-unit course) grading.

232. Vulgar Latin. (4) History and characteristics of popular Latin; its development into early forms of the Romance languages.

235. Late Latin Poetry. (2 or 4) Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Ovid and fall of the Roman Empire. May be repeated with change in author.

236. Late Latin Prose. (2 or 4) Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire. May be repeated with change in author.

240. History of the Latin Language. (4) Development of Latin from the earliest monuments until its emergence in the Romance languages.

242. Italic Dialects and Latin Historical Grammar. (4) Linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in context of Italic and Indo-European linguistics.

243. Seminar: Latin Paleography. (4) Studies in development of book hand in Latin manuscripts earlier than the invention of printing.

245. Neo-Latin. (2 or 4) Seminar, three hours. Preparation: at least two upper division Latin courses. Requisite: course 100. Survey of texts by one or more authors from Renaissance to the present, written on related topics. S/U or letter grading.

370. Teaching Latin. (4) Designed for graduate students. Techniques for teaching; organization of courses; review of content of curriculum offered in junior and senior high schools.

495. College Teaching of Latin. (2) Preparation: appointment as a teaching assistant. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. S/U grading.

Scope and Objectives

The major in Communication Studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialty are offered: the concentration in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the concentration in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Undergraduate Study

Communication Studies B.A.

Students selecting the major in Communication Studies must complete the required lower division requisites and a minimum of 15 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available during Spring Quarter in the program office.

Preparation for the Major

Required Lower Division Courses: Communication Studies 10, Anthropology 33 or Linguistics 1, Speech 1, one statistics course from Economics M40 or Sociology M18 or Statistics 10. Three additional courses must be selected from Political Science 40, Psychology 10, Sociology 1, and Economics 1 or 2 or 5 or Political Science 30.

Students are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

Writing Requirement

Required: English Composition 131D.

The Major

Required Core Courses: Communication Studies 100, 101, 150.

Interpersonal Communication Concentration

Required: Eleven courses as follows:

(1) Seven courses, three of which must be in communication studies and one of which must be Communication Studies 115 or 120, from Anthropology 141, Communication Studies 115, M116, 120, M125, 130, M144A, M144B, 197G, 197J, Psychology 137C, M165, 174, 177, 178, Sociology 132 or Psychology 135, Sociology 135 or Psychology 137I, and Sociology 156 or 160.

(2) Two mass communication elective courses from Communication Studies M135, 140, M147, 152, 153, M155, 156, 165, 170, 177, 180, 187, 197A, 197B, 197K, 197N, 197R, 197T.

(3) Two general interpersonal communication elective courses from one of the following groups: (a) *language theory* — Anthropology M140, M145 (by petition), Applied Linguistics and Teaching English as a Second Language M189, Communication Studies M124, 197E, Linguistics 103, 170, Philosophy 172, Psychology 122 or 123, (b) *media content/criticism/history* — Communication Studies 160, M161, 171, 175 (or Film and Television 116), 189, 197C, 197R, Film and Television 106A, 108, 110A, (c) *theories of social interaction* — Anthropology 133R, 135A, 135B, 142A, 142B, Communication Studies M125, M144A, M144B, 197F, Sociology 134.

Mass Communication Concentration

Required: Eleven courses as follows:

(1) Seven courses, three of which must be in communication studies, from Anthropology M140, Communication Studies M135, 140, M147, 152, 153, M155, 156, 160, M161, 165, 170, 171, 175 (or Film and Television 116), 177, 180, 187, 189, 197A, 197B, 197C, 197K, 197N, 197R, 197T, Film and Television 106A, 108, 110A, and Political Science 141B or Psychology 137B or Sociology 133.

(2) Two interpersonal communication elective courses from Communication Studies 115, M116, 120, M124, M125, 130, M144A, M144B, 197G, 197J, Psychology 135 or Sociology 132, Psychology 137I or Sociology 135, Sociology 156 or 160.

(3) Two general mass communication elective courses from one of the following groups: (a) *American studies* — Communication Studies 197D, English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B, (b) *language theory* — Anthropology M140, M145 (by petition), Applied Linguistics and Teaching English as a Second Language M189, Communication Studies M124, 197E, Linguistics 103, 170, Philosophy

172, Psychology 122 or 123, (c) *theories of social interaction* — Anthropology 133R, 135A, 135B, 142A, 142B, Communication Studies M125, M144A, M144B, 197F, Sociology 134.

Communication Studies

Lower Division Courses

10. Introduction to Communication Studies. (4) Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

15A. Production of Multimedia Software. (4) Description of what goes into a multimedia software program; discussion of different platforms (PC, Mac, network computers, servers, and transmitters) and distribution means (CD-ROM, DVD-ROM, Internet), content organization and layout, data structure and management; and overall planning for prototype and final product. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Special Topics in Communication Studies. (4 each) Seminar, three hours. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. **88A.** Mass Communication Theory; **88B.** Systems, Institutions, and Policies; **88C.** Media Content/Criticism and History; **88D.** American Studies; **88E.** Language/Interaction Structures; **88F.** Social Systematics; **88G.** Interpersonal Communication Theory; **88J.** Heterogeneous Groups Communication.

Upper Division Courses

100. Communication Theory. (4) Requisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

101. Freedom of Communication. (4) Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

115. Dyadic Communication and Interpersonal Relationships. (4) Requisite: course 100. Developmental approach to study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

M116. Communication and Conflict in Couples and Families. (4) (Same as Psychology M176.) Lecture, 90 minutes; discussion, 90 minutes. Requisites: Psychology 10, 100A, 127. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

M117. Rhetoric of Rule. (4) (Same as French M143.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

120. Principles and Types of Group Communication. (4) Requisite: course 100. Analysis of purposes, principles, and types of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

M124. Psychology of Language and Gender. (4) (Same as Psychology M137J and Women's Studies M137J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

M125. Talk and Social Institutions. (4) (Same as Sociology CM125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. P/NP or letter grading.

130. Cultural Factors in Interpersonal Communication. (4) Requisite: course 100. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and interracial communications in the small group configuration.

M135. Narrative in Mass Communication. (6) (Same as Honors Collegium M135.) Seminar, four hours; outside study, 10 hours. Examination of narrative as a primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

140. Theory of Persuasive Communication. (4) Requisite: course 100. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences.

142. Rhetorical Theory. (4) Requisite: course 100. Survey of major classical and neoclassical treatises on rhetoric. Analysis of theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in theory of rhetoric.

M144A-M144B. Conversational Structures I, II. (4) (Same as Sociology CM124A-CM124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. **M144A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **M144B.** Requisite: course M144A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

M147. Sociology of Mass Communication. (4) (Same as Sociology M176.) Requisite: course 100. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

150. Methodologies in Communication Research. (4) Lecture, three hours; discussion, one hour. Requisite: course 100. Critical studies of quantitative and qualitative methodologies in communication research.

152. Analysis of Communication Effects. (4) Requisite: course 100. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response.

153. The Media and Aggression against Women. (4) Lecture, two hours; discussion, two hours. Requisite: course 152. Study of the growing body of literature on relationship between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media.

M155. Information Superhighway. (4) (Formerly numbered 155.) (Same as Policy Studies CM110.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services.

156. Human/Computer Communication. (4) Preparation: completion of the seven preparation for the major courses. Limited to communication studies majors. Survey of behavioral, design, and evaluation issues in human/computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

M157. Culture, Identity, and Media. (4) (Same as Policy Studies M111.) Discussion, three hours. Interplay of national culture and identity with electronic media, both "old" and "new." Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia.

160. Political Communication. (4) Requisites: courses 100, 101. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

M161. Electoral Politics: Mass Media and Elections. (4) (Same as Political Science M141D.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 160. Designed for juniors/seniors. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

165. Agitational Communication. (4) Requisites: courses 100, 101. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the technique and content of their communications.

170. Legal Communication. (4) Requisites: courses 100, 101. Study of trial and appellate processes as systems of communication. Analysis of elements of the juridical process as they affect the quality of communication content. Study of rules of evidence, jury behavior, and structure of legal discourse.

171. Seminar: Theories of Freedom of Speech and Press. (4) Requisite: course 101. Exploration of relationship between freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech.

175. Criticism and the Public Arts. (4) Requisite: course 10. Introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment.

177. Libel and Freedom of Expression. (4) Lecture, two hours; discussion, two hours. Requisite: course 101. Intensive study of law of defamation and its relationship to the free flow of information in a democracy. Examination of rationale, scope, and effects of libel laws. Topics include application of libel laws to public official, public figure, and private plaintiffs and media and nonmedia defendants; group libel, privileged libel, and libelous fiction.

180. Politics of Censorship. (4) Discussion, two hours; simulation teaching, three hours. Requisite: course 101. Examination of the process and substance of debates over government and private censorship by having students become active participants in a term-long simulated battle over a current issue such as book censorship, pornography, or UNESCO's proposed "New World Information Order."

185. Field Studies in Communication. (2 to 4) Requisite: course 10. Designed for juniors/seniors. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be taken for a maximum of four units per term. P/NP grading.

187. Ethical and Policy Issues in Institutions of Mass Communication. (4) Requisites: courses 10, 101. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

189. Multicultural Television and Society. (4) Study and evaluation of cross-cultural, social, and psychological characteristics of selected national and international television programs and their implications for social learning in children. Designed to systematically study multicultural attributes related to sociocultural images and portrayals of television programs using various evaluation models and techniques.

191H. Research Methods in Communication (Honors). (4) Seminar, three hours. Requisite: course 150. Provides a working understanding of research methods in communication studies, particularly related to study of mass media effects, to give students the background necessary to design, implement, and report their own research projects. Letter grading.

196H. Undergraduate Honors Proseminar. (4) Preparation: 3.5 grade-point average in communication studies major, 3.3 grade-point average overall. Limited to seniors. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

197A-197Z. Special Topics in Communication Studies. (4 each) Lecture, three hours. Preparation: completion of preparation for the major courses. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. **197A.** Mass Communication Theory; **197B.** Systems, Institutions, and Policies; **197C.** Media Content/Criticism and History; **197D.** American Studies; **197E.** Language/Interaction Structures; **197F.** Social Systematics; **197G.** Interpersonal Communication Theory; **197J.** Heterogeneous Groups Communication; **197K.** Communication Policy; **197N.** Humanistic Approaches to Mass Communication; **197R.** Political Factors in Mass Communication; **197T.** Technology in Communication.

199. Special Studies. (2 to 8) To be arranged with faculty member who directs the study. Limited to seniors. Independent studies for seniors who desire intensive or specialized investigation of selected research topics.

199H. Special Studies for Honors Candidates. (2 to 8) To be arranged with faculty member who directs the study. Limited to senior honors program students. Independent studies for honors undergraduates who desire intensive or specialized investigation of selected research topics.

Michael Lu, M.D., M.P.H.

Lecturers

Marianne Parker Brown, M.P.H.
Susan Edelstein, M.S.W., L.C.S.W.
Jonathan Freedman, M.P.H.
Lynn Kersey, M.A., M.P.H.
Wendy Lazarus, M.S.
Michael Prelop, D.P.A., M.P.H., C.H.E.S., *Associate Field Program Supervisor*

Adjunct Professors

Neal Kaufman, M.D., M.P.H.
Steve Rottman, M.D.

Adjunct Associate Professors

Martin Anderson, Ph.D.
 Carol Archie, M.D.
 Marion Taylor Baer, Ph.D., R.D.
 Daniel H. Ershoff, Dr.P.H.
 Joanne Leslie, Ph.D.
 C. Kevin Malotte, Ph.D.

Adjunct Assistant Professors

Helen DuPlessis, M.D., M.P.H.
 Vicki Ebin, Ph.D.
 Janet Frank, Ph.D.
 Ronald Halbert, M.D.
 Kimberley Shoaf, Dr.P.H.
 Bonnie Taub, Ph.D.
 Antronette K. Yancey, M.D., M.P.H.

Scope and Objectives

The Department of Community Health Sciences focuses on the determinants of health within the context of the social structure, community, health care systems, and family units. Of particular interest is how health-related behaviors of individuals are influenced by and interact with conditions in the social, cultural, physical, and biological environment to influence health status, with particular emphasis on identifying, evaluating, and discouraging health-damaging behaviors and facilitating health-promoting behaviors. The curriculum seeks to integrate basic and applied public health theories and methods in applying them to real problems of human populations. Assessment, planning, and evaluation are common themes in the department's educational programs, which provide concentrations in the areas of health education/promotion, international family health, public health nutrition, public health policy, and sociocultural aspects of health. Students specializing in maternal and child health complete one of these concentrations as well as additional coursework.

The department offers both professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs generally assume positions in the planning, administration, and evaluation of public health programs and policies, both in the U.S. and abroad, which have as their objective the maintenance and improvement of the health of individuals, families, communities, and populations. Graduates of the doctoral programs assume teaching and research positions in a wide variety of settings, including universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Community Health Sciences offers the Master of Science (M.S.) degree in Community Health Sciences. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission

Admission requirements for the M.S. program in Public Health are the same as for the M.P.H. See the admission section under Public Health Schoolwide Programs for information on the M.P.H. program.

Areas of Study

Consult the graduate adviser.

Course Requirements

Students must complete at least one year of residence in graduate status at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Community Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses are required for the degree.

Mandatory core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived for students who have taken a similar course elsewhere and can pass the waiver examination.

Community Health Sciences 210, 211A-211B, 212, 213, Biostatistics 406, and four to six department courses (selected from an approved list) are required. Elective courses, selected in consultation with an adviser, must include the Community Health Sciences 270 series, 283 and research methods courses. Normal program length is six quarters.

Only courses in which a grade of C- or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on the major area of study must be passed. Students who fail may be reexamined once.

The preparation of a major written research report is required, and it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves

the thesis prospectus before students may file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree

Admission

In addition to the University minimum requirements, the department requires for Ph.D. degree in Public Health (1) a master's degree in public health (either an M.P.H. or M.S.) or other appropriate degree in a related field with a grade-point average of at least 3.5 for graduate studies; (2) a combined Graduate Record Examination (GRE) score of 1,200 for the verbal and quantitative sections; equivalent scores on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT) may be substituted at the discretion of the department; (3) a score of at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English; (4) an example of published or other written work; and (5) acceptance by an initial doctoral adviser in the department.

It is recommended that applicants contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

Major Fields or Subdisciplines

Faculty in the department represent a range of disciplines and focus their research and curriculum in five areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Ph.D. students may design their programs in one or more of these areas.

Course Requirements

The following courses are required if students have not already taken them or their equivalents in the course of the master's degree or other postgraduate work: Biostatistics 100A, 100B, and 406; Community Health Sciences 210, 211A-211B, 212; Epidemiology 100; Health Services 100; Environmental Health Sciences 100. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to any of the above courses not already taken, students must take a minimum of 48 units in residence in the doctoral program, to include Community Health Sciences 270A - 270B. No more than four units may be individual studies (Community Health Sciences 596). Community Health Sciences 242 or 286 (Doctoral Roundtable) is required every quarter from the first year of residency until advancement to candidacy. The Doctoral Roundtable

does not fulfill any of the 48 units required for the doctorate.

Students must complete a minor in a Ph.D. granting department outside the School of Public Health, in a discipline relevant to community health sciences. Four graduate-level courses (16 units) are required.

Written and Oral Qualifying Examinations

Before advancement to candidacy, all coursework must have been completed, and students must pass a written examination administered by the department and an oral qualifying examination in the major field. The written examination may be repeated only once. Additionally, students must complete the requirements for the minor field and pass an examination administered by the minor department or the minor member of the guidance committee.

After students pass the written qualifying examination and complete the minor requirements, and at least one month prior to taking the University Oral Qualifying Examination, a doctoral committee is nominated. The doctoral committee consists of at least four faculty members including the chair, who hold professorial appointments at UCLA. Two of the faculty must be tenured. Two of the four must hold appointments in the Department of Community Health Sciences; one must be an outside member who holds no appointment in the School of Public Health; one of the four must be from the minor field. Eligible faculty are those in the tenure-eligible series, the in-residence series, and acting or emeriti in these series. The composition of the committee must be approved by the department chair. The doctoral committee guides the student's progress toward completion of the dissertation.

Students are advanced to candidacy and commences work on a dissertation by passing the University Oral Qualifying Examination, which is administered by the doctoral committee. Only the student and the committee members attend this examination; all committee members must be present. The examination may be repeated once if a majority of the committee so recommends.

Community Health Sciences

Lower Division Courses

19. Peer Health Counselor Training. (4) Lecture, four hours. Limited to students in Peer Health Counselor Program. Analysis of student health care issues as related to campus health care delivery system and to health care consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor's role. P/NP or letter grading.

88. Lower Division Seminar: Special Topics in Community Health Sciences. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in community health sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

Upper Division Courses

100. Introduction to Community Health Sciences. (4) Lecture, three hours; discussion, one hour. Development of broad appreciation of community, cultural, developmental, and psychosocial factors as they affect health, health-related behavior, and implications for public health. Review of theories, models, and modalities of interventions and policies for health promotion and disease prevention. Letter grading.

130. Nutrition and Health. (2) Lecture, two hours. Preparation: one biology course, one chemistry course. Not open for credit to nutrition majors. Basic and clinical nutrition theory and practice for students in health sciences curricula. P/NP or letter grading.

132. Health, Disease, and Health Services in Latin America. (4) Lecture, four hours. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition. P/NP or letter grading.

M140. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4) (Formerly numbered M197.) (Same as Asian American Studies M129A.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

190. Aging Frontier: Public Health Perspective. (4) Lecture, three hours; discussion, one hour. Introduction to gerontology from public health perspective, emphasizing prevention of illness and promotion of healthy aging. Special attention to health and aging among women and racial/ethnic minorities. Letter grading.

195. Field Studies in Cancer Control. (4) Lecture, two hours; discussion, one hour; fieldwork, four hours. Requisite: Molecular, Cell, and Developmental Biology 30. Designed for juniors/seniors. Opportunity for students to become involved in cancer control through classroom discussion, lectures, service in the field, and guided research. Biology of cancer, its prevention, early detection, treatment, and rehabilitation. Letter grading.

196A. Introduction to Health Promotion Fieldwork. (4) Lecture, two hours; discussion, one hour; laboratory, six hours. Designed for juniors/seniors. Training and experience in health promotion and health education in selected ethnic communities, including participation in supervised fieldwork at sites throughout Los Angeles. Letter grading.

196B. Advanced Health Promotion Fieldwork. (4) Lecture, two hours; discussion, one hour; laboratory, six hours. Requisite: course 196A. Application of skills and experience gained in course 196A to development and provision of additional health education and health promotion in selected ethnic communities. Letter grading.

199. Special Studies. (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term. P/NP or letter grading.

Graduate Courses

200. Global Health Problems. (4) Lecture, two hours; discussion, two hours. Overview of health profile of the world in the 20th century. Global health problems and methods by which they have been dealt in context of the Alma Ata goal of "health for all by year 2000." Letter grading.

210. Community Health Sciences. (4) Lecture, three hours. Preparation: one social sciences course. Basic concepts, relationships, and policy issues in the field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective. Letter grading.

211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (4-4) Lecture, three hours; discussion, one hour; outside assignments, eight hours. Requisite: course 210. Course 211A is requisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules. Letter grading.

212. Advanced Social Research Methods in Health. (4) Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Requisites: courses 211A-211B, Biostatistics 100B, 406. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Letter grading.

213. Research in Community and Patient Health Education. (4) Lecture, three hours; discussion, two hours. Requisite: course 210. Application of conceptual, theoretical, and evaluation skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program databases. Letter grading.

214. Issues in Program Evaluation. (4) Discussion, three hours; reading and research paper, one hour. Requisite: course 212. Advanced seminar which explores problems of planning and implementing evaluation research in context of local demonstration projects. S/U or letter grading.

M216. Qualitative Research Methodology. (4) (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. S/U or letter grading.

218. Questionnaire Design and Administration. (4) Lecture, two hours; discussion, one hour; laboratory, one hour; outside assignments. Requisites: courses 211A-211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

219. Strategies for Multivariate Data Analysis. (4) Discussion, three hours. Preparation: one multivariate statistics course. Designed for graduate students. Translation of theory into a data analytic plan, with special emphasis on social epidemiology; application of this analytic plan to real data; and interpretation of results obtained through multivariate analysis. Letter grading.

220. Demography of Women. (4) Lecture, four hours. Overview of demography of women, with focus on the U.S. Areas include trends and differentials in fertility, marital patterns and living arrangements, educational attainment, and labor force participation. Letter grading.

221. Introduction to Sociocultural Aspects of Health. (4) Lecture, three hours; discussion, one hour. Examination of how social stratification and culture relate to health and health-related behavior. Consideration of four major status characteristics: age, ethnicity, gender, and socioeconomic status. Description of epidemiological patterns and discussion of social meaning of the four characteristics. Letter grading.

228. Drug Abuse Prevention. (4) Discussion, three hours. Identification and discussion of strategies for prevention of drug abuse at individual and community levels, particularly in minority populations. Letter grading.

229. Policy and Public Health Approaches to Violence Prevention. (4) Lecture, four hours. How policies relate to violence and development of skills to transmit this knowledge. Examination of wide range of policy topics and how each might be associated with a reduction/increase in violence/violent injury. Letter grading.

230. Family and Sexual Violence. (4) Lecture, three hours; community, three to four hours. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems. S/U or letter grading.

231. Maternal and Child Nutrition. (4) Lecture, four hours. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service. Letter grading.

M232. Determinants of Health. (4) (Same as Health Services M242.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

233. Hunger and Food Insecurity as Public Health Issues. (4) Lecture, three hours. Requisite: course 231 or 443. Public health aspects of hunger and food insecurity in historical and international perspectives, including measurement and identification of vulnerability, prevention, and options for relieving acute food shortage. Letter grading.

234. Obesity and Nutrition: Multidisciplinary Perspective. (2) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: admission to UCLA postdoctoral fellowship training program in obesity and nutrition, or graduate public health or biological sciences student. Multidisciplinary introduction at advanced graduate level to research methods and topics on obesity and related conditions in humans and in relevant animal and in vitro models. S/U or letter grading.

235. The Family and Mental Health. (4) Lecture, two hours; discussion, two hours; assignments, eight hours. Emphasis on how social organization of the family, relationships among family members, and extrafamilial roles of family members contribute to or detract from psychological well-being of spouses, parents, and children. S/U or letter grading.

M236. Human Resources and Economic Development. (4) (Same as Education M252C.) Lecture, four hours. Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. S/U or letter grading.

237. Evolving Paradigms of Prevention: Interventions in Early Childhood. (4) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues. Letter grading.

238. Evolving Paradigms of Prevention: Interventions in Adolescence. (4) Seminar, three hours. Designed for graduate students. Introduction to organizing principles which underlie health assessment and intervention in adolescent populations (identity formation, access to care, knowledge/attitudes/behavior influences) and provide a basis for understanding pivotal issues in health enhancement, morbidity, and mortality. Letter grading.

M239. Race and Ethnicity as a Concept in Practice and Research. (4) (Formerly numbered 239.) (Same as Asian American Studies M239.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

242. Advanced Seminar: Population and Family Health. (2) Seminar, two hours. Designed for doctoral students. Current research in population and family health. May be repeated for credit. S/U grading.

243A-243B-243C. Seminars: Public Health Practice (2 units each). Seminar, one hour; laboratory, one hour. Three-term sequence devoted to analysis of current issues, practices, research literature, and policy and trends in public health practice. Discussion of administrative, epidemiologic, and clinical methods. S/U or letter grading.

M244. Advanced Seminar: Medical Anthropology. (4) (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

M245A-M245B-M245C. Child Abuse and Neglect (2-2-1). (Same as Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Lecture, two hours. Course M245A is requisite to M245B, which is requisite to M245C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

246. Women's Roles and Family Health. (4) Lecture, two hours; discussion, one hour. Rapidly changing roles of women throughout the world are having important effects on women's own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications. S/U or letter grading.

247. Population Change and Public Policy. (4) Lecture, four hours. Examination of international population change, population-related policies, and public health implications of demographic processes. Letter grading.

248. Women's Mental Health. (4) Discussion, three hours. Designed for graduate students. Prevalence of psychological distress and psychiatric disorder among women, with emphasis on impact of social and cultural factors, including gender roles and socialization, stratification and inequality, work and family roles, diagnosis, help-seeking behavior, and treatment. Letter grading.

M249L. Ethical Issues in Public Health. (4) (Same as Health Services M249L.) Lecture, four hours. Requisites: Health Services 200A-200B-200C. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

M252. Health Policy Analysis. (4) (Same as Health Services M233.) Lecture, three hours. Requisites: Health Services 100 or 200A, M236, M287. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Letter grading.

M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2) (Same as Epidemiology M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.

257. Program Planning in Community Disaster Preparedness. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 211A-211B, 295. Health education and emergency management principles combined to design, plan, implement, and evaluate community disaster preparedness programs, including needs assessment, identification of target population, objective writing, program planning, and process, outcome, and impact evaluation. Letter grading.

258. Cooperative Interagency Management in Disasters. (4) Lecture, four hours. Requisites: courses 211A-211B, 295. Overview of interagency disaster management. How different agencies work together to respond to impact of disasters on public's health. Discussion of difficulties inherent in emergency management, as well as policy and program strategies. Letter grading.

270A-270B. Foundations of Community Health Sciences. (4-4) Lecture, four hours. Requisite: course 210. Course 270A is requisite to 270B. Designed for doctoral students. In-depth analysis of theories, methods, and research on which community health sciences are based. Letter grading.

271. Health-Related Behavior Change. (4) Lecture, four hours. Requisite: course 210. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels. Letter grading.

272. Social Epidemiology. (4) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. S/U or letter grading.

273. Social Epidemiology of Chronic Disease. (4) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other socioenvironmental factors associated with chronic diseases. S/U or letter grading.

M274. Health Professions. (4) (Same as Sociology M249A.) Lecture, three hours. Requisite: course 210. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. S/U or letter grading.

M275. Health and Illness Behavior. (4) (Same as Sociology M249B.) Lecture, four hours. Requisites: course 210, Epidemiology 100. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. S/U or letter grading.

277. Advanced Community Health Education. (4) Lecture, two hours; discussion, two hours. Requisite: course 210. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program. Letter grading.

280. International Health Education: Training and Development. (4) Lecture, four hours. Preparation: one upper division research methods or epidemiology course. Requisite: course 210. Introduction to an international perspective of health education and health promotion. Survey of current developments in health education in both developed and developing countries. Letter grading.

282. Communication in Health Promotion and Education. (4) Lecture, two hours; discussion, two hours. Requisite: course 210. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies. Letter grading.

283. Aging and Health Behavior. (4) Discussion, three hours. Requisite: course 210. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among the aged. Letter grading.

284. Sociocultural Aspects of Mental Health. (4) Discussion, three hours. Designed for graduate students. Examination of how society shapes mental health of its members and lives of those who have been identified as mentally ill. Group differences (e.g., gender, ethnicity) in disorder and how it is socially constructed. Letter grading.

285. Aging, Health, and Society. (4) Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of the elderly in America. Leading gerontological theories and major issues that affect the aged, showing how those theories and issues influence health status, health promotion, and illness among the elderly. S/U or letter grading.

286. Seminar: Behavioral Sciences and Health. (2 to 4) Seminar, two hours. Recent significant contributions of behavioral sciences to understanding health and illness, with selected and varying topics each term. May be repeated for credit. S/U grading.

M287. Politics of Health Policy. (4) (Same as Health Services M287.) Lecture, three hours; discussion, one hour. Requisites: course 210 or Health Services 200A-200B. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors. Letter grading.

288A-288B. Current Problems in Health Education. (4-4) Lecture, one hour; discussion, three hours. Preparation: three public health and/or social sciences courses. Requisite: course 210. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, and communicable and chronic diseases. In Progress and S/U grading.

289. Drug Abuse in Pregnancy: Special Focus on Adolescents and Utilizing Secondary Data Sources. (4) (Formerly numbered 298A.) Lecture, three hours; clinical placement. Designed for graduate students. Multidisciplinary graduate seminar combining didactic material on substance abuse in pregnancy, participation in ongoing research, and clinical experience in on- and off-campus settings. Medical, social, economic, and legal issues affecting pregnant substance abusers. Letter grading.

290. Race, Class, Culture, and Aging. (4) Lecture, three hours; discussion, one hour. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and the nation. Exploration of cultural and structural influences on health and lived experiences of those elders. Letter grading.

291. Health Policy and the Aged. (4) Lecture, three hours; discussion, one hour. Examination of political, economic, and social forces that shape health policy for the aged, identifying failings in those policies within framework of broader health policy problems. Letter grading.

292. Communication and Media Development in Health Promotion/Education. (4) Lecture, three hours; field practice, one hour. Requisites: course 210 or prior social sciences courses. Selected aspects of communications planning, social marketing, mass media, and communications evaluation theory and practice. Letter grading.

293. Social and Behavioral Research in AIDS: Roundtable Discussion. (2) Discussion, two hours. Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV. Letter grading.

294. Social and Behavioral Factors of AIDS/HIV: A Global Perspective. (4) Lecture, four hours. Requisites: course 100 and Epidemiology 100 or prior social sciences courses. Overview of social and behavioral factors which influence both the transmission as well as prevention of HIV/AIDS throughout the world. Letter grading.

295. Selected Topics in Disaster Relief and Humanitarian Assistance. (2) (Formerly numbered 298.) Lecture, two hours. Designed for graduate students. Overview of broad interdisciplinary issues which necessarily converge in fields of disaster preparedness and humanitarian assistance. Introduction to both theoretical and problem-solving strategies. Letter grading.

296. Advanced Research Topics in Community Health Sciences. (2 to 4) (Formerly numbered 296A-296L and 296M-296Z.) Discussion, two to four hours. Advanced study and analysis of current topics in community health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M299. Intervention to Reduce HIV and Its Consequences. (4) (Same as Psychiatry M289.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.

400. Field Studies in Public Health. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

M411. Issues in Cancer Prevention and Control. (4) (Formerly numbered 411.) (Same as Health Services M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

M420. Children with Special Health Care Needs: Systems Perspective. (4) (Same as Social Welfare M290I.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

425. Child Advocacy: Skills for Effective Action. (4) (Formerly numbered M298C.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Use of case method approach to involve students both in classroom discussions and in fieldwork projects about which they update classmates. Highly respected leaders for children in the community share experiences and offer insight. Letter grading.

426. School-Linked Services: Integrated Health, Education, and Social Services for Children in Communities. (4) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Examination of school services in context of other dramatic changes, scope of problems facing youth, roles that schools may serve as organizers/delivery sites for comprehensive services, and factors that influence development of appropriate school service models. Letter grading.

430B. Advanced Issues in International Health. (4) Lecture, two hours; discussion, two hours. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance. S/U or letter grading.

431. Research in Women's Health: Theories and Methods. (4) Lecture, four hours. Interdisciplinary perspective critically examining research on women's health. Overview of scientific inquiry and methods; gender roles; status attainment and medical sociology. Review of current data on women's health. Letter grading.

432. Perinatal Health Care: Principles, Programs, and Policies. (4) Lecture, three hours; discussion, one hour. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measures, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues. S/U or letter grading.

433. Reproductive Health: Demographic Applications. (4) Lecture, four hours. Introductory aspects of population dynamics; reproductive biology (male and female); contraceptive methods; fertility-related behaviors and STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness. Letter grading.

434A. Maternal and Child Health in Developing Areas. (4) Lecture, four hours. Requisite: course 231. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieu. S/U or letter grading.

434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries. (2) Seminar, two hours. Requisite: course 231. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries. S/U or letter grading.

435. Seminar: Advanced Issues in Women's Health. (2) Seminar, two hours. Requisite: course 246 or 431. Provides a more advanced and in-depth understanding of ways in which scientists "know" and considerations of women's place in scientific discourse. Examination of a series of case studies as a starting point for discussion. Letter grading.

M436A-M436B. Child Health, Programs, and Policies. (4-4) (Formerly numbered 436A-436B.) (Same as Health Services M449A-M449B.) Lecture, four hours. Requisite: Health Services 100. Course M436A is requisite to M436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

437. Principles and Practice of Preventive Medicine. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Comprehensive review and evaluation of scientific background and application of principles of preventive medicine, with primary focus on the family and the disadvantaged. Letter grading.

438. Research Seminar: Community Child Health Services. (2) Seminar, one hour; laboratory, one hour; field trips, two hours. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel. S/U or letter grading.

441. Advanced Program Planning and Evaluation in International Health. (4) Lecture, two hours; discussion, two hours. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Letter grading.

443. Assessment of Family Nutrition. (4) Lecture, four hours. Requisite: course 231. Assessment of nutritional status of families in developing countries, with special reference to limited resources, terrain, and cross-cultural considerations, stressing anthropometric methods and techniques. S/U or letter grading.

444. Anthropometric and Dietary Aspects of Nutritional Assessment. (4) Lecture, two hours; laboratory, two hours. Requisite: course 443. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation. Letter grading.

445. Food and Nutrition Planning: Policies and Programs in World Context. (4) Lecture, two hours; discussion, two hours. Requisite: course 434A. Discussion of policies regarding improvement of food supplies and their global impact on health of disadvantaged families, including review of effect of many factors, with emphasis on need for multidisciplinary action, food and nutrition planning, and external assistance. S/U or letter grading.

446. Nutrition Education and Training: Third World Considerations. (4) Lecture, two hours; discussion, one hour; student participation, one hour. Requisite: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and governmental and international interventions. S/U or letter grading.

447. Health Issues in the Middle East. (4) Lecture, four hours. Requisite: course 200 or 231 or 434A. Recommended: background in Islamic or Middle Eastern studies. Current health issues and problems of countries in the Middle East and implications for socioeconomic development. Review of economic, demographic, and cultural variation of the region to provide background for discussion of trends and patterns of health and nutritional status of population in the area. Letter grading.

448. Nutrition Policies and Programs: Domestic and International Perspectives. (4) Lecture, two hours; discussion, two hours; field visits. Preparation: one nutrition sciences course and/or nutrition program experience. Nutrition programs and policies in the U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and nongovernmental agencies. Emphasis on meeting needs of vulnerable populations. Letter grading.

449. Nutrition and Chronic Disease. (4) Lecture, four hours. Preparation: one graduate or undergraduate course each in chemistry or biochemistry, physiology, and nutritional sciences, or M.D. degree. Advanced-level seminar on nutritional needs of healthy individuals, current knowledge of role of nutrition in disease prevention, nutritional and metabolic responses to disease, and role of nutritional therapy in management of disease. Letter grading.

451. Post-Disaster Community Health. (4) Lecture, four hours. Requisite: course 295. Examination of how public health research and practices can be combined to address post-disaster community health needs. Identification of disaster-related health problems, data collection strategies, and service delivery approaches in a post-disaster environment. Letter grading.

M470. Introduction to Occupational and Environmental Health Education. (4) (Formerly numbered 470.) (Same as Urban Planning M470.) Lecture, four hours. Preparation: at least three social sciences courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

474. Self-Care and Self-Help in Community Health. (4) Lecture, two hours; discussion, two hours. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health. S/U or letter grading.

480. Health Education in Clinical Settings. (4) Lecture, two hours; discussion, two hours. Requisites: courses 271, 282, Health Services 100. Analysis of role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education. S/U or letter grading.

482. Practicum: Community Health Sciences. (4) Discussion, two hours; fieldwork, up to 20 hours. Requisites: courses 210, 211A-211B. Understanding of professional practice in health-related organizations. Letter grading.

483. Leadership Development and Empowerment for Health Promotion and Health Education. (4) Lecture, three hours; discussion, one hour. Requisites: courses 210, 211A-211B. Development of basic understanding of and competency in leadership development and empowerment support for health promotion in multicultural and distressed communities (e.g., south-central Los Angeles). Letter grading.

485. Resource Development for Community Health Programs. (4) Lecture, three hours; fieldwork, one hour. Designed for graduate students. Overview course of fund and resource development for public health and community-based programs. Lectures and workshops include developing grant proposals, researching funding sources, evaluating proposals, developing volunteer and in-kind resources, and implementing capital campaigns. Letter grading.

487. Community Organization for Health. (4) Lecture, three hours; fieldwork, four to six hours. Preparation: three public health, sociology, or anthropology courses. Requisite: course 210. Theory and practice of community organizations, including models and strategies of community organization and their application to health problems and health policy. Particular attention to use of community organization for health promotion and to change public policy. Letter grading.

490. Professional Writing for Public Health. (2) Lecture, two hours. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

495. Teacher Preparation in Public Health. (2) Lecture, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Shu-mei Shih, Ph.D.

Lecturer

Marilyn Manners, Ph.D.

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Department faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Undergraduate Study

Comparative Literature B.A.

Preparation for the Major

Required: Two courses from the Comparative Literature 1 or 2 series or comparable lower division courses in other departments; completion of the college English Composition requirement; literary proficiency in at least one language other than English, to be demonstrated by successful completion of (1) two years of the college language sequence or its equivalent or (2) an upper division literature course in the original language.

The Major

Required: Thirteen courses, of which (1) a minimum of four must be from comparative literature offerings, including Comparative Literature 100, 197, and at least two additional comparative literature courses selected from M101 through C195B; (2) four upper division literature courses using original language texts in the major language area; (3) three upper division literature courses using original language texts in the minor language area (students may petition the undergraduate adviser to take three upper division literature courses in translation if their major area is in a language other than English); (4) two upper division electives in a third language or a field such as anthropology, art, art history, classics, East Asian languages and cultures, film, folklore, history, music, philosophy, or political theory, to be selected in consultation with the undergraduate adviser.

Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the criti-

cal problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

To enter the minor students must have fulfilled the English Composition requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and file a petition with either the faculty or staff undergraduate adviser, 212 Royce Hall, (310) 825-4620.

Required Courses (28 units): (1) Four upper division comparative literature courses (one course from Comparative Literature 1A through 2D may be substituted); (2) two upper division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language; and (3) one upper division course in a second literature in the original language (one level six foreign language course may be substituted). If students complete two upper division courses in a language other than English, they may petition to take one upper division course taught in English translation to fulfill the third requirement.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Comparative Literature offers the Master of Arts (M.A.) degree in Comparative Literature.

Admission

A bachelor's degree in literature, ancient or modern, is a requisite for admission to the M.A. program. Applicants whose B.A. program lacks a literature major are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation. Literary proficiency in one foreign language and at least an elementary knowledge of a second one are expected.

Areas of Study

Each student's study plan should combine the work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period such as Romanticism, a genre such as the novel, or a theoretical problem.

The major literature is the area of primary concentration. Students specialize in one historically defined period (such as medieval, Renaissance and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, students focus on a period comparable to the area of specialization in the major literature, although they may not have as much historical depth and breadth as in the major literature.

Course Requirements

The following 12 courses are the minimal course requirements. Some students take extra courses to make up deficiencies.

(1) Four courses in comparative literature: Comparative Literature 200; one course whose primary focus is theory, for example, Comparative Literature 290, 291, 292, or 293; two courses that deal with primary texts in a comparative context (courses on genre, period, or a special topic that examines primary texts).

(2) Five courses (a minimum of three must be graduate courses; the other two may be upper division) in the major literature.

(3) Three courses, at least one of which must be graduate, in the minor literature. Periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in the major literature should be studied.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement, but only one of the courses may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: the student receives an M.A. degree and is allowed to progress toward the Ph.D., the student is granted a terminal M.A., or the student fails the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature and the works of at least 10 authors in the minor literature. Normally, the reading list consists of approximately 24 to 30 works in the

major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the department office.

Thesis Plan

None.

Doctoral Degree

Admission

For entrance into the program leading to the Ph.D. degree in Comparative Literature, an M.A. degree in Comparative Literature is normally required. Applicants who have an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Three letters of recommendation should be submitted. Those entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a permission to proceed examination before being allowed to continue toward the Ph.D. They should be taken within the first year of residence.

The two written examinations (two hours each) are based on reading lists of approximately 10 to 12 items in the major field and 8 to 10 items in the minor field. Students who transfer from another department at UCLA are not required to take a permission to proceed examination in the area of their M.A. They are, however, required, to complete an examination in their minor field. Permission to proceed examinations should be passed by the end of the first year of residence.

Major Fields or Subdisciplines

The study plan for the Ph.D. should combine the work in one major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (for example, a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology. A related field such as art history, film, or gender studies may be substituted for one minor literature after program approval of a student's petition.

Course Requirements

All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. If the M.A. is not in Comparative Literature at UCLA, students must take three of the required six courses in comparative literature and one from each of the major and minor literatures. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, students are strongly advised to take at least two and

usually three courses in each chosen literature.

For those who have taken the M.A. in Comparative Literature at UCLA, the following courses are required: two courses in comparative literature, one of which should be theoretically oriented; two to three courses in the second minor; two courses in the major, preferably in the period of emphasis, plus whatever additional courses might be required by the comparative literature committee and/or graduate advisers. None of the minimum required courses may be in the 500 series.

Written and Oral Qualifying Examinations

The examinations are both written and oral and may be taken over a period of two to three quarters. The written examinations are based on reading lists for the major and two minor literatures.

Ph.D. qualifying examinations should be taken at the end of the second year after the M.A. However, they must be taken by the end of the third year after the M.A. (ninth quarter). The examinations are composed of written and oral sections.

There is one three-hour historical examination in the major area. The reading list for the examination consists of 40 items chosen in consultation with the examining professor and with the approval of a core member of the comparative literature committee. No more than 20 of the items may be in the approximately 100-year period of emphasis.

For the minor fields, there are two options:

(1) Students take one three-hour written examination in each minor field, based on approved reading lists of 25 to 30 items or

(2) Students take one three-hour written examination in the minor field not included in the M.A. examinations and, with the approval of the program chair and the agreement of the examining professor, in lieu of the written examinations in the minor literature originally presented for the M.A., may arrange with the examining professor to write a paper of 20 to 30 pages on a topic or topics to be chosen in consultation with the examining professor. The paper would also be based on approved reading lists.

Students submit a detailed dissertation prospectus (approximately 20 pages) for the University Oral Qualifying Examination. The two-to three-hour oral qualifying examination raises questions pertaining to all written examinations as well as any questions concerning the dissertation prospectus. All three of the candidate's fields should be included in the discussion.

The University Oral Qualifying Examination must be taken within 60 days after the last written examination is passed. The department allows a maximum of two attempts to pass the Ph.D. examinations.

Comparative Literature

Lower Division Courses

1A. World Literature: Antiquity to Early Middle Ages. (4) (Formerly numbered Humanities 1A.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as *Iliad* or *Odyssey*, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Iseult*. P/NP or letter grading.

1B. World Literature: Late Middle Ages to the 17th Century. (4) (Formerly numbered Humanities 1B.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's *Canterbury Tales*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine. P/NP or letter grading.

1C. World Literature: Age of Enlightenment to the 20th Century. (4) (Formerly numbered Humanities 1C.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens. P/NP or letter grading.

1D. Great Books from the World at Large. (4) (Formerly numbered Humanities 1D.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

1E. Introduction to Classical Traditions of East Asia. (4) (Formerly numbered Humanities 1E.) Lecture, three hours; discussion, one hour. Through analysis of selected texts, presentation of some main currents in literatures of China, Korea, and Japan. Emphasis and readings vary. P/NP or letter grading.

2A. Survey of Literature: Antiquity to Early Middle Ages. (5) (Formerly numbered Humanities 2A.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Iliad*, *Gilgamesh*, Greek tragedies, *Aeneid*, Petronius, St. Augustine, or *Tristan and Iseult*. P/NP or letter grading.

2B. Survey of Literature: Late Middle Ages to the 17th Century. (5) (Formerly numbered Humanities 2B.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine. P/NP or letter grading.

2C. Survey of Literature: Age of Enlightenment to the 20th Century. (5) (Formerly numbered Humanities 2C.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens. P/NP or letter grading.

2D. Survey of Literature: Great Books from the World at Large. (4) (Formerly numbered Humanities 2D.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

Upper Division Courses

100. Introduction to Comparative Literature: Histories, Theories, Practices, and Perspectives. (4) Lecture, three hours. Preparation: satisfaction of Subject A and English Composition requirements. Requisites: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through a series of texts illustrative of its formation and practice.

M101. Hebrew Literature in English — Literary Traditions of Ancient Israel: Bible and Apocrypha. (4) (Formerly numbered Humanities M101.) (Same as Jewish Studies M150A.) Lecture, three hours. Study of literary culture of ancient Israel through examination of principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). P/NP or letter grading.

102. Classical Tradition: Epic. (4) (Formerly numbered Humanities 102.) Seminar, three hours. Designed for upper division literature majors. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. P/NP or letter grading.

103. Classical Tradition: Tragedy. (4) (Formerly numbered Humanities 103.) Seminar, three hours. Designed for juniors/seniors. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. P/NP or letter grading.

C104. Satire. (4) (Formerly numbered Humanities C104.) Lecture, three hours. Designed for juniors/seniors. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with course C204. Undergraduates read all texts in translation. P/NP or letter grading.

C105. Comic Vision. (4) (Formerly numbered Humanities C105.) Lecture, three hours. Designed for upper division literature majors. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C205. Undergraduates read all works in translation. P/NP or letter grading.

106. Archetypal Heroes in Literature. (4) (Formerly numbered Humanities 106.) Seminar, three hours. Designed for juniors/seniors. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. All works read in translation. P/NP or letter grading.

C108. Saints' Lives as Literature. (4) (Formerly numbered Humanities C108.) Lecture, three hours; outside study, nine hours. Designed for juniors/seniors. Examination of genre of the saint's life as it develops in Western European tradition from late classical to early modern period; connections between the saint's life and other forms of literature; comparative considerations (e.g., the Western European saint's life and classical Greek and Roman biography, Islamic traditions, and Buddhist traditions). Concurrently scheduled with course C208. P/NP or letter grading.

C109. Love, Deceit, and Truth: Tristan and Isolde Legend in Literary Tradition. (4) Lecture, three hours; outside study, nine hours. Tracing of history and literary treatment of one of most enduring "myths" of medieval and modern storytelling: tale of ill-fated love triangle as exemplified in figures of Tristan, Isolde, and Mark. Literary texts to be read in translation, but comparative literature students encouraged to read texts in original language. Concurrently scheduled with course C209. P/NP or letter grading.

120. The Individual and Society in the Renaissance. (4) (Formerly numbered Humanities 120.) Lecture, three hours; discussion, one hour. Requisite: one course from 1A, 1B, 1C, 2A, 2B, 2C, or English Composition 3. Explorations of a change in Western man's relationship to his world, himself, and his art; reading of such works as *Don Quixote*, Montaigne's *Essays*, *Gargantua and Pantagruel*, *The Praise of Folly*, *Utopia*. P/NP or letter grading.

C122. Renaissance Drama. (4) (Formerly numbered Humanities C122.) Lecture, three hours. Designed for upper division literature majors. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C222. Undergraduates read all works in translation. P/NP or letter grading.

C140. Dramatic Theory and Criticism in German and English Romanticism. (4) (Formerly numbered Humanities C140.) Seminar, three hours. Designed for upper division literature majors. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C240. Undergraduates read all works in translation. P/NP or letter grading.

C150. The 19th-Century Novel. (4) (Formerly numbered Humanities C150.) Seminar, three hours. Designed for upper division literature majors. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with course C250. Undergraduates read all works in translation. P/NP or letter grading.

C151. Crisis of Authority. (4) (Formerly numbered Humanities C151.) Seminar, three hours. Designed for juniors/seniors. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(iz)ed and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C251. P/NP or letter grading.

C152. Symbolist Tradition in Poetry. (4) (Formerly numbered Humanities C152.) Seminar, three hours. Designed for upper division literature majors. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with course C252. Undergraduates read all works in translation. P/NP or letter grading.

C153. Poetry and Poetics of Post-Symbolist Period. (4) (Formerly numbered Humanities C153.) Lecture, three hours. Designed for juniors/seniors. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valery, Stefan George, R.M. Rilke, Gunnar Ekelof, or Wallace Stevens. May be concurrently scheduled with course C253. Undergraduates read all works in translation. P/NP or letter grading.

154. Adventures of the Avant-Garde. (4) Seminar, three hours; outside study, nine hours. Designed for upper division literature majors. Interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Mayakovsky, Brecht, Fritz Lang, Duchamp, Breton, Bunuel, Lispector, Warhol, Orlan. Emphasis on cross-fertilization among different kinds of aesthetic expression. P/NP or letter grading.

158. Colonial Encounters. (4) (Formerly numbered Humanities 158.) Seminar, three hours. Discussion of how a Western textual system restricts cultures of colonized peoples to an encounter with the European. As a means of understanding limits to a European frame of reference, reading of English literary works alongside their postcolonial counterparts. Investigation of how reversal of perspective affects the telling of a tale. P/NP or letter grading.

159. Four Modern Dramatists. (4) (Formerly numbered Humanities 159.) Lecture, three hours. Study of several works by four major modern dramatists, focusing on understanding specific elements in each work and authors' possible interrelations. Pirandello, Beckett, and Pinter are read; fourth author is selected from Ionesco, Giraudoux, Cocteau. P/NP or letter grading.

C160. Topics in Literature and Visual Arts. (4) (Formerly numbered Humanities C160.) Lecture, three hours; outside study, nine hours. Designed for juniors/seniors. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C260. Undergraduates read all works in translation. P/NP or letter grading.

C161. Fiction and History. (4) (Formerly numbered Humanities C161.) Seminar, three hours. Designed for upper division literature majors. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C261. P/NP or letter grading.

C163. Crisis of Consciousness in Modern Literature. (4) (Formerly numbered Humanities C163.) Seminar, three hours. Designed for upper division literature majors. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C263. Undergraduates read all works in translation. P/NP or letter grading.

C164. The Modern Continental Novel. (4) (Formerly numbered Humanities C164.) Seminar, three hours. Designed for upper division literature majors. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with course C264. Undergraduates read all works in translation. P/NP or letter grading.

M165. The Holocaust in Literature. (4) (Formerly numbered Humanities M165.) (Same as Jewish Studies M187.) Lecture, three hours. Requisite: History 191E or 191F or 191G. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

C167. Theory and Texts of the Fantastic. (4) (Formerly numbered Humanities C167.) Seminar, three hours. Designed for upper division literature majors. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with course C267. Undergraduates read all works in translation. P/NP or letter grading.

M168. Korean American Literature. (4) (Formerly numbered Humanities M168.) (Same as Asian American Studies M132A.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

169. Continental African Authors. (4) (Formerly numbered Humanities 169.) Lecture, three hours. Requisite: one course from 1A, 1B, 1C, 2A, 2B, 2C, or English Composition 3. Introduction to new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achebe, Ngugi, Armath, Soyinka, etc. P/NP or letter grading.

C170. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (4) (Formerly numbered Humanities C170.) Seminar, three hours. Designed for upper division literature majors. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with course C270. Undergraduates read all works in translation. P/NP or letter grading.

M171. Chinese Immigrant Literature and Film. (4) (Formerly numbered Humanities M171.) (Same as Asian American Studies M132B and Chinese M153.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

C172. The Postmodern Novel. (4) (Formerly numbered Humanities C172.) Seminar, three hours. Designed for upper division literature majors. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C272. Undergraduates read all works in translation. P/NP or letter grading.

C173. Postmodernism and the Third World. (4) (Formerly numbered Humanities C173.) Seminar, three hours. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C273. P/NP or letter grading.

M174. Film and Literature of the Spanish-Speaking World. (4) (Formerly numbered Humanities M174.) (Same as Spanish M161.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

190. Semiotics of Story and Film. (4) (Formerly numbered Humanities 190.) Seminar, three hours. Designed for upper division literature majors. Investigation of theoretical aspects of semiotics and their application to specific narratives in prose and film. P/NP or letter grading.

192. Walter Benjamin's Literary Criticism. (4) (Formerly numbered Humanities 192.) Seminar, three hours. Designed for juniors/seniors. Some knowledge of German desirable but not required, as all texts are available in English translation. Walter Benjamin has emerged in recent years as one of the most influential critics of the 20th century. Course approaches his work primarily through a reading of his specifically literary criticism which occupies a central place in his work. P/NP or letter grading.

194. Variable Topics. (4) (Formerly numbered Humanities 197.) Seminar, three hours. Designed for juniors/seniors. Study of limited periods and specialized issues and approaches in literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

C195A. Heidegger, Language, and Literature. (4) (Formerly numbered C195.) Seminar, three hours; outside study, nine hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with course C295A. P/NP or letter grading.

C195B. Derrida as a Reader of Heidegger. (4) (Formerly numbered C196.) Seminar, three hours; outside study, nine hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question* and *Geschlecht*. May be concurrently scheduled with course C295B. P/NP or letter grading.

197. Senior Essay. (4) Lecture, three hours. Limited to senior Comparative Literature majors. Research essay on a comparative topic selected by the student and written under supervision of a core faculty member. P/NP or letter grading.

199. Special Studies in Comparative Literature. (2 to 4) Requisite: course 100. May be repeated for credit with consent of chair. P/NP or letter grading.

202. Classical Tradition: Epic. (4) Seminar, three hours. Preparation: reading knowledge of Greek, Latin, or Italian. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Jerusalem Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. S/U or letter grading.

203. Classical Tradition: Tragedy. (4) Seminar, three hours. Preparation: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. S/U or letter grading.

C204. Satire. (4) Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with course C104. Graduate students required to prepare papers based on texts read in original languages whenever possible and may meet as a group one additional hour each week. S/U or letter grading.

C205. Comic Vision. (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C105. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

206. Archetypal Heroes in Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. S/U or letter grading.

207. Allegory and Some Allegories. (4) Seminar, three hours. Preparation: reading knowledge of French, German, Italian, Latin, Greek, or Chinese. Designed for graduate students. Historical perspective on topic of allegory, with readings from texts traditionally held to be examples of the genre. Defining allegory is simple; saying which works count as examples of allegory, and why, is much harder. Authors include Prudentius, Augustine, Dante, Spenser, Donne, Tung Yueh, Hegel, Baudelaire, and Mallarmé. S/U or letter grading.

C208. Saints' Lives as Literature. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Examination of genre of the saint's life as it develops in Western European tradition from late classical to early modern period; connections between the saint's life and other forms of literature; comparative considerations (e.g., the Western European saint's life and classical Greek and Roman biography, Islamic traditions, and Buddhist traditions). Concurrently scheduled with course C108. S/U or letter grading.

C209. Love, Deceit, and Truth: Tristan and Isolde Legend in Literary Tradition. (4) Lecture, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Tracing of history and literary treatment of one of most enduring "myths" of medieval and modern storytelling: tale of ill-fated love triangle as exemplified in figures of Tristan, Isolde, and Mark. Literary texts to be read in translation, but comparative literature students encouraged to read texts in original language. Concurrently scheduled with course C109. S/U or letter grading.

Graduate Courses

200. Methodology of Comparative Literature. (6) Seminar, four hours. Study of methodology of comparative literature and theory of literature.

C222. Renaissance Drama. (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C240. Dramatic Theory and Criticism in German and English Romanticism. (4) Seminar, three hours. Preparation: reading knowledge of German. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C140. S/U or letter grading.

C250. The 19th-Century Novel. (4) Seminar, three hours. Preparation: reading knowledge of French or German. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with course C150. S/U or letter grading.

C251. Crisis of Authority. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(iz)ed and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C151. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C252. Symbolist Tradition in Poetry. (4) Seminar, three hours. Preparation: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C253. Poetry and Poetics of Post-Symbolist Period. (4) Lecture, three hours. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valery, Stefan George, R.M. Rilke, Gunnar Ekelof, or Wallace Stevens. May be concurrently scheduled with course C153. S/U or letter grading.

C260. Topics in Literature and Visual Arts. (4) Lecture, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C160. Graduate students required to read works in original languages. S/U or letter grading.

C261. Fiction and History. (4) Seminar, three hours. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with course C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

262. The Psychological Novel. (4) Seminar, three hours. Preparation: major in literature, reading knowledge of French. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. S/U or letter grading.

C263. Crisis of Consciousness in Modern Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C163. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C264. The Modern Continental Novel. (4) Seminar, three hours. Preparation: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with course C164. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

265. Intertextuality in Literature and Film. (4) Discussion, three hours. Study of relationships between literature and film from perspective of intertextuality grounded in theorists Mikhail Bakhtin and Jacques Derrida and elaborated by critics Barthes, Chatman, and Kristeva. Focus on processes of inscription, reiteration, transformation, filiation, and dissemination during consideration of representative types of intertextuality. S/U or letter grading.

266. Writing and the Photographic Image. (4) Seminar, three hours; outside study, nine hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Investigation of intertextual relations between writing and photography in American and European contexts. Study rests on premise that a photograph enters public domain framed by writing and discourse and that, in turn, some forms of writing are framed by photographic modes of representation. S/U or letter grading.

C267. Theory and Texts of the Fantastic. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with course C167. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with course C170. Graduate students required to prepare papers based on texts read in original languages whenever possible. S/U or letter grading.

271. Imaginary Women. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their incarnations in modern African American, Anglo-American, Asian American, European, Native American, and Spanish-American literatures. Particular emphasis on position of women in the cultures and ideology of the authors. S/U or letter grading.

C272. The Postmodern Novel. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C172. Graduate students required to meet as a group one additional hour each week. S/U or letter grading.

C273. Postmodernism and the Third World. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C173. S/U or letter grading.

M274. Theorizing the Third World. (4) (Same as Asian American Studies M261.) Seminar, three hours; outside study, nine hours. Investigation of politics of power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

275. Nationalism and Immigration Today. (4) Seminar, three hours; outside study, nine hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Literary and social discourses on issues of nationalism, immigration, and the politics of identity in our postcolonial era, with consideration of broad range of texts (aesthetic representations, theoretical reflections, and legal documents). S/U or letter grading.

M276. Reading Modern Bodies. (4) (Same as Japanese M276.) Seminar, three hours; outside study, nine hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

280. Latin American Literature in Comparative Contexts. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. In-depth study of one topic of Latin American literature in a comparative context. May be repeated for credit. S/U or letter grading.

284. Theories of Translation. (4) Seminar, three hours; outside study, nine hours. Examination of various approaches to concept of translation and to its significance for literary studies. Readings include authors such as Matthew Arnold, Walter Benjamin, George Steiner, and Susan Bassnett. S/U or letter grading.

285. Translation Workshop. (4) Seminar, three hours. Preparation: solid reading knowledge of at least one foreign language. Open to qualified undergraduates with proper language preparation. Theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at discretion of participants. S/U or letter grading.

290. Contemporary Theories of Criticism. (4) Seminar, three hours. Requisite: course 200. Advanced course in theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches. S/U or letter grading.

291. Problems in Theory of Literature. (4) Seminar, three hours. Preparation: reading knowledge of French or German. Requisite: course 290. Study of specific topics in theory of literature for advanced students in criticism and literary theory. May be repeated for credit. S/U or letter grading.

292. Problems of the Sign in Literature. (4) Seminar, three hours. Inquiry into theoretical bases and implications of the sign as metaphysical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of "sciences" envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjelt, and Greimas. S/U or letter grading.

293. Psychoanalytic Approaches to Literature. (4) Seminar, three hours. Requisite: course 200 or equivalent criticism course in English. Study of development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schafer) whose work is applicable to literary theory. S/U or letter grading.

C295A. Heidegger, Language, and Literature. (4) (Formerly numbered C295.) Seminar, three hours; outside study, nine hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with course C195A. S/U or letter grading.

C295B. Derrida as a Reader of Heidegger. (4) (Formerly numbered C296.) Seminar, three hours; outside study, nine hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question* and *Geschlecht*. May be concurrently scheduled with course C195B. S/U or letter grading.

297. Death and the Limits of Representation. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Examination of fundamental shifts in the relationship that obtains between thinking and death which are closely tied to rethinking of the status and structure of representation. May be repeated once for credit. S/U or letter grading.

299. Analytic Philosophy and Literary Theory. (4) (Formerly numbered 294.) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Study of literary theory through exploration of approaches to literature by philosophers grounded on analytic tradition. Careful attention to concepts of truth, meaning, expression, representation, metaphor, fiction, and literature. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Literature and Composition. (4) Lecture, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in the teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of teaching assistants' performance. May not be applied toward M.A. course requirements. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Limited to graduate comparative literature students. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

596X. Directed Individual Study. (2 to 4) Preparation for foreign language examination. S/U grading.

597. Preparation for M.A. and Ph.D. Examinations. (2 to 12) Limited to graduate students. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Limited to Ph.D. students. Research for and preparation of Ph.D. dissertation. May be repeated for credit. S/U grading.

Jason (Jinsheng) Cong, Ph.D.
Joseph J. DiStefano III, Ph.D.
Michael G. Dyer, Ph.D.
Milos D. Ercegovac, Ph.D.
Mario Gerla, Ph.D.
Sheila A. Greibach, Ph.D.
Andrew B. Kahng, Ph.D.
Richard E. Korf, Ph.D.
Richard R. Muntz, Ph.D.
D. Stott Parker, Jr., Ph.D.
Carlo A. Zaniolo, Ph.D. (*Norman E. Friedmann Professor of Knowledge Sciences*)

Professors Emeriti

Algirdas A. Avizienis, Ph.D.
Bertram Bussell, Ph.D.
Jack W. Carlyle, Ph.D.
Gerald Estrin, Ph.D.
Thelma Estrin, Ph.D.
Walter J. Karplus, Ph.D.
Leonard Kleinrock, Ph.D.
Allen Klinger, Ph.D.
Lawrence P. McNamee, Ph.D.
Michel A. Melkanoff, Ph.D.
Judea Pearl, Ph.D.
Thomas A. Rogers, Ph.D.
Jacques J. Vidal, Ph.D.

Associate Professors

Eliezer M. Gafni, Ph.D.
Miodrag Potkonjak, Ph.D.
David A. Rennels, Ph.D.
Yuval Tamir, Ph.D.
Lixia Zhang, Ph.D.

Assistant Professor

Elias Koutsoupias, Ph.D.

Senior Lecturer

Leon Levine, M.S., *Emeritus*

Adjunct Professors

Boris Kogan, Ph.D.
Gerald J. Popek, Ph.D.

Adjunct Associate Professor

Peter L. Reiher, Ph.D.

Scope and Objectives

Computer science is concerned with the design, modeling, analysis, and applications of computer-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in computer system architecture, computer network modeling and analysis, distributed computer systems, programming languages and systems, artificial intelligence, computer science theory, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. In addition to the departmental computing facility, there are nearly a dozen laboratories specializing in areas such as distributed systems, multimedia computer communications, VLSI systems, VLSI CAD, and artificial intelligence. The Cognitive Systems Laboratory is engaged in studying computer systems which emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained either through the Computer Science and Engineering major or through the Computer Science major described below.

The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

Undergraduate Study

Computer Science and Engineering B.S.

The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components

from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, networking fundamentals, higher-level language skills, and application of these to systems. Students are prepared for employment in the high-technology industries that employ information and digital systems.

The Major

Course requirements are as follows (185 minimum units required):

- (1) Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16).
- (2) Computer Science 111, 118, 131, M151B (or Electrical Engineering M116C), 180, 181, Electrical Engineering 10, 102, 103, 110, 115A, 115C, Statistics 110A; six laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D); one computer science/electrical engineering elective (excluding Electrical Engineering 100).
- (3) Four upper division elective courses from the Computer Science Department. Course 199 may normally be taken only as a free elective; however, students may petition for exceptions in extraordinary situations.
- (4) Chemistry and Biochemistry 20A; Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 31C, 32A, 32B, 33A, 61.
- (5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Computer Science and Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

Computer Science B.S.

The computer science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, students study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The program is accredited by the Computer Science Accreditation Commission (CSAC) of the Computing Sciences Accreditation Board (CSAB), a specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation (CORPA).

The Major

Course requirements are as follows (181 minimum units required):

- (1) Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16).
- (2) Computer Science 111, 112, 118, 131, 132, M151B (or Electrical Engineering M116C), 180, 181, Statistics 110A; one course from Computer Science 161 or 163; Mathematics 151A or Electrical Engineering 103; six laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D).
- (3) Two elective upper division computer science courses.
- (4) A minor or technical support area composed of a coherent group of three upper division courses selected from astronomy, atmospheric sciences, biology, chemical engineering, chemistry and biochemistry, civil and environmental engineering, Earth and space sciences, economics, electrical engineering, information studies, linguistics, management, materials science and engineering, mathematics, mechanical and aerospace engineering, molecular biology, physics.
- (5) Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61.
- (6) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Computer Science majors must also select two additional humanities/social sciences courses and one additional life sciences course and are required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements. Chemistry 20A may be substituted for one of the life sciences courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Computer Science offers the Master of Science (M.S.) degree in Com-

puter Science and participates in a concurrent degree program with the John E. Anderson Graduate School of Management.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.cs.ucla.edu>. Forms are also available by writing to the Computer Science Department, UCLA, 4732 Boelter Hall, Box 951596, Los Angeles, CA 90095-1596.

M.B.A./M.S. Computer Science

The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete the requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Contact the Anderson School for details.

Areas of Study

Artificial intelligence; computer science theory; computer system architecture; programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (biological systems, physical systems).

Course Requirements

Course Requirement. A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. No specific courses are required, but a majority of both the total number of formal courses and the total number of graduate courses must consist of courses offered by the Computer Science Department.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Breadth Requirement. Candidates for the M.S. in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. The requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:

Group I: Four required courses or equivalent from Computer Science M51A, 143 or 180, M151B, 181.

Group II: Two required courses or equivalent from Computer Science 111, 112 or 118, 131 or 132, 161 or 163, 171 or 174, 270A.

In addition, for each degree students must complete at least one class per quarter for three quarters of Computer Science 201 with grades of Satisfactory.

Competence in any or all courses may be demonstrated in one of three ways:

(1) Satisfactory completion of the course at UCLA with a grade of B– or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B– or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

Comprehensive Examination Plan. In the comprehensive examination plan, at least five of the nine courses must be 200-series courses. The remaining four courses may be either 200-series or upper division courses. No units of 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

The thesis is a report on the results of the investigation of a problem in the major field of study under the supervision of the thesis committee, which approves the subject and plan of the thesis and reads and approves the complete manuscript. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject. Students should normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Computer Science are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

Applicants normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the

Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at <http://www.cs.ucla.edu>. Forms are also available by writing to the Computer Science Department, 4732 Boelter Hall, Box 951596, Los Angeles, CA 90095-1596.

Major Fields or Subdisciplines

Artificial intelligence; computer science theory; computer system architecture; programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (biological systems, physical systems).

Course Requirements

Course Requirement. There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute examinations for coursework. Normally, however, the student takes courses to acquire the knowledge needed for preparation for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields; the major and at least one minor must be in computer science. The major field corresponds to a body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. A detailed syllabus for each major field can be obtained from the Student Affairs Office in the Computer Science Department. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B– or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. By petition and administrative approval, a minor field may be satisfied by examination.

Breadth Requirement. Candidates for the Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. The requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:

Group I: Four required courses or equivalent from Computer Science M51A, 143 or 180, M151B, 181.

Group II: Two required courses or equivalent from Computer Science 111, 112 or 118, 131 or 132, 161 or 163, 171 or 174, 270A.

In addition, for each degree students must complete at least one class per quarter for three quarters of Computer Science 201 with grades of Satisfactory.

Competence in any or all courses may be demonstrated in one of three ways:

(1) Satisfactory completion of the course at UCLA with a grade of B– or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B– or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the three fields and passing the breadth requirement, students take a written preliminary examination in the major field. When the examination is passed and all coursework is completed, students may be required to take an oral preliminary examination that encompasses the major and minor fields. The examination may be waived by the faculty on the recommendation of the major field committee for students deemed to be making strong progress toward the degree. Students may not take a preliminary examination more than twice.

After passing the preliminary examination, the student should form a doctoral committee and prepare to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

Computer Science

Lower Division Courses

1. Principles of Computer Science. (4) Lecture, four hours; laboratory, two hours; other, six hours. Not open for credit to Computer Science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing. P/NP or letter grading.

2. Great Ideas in Computer Science. (4) Lecture, four hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and neural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications. P/NP or letter grading.

10C. Introduction to Programming. (4) Lecture, four hours; discussion, four hours; outside study, four hours. Exposure to computer organization and capabilities. Basic principles of programming: algorithmic, procedural problem solving. Program design and development. Control structures and data structures. Character strings and word processing. Letter grading.

10F. Introduction to Programming/FORTRAN. (4) Lecture, four hours; discussion, two hours. Open to Mathematics and Computer Science majors; open to graduate students on S/U grading basis only. Description and use of FORTRAN programming language. Selected topics in programming techniques. Programming and running of several problems. Letter grading.

11. Introduction to PASCAL. (4) Lecture, four hours; discussion, two hours; other, six hours. Limited to majors in Computer Science and Engineering and Computer Science majors. Open to graduate students on S/U grading basis only. Not open to students with credit for course 10C, 10F, or Program in Computing 10A. Human factors in programming and program design. Exposure to computer organization and capabilities, data representation, professional ethics. Principles of programming (using PASCAL as example language): algorithm design and procedural abstraction. Program design and development. Control structures and data structures. Letter grading.

31. Introduction to Computer Science I. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Limited to majors in Computer Science and Engineering and Computer Science majors. Introduction to computer science via theory, applications, and programming. Operators and control structures. Functions, parameters, scope rules. Recursion. Arrays, strings, pointers. Object-oriented programming, classes, data abstraction. Input/output. Examples and exercises from computer science theory and applications. Letter grading.

32. Introduction to Computer Science II. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 31. Limited to majors in Computer Science and Engineering and Computer Science majors. Not open to students with credit for former course 23. Object-oriented programming, overloading, inheritance, polymorphism. Object-oriented view of data structures: lists, stacks, queues. Memory management. Sorting and searching algorithms and their performance. Trees, graphs, and associated algorithms. Case studies and exercises from computer science applications. Letter grading.

33. Systems Programming. (5) Lecture, four hours; discussion, two hours; outside study, nine hours. Requisite: course 32. Limited to majors in Computer Science and Engineering and Computer Science majors. Not open to students with credit for former course 24. Introductory course on assembly language and operating systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, input/output (I/O) programming, memory management, file systems. Letter grading.

M51A. Logic Design of Digital Systems. (4) (Formerly numbered 51A.) (Same as Electrical Engineering M16.) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: Physics 1C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

Upper Division Courses

111. Operating Systems Principles. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 32, 33. Introduction to design and performance evaluations of modern operating systems. Mapping and binding of addresses. Organization of multiprogramming and multiprocessing systems; interrupts, process model, and interlocks. Resource allocation models and problem of deadlocks. Scheduling, synchronization. Memory management, virtual memory. input/output (I/O) control, file systems. Letter grading.

112. Computer System Modeling Fundamentals. (4) Lecture, four hours; outside study, eight hours. Requisite: Statistics 110A. Designed for juniors/seniors. Basic tools necessary for performance evaluation and design of distributed computer systems, including such topics as combinatorics, generating functions, probability theory, transforms, Markov chains, baby queueing theory. Presentation of this set of tools in a fashion that is rich with examples from computer systems field. Letter grading.

118. Computer Network Fundamentals. (4) Lecture, four hours; discussion, two hours. Designed for juniors/seniors. Investigation of functions required to operate computer communications networks. Development of methodology for implementing these functions in procedures called protocols. Organization around ISO-OSI seven-layer architecture, with review of each layer. Specific functions defined and available alternatives studied. Presentation of several applications and case studies based on existing public and private networks. Letter grading.

130. Software Engineering. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 32. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming. Letter grading.

131. Programming Languages. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisites: courses 32, 33. Study, comparison, and evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementations. Use of a few languages selected from FORTRAN 77, ADA, SNOBOL 14, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features. Letter grading.

132. Compiler Construction. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 32, 131, 181. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing. Letter grading.

133. Parallel and Distributed Computing. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 111 (may be taken concurrently), 131. Distributed memory and shared memory parallel architectures; asynchronous parallel languages: MPI, Maisie; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization; design of parallel programs for scientific computation and distributed systems. Letter grading.

143. Introduction to Database Systems. (4) Lecture, four hours; discussion, two hours; laboratory, two hours; outside study, four hours. Requisite: course 32. Information systems and database systems in enterprises. File organization and secondary storage structures. Relational model and relational database systems. CODASYL and other data management approaches. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization. Letter grading.

M151B. Computer Systems Architecture. (4) (Formerly numbered 151B.) (Same as Electrical Engineering M16C.) Lecture, four hours; recitation, two hours; outside study, six hours. Requisites: courses 33, and M51A or Electrical Engineering M16. Recommended: course M152A or Electrical Engineering M16L. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating-point, addressing structures, mechanization of procedure calls, memory organization and management, microprogramming, input/output (I/O) processing and interrupts, and reliability aspects. Letter grading.

151C. Design of Digital Systems. (4) Lecture, four hours; discussion, two hours. Requisites: courses M51A, M151B, M152A. Design of complex digital systems using hierarchical approaches and regular structures. Combinational, sequential, and algorithmic systems. Microprogramming and firmware engineering. Cost/performance measures and technology constraints. Use of design tools. Design project. Letter grading.

M152A. Introductory Digital Design Laboratory. (2) (Formerly numbered 152A.) (Same as Electrical Engineering M16L.) Laboratory, four hours; outside study, two hours. Requisite: course M51A or Electrical Engineering M16. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

M152B. Digital Design Project Laboratory. (4) (Formerly numbered 152B.) (Same as Electrical Engineering M16D.) Laboratory, four hours; recitation, two hours; outside study, six hours. Requisite: course M151B or Electrical Engineering M16C. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

161. Fundamentals of Artificial Intelligence. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 23. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to LISP with regular programming assignments. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures. Letter grading.

163. Introduction to Natural Language Processing. (4) Lecture, four hours; laboratory, two hours. Requisite: course 130 or 131. Role of syntax, semantics, and pragmatics in human language processing by computers. Natural language generators and parsers, inference, and conceptual analysis. Modeling conceptual processes and representing semantic knowledge by means of computer problems. Letter grading.

170A. Introduction to Scientific Computing. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Designed for senior Computer Science majors. Introduction to scientific modeling and simulation, using the very high-level computer languages MATHEMATICA and MAPLE. Extensive coverage of programming in MATHEMATICA, with applications involving engineering modeling; simulation term project required. Letter grading.

171. Real-Time Computer Systems. (4) Lecture, four hours; outside study, eight hours. Designed for seniors. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction. Letter grading.

171L. Data Communication Systems Laboratory. (2 to 4) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: courses M152A, 171. Limited to seniors. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes (and CRT cameras), pulse and function generators, baseband spectrum analyzers, desktop analog computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

174. Elements of Computer Graphics. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisite: course 32. Hardware and software elements of computer graphics systems. Graphics languages. Graphic workstations and specialized input/output (I/O) devices. Design and development of interactive graphics programs. Letter grading.

180. Introduction to Algorithms and Complexity. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course 32, Mathematics 61. Limited to junior/senior Computer Science majors. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness. Letter grading.

181. Introduction to Formal Languages and Automata Theory. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 61. Designed for junior/senior Computer Science majors. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown story automata. Unrestricted rewriting systems, recursively enumerable and recursive languages, and Turing machines. Closure properties, pumping lemmas, and decision algorithms. Introduction to computability. Letter grading.

190. Computer Science Design Project. (4) Lecture, four hours; outside study, eight hours. Preparation: adequate background in hardware, software, and computer applications. Limited to senior Computer Science and Engineering majors and senior Computer Science majors. Basic concepts of design of projects in computer science, including interpretation of specifications, subtasking, design of experiments, data analysis and performance evaluation, cost engineering, reliability, and societal and safety considerations. Letter grading.

196A. Introduction to Bioengineering and Cybernetics. (2) Lecture, two hours; outside study, six hours. Preparation: calculus. Strongly recommended for students with potential interest in bioengineering or cybernetics as a major. Introductory survey of topics in bioengineering and cybernetics disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

M196B. Modeling and Simulation of Biological Systems. (5) (Same as Medicine M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours; outside study, eight hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

CM196L. Biomedical Systems/Biocybernetics Research Laboratory. (4) (Formerly numbered C196L.) (Same as Neuroscience M174.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course C296L. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to juniors/seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

201. Computer Science Seminar. (2) (Formerly numbered 201A-201B-201C.) Seminar, four hours; outside study, two hours. Designed for graduate computer science students. Seminars on current research topics in computer science. May be repeated for credit. S/U grading.

202. Advanced Computer Science Seminar. (4) Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit. S/U or letter grading.

212A. Queueing Systems Theory. (4) Lecture, four hours; outside study, eight hours. Requisites: course 112, Electrical Engineering 131A. Resource sharing issues and theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages. $M/E/1$, $E/M/1$. Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Intermediate queueing theory: $M/G/1$; $G/M/m$. Collective marks. Advanced queueing theory: $G/G/1$; Lindley integral equation; spectral solution. Inequalities, bounds, approximations. S/U or letter grading.

212B. Queueing Applications: Scheduling Algorithms and Queueing Networks. (4) Lecture, four hours; outside study, eight hours. Requisite: course 212A. Priority queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing networks: definitions; job flow balance; product form solutions — local balance, $M \rightarrow M$; computational algorithms for performance measures; asymptotic behavior and bounds; approximation techniques — diffusion — iterative techniques; applications. S/U or letter grading.

214. Data Transmission in Computer Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112. Limited to graduate computer science students. Discrete data streams, formats, rates, transductions; digital data transmissions via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modem designs; physical interfaces in computer communication links; national/international standards; tests and measurements. S/U or letter grading.

215. Computer Communications and Networks. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112. Resource sharing; computer traffic characterizations; multiplexing; network structure; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDLC, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors. S/U or letter grading.

216. Distributed Multiaccess Control in Networks. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. S/U or letter grading.

217. Advanced Topics in Internet Research. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Overview of Internet development history and fundamental principles underlying TCP/IP protocol design. Discussion of current research topics, including multicast routing protocols, multicast transport protocols (e.g., real-time, transport protocol, RTP, and SRM), support for integrated services, World Wide Web, multimedia applications on Internet. Fundamental issues in network protocol design and implementations. Letter grading.

218. Advanced Computer Networks. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 112, 118. Review of seven-layer ISO-OSI model. High-speed networks: LANs, MANs, ATM. Flow and congestion control; bandwidth allocation. Internetworking. Letter grading.

219. Current Topics in Computer System Modeling Analysis. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

M222. Control and Coordination in Economics. (4) (Same as Economics M222A.) Lecture, three hours. Recommended preparation: appropriate mathematics course. Designed for graduate economics and engineering students. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

232A. Operational Semantics of Programming Languages. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 131, 181. Introduction to formal semantics. Interpreter-based operational definitions. Induction and structural operational semantics. Proving equivalence between structural and interpreter-based operational definitions. Static and dynamic semantics. Example operational definitions of functional, imperative, concurrent, logic, and object-oriented programming languages. Letter grading.

232B. Semantics of Programming Languages. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 131, 181. Denotational semantics of programming languages. Notation and foundations. Expressions, commands, declarations, and other constructs. Environments, stores, and continuations. Examples. Relations between semantic definitions of programming languages. Applications of current research interest. S/U or letter grading.

233A. Parallel Programming. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, ADA, LINDA, MAISIE, UC, and others; introduction to parallel program verification. S/U or letter grading.

233B. Verification of Concurrent Programs. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 233A. Formal techniques for verification of concurrent programs. Topics include safety, liveness, program and state assertion-based techniques, weakest precondition semantics, Hoare logic, temporal logic, UNITY, and axiomatic semantics for selected parallel languages. S/U or letter grading.

234A. Correctness Proofs. (4) Lecture, four hours; outside study, eight hours. Theoretical and practical aspects of correctness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness of implementations. Formulation, execution, and assessment of correctness proofs. Topics of current research interest. S/U or letter grading.

235A. Logic Programming and PROLOG. (4) Lecture, four hours; outside study, eight hours. Limited to graduate computer science students. Logic programming; PROLOG as an approximation thereof; PROLOG programming techniques; translation and definite clause grammars; rewriting and interpreters; implementation of PROLOG; constraint logic programming and other proposed extensions to PROLOG; parallel logic programming systems. Letter grading.

239. Current Topics in Computer Science: Programming Languages and Systems. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science programming languages and systems in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with topic change. S/U or letter grading.

240A. Databases and Knowledge Bases. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, which merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology. Letter grading.

241A. Object-Oriented and Semantic Database Systems. (4) Lecture, three and one-half hours; recitation, 30 minutes; laboratory, one hour; outside study, eight hours. Prerequisite: course 143. Object and database principles. Data models and accessing. Database systems architecture and functional components. Extended relational systems. Object and semantic systems. Systems comparison. Database design, organization, indexing, and performance. Other topics at discretion of instructor. Letter grading.

241B. Pictorial and Multimedia Database Systems. (4) Lecture, three and one-half hours; recitation, 30 minutes; outside study, nine hours. Prerequisites: courses 143, 241A. Pictorial and multimedia information system requirements. Data models and accessing; alternatives. Database systems. Visual languages and communication. Hypertext. Database design and organization, logical and physical. Database heterogeneity and distribution. Other topics at discretion of instructor. Letter grading.

243B. Abstract Data Types and Program Specification. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 32, 181. Notions of abstract data type and abstract program specification permit one to understand how programs manipulate data, independently of their implementations. These notions also give powerful techniques for program structuring and verification. Programming exercises. S/U or letter grading.

244A. Distributed Database Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multidatabase systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences. Letter grading.

245A. Intelligent Information Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 241A, 255A. Knowledge discovery in database, knowledge-base maintenance, knowledge-base and database integration architectures, and scale-up issues and applications to cooperative database systems, intelligent decision support systems, and intelligent planning and scheduling systems; computer architecture for processing large-scale knowledge-base/database systems. Letter grading.

249. Current Topics in Data Structures. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

251A. Advanced Computer Architecture. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses M51A, 111, M151B. Functional and structural models of computer systems. Architecture and organization at microprogramming, machine language, and operating system level. Processor organization and system control. Arithmetic processors: algorithms and implementation. Storage system organization: hierarchy and management. Communication organization and control. S/U or letter grading.

251B. Parallel Computer Architectures. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. Parallel algorithmic structures and computer organizations. Effect of sequencing mechanisms, granularity, coupling, and locality. Organizations of control, memory, interconnection, and processing elements. Performance evaluation measures. Detailed discussion of system organization and performance of vector computers, array computers, loop-level multiprocessors, process-level multiprocessors, and dataflow computers. S/U or letter grading.

252A. Arithmetic Algorithms and Processors. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. Number systems: conventional, redundant, signed-digit, and residue. Types of algorithms and implementations. Complexity measures. Fast algorithms and implementations for two-operand addition, multioperand addition, multiplication, division, and square root. On-line arithmetic. Evaluation of transcendental functions. Floating-point arithmetic and numerical error control. Arithmetic error codes. Residue arithmetic. Examples of contemporary arithmetic ICs and processors. Letter grading.

253A. Design of Fault-Tolerant Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisite or corequisite: course 251A. Fundamental concepts of dependable computing. Design methodology for fault-tolerant systems. Analytic models and measures, modeling tools. Design for critical applications: long-life, real-time, and high-availability systems. Tolerance of design faults: design diversity and fault-tolerant software. Letter grading.

253B. Advanced Topics in Fault-Tolerant Computing. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 253A. Fault tolerance in distributed systems: protocols and network redundancy. Design of fault-tolerant software: N-version programming and recovery blocks. Relationship between fault tolerance and system security. Case studies of contemporary fault-tolerant systems. Review of recent research results. Letter grading.

253C. Testing and Testable Design of VLSI Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course M51A. Detailed study of various problems in testing and testable designs of VLSI systems, including fault modeling, fault simulation, testing for single stuck faults and multiple stuck faults, functional testing, design for testability, compression techniques, and built-in self-test. Letter grading.

254A. Computer Memories and Memory Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics, system organization, and device considerations of ferrite memories, thin film memories, and semiconductor memories. S/U or letter grading.

255A. Distributed Processing Systems. (4) Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 251A. Task partitioning and allocation, interprocess communications, task response time model, process scheduling, message passing protocols, replicated file systems, interface, cache memory, actor model, fine grain multicomputers, distributed operating system kernel, error recovery strategy, performance monitoring and measurement, scalability and maintainability, prototypes and commercial distributed systems. Letter grading.

256A. Advanced Scalable Architectures: Systems, Building Blocks, and Technology. (4) Lecture, four hours; outside study, eight hours. Prerequisite: course 251A. State-of-the-art scalable multiprocessors and multicomputers. High-performance VLSI building blocks. Capabilities and limitations of VLSI technology. Interdependency among implementation technology, packaging, chip microarchitecture, and system architecture. Mechanisms for exploiting parallelism. Current research areas. Examples of chips and systems. Letter grading.

M258A. LSI in Computer System Design. (4) (Same as Electrical Engineering M216A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. S/U or letter grading.

M258B-M258C. LSI in Computer System Design. (4-4) (Same as Electrical Engineering M216B-M216C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

258D. VLSI CAD Techniques. (4) Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. In-depth study of latest advances in computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. S/U or letter grading.

258E. Foundations of VLSI CAD Algorithms. (4) Lecture, four hours; outside study, eight hours. Preparation: one course in analysis and design of algorithms. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to computer-aided physical design of VLSI circuits at high-level phases of layout: partitioning, placement, graph folding, floorplanning, and global routing. S/U or letter grading.

258F. Physical Design Automation of VLSI Systems. (4) Lecture, four hours; outside study, eight hours. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussion of applications of a number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms. S/U or letter grading.

258G. Logic Synthesis of Digital Systems. (4) Lecture, four hours; outside study, eight hours. Requisites: courses M51A, 180. Detailed study of various problems in logic-level synthesis of VLSI digital systems, including two-level Boolean network optimization; multilevel Boolean network optimization; technology mapping for standard cell designs and field-programmable gate-array (FPGA) designs; retiming for sequential circuits; and applications of binary decision diagrams (BDDs). Letter grading.

258H. Analysis and Design of High-Speed VLSI Interconnects. (4) Lecture, four hours; outside study, eight hours. Requisites: courses M258A, 258F. Detailed study of various problems in analysis and design of high-speed VLSI interconnects at both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution noise, delay models and power dissipation models, interconnect topology and geometry optimization, and clocking for high-speed systems. Letter grading.

259. Current Topics in Computer Science: System Design/Architecture. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. S/U or letter grading.

261A. Problem Solving and Search. (4) Lecture, four hours; outside study, eight hours. Requisite: course 23. Examination in depth of that part of artificial intelligence concerned with problem-solving behavior, including problem spaces, brute-force search, heuristic search, two-player game searches, planning, subgoaling, GPS, macro-operators, and abstraction. Emphasis on mathematical rigor and complexity analyses of search algorithms. S/U or letter grading.

262A. Reasoning with Partial Beliefs. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112 or Electrical Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. S/U or letter grading.

262B. Knowledge-Based Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 262A. Machine representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases. Rule-based systems — principles, advantages, and limitations. Signal understanding. Automated planning systems. Knowledge acquisition and explanation producing techniques. S/U or letter grading.

262C. Computer Methods of Data Analysis and Model Formation. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision of computerized models. S/U or letter grading.

262Z. Current Topics in Cognitive Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 262A. Additional requisites for each offering announced in advance by department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. S/U or letter grading.

263A. Language and Thought. (4) Lecture, four hours; outside study, eight hours. Recommended preparation: understanding of LISP. Introduction to natural language processing. Representation and manipulation of conceptualizations underlying processes of thought for natural language comprehension and generation. Process models of story comprehension, question answering, paraphrasing, machine translation. Conceptual dependency theory, scripts, plans, goals, expectation-based parsing. S/U or letter grading.

263B. Language and Memory. (4) Lecture, four hours; outside study, eight hours. Preparation: knowledge of LISP or PROLOG. Requisite: course 263A. Recommended: course 264A. Advanced natural language processing. Emphasis on organization of human memory for language comprehension. Episodic and semantic memory. Subjective understanding and modeling ideologies. Language acquisition, processes of generalization during comprehension. Cross-contextual reminders and thematic abstraction. S/U or letter grading.

264A. Artificial Intelligence Programming I. (4) Lecture, four hours; outside study, eight hours. Recommended preparation: knowledge of LISP or PROLOG. Introduction to tools, techniques, and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of LISP and introduction to lexically scoped LISPs (e.g., T, SCHEME). Lambda calculus, closures, data-driven and object-oriented programming, flavors, d-nets, resolution-based deductive systems. S/U or letter grading.

264B. Artificial Intelligence Programming II. (4) Lecture, four hours; outside study, eight hours. Requisite: course 264A. Techniques of logic programming. Artificial intelligence programming languages (e.g., PROLOG, AMORD, DUCK, CONNIVER, PLANNER, QA4, KRL, ACTORS, etc.) and artificial intelligence features (e.g., nonmonotonic logics, data-dependencies for truth maintenance, meta-rules, semantic networks, frame-based systems). S/U or letter grading.

265A. Machine Learning. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 263A, 264A. Introduction to machine learning. Learning by analogy, inductive learning, modeling creativity, learning by experience, role of episodic memory organization in learning. Examination of BACON, AM, EURISKO, HACKER, teachable production systems. Failure-driven learning. S/U or letter grading.

267A. Neural Models. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structure and function. Students required to prepare a paper analyzing research in one area of interest. S/U or letter grading.

267B. Artificial Neural Systems and Connectionist Computing. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multisensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest. S/U or letter grading.

268. Machine Perception. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by "neural-net" architectures. Letter grading.

268CN. Computational Neuroscience. (4) Lecture, four hours; discussion, two hours; outside study, eight hours. Computational neuroscience as a paradigm of formal analysis and demonstrations of how to correctly interpret sensory data by discovering constraints from the natural world. Neural networks and connectionist models as a paradigm for parallel and concurrent computation and application to problem of vision, multimodal sensory interpretation, and learning. S/U or letter grading.

268S. Seminar: Computational Neuroscience. (2) Seminar, two hours; outside study, six hours. Designed for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

269. Seminar: Current Topics in Artificial Intelligence. (2 to 4) Seminar, to be arranged. Review of current literature and research practicum in an area of artificial intelligence in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. S/U or letter grading.

270A. Computer Methodology: Advanced Numerical Methods. (4) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 103 or Mathematics 151B or comparable experience with numerical computing. Designed for graduate computer science and engineering students. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises. Letter grading.

271A. Modeling and Simulation of Lumped Parameter Systems. (4) Lecture, eight hours. Recommended preparation: course 270A. Characterization of electrical, electromechanical, and other engineering problems by systems of nonlinear ordinary differential equations. Survey of integration algorithms. Digital simulation languages for continuous systems. Real-time simulation using array processor and multiprocessor computer systems. S/U or letter grading.

271B. Modeling and Simulation of Distributed Parameter Systems. (4) Lecture, eight hours. Recommended preparation: course 270A. Mathematical formulation of engineering field problems governed by partial differential equations. Finite difference and finite element approximations. Principal algorithms for solving elliptic, parabolic, and hyperbolic partial differential equations. Supercomputers, vector processors, multiprocessors, and array processors. S/U or letter grading.

271C. Seminar: Advanced Simulation Methods. (2) Seminar, two hours; outside study, six hours. Requisite: course 271A. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit. S/U grading.

272. Advanced Discrete Event Simulation and Modeling Techniques. (4) Lecture, four hours; outside study, eight hours. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations. Variance reduction techniques, simulation models of computer systems and manufacturing systems. Letter grading.

273A. Digital Processing of Engineering and Statistical Data. (4) Lecture, four hours; outside study, eight hours. Computer methods for processing engineering and statistical data. Algorithms to evaluate recursive filter functions, Fourier series, power spectral, analysis correlation computations, and statistical testing. Letter grading.

276A. Pattern Analysis and Machine Intelligence. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence. S/U or letter grading.

276B. Structured Computer Vision. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications. S/U or letter grading.

276C. Speech and Language Communication in Artificial Intelligence. (4) Lecture, four hours; outside study, eight hours. Requisite: course 276A or 276B. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in applications. S/U or letter grading.

279. Current Topics in Computer Science: Methodology. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. S/U or letter grading.

280A-280ZZ. Algorithms. (4 each) Lecture, four hours; outside study, eight hours. Requisite: course 180. Additional requisites for each offering announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and with topic change. Letter grading.

281A. Computability and Complexity. (4) Lecture, four hours; outside study, eight hours. Requisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, "easy" and "hard" problems, PTIME/NP-TIME. S/U or letter grading.

281D. Discrete State Systems. (4) Lecture, four hours; outside study, eight hours. Recommended requisite: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation. S/U or letter grading.

284A-284ZZ. Topics in Automata and Languages. (4 each) Lecture, four hours; outside study, eight hours. Requisite: course 181. Additional requisites for each offering announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtitles of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and with topic change. S/U or letter grading.

287A. Theory of Program Structure. (4) Lecture, four hours; outside study, eight hours. Requisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics. S/U or letter grading.

288S. Seminar: Theoretical Computer Science. (2) Seminar, two hours; outside study, six hours. Requisites: courses 280A, 281A. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

289A-289ZZ. Current Topics in Computer Theory. (2 to 12 each) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. S/U or letter grading.

M296A. Modeling Methodology for Biomedical Systems. (4) (Same as Medicine M270C.) Lecture, four hours; outside study, eight hours. Recommended preparation: course M196B, some intermediate knowledge of linear systems analysis or linear algebra (e.g., Mathematics 115A, Electrical Engineering 141, 142, Mechanical and Aerospace Engineering 171A). Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems, including dynamic system experiment/model development, multicompartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. S/U or letter grading.

M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Biomathematics M270 and Medicine M270D.) Lecture, four hours; outside study, eight hours. Requisite: course M296A. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design. S/U or letter grading.

M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4) (Same as Medicine M270E.) Lecture, four hours; outside study, eight hours. Requisite: course M296A. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of the literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training. S/U or letter grading.

C296L. Biomedical Systems/BioCybernetics Research Laboratory. (4) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: course M196B. Special laboratory techniques and experience in bioCybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM196L. S/U or letter grading.

298. Research Seminar: Computer Science. (2 to 4) (Formerly numbered 209AA-209ZZ.) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate computer science students. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours; outside study, six hours. Limited to graduate Computer Science Department students. Seminar on communication of computer science materials in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

497D-497E. Field Projects in Computer Science. (4-4) Fieldwork, to be arranged. Students are divided into teams led by instructor; each team is assigned an external company or organization which they investigate as a candidate for possible computerization, submitting a team report of their findings and recommendations. In Progress and S/U or letter grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate computer science students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate computer science students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate computer science students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate computer science students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

Scope and Objectives

The major in Cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate prepara-

tion for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Undergraduate Study

Cybernetics B.S.

Precybernetics Major

Students may apply for the precybernetics major via petition if they are sophomores and have taken at least three of the premajor mathematics courses with a 2.7 grade-point average or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Preparation for the Major

Required: A minimum of 76 to 81 units, including Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 115A; Physics 1A, 1B, and 1C or Electrical Engineering 1, or 2AH and 2BH; Program in Computing 10A; Psychology 10.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 grade-point average in mathematics, 3.0 GPA overall, and a minimum grade of C in all preparation for the major courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be passed with a grade of C or better.

Methodology Core

Required: Four subject areas as follows:

- (1) One overview course: Computer Science 196A.
- (2) Two courses in probability and statistics from one of the following groups: (a) Statistics M100A and 100B, or (b) Mathematics M170A and Statistics 100B, or (c) Electrical Engineering 131A and Statistics 100B.
- (3) Two courses in signals and control systems (one from each group): (a) Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A.
- (4) One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas

Required: A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in physiological or cognitive psychology. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement

Required: One course from each of the applications/specialization areas selected from the current approved list.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Computing Specialization

Students may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and 60 are required, in addition to six courses selected from an approved list. Students graduate with a bachelor's degree in cybernetics and a specialization in Computing.

Cybernetics

Upper Division Course

195H. Honors Thesis. (4) Limited to Cybernetics honors majors. Honors thesis preparation and submission, under direction of a faculty sponsor on Cybernetics Interdepartmental Committee. P/NP grading.

DENTISTRY

School of Dentistry

UCLA
A3-042 Dentistry
Box 951668
Los Angeles, CA 90095-1668

(310) 825-6401
<http://www.dent.ucla.edu/>

No-Hee Park, D.D.S., M.S.D., Ph.D., *Dean*

Scope and Objectives

The UCLA School of Dentistry offers one lower division and two upper division courses for pre-dental students, plus several graduate courses. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of research at (310) 825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty.

Dentistry

Lower Division Course

88. Lower Division Seminar: Special Topics in Dentistry. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in dentistry approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

199. Individual Special Studies. (2 to 8) Studies in dentistry and related subject areas appropriate for the training of particular students, with required reading assignments or laboratory work leading to a final oral or written examination. P/NP or letter grading.

199H. Individual Special Studies (Honors). (2 to 8) Studies in dentistry and related subject areas appropriate for the training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). P/NP or letter grading.

Graduate Courses

M300.5A-M300.5B-M300.5C. Child Abuse and Neglect (2-2-1). (Same as Community Health Sciences M245A-M245B-M245C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Lecture, two hours. Course M300.5A is requisite to M300.5B, which is requisite to M300.5C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M422. Health Policy Issues for Dental Professionals. (2) (Same as Health Services M448.) Lecture, two hours. Requisites: Biostatistics 100A, Epidemiology 100, Health Services 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

M433A. Case Studies in Dental Practice. (2) (Same as Health Services M448D.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

441C. Introduction to Health Care. (2) Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of health care services in America, with comparisons to dental care provisions in other countries. S/U grading.

Scope and Objectives

The Department of Design offers the Bachelor of Arts and Master of Fine Arts degrees, which focus on visual communication design with emphasis on digital media. These uniquely challenging programs invite students to bal-

ance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The undergraduate program begins with the study of basic design elements and processes: form, color, drawing, letterforms and typography, visual technologies, and the manipulation of photography and video through image-capture technologies. Historical perspectives and social issues are also introduced. At the upper division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments.

Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 20 students, which encourages individual growth and fosters a sense of community within the department.

The two-year Master of Fine Arts (M.F.A.) degree fosters mature, professional-quality work utilizing the most current technologies in the field of media design. The exploration of visual communication in a digital format leads to new concepts and understanding that address the role of design in the rapidly evolving area of digital media. The program focuses on developing an individual thesis project that incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work. Students have the opportunity to participate in ongoing research projects that may form the basis of their thesis work. Sample topics include design of the interface and design of virtual environments and information spaces that integrate visual elements with sound, movement, time, and space.

Facilities and equipment in the department enable students to create visual designs in two, three, and even four dimensions. The newly created Center for Digital Arts expands opportunities for students to develop interactive media applications in a networked environment, as well as advanced computer graphics involving virtual reality and three-dimensional form. The center's equipment combines high-end PC and Macintosh computers with facilities for music and nonlinear video editing.

Undergraduate Study

Design B.A.

Preparation for the Major

Required: Design 10, 21, 22, 23, 24, 25, 26, and one course from Art 31 or Art History 50 through 57.

The Major

Required: Thirteen upper division courses, including a minimum of three courses from comparative and theoretical studies (Design 101 through C106) and seven courses from area

studies (courses 153 through 160). Three additional upper division courses must be selected from the courses listed above and/or from major electives (courses C121 through C143 and 182 through 199). In consultation with and with approval of the faculty adviser, other nonmajor courses may be applied toward major credit.

It is recommended that students have each term's program approved by the departmental adviser.

Note: Consult the *Schedule of Classes* for courses restricted to majors only.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Design offers a Master of Arts (M.A.) degree and a Master of Fine Arts (M.F.A.) degree in Design.

Master of Arts

The Design Department is not accepting applications for admission to the M.A. program for Fall Quarter 1999.

Admission

Applicants for admission to the M.A. program are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. The application dossier must include (1) three letters of recommendation; (2) transcripts of academic record; (3) statement of purpose; (4) sample of work related to studies in design and computation; (5) Graduate Record Examination (GRE) scores; (6) proof of competence in English for applicants whose native language is not English (minimum score of 550 on the Test of English as a Foreign Language).

Acceptance is by a majority vote of the design faculty. Formal faculty review of graduate applicant dossiers takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study

Consult department.

Course Requirements

Although a new curriculum is approved for this degree, to date the courses that comprise this curriculum have not been submitted or approved.

Comprehensive Examination Plan

The written comprehensive examination is offered each quarter. A committee of at least three members appointed by the department administers the comprehensive examination. The comprehensive examining committee may conduct an oral query after reviewing the written examination. In case of failure, reexamination may be conducted once only with the consent of the departmental graduate adviser.

Thesis Plan

None.

Master of Fine Arts

Admission

Applicants for admission to the M.F.A. program in Design are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. Applicants are expected to have working knowledge of graphics software. Additional experience with video, interactive media, and/or three-dimensional modeling and animation is preferred. A portfolio is required in the form of slides (maximum 20) and/or videotape of no more than five minutes in length. A statement of purpose is also considered. A minimum score of 620 on the Test of English as a Foreign Language is required for applicants whose native language is not English. Formal faculty review of graduate applicant portfolios takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study

Media Design: interfaced design, interactive media, time-based work, virtual environments, and information spaces.

Course Requirements

A minimum of 72 quarter units of upper division and graduate design courses is required. No fewer than 24 quarter units in the Design 200 series are to be completed: Design C206, 254, and 256 must be taken during the first two quarters in residence, Design 258 during the first year in residence, and the graduate seminar, Design 269, is to be taken twice (eight units). A further 32 units are to be taken from the Design 400 series, at least eight units in the first year in residence, and 16 units of electives of which eight units of Design 596 may be applied toward the requirements for the degree.

Comprehensive Examination Plan

The comprehensive examination consists of an oral examination and a concentrated body of work which is presented as the master's statement. Also required is an accompanying record of the project, consisting of documentation in the form of slides of physical work, research material, and other visual material, and may include a written statement as determined by the graduate guidance committee.

Thesis Plan

None.

Design

Lower Division Courses

10. Nature of Design. (4) Lecture, three hours. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment. P/NP or letter grading.

21. Color. (4) Studio, six hours. Introduction to theories of color to understand interdependence and interaction of color and form, color and quantity, color and placement, and the after-image. P/NP or letter grading.

22. Form. (4) Studio, six hours. Interrelation of two-dimensional surfaces and three-dimensional forms with traditional and experimental materials as a foundation for creativity; origination and solution of problems. P/NP or letter grading.

23. Drawing. (4) Studio, six hours. Translation of perception through delineation, drawing, and other descriptive media. Emphasis on development of students' motor control by means of freehand and mechanical drawing and by development of analytical and objective observation from life and three-dimensional objects. P/NP or letter grading.

24. Visual Technologies. (4) Lecture/studio, four hours; laboratory, two hours. Introduction and integration of traditional design tools, the camera, and digital technologies for application to visual thinking and fundamentals of design. P/NP or letter grading.

25. Letterforms and Typography. (4) Lecture/studio, four hours; laboratory, two hours. Requisite: course 24. Introduction to typography as basic element of information design and as it applies to various forms of media; historical basis for development of letterform design and its architecture. P/NP or letter grading.

26. Image Capture. (4) Lecture/studio, four hours; laboratory, two hours. Requisite: course 24. Introduction to image capture technologies through understanding of photography and video. Studio and field exercises include equipment operation, lighting techniques, and digital image manipulation. P/NP or letter grading.

35B. Introduction to Tools and Processes. (4) Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes.

Upper Division Courses

101. Introduction to Study of Design. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Historical introduction to principles of design, theories about design process, and culture of artifacts from classical times to the present day. P/NP or letter grading.

102. Introduction to Design and Computation. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Introduction to use of computational methods in representation, creation, and study of designs. Discussion of spatial algorithms, recursive procedures, and formal grammars and languages. Presentation of elementary applications in design. P/NP or letter grading.

103. Introduction to Visual Communication. (4) (Formerly numbered C103.) Lecture, three hours. Preparation: completion of preparation for the major courses. Designed for juniors/seniors. Introduction to methodology of design in context of visual communication, with focus on integrative themes and representative case studies that encourage independent student investigation. Letter grading.

104. Design and Society: Society and Design. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Open to nonmajors with consent of instructor. Historical and thematic examination of how design affects society from classical antiquity to the 20th century in order to understand historically how each type and application of design related to sociological context in which it existed. Consideration of how various design practices and techniques related to each other. P/NP or letter grading.

C106. Media Studies. (4) (Not the same as course 106 prior to Fall Quarter 1998.) Lecture, three hours. Preparation: completion of preparation for the major courses. Overview and contextual understanding of influences and origins of media, communication paradigms, and technologies of past 150 years through reading and discussion of theoretical and historical works. Concurrently scheduled with course C206. Letter grading.

C121. Fundamentals of Architectonics: Proportion. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM221. P/NP or letter grading.

C122. Fundamentals of Architectonics: Symmetry. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM222. P/NP or letter grading.

C123. Fundamentals of Architectonics: Composition and Order. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM223. P/NP or letter grading.

C141. Programming Computer Applications in Architecture and Urban Design. (4) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. Concurrently scheduled with course CM241. P/NP or letter grading.

C142. Introduction to Geometric Modeling. (4) Lecture, three hours; outside study, nine hours. Requirement: course C141 or Computer Science 141. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. Concurrently scheduled with course CM242. P/NP or letter grading.

C143. User Interaction Techniques in Design. (4) Lecture, three hours; outside study, nine hours. Requirement: course C141 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. Concurrently scheduled with course CM243. P/NP or letter grading.

153. Design for Video. (4) (Formerly numbered 165C.) Studio, six hours. Preparation: completion of preparation for the major courses. Use of video technology (video systems, cameras, displays, editing, and storage) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

154. Design for Print Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirement: course 103 or C106. Introduction to procedures to create, plan, and produce visual communication design. Emphasis on acquiring and working with visual vocabulary to gain mastery of conceptual and creative procedures by learning technical skills to translate ideas and concepts into visual design and graphic imagery. P/NP or letter grading.

155. Design for Print and Digital Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirements: courses 103 or C106, 154. Integration of print and digital information technology, with continued emphasis on fully integrating visual vocabulary with mastery of conceptual and creative procedures. P/NP or letter grading.

156A. Three-Dimensional: Design of Virtual Form. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirement: course 103 or C106. Through lectures, discussions, and studio work, introduction to basic elements of three-dimensional computer visualization, including modeling, image mapping, lighting, project construction, and rendering. P/NP or letter grading.

156B. Three-Dimensional: Time and Motion in Virtual Space. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirements: courses 103 or C106, 156A. Extension of study of virtual three-dimensional form to include motion, time, and rhythm. Storyboard development, modeling of articulated characters and objects, virtual camera movement, and motion capture. P/NP or letter grading.

157A. Design for Interactive Media. (4) (Formerly numbered 157.) Studio, six hours. Preparation: completion of preparation for the major courses. Requirements: courses 103 or C106, 154. Emphasis on graphic and information design for interactive media applications. Introduction to multimedia and hypertext. Focus on communicative role of conceptual designer as visual communicator and design manager. P/NP or letter grading.

157B. Advanced Interactive Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirements: courses 103 or C106, 154, 157A. Extension of study of interactive media design. Focus on development of advanced conceptual skills in interface design and nonlinear narrative utilizing programming techniques such as lists and objects. Builds on skills and concepts acquired in course 157A. P/NP or letter grading.

158. Design for Environmental Communication. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requirements: courses 103 or C106, 154. Introduction to environmental communication design through experience in the design studio. Focus on aesthetic issues concerning creation of design elements incorporating concepts of spatial dimension, human/environmental scale, motion, and time. Overview of history, technologies, and future of environmental graphics. P/NP or letter grading.

159. Senior Project. (4) Lecture, two hours; discussion, two hours; laboratory, two hours. Preparation: completion of preparation for the major courses. Requirements: courses 103, C106, three courses from 153 through 158. Limited to seniors. Individual studies organized and conceptualized by senior students. Proposal for research and development of design and production of a body of work. May be repeated once for credit.

160. Special Topics in Area Studies. (2 to 8) Hours to be arranged. Preparation: completion of preparation for the major courses. Requirement: course 103 or C106. Selected topics in design and media arts explored through variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics to be announced in advance. May be repeated for a maximum of eight units.

182. Design Processes: World Cultures. (4) Studio, six hours. Introduction to early development of tools, cloth, shelters, symbols, and embellishments in world cultures. P/NP or letter grading.

183. Material Processes: Fiber Structure. (4) Studio, six hours. Use of basic hand methods of construction to develop both two- and three-dimensional forms, utilizing pliable materials but not to exclude other media. P/NP or letter grading.

184. Material Processes: Surface Pattern. (4) Studio, six hours. Use of hand processes and a variety of materials to develop simple to complex surface pattern systems as a means for creative expression. P/NP or letter grading.

189. Topics in Design. (2 to 8) Hours to be arranged. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated for a maximum of 16 units.

193. Proseminar: Design. (4) Proseminar, three hours. Open to senior and advanced students. Examination in seminar format of specific problems relevant to design theory and performance. Topics announced in advance.

197. Honors Course. (4) Hours to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Design. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

C206. Media Studies. (4) Lecture, three hours. Designed for graduate design students. Overview and contextual understanding of influences and origins of media, communication paradigms, and technologies of past 150 years through reading and discussion of theoretical and historical works. May be repeated for credit with consent of adviser. Concurrently scheduled with course C106. Letter grading.

207. Mathematical Techniques in Design and Computation I. (4) Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Sets, relations, posets, lattices, Boolean and Heyting algebras, formal languages and production systems. May be repeated for credit with consent of adviser. S/U or letter grading.

208. Mathematical Techniques in Design and Computation II. (4) Lecture, three hours. Designed for graduate students. Survey of mathematical techniques used in design and computation theory. Theory of descriptive geometry, spatial transformations, matrix representations, symmetry and groups, graphs, maps and triangulations. May be repeated for credit with consent of adviser. S/U or letter grading.

CM221. Fundamentals of Architectonics: Proportion. (4) (Same as Architecture and Urban Design M225A.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C121. S/U or letter grading.

CM222. Fundamentals of Architectonics: Symmetry. (4) (Same as Architecture and Urban Design M225B.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C122. S/U or letter grading.

CM223. Fundamentals of Architectonics: Composition and Order. (4) (Same as Architecture and Urban Design M225C.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C123. S/U or letter grading.

229. Advanced Seminar: Architectonics. (4) Seminar, three hours. Requisites: courses CM221, CM222, CM223. Exploration in depth of an active research question in architectonics. Topics may focus on some aspect of proportion, symmetry, compartment, and order from historical and/or formal point of view. May be repeated for credit with consent of adviser. S/U or letter grading.

CM241. Programming Computer Applications in Architecture and Urban Design. (4) (Same as Architecture and Urban Design M227A.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. Concurrently scheduled with course C141. S/U or letter grading.

CM242. Introduction to Geometric Modeling. (4) (Same as Architecture and Urban Design M227B.) Lecture, three hours; outside study, nine hours. Requisite: course CM241. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. May be repeated for credit with consent of adviser. Concurrently scheduled with course C142. S/U or letter grading.

CM243. User Interaction Techniques in Design. (4) (Same as Architecture and Urban Design M227C.) Lecture, three hours; outside study, nine hours. Requisite: course CM241 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. May be repeated for credit with consent of adviser. Concurrently scheduled with course C143. S/U or letter grading.

249. Advanced Seminar: Computer Applications. (4) Seminar, three hours. Requisite: course C141 or Computer Science 141. Survey of various roles computers may play in design; development of new applications. Topics include representation, search, evaluation functions, and communication. May be repeated for credit with consent of adviser. S/U or letter grading.

254. Dynamic Media. (4) Lecture/studio, six hours. Designed for graduate design majors. Emphasis on creation of dynamic, digital, and linear works through integration of typography, photography, video, graphics, animation, and sound. May be repeated for credit with consent of adviser.

256. Interactive Environments. (4) Lecture/studio, six hours. Requisites: courses C206, 254. Designed for graduate design majors. Emphasis on comprehension of fundamental principles of interactivity and networked environments. May be repeated for credit with consent of adviser.

258. Current State of Technology. (4) Lecture/studio, six hours. Designed for graduate design majors. Introduction to state-of-the-art software programs and techniques necessary for design of interactive and multimedia applications. May be repeated for credit with consent of adviser.

269. Graduate Seminar. (4) Designed for graduate design majors. Survey of critical theories in media art and design. Critical examination of student work by peers, faculty, and expert guests. Must be taken twice for M.F.A. degree. May be repeated for credit with consent of adviser.

287. Form and Structure. (2 to 8) Studio or studio/seminar, to be arranged. Exploration of form, with emphasis on expressive experimentation in materials and processes. May be repeated for credit with consent of adviser.

289. Special Topics in Media Design. (2 to 8) Hours to be arranged. Examination of specific problems relevant to design theory and performance. Topics announced in advance. May be taken for a maximum of eight units.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

401. Design Studio I. (2 to 8) Limited to first-year graduate design students. Introduction to advanced experimentation and integration of media, technologies, and concepts, with emphasis on development of design work of individual graduate students. May be repeated for credit with consent of adviser.

402. Design Studio II. (2 to 8) Requisites: courses C206, 254, 256, four units of 401. Continuation of advanced design research based on experimentation integrated into a disciplined approach to design process. Focus on development of comprehensive body of work which forms basis of M.F.A. thesis exhibition. May be repeated for credit with consent of adviser.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

The Department of Design reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

DIVERSIFIED LIBERAL ARTS

*College of Letters and Science
Certificate Program*

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 206-6661, 825-9315

Faculty Advisory Committee

Bruce Barbee, Ph.D. (*Education*)
Bruce Beiderwell, Ph.D. (*English Composition*)
Shelley Kriegler, Ph.D. (*Mathematics*)
James W. Trent Ph.D. (*Education*), *Director*

Scope and Objectives

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which students may waive the Multi-subject Assessment for Teachers (MSAT) in California. The MSAT examination must be passed (or the DLAP completed) before students in elementary school teaching credential programs may begin their student teaching. To earn an elementary school teaching credential, students must complete an accredited program offered through a graduate school of education.

Undergraduate Study

Diversified Liberal Arts Certificate Program

To earn the certificate in Diversified Liberal Arts, students must complete a major in the College of Letters and Science. (For eligibility of students in the professional schools, consult a DLAP counselor.) They must also complete DLAP requirements in four main areas: (1) language and literature, (2) mathematics and science, (3) history and social science, (4) arts and culture. Many program requirements can be satisfied by courses taken to fulfill general education requirements.

Students must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college certifies completion of the program.

Students who do not complete the program prior to graduation must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a DLAP counselor in the College of Letters and Science, A316 Murphy Hall (310-206-6681; e-mail: dlap@hup.ucla.edu). For information regarding the Teacher Credential Program in the Graduate School of Education and Information Studies, see a counselor in 1009 Moore Hall (310-825-8328).

Paul M. Merifield, Ph.D., *Adjunct (Environmental Geology)*
 Floyd F. Sabins, Jr., Ph.D., *Adjunct (Geology)*

Adjunct Associate Professors

Heidi Houston, Ph.D. (*Geophysics, Seismology*)
 Frank Kyte, Ph.D. (*Geochemistry*)

Adjunct Assistant Professor

Tom Latourrette, Ph.D. (*Geochemistry*)

Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, seismology, the Earth's interior, planetary physics, and space plasmas.

The variety of techniques applied lead to several concentrations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth Sciences is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students

who plan careers in environmental sciences, law, government, business, journalism, public health, medicine, or dentistry. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

Undergraduate Study

Geology B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 31A, 31B, 32A; Physics 1A, 1B, 1C, 4AL, 4BL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

To be admitted as Geology majors, **transfer students** with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 103A, 103B, 103C, 111, 112, 116, 121A-121B, 133, 135, and three additional courses from C106, C107, C109, 119, 125, C126, 129, 133, 134, 136C, 137, 139, 141, 150, 152.

Students with an interest in nonrenewable natural resources are advised to take courses 136C, 137, 139, 141, and/or 150. Those interested in geochemistry are advised to take Earth and Space Sciences 103C, C107, C109, 119, 121A-121B, C126, and/or Chemistry and Biochemistry 110A, 110B, 114, 132A, 132B, 153A, 184.

Geology — Engineering Geology B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, 1C, 4AL, 4BL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. *Recommended:* Mathematics 32B. All courses must be passed with a minimum grade of C–.

To be admitted as Geology — Engineering Geology majors, **transfer students** with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with labo-

ratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil and Environmental Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Civil and Environmental Engineering 151, 155, Geography 100.

Geology — Paleobiology B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 16 or 17, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A; Physics 1A, 1B, and 4AL, or 6A and 6B. All courses must be passed with a minimum grade of C–.

To be admitted as Geology — Paleobiology majors, **transfer students** with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 103B, 111, 112, 116, CM118, 133; seven courses from Biostatistics 110A, 110B, Chemistry and Biochemistry 130A/130AL, 130B/130BL, 153A, 153L, Earth and Space Sciences C109, 119, 121A, 121B, 141, Organismic Biology, Ecology, and Evolution 101A, 101B, 102, 105, 110, 111, 117, 120, 121, 122, 123, 147, 148.

Geophysics — Applied Geophysics B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

To be admitted as Geophysics — Applied Geophysics majors, **transfer students** with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. A second year of calculus, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152; Physics 105A, 105B, 110A, 110B, 114; two courses from Earth and Space Sciences 103A, 103B, C107, 134, 137, 139, 153, 154, 155, 205, 265, Physics 112, 115A, 116, 131, 132, Statistics M100A, 100B, or other courses with consent of adviser.

Geophysics — Geophysics and Space Physics B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, and 4BL (or 2AH, 2BH, 4AL, and 4BL), 17, 18L; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.

To be admitted as Geophysics — Geophysics and Space Physics majors, **transfer students** with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. A second year of calculus, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 134, M140, 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 112, 131; two upper division courses from the physical sciences, engineering, or mathematics (must be approved by the undergraduate adviser).

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 248.

Earth Sciences B.A.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 9, 15, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 1A, 1B, 1C, and 4AL, or 2AH, 2BH, and 4AL, or 6A, 6B, and 6C. All courses must be passed with a minimum grade of C–.

To be admitted as Earth Sciences majors, **transfer students** with 80 or more quarter

units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One year of calculus-based physics with laboratory, one biology course with laboratory, and either one introductory origin and evolution of the solar system course or one introductory oceanography course are recommended.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 116; five additional upper division courses from Earth and Space Sciences other than 100 or 120, English Composition 129C, Geography 100/100A, 101/101A, 104, 105/105A, 106/106A, 107, 113, or other upper division physical sciences, life sciences, or engineering courses by petition.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Geochemistry Minor

Geochemistry emphasizes use of minerals, magmas, elements, and isotopes to date events, determine rates, and track matter through its cycles in the planets and biosphere. These skills are valuable in environmental and natural-resource work and anthropology, as well as in studying the histories of the planets.

To enter the Geochemistry minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units): Earth and Space Sciences 1, 51A, 51B.

Required Upper Division Courses (20 to 26 units): Two courses from Earth and Space Sciences C106, C107, C109, and three courses from 103A, 103B, 103C, C106 or C107 or C109 (whichever course was not applied above), 152, 153.

All minor courses must be taken for a letter grade, with an overall grade-point average of

2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Geology Minor

Geology is the study of the surface of the Earth and the rocks and processes which created it. Field methods, interpretation of rocks, and modern plate-tectonic models are emphasized, with the goals of finding valuable or hazardous materials and inferring geologic history. These skills are valuable in engineering, urban planning, and environmental and resource studies.

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units): Earth and Space Sciences 1, 2, 61.

Required Upper Division Courses (22 units): Earth and Space Sciences 112, 119, and three courses from 116, 129, 137, 139, 150.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Geophysics and Planetary Physics Minor

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career which requires quantitative analysis.

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units): Earth and Space Sciences 1, 8, 9.

Required Upper Division Courses (20 units): Earth and Space Sciences 134, 135, and three courses from M140, 152, 153, 154, 155.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics.

Geochemistry

Master's Degree

Admission

A bachelor's degree in chemistry, geology, physics, or a related field is required for the Master of Science degree in Geochemistry. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test and Subject Test scores are required; the Subject Test may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Areas of Study

The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements

A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Sixteen units of 500-series courses may be applied toward the total course requirement for the M.S. in Geochemistry. Twelve units may be applied toward the minimum graduate course requirement.

Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 51A, 51B, C107, C109, 234, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C, or 295A, 295B, 295C.

Comprehensive Examination Plan

The advising committee prepares and administers the final examination (which normally is oral). In the preparation for the examination, the committee takes proper recognition of the fact that some students are better qualified in chemistry and others in geology. However, it is required that a distinct competence in one of these fields be matched by at least an adequate performance in the other. In most cases, a failed final examination can be repeated one additional time.

Thesis Plan

The thesis must be approved by the research director (who usually is the chair of the advis-

ing committee), as well as by the other members of the advising committee. If students choose the thesis plan, no examination is required.

Doctoral Degree

Admission

A bachelor's degree in chemistry, geology, physics, or a related field is required for the Ph.D. degree in Geochemistry. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required; the Subject Test is optional and may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Major Fields or Subdisciplines

The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements

Students are expected to complete at least the minimum number of courses required for the M.S. degree. Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 51A, 51B, C107, C109, 234, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The examination must be taken before the end of the first year of the doctoral program if the student has a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It may be given in either a question/answer format or in a proposal format, at the discretion of the student.

The question/answer format is a conventional written examination that covers the field of geochemistry and related areas of geology and chemistry. It may be followed by an oral part, at the discretion of the examining committee.

The proposal format is based on three written research proposals prepared by the student and submitted to the examining committee at least 10 days before the examination. The proposals must be concise and must entail three dissimilar projects; one of them should cover the intended dissertation topic. The proposals

are presented briefly to the examining committee orally, and the committee examines their originality and scientific merit. The oral examination is not necessarily limited to the topics of the proposals.

In case of failure, an examination of either format can be repeated at the discretion of the examining committee.

University Oral Qualifying Examination. After passing the written qualifying examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week before the examination, students must provide each member of the doctoral committee with a written prospectus of their proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geology

Master's Degree

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required for the Master of Science in Geology. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Areas of Study

The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements

Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students' performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C, or 295A, 295B, 295C.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology

seminar (Earth and Space Sciences 251 through C260). Except for courses 597 and 598, those graded on an S/U basis are not applicable toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses may be applied toward the total course requirement for the M.S. in Geology. Four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

This plan is recommended for those continuing to the Ph.D. degree. The examination is administered by the student's three-member advising committee and one additional member who is appointed by the graduate adviser following consultation with the student. It consists of a six-hour written part and a subsequent oral part. The written part covers the student's major field of study, whereas the oral part may be more general in scope. If the examination is failed, the committee may, on the basis of the student's academic performance, recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Thesis Plan

This plan is normally required for students not continuing to the doctorate. The thesis committee consists of the three-member advising committee, whose chair is the supervisor of the thesis research. One member of the committee may be from another department. The thesis subject may be selected at once and the research undertaken concurrently with coursework. In any event, it should normally be selected within the first year of residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may, on the basis of the student's academic performance, recommend either termination of graduate study or further coursework or research or both, leading to submission of a revised thesis. Revision and resubmission is not normally permitted more than once.

Doctoral Degree

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required for the Ph.D. degree in Geology. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Major Fields or Subdisciplines

The program in geology offers study in geomorphology, glaciology, micropaleontology,

mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements

Students are expected to complete at least the minimum number of courses required for the M.S. degree and must take a geology seminar each year. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students' performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C, or 295A, 295B, 295C.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The examination must be taken before the end of the first year of the doctoral program if the student has a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It is administered by the advising committee augmented by a fourth member who is appointed by the graduate adviser in consultation with the student and serves as chair of the examining committee. It is given in either a question/answer format or a proposal/proposition format, which the student may select.

The question/answer format consists of a two-part examination. The first part is written and can cover any aspect of geology in which the student has had training. The second part is oral, is taken no later than a week after the first part, and can cover subjects from the written part and the field of the proposed dissertation, although it is not limited to these topics.

The proposal/proposition format consists of an oral examination based on three written research proposals or scientific propositions in any combination, which must be submitted to the examining committee at least 10 days before the examination. One of the essays must specify the intended dissertation research. The examination is concerned with the originality and soundness of the proposals and propositions, their scientific significance, and the quality of their elucidation and defense, although it is not limited to these topics.

University Oral Qualifying Examination. After passing the written qualifying examination, students must consult a faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week beforehand, students must provide each member of the doctoral committee with a written prospectus of the proposed dissertation research. The sub-

ject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geophysics and Space Physics

Master's Degree

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required for the Master of Science degree in Geophysics and Space Physics. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Undergraduate preparation for admission to the program in geophysics and space physics with specialization in applied geophysics is the equivalent of the B.S. in Geophysics – Applied Geophysics, including a common mastery of the subject matter of Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Areas of Study

The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

The objective of the program in geophysics and space physics with specialization in applied geophysics is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly in petroleum exploration.

Course Requirements

Courses applied toward the 36-unit minimum requirement must include courses Earth and Space Sciences 200A, 200B, 200C and at least 12 additional units of 200-series (graduate) courses, of which at least half must fall within a single field of concentration (geophysics, geophysical fluid dynamics, planetology, or space physics) which students select with the advice and approval of their faculty adviser, and the remainder must contribute to their general competence in geophysics and space physics.

For the program in geophysics and space physics with specialization in applied geophysics, courses applied toward the 36-unit minimum requirement must include Earth and

Space Sciences 200A and 202, plus at least two courses from 204, 205, 222. Eight additional units of graduate-level courses are required; courses recommended are Earth and Space Sciences 200B, 208, M224A. Up to eight units of course 596 or 598 may count toward the graduate-level course requirements. Except for course 596 or 598, courses graded on a S/U basis do not apply toward the minimum requirement.

Comprehensive Examination Plan

Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which, along with a written statement of their field, must be submitted to the examining committee before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

In either format, the examination tests students' general knowledge of their field (e.g., Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by students in a written statement to which they must get the examining committee's concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with students, of whom at least three must be from the department and one must be from outside the student's field of concentration. Courses in the 500 series and courses graded on a S/U basis may not be applied toward the minimum requirement.

The comprehensive examination plan is not offered for the program in geophysics and space physics with specialization in applied geophysics.

Thesis Plan

At least three members of the thesis committee must be from the department. Eight units of 500-series courses (596, 598) may be applied toward the total course requirement.

A thesis is required for the program in geophysics and space physics with specialization in applied geophysics. A qualifying examination on the suitability of the proposed thesis should be taken by the fourth quarter of residence. A final examination must be taken on the adequacy of the completed thesis. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with the student, of whom at least three must be from the department.

Doctoral Degree

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required for the Ph.D. degree in Geophysics and Space Physics. Undergraduate work must in-

clude junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test score are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Major Fields or Subdisciplines

The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

Course Requirements

Six courses are required, three in fundamental physics and three in the major geophysics disciplines. Students must attain a grade-point average of 3.3 or better, on a 4.0 scale in the six courses.

Courses in Fundamental Physics. Courses satisfying the fundamental physics requirement may be chosen from the following: Earth and Space Sciences 201, 202, Physics 210A, 210B, 215A, 220, 222A, 231A, Chemistry and Biochemistry C223A. Exceptions are that students may not obtain credit for both examinations in the following pairs due to overlap of subject matter: Earth and Space Sciences 201 and Physics 220; Earth and Space Sciences 203 and Physics 210A; Earth and Space Sciences 203 and Physics 210B; Physics 215A or Chemistry and Biochemistry C223A.

In addition to the above listed courses, students may petition to count toward this requirement either or both of Physics 221A and 221B. Approval of a petition depends on relevance of quantum mechanics to more advanced study planned by the student. Other substitutions may be petitioned in exceptional cases. Students who can demonstrate they have mastered the material elsewhere may petition for course credit. The three fundamental physics examinations must all be passed prior to undertaking the departmental written qualifying examination.

Courses in the Three Major Geophysics Disciplines. Earth and Space Sciences 200A, 200B, 200C, on solid Earth, oceans and atmospheres, and space plasma physics must be passed with an average grade of 3.3 or better. The examinations must be attempted by the fourth quarter of enrollment. Students not achieving the necessary level of achievement by the sixth quarter of enrollment are not eligible to continue in the Ph.D. program and may not attempt the departmental written qualifying examination. Exceptions to this requirement

may be granted by petition under extenuating circumstances.

Written and Oral Qualifying Examinations

Written Qualifying Examination. Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which must be submitted to the examining committee at least 10 days before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

The examination tests students' general knowledge of their field (Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by students in a written statement to which they must get the examining committee's concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with students, of whom at least three must be from the department and one must be from outside the students' field of concentration.

University Oral Qualifying Examination. After passing the field examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination as soon as possible. The examination determines the suitability of the chosen problem for the Ph.D. dissertation and their capacity to pursue research on the problem, but it is not limited to these topics. A written prospectus on their topic must be handed to the committee at least 10 days before the examination. Repetition of a failed examination is at the option of the doctoral committee. If students do not pass this examination within five years after entering the program, they are subject to dismissal.

Earth and Space Sciences

Lower Division Courses

1. Introduction to Earth Science. (4) Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.

1H. Fundamentals of Earth Science. (4) Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical sciences majors with strong high school or some lower division preparation. Introduction to Earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods.

2. Earth History. (4) Lecture, three hours; laboratory, three hours; fieldwork. Enforced requisite: course 1 or 1H. Methods of historical science; consideration of special problems related to physical and biological evolution of Earth from earliest time to the present.

5. Environmental Geology of Los Angeles. (4)

Lecture, three hours; discussion, two hours; field trips. Geologic hazards and natural resources of greater Los Angeles region. Topics include Los Angeles geologic hazards such as earthquakes, landslides, and floods; Southern California oil fields; gold and gem mining in the region; local beach processes; and Los Angeles water-resource problems. Field trips to San Andreas fault, California aqueduct, active landslides, and historic gold mines. P/NP or letter grading.

8. Earthquakes. (4) Lecture, three hours; discussion, one hour. Causes and effects of earthquakes, with special emphasis on problems of living with earthquakes in Southern California. Topics include relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes.

9. Origin and Evolution of Solar System. (4) Lecture, three hours; discussion, one hour. Properties of sun, planets, asteroids, and comets. Astronomical observations relevant to understanding the solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding earliest history of the solar system. Chemical models of solar nebula. Space exploration and its planning.

15. Introduction to Oceanography. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Organismic Biology 25. General introduction to geological, physical, chemical, and biological processes related to characteristics and evolution of ocean system. P/NP or letter grading.

16. Major Events in History of Life. (4) Lecture, three hours; laboratory, two hours. Designed for nonmajors. History of life on Earth as revealed through the fossil record. P/NP or letter grading.

17. Dinosaurs and Their Relatives. (4) Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Exploration of biology, evolution, and extinction of dinosaurs and close relatives, in context of history of biosphere. Information from paleontology, biology, and geology.

20. Natural History of Southern California. (4) Lecture, one hour; laboratory, three hours; four field weekends; outside study, eight hours. Identification, distribution, diversity of native plants and communities; identification and interpretation of rocks, minerals, and geologic features and geologic history of physiographic regions of Southern California. Emphasis on field-based learning. P/NP or letter grading.

51A. Mineralogy-Lithology. (4) Lecture, three hours; laboratory, six hours. Enforced prerequisite: course 1 or 1H. Recommended: completion of chemistry requirement. Mineralogic crystal chemistry; relation of physical properties to structure. Structural classification and petrogenesis of major minerals and rocks. Laboratory study of crystallography and identification of minerals and igneous, sedimentary, and metamorphic rocks in hand sample.

51B. Optical Mineralogy-Petrography. (4) Lecture, three hours; laboratory, six hours. Enforced prerequisite: course 51A. Preparation: one introductory high school or college physics course. Principles of optical crystallography. Utilization of optical properties to identify nonopaque minerals in immersion media and in thin section. Study of common igneous, sedimentary, and metamorphic rocks in thin section.

61. Elements of Field Geology. (4) Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Enforced prerequisite: course 1 or 1H. Majors must have completed or be concurrently enrolled in course 51B. Techniques of geologic mapping; preparation of geologic reports; methods of mapping faults and folds, sedimentary, igneous, and metamorphic terrains, and Quaternary deposits; introduction to field methods in engineering and environmental geology, petroleum geology, and mining geology and mineral exploration; interpretation of geologic maps; field exercises in pace-and-compass topographic and geologic mapping. P/NP or letter grading.

Upper Division Courses

100. Principles of Earth Science. (4) Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of Earth; physical and biological evolution.

102. Reflected Light Microscopy. (2 or 4) Lecture, 90 minutes; laboratory, three hours. Requisite: course 51B. Study of opaque and ore minerals in polished section using reflected light methods. Optical theory, qualitative and quantitative measurements, mineral identification, textures and assemblages of reflective metals, oxides, sulfides, and arsenides. Independent project required if taken for four units. P/NP or letter grading.

103A. Igneous Petrology. (6) Lecture, two to three hours; laboratory, six hours; field trips. Requisites: courses 51A, 51B, Chemistry 20B, 20L, Mathematics 31B. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in earth. Introduction to thermodynamics as applied to petrology. Formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and its relation to seismology. Overview of petrological and chemical evolution of Earth, moon, and other planets from their origin to the present. P/NP or letter grading.

103B. Sedimentary Petrology. (6) Lecture, two to three hours; laboratory, six hours; field trips. Requisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. P/NP or letter grading.

103C. Metamorphic Petrology. (6) Lecture, two to three hours; laboratory, six hours; field trips. Requisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and application of physical and chemical principles. P/NP or letter grading.

C106. Physical Geochemistry. (4) Lecture, three hours; outside study, nine hours. Requisite: course 51B. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C206. P/NP or letter grading.

C107. Geochemistry. (4) Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C207. P/NP or letter grading.

C109. Isotope Geochemistry. (4) Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C209. P/NP or letter grading.

111. Stratigraphic and Field Geology. (6) Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Requisite: course 61. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report.

111G. Field Geology. (2 to 4) Designed for graduate students. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation.

112. Structural Geology. (6) Lecture, three hours; laboratory, six hours. Requisite: course 1. Recommended: course 51B. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. P/NP or letter grading.

116. Paleontology. (4) Lecture, three hours; laboratory, three hours; field trips. Requisite: Biology 5. Review of major groups of fossil organisms and their significance in geology and biology.

CM118. Advanced Paleontology. (4) (Same as Organismic Biology CM145.) Lecture, three hours. Requisite: course 116 or Organismic Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM218. P/NP or letter grading.

119. Continental Drift and Plate Tectonics. (4) Lecture, three hours. Requisite: course 1 or 1H or 100. Designed for juniors/seniors. Classical concepts of sedimentation and tectonics. Alfred Wegener's theory of continental drift and ensuing controversy. Physiography of continents and oceans. Geophysical evidence regarding nature of ocean floor. Magnetic stratigraphy. Seafloor spreading. Plate tectonic model and its driving mechanisms. Tectonic, igneous, and metamorphic processes at plate boundaries.

120. Rubey Colloquium: Major Advances in Earth Science. (4) Lecture, three hours. Designed for juniors/seniors. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Supervision of continuity and assessment of student performance by a faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently.

121A-121B. Advanced Field Geology. (6-6) Fieldwork, four weeks each. Requisites: courses 61, 103B, 111. Problems in field geology; preparation of geologic maps and cross-sections; preparation of written geologic reports in the field and a final written summary geologic report of selected areas.

125. Volcanoes. (4) Lecture, three hours; laboratory, three hours; field trip(s). Requisites: courses 1, 61. Recommended: courses 51A, 51B, 103A. Origins of magmas and their properties. Physics of volcanism and characteristics of volcanic deposits. Monitoring volcanic hazards and understanding effects of volcanoes on life. Case studies of historical eruptions. P/NP or letter grading.

C126. Advanced Igneous Petrology. (4) Lecture, three hours; laboratory, three hours; field trips. Requisite: course 103A. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C226. P/NP or letter grading.

129. Hydrogeology. (4) Lecture, three hours. Requisite: course 1 or 1H or 100. Designed for juniors/seniors. Hydrogeologic controls of groundwater occurrence, movement, quality, and management. Hydrologic equation, groundwater/surface water relationships, water wells, pumping tests, pollution, artificial recharge, seawater intrusion, safe yield of groundwater basins, groundwater models.

C132. Subsurface Fluid Flow and Geological Processes. (4) Lecture, three hours; laboratory, one hour. Requisite: Mathematics 32A. Quantitative basis for studying fluid flows in geologic processes. Groundwater problems and pore-fluid pressure evolution. Concurrently scheduled with course C232. P/NP or letter grading.

133. Historical and Regional Geology. (4) Lecture, three hours; discussion, two hours; field trips. Requisite: course 61. Principles of historical geology. Physical evolution of Earth, especially North America. One area of Earth to be investigated in detail, with emphasis on its geologic evolution through time. Areas of investigation vary. P/NP or letter grading.

134. Computing in Earth and Space Sciences. (4) Lecture, three hours; laboratory, three hours. Requisite: Program in Computing 3 or 10A. Original programming and application of software to generate and test hypotheses with nonideal or incomplete data sets. Interpolation/extrapolation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software used in research and industry.

135. Introduction to Applied Geophysics. (4) Lecture, three hours; laboratory, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals. P/NP or letter grading.

136A. Applied Geophysics. (4) Lecture, three hours; laboratory, three hours; field trips. Requisites: Mathematics 33A, Physics 1A, 1B, and 1C (or 2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refraction, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules. P/NP or letter grading.

136B. Applied Geophysics. (4) Lecture, three hours; laboratory/field trips, six hours. Requisites: course 136A, Program in Computing 3 or 10A. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics.

136C. Field Geophysics. (6) Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Requisite: course 135 or 136A. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip).

137. Petroleum Geology. (4) Lecture, three hours. Requisites: courses 61, 111. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology.

139. Engineering and Environmental Geology. (4) Lecture, two and one-half hours. Requisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes.

M140. Introduction to Fluid Dynamics. (4) (Same as Atmospheric Sciences CM120.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Letter grading.

141. Basin Analysis. (4) Lecture, three hours; laboratory, six hours. Requisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions.

150. Remote Sensing for Earth Sciences. (4) Lecture, three hours. Designed for juniors/seniors and graduate students. Remote sensing related to development of natural resources. Characteristics of electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery.

152. Physics of the Earth. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest. P/NP or letter grading.

153. Oceans and Atmospheres. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

154. Solar Terrestrial Physics. (4) Lecture, three hours; discussion, one hour. Requisites: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. Solar wind. Magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and the aurora.

155. Planetary Physics. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (or 2AH and 2BH). Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. P/NP or letter grading.

C160. Field Seminar. (2 to 6) Lecture, one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C260. P/NP or letter grading.

195G. Field Geology for Graduate Students. (2 to 4) Lecture, two hours; four to five field trips. Requisite: course 121B. Required of new graduate students in geology program. Advanced techniques in field geologic mapping, exposing students to igneous, metamorphic, and sedimentary terranes with varying amounts of tectonism. May be repeated for credit. P/NP or letter grading.

199. Special Studies in Earth and Space Sciences. (2 to 8) May be repeated for credit.

199H. Honors Research in Earth and Space Sciences. (4) Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of Earth and space sciences.

Graduate Courses

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. (4) Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; core and geomagnetism; lunar and planetary interiors.

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. (4) Lecture, three hours. Requisites: Physics 105A, 110A, 112, 131. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres.

200C. Introduction to Geophysics and Space Physics III: Plasmas — Aeronomy and the Interplanetary Medium. (4) Lecture, three hours. Requisites: Physics 105A, 110B, 112, 131. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with Earth, magnetospheric phenomena.

201. Classical Mechanics. (4) Lecture, three hours. Kinematics, variational principles and Lagrange equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to solar system.

202. Continuum Mechanics. (4) Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Elasticity and viscosity. Heat transfer, boundary layers, and dynamical similarity. S/U or letter grading.

204. Time-Series Analysis and Spectral Estimation. (4) Lecture, three hours. Preparation: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis.

205. Inverse Theory and Data Interpretation. (4) Lecture, three hours. Requisites: Mathematics 115A, M150A-150B, 151. Inverse modeling problem — determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation for rectangular matrices, Bachus/Gilbert resolving kernels, and Lagrange multipliers. Examples from a broad range of physical sciences.

C206. Physical Geochemistry. (4) Lecture, three hours; outside study, nine hours. Requisite: course 51B. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

C207. Geochemistry. (4) Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C107. Additional homework and class presentation required of graduate students. S/U or letter grading.

208. Geothermics. (4) Lecture, two and one-half hours; discussion, 30 minutes. Requisite: Mathematics 33A. Basic concepts of heat transfer applied to solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions.

C209. Isotope Geochemistry. (4) Lecture, three hours; discussion, one hour. Designed for junior/senior and graduate physical and biological sciences students. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C109. Additional literature survey, which may result in class presentation, expected of graduate students. S/U or letter grading.

210. Geochemical Kinetics: Thermochronometry. (4) Lecture, three hours; discussion, one hour. Designed for graduate physical and biological sciences students. Theoretical basis and application of thermochronometry: derivation of diffusion equation and methods of solution, relationship between heat and mass diffusion and their simultaneous solution, Boltzmann/Matano analysis, multicomponent diffusion, closure theory; $^{40}\text{Ar}/^{39}\text{Ar}$ systematics and interpretive models, multidiffusion domain theory, petrological applications.

M216. Evolutionary Biology. (4) (Same as Organismic Biology M200A.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

M217. Molecular Evolution. (4) (Formerly numbered M243C.) (Same as Organismic Biology M231.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

CM218. Advanced Paleontology. (4) (Same as Organismic Biology CM245.) Lecture, three hours. Requisite: course 116 or Organismic Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM118. S/U or letter grading.

219. Planetary and Orbital Dynamics. (4) Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings.

220. Principles of Paleobiology. (4) Lecture/discussion, three hours. Limited to graduate science students. Open to qualified undergraduate biological and physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit.

221. Field Geology. (4) Lecture, one hour; discussion, one hour; fieldwork, 10 days. Requisite: course 121B or 195G. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit.

222. Introduction to Seismology. (4) Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis.

M224A. Elastodynamics. (4) (Same as Mechanical and Aerospace Engineering M257A.) Lecture, four hours; outside study, eight hours. Requisites: Mechanical and Aerospace Engineering 256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

225A. Physics and Chemistry of Planetary Interiors I. (4) Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution.

225B. Physics and Chemistry of Planetary Interiors II. (4) Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidences of motion; remanent magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection.

C226. Advanced Igneous Petrology. (4) Lecture, three hours; laboratory, three hours; field trips. Requisite: course 103A. Designed for graduate students. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C126. Graduate students required to read more recommended references, make class presentations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

229. Planetary Atmospheres. (4) Lecture, three hours. Requisite: course 200B. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques.

230. X-Ray Crystallography. (4) Lecture, three hours; laboratory, three hours. Requisite: course 51B. Point, translation, and space group symmetry, diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis.

231. Crystal Chemistry and Structure of Minerals. (4) Lecture, three hours; laboratory, three hours. Requisite: course 51B. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure.

C232. Subsurface Fluid Flow and Geological Processes. (4) Lecture, three hours; laboratory, one hour. Requisite: Mathematics 32A. Quantitative basis for studying fluid flows in geologic processes. Groundwater problems and pore-fluid pressure evolution. Concurrently scheduled with course C132. S/U or letter grading.

233. Mineral Physics and Equations of State. (4) Lecture, three hours. Interrelationship of physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state.

234. Petrologic Phase Equilibria. (4) (Formerly numbered 234B.) Lecture, three hours; discussion, three hours. Requisites: course 51B, Chemistry 110B. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). S/U or letter grading.

235A-235B-235C. Current Research in Geochemistry (1 unit each). (4) Limited to graduate Earth and space sciences students. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

238. Metamorphic Petrology. (4) Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrography course. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures.

239. Structural Petrology of Deformed Rocks. (4) Discussion, three hours; laboratory, three hours. Requisites: courses 51B, 112. Recommended: courses 245A-245B. Use of universal stage. Microscopic study of textures, structures, and preferred orientations of minerals in tectonites. Deformation mechanisms in crystals and aggregates. Theories of development of preferred orientation. Application of experimental data to interpretation of microfabrics.

240. Space Plasma Physics. (4) Lecture, three hours. Requisite: course 203 or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere/ionosphere coupling; ring current dynamics; and wave particle instabilities.

241. Sedimentary Petrology. (4) Lecture, two hours; laboratory, six hours. Requisites: courses 51B, 103B. Texture, composition, structure, and modes of origin of sedimentary rocks. Content varies from year to year.

242. Sandstone Petrology. (4) Lecture, two hours; laboratory, four hours. Requisite or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions.

244. Tectonics of Sedimentary Basins. (4) Lecture, two hours; discussion, two hours; field trips. Requisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in context of plate-tectonic controls on basin evolution.

245A-245B. Stress and Deformation. (4-4) Lecture, three hours. Requisites: Mathematics 32A, 32B, Physics 1A or 2AH, 4AL. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws. S/U or letter grading.

246. Stress in the Lithosphere. (4) Lecture, three hours. Requisite: course 202 or 245A or Civil Engineering 108. Overcoring, hydrofracture, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination.

248. Advanced Structural Geology. (4) Lecture, three hours; discussion, two hours. Requisite: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems.

250. Mars. (4) Lecture, three hours. Mars geology, geophysics, geochemistry. Cratering history, surface/atmosphere interaction, volatiles, polar caps, atmosphere, climate. S/U or letter grading.

251. Seminar: Mineralogy. (4) Seminar, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis.

252. Seminar: Geochemistry. (4) Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochronology, and cosmochemistry.

253. Seminar: Petrology. (4) Seminar, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.

254. Seminar: Sedimentology. (4) Seminar, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lites; stratigraphy; paleoenvironmental studies.

255. Seminar: Structural Geology and Tectonics. (4) Seminar, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks.

257. Seminar: Paleontology. (4) Seminar/discussion, three hours. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines.

259. Seminar: Paleotectonics. (4) Seminar, two hours; discussion, two hours. Requisite: course 244. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western U.S.

C260. Field Seminar. (2 to 6) (Formerly numbered 260.) Lecture, one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C160. S/U or letter grading.

261. Topics in Magnetospheric Plasma Physics. (4) Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts.

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. (4) Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra.

M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each) (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

277. Concepts and Tools for Variability in Natural Sciences. (4) Lecture, three hours. Introduction to concepts and methods of nonlinearity, chaos theory, fractals, intermittency, self-organization, cooperativity, criticality, spatio-temporal chaos, turbulence, disorder, and fluctuations. Applications to tectonics, earthquakes, geomorphology, meteorology, evolution, biology. S/U or letter grading.

282. Seminar: Geophysics. (4) Seminar, two hours; discussion, two hours. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit.

M285. Origin and Evolution of Solar System. (4) (Same as Astronomy M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

286A-286B-286C. Seminars: Planetology (2 units each). (4) Problems of current interest concerning moon, planets, and meteorites. May be repeated for credit. S/U grading.

287A-287B-287C. Seminars: Seismology and Earth's Interior. (2-2-2) Problems of current interest in seismology and Earth's interior. May be repeated for credit. S/U grading.

M288A-M288B-M288C. Seminars: Space Physics. (2-2-2) (Same as Atmospheric Sciences M275A-M275B-M275C.) Seminar, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

289. Seminar: Fluid Dynamics. (2) (Formerly numbered 289A-289B-289C.) Seminar, one to two hours. Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

290. Seminar: Time-Series Analysis (2). Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading.

295A-295B-295C. Current Research in Earth and Space Sciences. (1-1-1) Limited to graduate Earth and space sciences students. Seminars presented by outside speakers, staff, and/or graduate students describing current research. Written reports required. May be repeated for credit. S/U grading.

296A-296Z. Research Topics in Earth and Space Sciences (1 each). Discussion, one to three hours. Designed for graduate Earth and space sciences students. Advanced study and analysis of current topics in Earth and space sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

296A. Rock Deformation, Structural Geology, Tectonics.

296B. Volcanology and Geochemistry of Volcanic Rocks.

296C. Seismology and Solid Earth Physics.

296D. Thermal Evolution of Lithosphere.

296E. Sedimentation and Tectonics.

296F. Seismology.

296G. Planetary and Orbital Dynamics.

296H. Space Plasma Physics.

296I. Earthquakes.

296J. Metamorphic Petrology.

296K. Quantitative and Molecular Paleobiology.

296L. Magnetic Phenomena.

296M. Planetary Physics.

296N. Martian Surface and Atmosphere.

296O. Tectonics and Stratigraphy.

296P. Chemical Geodynamics.

296Q. Paleobiology.

296R. Planetary and Space Physics.

296S. Precambrian Paleobiology.

296T. Geophysical Fluid Dynamics.

296U. Geomorphology and Geological Physics.

296V. Cosmochemistry.

296W. Structural Geology, Tectonics.

296X. Earthquakes and Earth Structure.

297. Advanced Techniques in Geological Research. (2 to 4) S/U grading.

298. Advanced Topics in Earth and Space Sciences. (2 to 4) Lecture, two to four hours. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Earth and Space Sciences. (2) Lecture, one hour; discussion, two hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. Special emphasis on integration of technology in classroom. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study and/or Research. (2 to 12) May be repeated. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) S/U grading.

598. M.S. Research and Thesis Preparation. (2 to 12) May be repeated. S/U grading.

599. Ph.D. Research and Dissertation Preparation. (2 to 12) S/U grading.

Timothy R. Tangherlini, Ph.D. (*Korean*)

Lecturers

Y.C. Chu, M.A., *Emeritus*
Masako Douglas, Ph.D. (*Japanese*)
Rongrong Liao, Ph.D. (*Chinese*)
Kuo-yi Pao (Unenseñen), M.A., M.S., *Emeritus*
Yihua Wang, M.A. (*Chinese*)
Jae Eun Yoon, Ph.D. (*Korean*)

Scope and Objectives

The Department of East Asian Languages and Cultures aims to provide students with an ex-

posure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese or Korean, in which the emphasis is on the language and culture of China or Japan or Korea. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Courses for Nonmajors

The department offers the following courses in which knowledge of Asian languages is not required: Chinese 50, 150A, 150B, 151, 152, M153, 155, 160, 175, 190, East Asian Languages and Cultures 60, 61, 161, 162, Indic 175, Japanese 50, 60, 90, 150, 151, 154, 155, C160, 161, 175, CM182, 188, Korean 50, 150, 151, 155, 160, 175, 177, 180A, 180B, 180C.

Buddhist Courses

The department also offers the following courses in Buddhism: Chinese 160, 165, 265A-265B, East Asian Languages and Cultures 60, 61, 161, 162, 265A-265B, Japanese C160, 165, 265A-265B, Korean 160, 165, 265A-265B.

Undergraduate Study

Grammar/Composition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Chinese, Japanese, and Korean grammar and/or composition.

Chinese B.A.

Preparation for the Major

Required: Chinese 1, 2, 3, 4, 5, and 6, or 1A, 2A, 4A, and 5A; one civilization or literature course from 50, 150A, 150B, 151; one comparative civilizations course from East Asian Languages and Cultures 60, 61, Japanese 50, 60, Korean 50.

The Major

Required: Chinese 100A-100B-100C (required only for nonnative speakers), 110A-110B-110C, East Asian Languages and Cultures C197 or 199, and four upper division electives, at least three of which must be selected from the following departmental courses: Chinese 101A, 101B, 120, 130A, 130B, 140A, 140B, 140C, 150A, 150B, 151, 152, 160, 165, 170, 175, 190, 195, East Asian Languages and Cultures 161, 162. Courses 150A, 150B, and 151 may be selected only if

not used to satisfy the preparation for the major requirements. Nondepartmental electives may be selected from Anthropology 175T, Art History C115D, C115E, C115F, Asian American Studies M132B, Ethnomusicology C156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, 159A, 159B, Sociology 151, M153, 188, Theater 102E; other courses may be substituted with approval of the undergraduate adviser. Native speakers who test out of language courses must take 10 electives, at least five of which must be from the departmental list.

Chinese language proficiency is determined by a placement examination offered at the beginning of Fall and Winter Quarters. Refer to the *Schedule of Classes* for details.

Students planning to undertake graduate study are urged to include in their undergraduate program additional courses in classical Chinese and beginning courses in Japanese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Japanese B.A.

Preparation for the Major

Required: Japanese 1, 2, 3, 4, 5, 6, or equivalent language proficiency; one civilization or literature course from 50, 60, 150, 151; two comparative civilizations courses from Chinese 50, East Asian Languages and Cultures 60, 61, Korean 50.

The Major

Required: Japanese 100A-100B-100C (required only for nonnative speakers), 110; one course from 197A, C197B, East Asian Languages and Cultures C197, 199; and four upper division electives, at least three of which must be selected from the following departmental courses: East Asian Languages and Cultures 161, 162, Japanese 101A, 101B (both open only to nonnative speakers), 120, CM122, CM123, CM127, 130A, 130B, 130C, 140A, 140B, 140C, C149, 150, 151, 154, C160, 161, 165, 175, C180, CM182, 188, C195. Courses 150 and 151 may be selected only if not used to satisfy the preparation for the major requirements. Nondepartmental electives may be selected from Anthropology 175S, 175T, Art History 114C, C115C, Ethnomusicology 160A, 160B, History 185, 186, 187A, 187B, 187C, Political Science 136, 160, Sociology 151, 156, 188, 189, Theater 102A, 102E; other courses may be substituted with approval of the undergraduate adviser. Native speakers who test out of language courses must take 10 electives, at least five of which must be from the departmental list.

Japanese language proficiency is determined by a placement examination offered at the beginning of Fall and Winter Quarters. Refer to the *Schedule of Classes* for details.

Students planning to undertake graduate study are urged to include in their undergraduate

program three courses in classical Japanese and beginning courses in Chinese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Korean B.A.

Preparation for the Major

Required: Korean 1, 2, 3, 4, 5, and 6, or 2A, 3A, 4A, 5A, and 6A (language requirements vary depending on students' language backgrounds; for details, see the undergraduate adviser); one civilization or literature course from 50, 150, 151; two comparative civilizations courses from Chinese 50, East Asian Languages and Cultures 60, 61, Japanese 50, 60.

The Major

Required: Korean 100A-100B-100C; one course from 197A, 197B, East Asian Languages and Cultures C197, 199; and five upper division electives, at least three of which must be selected from the following departmental courses: Korean 101A, 101B, 101C, CM120, CM127, 130A, 130B, 150, 151, 160, 165, 175, 176, 177, 180A, 180B, 180C, East Asian Languages and Cultures 161, 162. Courses 150 and 151 may be selected only if not used to satisfy the preparation for the major requirements. Nondepartmental electives may be selected from Anthropology 175T, 175V, Art History 114E, Asian American Studies M132A, Folklore and Mythology M183, Sociology 151, 188, 191; other courses may be substituted with approval of the undergraduate adviser. Native speakers who test out of language courses must take 10 electives, at least five of which must be from the departmental list.

Korean language proficiency is determined by a placement examination offered at the beginning of Fall and Winter Quarters. Refer to the *Schedule of Classes* for details.

Students planning to undertake graduate study are urged to include in their undergraduate program beginning courses in Chinese and Japanese. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of East Asian Languages and Cultures offers the Master of Arts (M.A.) degree in East Asian Languages and Cultures.

Admission

Applicants to the M.A. program are expected to (1) meet general University requirements for the undergraduate major, (2) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA's department, and (3) have taken a minimum of three quarter courses or the equivalent in classical Chinese for Chinese majors, classical Japanese for Japanese majors, or a minimum of three years of modern Korean for Korean majors. Applicants with a B.A. in another field or from a department whose requirements are less rigorous are admitted only if they meet the requisite standards within one year. Selection is based on (1) prior scholastic performance (at the junior, senior, and/or graduate levels), (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English. All materials must be complete before the application is considered. Students transferring from other departments must also fulfill the above requirements.

International applicants are required to take the Test of English as a Foreign Language (TOEFL), administered by the Educational Testing Service, unless this test is not offered in the country of residence. A test in translation from Chinese, Japanese, or Korean into English must be taken, either with the comprehensive examinations or earlier.

Areas of Study

The department recognizes three areas of specialization at the M.A. level: Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

Course Requirements

Nine courses are required for the degree, six of which must be graduate courses. Course 200 in the appropriate field is required for the Chinese, Japanese, or Korean major.

With the consent of the department, up to two courses taken outside the department (for which the grade of S/U is acceptable) may be applied toward the nine courses. No more than two courses in the 500 series may apply toward the divisional minimum of nine courses required for a master's degree, and only one of these two courses may be counted toward the minimum of six graduate courses required for the degree. Courses taken to meet the language requirements and admission standards do not apply toward the total course requirement. At least one seminar in each of the student's comprehensive examination fields must be taken.

International students may also be required to take English as a Second Language 33A, 33B, 33C, 34, 36, or other ESL courses.

Comprehensive Examination Plan

The comprehensive examination consists of the submission of three seminar research papers (all two-quarter sequences) and evaluation of them by the ad hoc committee chaired by the principal adviser, and an oral examination based on those papers. A translation examination in the student's area of specialization must also be taken. The evaluation of three seminar papers by the ad hoc committee and the oral examination based on the papers determines whether students are admitted to the Ph.D. program.

Thesis Plan

This plan is recommended for students intending to proceed to the Ph.D. Students who have completed at least one year of graduate work with excellence may petition to the department to present a thesis for the M.A. degree. If this plan is chosen, students must have a letter of support from a faculty member who intends to serve as thesis director. The remaining members of the thesis committee are selected in consultation with the graduate adviser. Final acceptance of the thesis plan is contingent on the approval of a thesis proposal. The thesis must be 40 to 60 pages in length and follow the rules and style set by the University. Information on these regulations is available from the Graduate Division. After acceptance of the thesis, there is an oral examination related to the thesis. Students are also required to take an examination in translation in their area of specialization.

Doctoral Degree

Admission

An M.A. degree in the field or in a related field is required for admission to the program leading to the Ph.D. degree in East Asian Languages and Cultures. Selection among qualified applicants from outside the department is based on (1) prior scholastic performance, (2) three letters of recommendation, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a recent research paper in English. Applicants with an M.A. in the department are judged on their M.A. record.

Students applying from foreign institutions are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

Major Fields or Subdisciplines

The department emphasizes six major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Korean language and literature with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature; (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism; (5) Japanese linguistics; and (6) cultural and com-

parative studies, which is designed to allow students with a primary focus on China, Japan, or Korea to incorporate comparative, interdisciplinary, and/or historical interests. In addition, a program in ancient Chinese civilization may be arranged by petition.

Course Requirements

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses (not including courses taken to meet the language requirements) beyond the M.A. degree is required for the Ph.D. In addition, if the student's major field is Chinese, two years of modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Japanese studies in the student's field of study. If the student's major field is Japanese, two years of modern Chinese, classical Chinese, or modern Korean must be taken with grades of S and a written examination which tests the ability to translate Chinese or Korean studies in the student's field of study. If the student's major field is Korean, two years of modern Chinese, classical Chinese, or modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Chinese or Japanese studies in the student's field of study. Those majoring in Buddhist studies are encouraged to take Sanskrit and/or Pali and Parsi with grades of B or better or S. Students in the comparative and cultural studies track must meet the language requirements for their primary area of interest and must also take East Asian Languages and Culture 210.

Written and Oral Qualifying Examinations

Students must take written examinations as follows:

For the major in Chinese literature: (1) a general examination in Chinese literature covering the following three fields: modern Chinese literature, traditional fiction and drama, and traditional Chinese poetry; (2) examinations in three approved fields which must be chosen from at least two groups as follows: (a) Chinese poetry, Chinese fiction and drama, and modern Chinese literature; (b) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion; (c) an outside field from within the department; or (d) a field offered in another department or interdepartmental program.

For the major in Japanese literature: (1) a general examination in Japanese literature; (2) examinations in two approved fields which cannot be from the same group, as follows: (a) ancient, medieval, early modern, or modern Japanese literature; (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics; (c) Chinese or Korean literature; or (d) a field offered in another department or interdepartmental program.

For the major in Korean literature: (1) a general examination in Korean literature; (2) examinations in three approved fields which must be chosen from at least two of the following groups: (a) Korean poetry, Korean fiction, modern Korean literature; (b) Korean Buddhism, Korean thought; (c) Chinese or Japanese literature; or (d) a field offered in another department or interdepartmental program.

For the major in Buddhist studies: (1) a general examination in the major field; (2) an examination in an approved subfield within the major field; (3) a general examination in another approved field inside or outside the department.

For the major in Japanese linguistics or the major by petition in ancient Chinese civilization: (1) an examination in the major language area; (2) a general examination in the major field; (3) an examination in an approved subfield within the major field; (4) a general examination in another approved field inside or outside the department.

For the major in cultural and comparative studies: examinations in four fields selected in consultation with the student's academic adviser, including at least two fields within the department and at least one with a comparative or theoretical focus. The four fields must be selected so that at least two are from the student's primary language area and two from a specific discipline.

Once all language and course requirements are satisfied, the qualifying examinations can be taken. All examinations must be completed within a four-week period. With the consent of the department, the examinations may be repeated only once. Students are required to take an examination in translation in their area of specialization.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as the student's dissertation adviser. Preferably within six months, but no more than a year after the written examinations, the student must pass the University Oral Qualifying Examination on the dissertation proposal. With the department's consent, the examination may be repeated only once.

Chinese

Lower Division Courses

1. Elementary Modern Chinese. (4) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing.

1A. Elementary Modern Chinese for Advanced Beginners. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: ability to speak and understand Mandarin or other Chinese dialects at elementary levels. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). Students who complete courses 1A and 2A fulfill one year of foreign language requirement. P/NP or letter grading.

2. Elementary Modern Chinese. (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

2A. Elementary Modern Chinese for Advanced Beginners. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Continuation of course 1A. P/NP or letter grading.

3. Elementary Modern Chinese. (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

3R. Reading and Writing of Elementary Modern Chinese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking and listening skills in Mandarin Chinese. Training in reading and writing skills at elementary level. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

4. Intermediate Modern Chinese. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters.

4A. Intermediate Modern Chinese for Advanced Students. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 2A. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at intermediate levels. Training in all four basic language skills (speaking, listening, reading, and writing). Students who complete courses 4A and 5A fulfill second year of foreign language requirement. P/NP or letter grading.

5. Intermediate Modern Chinese. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 4. Continuation of course 4.

5A. Intermediate Modern Chinese for Advanced Students. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Continuation of course 4A. P/NP or letter grading.

6. Intermediate Modern Chinese. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 5. Continuation of course 5.

6R. Reading and Writing of Intermediate Modern Chinese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3R. Modern Chinese for students who understand and speak Mandarin but cannot read and write at intermediate level. Students learn to read texts in traditional and simplified characters and write simple compositions. Readings provide insight into Chinese society. P/NP or letter grading.

8. Elementary Chinese: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

10. Intermediate Modern Chinese: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Enforced requisites: courses 1, 2, 3. Intensive course equivalent to courses 4, 5, and 6. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters. Offered in summer only. Letter grading.

50. Chinese Civilization. (4) Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Survey of development of outstanding aspects of Chinese culture from prehistoric to modern times.

Upper Division Courses

100A-100B-100C. Advanced Modern Chinese. (4-4-4) Lecture, two hours; discussion, two hours. Requisite: course 6. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. P/NP or letter grading.

101A-101B. Advanced Readings in Modern Chinese. (4-4) (Formerly numbered 101A-101B-101C.) Lecture, two hours; discussion, two hours; outside study, eight hours. Requisite: course 100C. Advanced readings and discussion for students planning to do advanced coursework or research on China. Topics from magazines, journals, and books related to humanities and social sciences. Letter grading.

102A. Business Chinese. (4) Lecture, two hours; discussion, two hours; outside study, eight hours. Preparation: three years of college-level Chinese. Advanced course designed to develop speaking, listening, reading, and writing skills in modern Chinese in business-related contexts and to gain awareness of cultural concepts and values in Chinese business practice and behavior. P/NP or letter grading.

110A-110B-110C. Introduction to Classical Chinese. (4-4-4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 3. Grammar and readings in selected texts.

120. Introduction to Chinese Linguistics. (4) Lecture, three hours. Requisite: course 6. Discussion of issues of Chinese phonology, morphology, and syntax. Case studies of seemingly idiosyncratic properties of Chinese in light of current theory of universal grammar.

130A-130B. Readings in Modern Chinese Literature. (4-4) Readings/discussion, three hours. Requisite: course 100B. Readings and discussion of works of modern Chinese literature.

140A-140B-140C. Readings in Classical Chinese Literature. (4-4-4) Readings/discussion, three hours; outside study, nine hours. Requisite: course 110C. Readings and discussion of works of classical Chinese literature. **140A.** Poetry; **140B.** Prose; **140C.** Fiction.

150A. Lyrical Traditions. (4) Lecture, three hours; outside study, nine hours. Readings in English translation from poetic, critical, and essayistic writings of traditional China, with emphasis on development of subjectivity and modes of address.

150B. Traditional Narrative and Drama. (4) Lecture, three hours; outside study, nine hours. Readings in English translation from narrative and dramatic writings of traditional China, with emphasis on self and society, growth of fictionality, subjectivity, and gender representation.

151. Chinese Literature in Translation: Modern Literature. (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to the present in English translation.

152. Topics in Contemporary Chinese Literature and Culture. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Investigation of various topics in contemporary Chinese literature and culture, including politics and poetics of Chinese post-modernism, nativism, feminism, mass culture, and media.

M153. Chinese Immigrant Literature and Film. (4) (Same as Asian American Studies M132B and Comparative Literature M171.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

155. Topics in Chinese Cinema. (4) Lecture, three hours; film viewing, four hours; outside study, five hours. Critical understanding of films from Hong Kong, Taiwan, and China to be offered. Examination of questions of cultural identity, transnationalism, postmodernity, and intersections between politics and culture in this "Greater China" region. P/NP or letter grading.

160. Chinese Buddhism. (4) Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

165. Introduction to Chinese Buddhist Texts. (4) Lecture, three hours. Requisite: course 100A or 110C or Korean 100A or Japanese 100A. Readings in Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor.

170. Readings in Chinese Philosophical Texts. (4) Lecture, three hours. Requisite: course 110C. May be repeated for credit with consent of instructor.

175. Introduction to Chinese Thought. (4) Lecture, three hours. Knowledge of Asian languages not required. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalists, influence of Buddhism, development of neo-Taoism and neo-Confucianism.

180. Chinese Mythology. (4) Lecture, three hours; outside study, nine hours. Survey of corpus of traditional Chinese mythology in English translation with focus on examples preserved in a variety of early texts, later evolutions in dramatic and fictional works, and evidence from visual arts.

190. Archaeology in China. (4) Lecture, three hours. Early Chinese study of their own past, types of artifacts, beginnings of scientific archaeology, and surveys of major excavations of sites of all periods.

195. Chinese Etymology and Calligraphy. (4) Lecture, three hours. Preparation: one year of classical Chinese. Covers (1) development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to modern "Simplified Forms" and the studies of Six Scripts principles which were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting the "Cursive Style," a common form of handwriting.

197B. Undergraduate Seminar: 20th-Century China and Taiwan. (4) Seminar, three hours; outside study, nine hours. Designed for juniors/seniors. Undergraduate seminar on related topics in modern and contemporary literature and culture from China and Taiwan.

Graduate Courses

200. Bibliography and Methods of Research in Chinese. (4) Required of all graduate students in Chinese. Lectures and discussion on research methodologies for dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.

M201. China — Seminar: Classical Historiography and Readings in Classical Studies. (4) (Same as History M281.) Discussion, three hours. Preparation: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents.

205. Methods and Issues in 20th-Century Chinese Literature and Culture. (4) Seminar, three hours; outside study, nine hours. Methodology course for all incoming graduate students in 20th-century Chinese literature and culture. Discussion of major theoretical and textual issues and methods.

210. Modern Chinese Literary History. (4) Lecture, three hours. Designed for graduate students. Discussion of history of modern Chinese literature, focusing on sources, controversies, major literary genres, and critical approaches to studying the relationship between literature and history.

211A-211B. Seminars: Classical Chinese Poetry (4-4). (Formerly numbered 211.) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of literary Chinese. Topics rotate among major textual traditions and chronological periods. Emphasis on philological, critical, and historical approaches. May be repeated for credit with consent of instructor. In Progress and letter grading.

212. Topics in Chinese Poetry. (4) Readings/discussion, three hours; outside study, nine hours. Selected readings from classical poetic tradition, with focus on individual poets, themes, or other critical issues. May be repeated for credit with consent of instructor. Letter grading.

220A-220B. Western Theory and Chinese Texts. (4-4) Seminar, three hours; outside study, nine hours. Discussions to be framed by Western literary and cultural theory, investigating both challenges and limitations Western theory may pose for Chinese literary and cultural studies. Specific topics vary from year to year. In Progress and S/U or letter grading.

230A-230B. Seminars: Selected Topics in Modern Chinese Literature. (4-4) Seminar, three hours. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. In Progress grading.

241A-241B. Heaven, Earth, and Monarchy in Ancient China. (4-4) Seminar, three hours. Preparation: working knowledge of classical Chinese. Close reading of chapters from the Han dynasty collection of writings on the forms of music, social interaction, education, marriage, and mourning in the Zhou royal court, with discussion of topics in recent cultural semiology and anthropology. In Progress grading.

242. Chinese Classics and Exegetical Traditions. (4) Seminar, three hours; outside study, nine hours. Preparation: command of literary Chinese. Reading and discussions of selections from one of the traditional Chinese classics (Confucian Five Classics, others), with introduction to exegetical history, secondary scholarship, and research methodology. Topics vary from year to year. May be repeated for credit.

245A-245B. Seminars: Traditional Chinese Narrative and Drama. (4-4) Seminar, three hours. Preparation: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from Chou through Ch'ing periods. Topics in drama selected from *tsa-chü* and *ch'uan-ch'i*. May be repeated for credit with consent of instructor. In Progress grading.

250A-250B. Chinese Literary Criticism. (4-4) Seminar, three hours; outside study, nine hours. Issues in production and interpretation of literary works, as formulated by Chinese critics from classical age onward.

265A-265B. Seminars: Chinese Buddhist Texts. (4-4) Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

290A-290B. Seminars: Selected Topics in Chinese Archaeology. (4-4) Seminar, three hours. Requisite: course 190. Discussion and research on major problems about Chinese archaeology and different interpretations to the most important archaeological finds, with emphasis on studies of the Xia and Shang cultures and Xia and Shang dynasties. May be repeated for credit. In Progress grading.

295A-295B. Seminars: Selected Topics in Chinese Cultural History. (4-4) Seminar, three hours. Discussion and research on major problems related to Chinese culture, such as beginnings of the Chinese civilization and Chinese dynastic history. Other topics include cultural developments of ancient and medieval China. May be repeated for credit. In Progress grading.

East Asian Languages and Cultures

Lower Division Courses

60. Introduction to Buddhism. (4) Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion.

61. Introduction to Zen Buddhism. (4) Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. Introduction to Zen traditions and to interplay between Zen and other fundamental cultural and religious concerns in East Asia. Topics include role of Zen within Buddhist thought and practice, artistic and literary arts, society, and daily life.

Upper Division Courses

161. Buddhist Literature in Translation. (4) Readings, three hours. Preparation: prior course on Buddhism or traditional Asian religions. Readings from variety of Buddhist literature of Indic and non-Indic origin, with emphasis on key Buddhist themes and critical issues in cross-cultural interpretations of Asian religious texts.

162. Buddhist Meditation Traditions. (4) Lecture, three hours. Knowledge of Asian languages not required. Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbiotic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative praxis.

C197. Life Writing in East Asia. (4) Seminar, three hours; outside study, nine hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C297.

199. Special Studies in East Asian Languages and Cultures. (2 to 4) Preparation: advanced reading knowledge of Chinese or Japanese. Required of senior majors. Special individual studies. May be repeated once with consent of instructor.

Graduate Courses

202. Proseminar: Functional Approaches to Japanese/Korean Linguistics. (4) Seminar, four hours; outside study, eight hours. Preparation: three years of Japanese or Korean, one year of any East Asian language, one functional linguistics course. Survey of recent empirical and theoretical research in syntax, semantico-pragmatics, theory of language change, and comparative sociolinguistics in Japanese/Korean. May be repeated for credit with consent of instructors. S/U or letter grading.

210. Proseminar: Cultural and Comparative Studies. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Introduction to theoretical topics relevant to comparative study of East Asian cultures in the modern period. Readings include Western theoretical works balanced with texts taking congruent approaches to East Asian topics. S/U or letter grading.

220A-220B. Seminars: Topics in Cultural Studies (4 units each). (4) Seminar, three hours; outside study, nine hours. Complements course 210. Further investigation of methodology and materials of cultural studies in connection with specific topics selected by instructors. May be repeated for credit. In Progress and letter grading.

230A-230B. Seminars: Theoretical Topics in East Asian Literature. (4-4) Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Concerns of literary theory which are brought to the fore by reading of literature from or about East Asia. Readings from both Western and Eastern theorists; issues of translation, comparison, and categorization. In Progress grading.

240A-240B. Seminars: Topics in East Asian Literary History. (4-4) Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. In Progress grading.

245A-245B. Seminars: Position of Modernity in East Asian Literature. (4-4) Seminar, three hours. Preparation: at least five years of an East Asian language. Designed for graduate students. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from European sources. In-class debate probes relevance of these readings for work as Asianists. Focus on Asian writings in course 245B. In Progress grading.

265A-265B. Seminars: Selected Topics in Buddhist Studies. (4-4) Seminar, three hours. Coverage varies. May be repeated for credit. In Progress grading.

C297. Life Writing in East Asia. (4) Seminar, three hours; outside study, nine hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C197. Additional readings and research required of graduate students.

299. Independent Study (2 to 6). Designed for graduate students. Guided research and writing of a research paper. May be repeated, but only four units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. S/U or letter grading.

301. Teaching an East Asian Language as a Foreign Language. (4) Lecture, four hours. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495C. Teaching Chinese at College Level. (2 to 4) Seminar, two hours; outside study, 10 hours. Preparation: Chinese language proficiency at advanced level. Study in team-teaching, teaching methodology, developing course and testing materials, teaching of Mandarin pronunciation, grammar, and characters, integrating cultural aspects in Chinese teaching, and comparative analysis between Chinese and English. S/U grading.

495J. Teaching Japanese at College Level. (2 to 4) Preparation: appointment as teaching assistant in Japanese. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

495K. Teaching Korean at College Level. (2 to 4) Preparation: appointment as teaching assistant in Korean. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 4) S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

598. Research for and Preparation of M.A. Thesis. (4 to 8) Maximum of eight units may be applied toward M.A. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4 to 8) S/U grading.

Indic

Upper Division Courses

110A. Elementary Sanskrit. (4) Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages.

110B. Intermediate Sanskrit. (4) Lecture, three hours. Requisite: course 110A. Advanced aspects of grammar and reading of literary texts.

110C. Advanced Sanskrit. (4) Lecture, three hours. Requisite: course 110B. Reading of entire *Bhagavadgita* or comparable amount of other Sanskrit literature.

115. Readings in Sanskrit. (4) Lecture, three hours. Requisite: course 110C. Extensive reading in such texts as best serve students' needs.

175. Introduction to Indic Philosophy. (4) Lecture, three hours. Survey of main trends in Indian philosophy from ancient to modern times.

Graduate Courses

M222A-M222B. Vedic. (4-4) (Same as Iranian M222A-M222B.) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to course 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

230. Selected Readings in Sanskrit Texts. (4) Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

234A-234B. Introduction to Panini's Grammar. (4) Lecture, three hours. Requisite: course 110C. Reading of selected passages of the text, with introduction to Panini's technique. S/U or letter grading.

236A-236B. Pali and Prakrits. (4) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to course 110B. Grammatical studies and reading of texts. Comparative considerations. S/U or letter grading. **236A.** Pali; **236B.** Prakrits.

Japanese

Lower Division Courses

1. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and written forms. Conversation drill based on material covered in class.

2. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

3. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

4. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, vocabulary building skills, language learning skills, and sociocultural knowledge. P/NP or letter grading.

5. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 4. Continuation of course 4. P/NP or letter grading.

6. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 5. Continuation of course 5. P/NP or letter grading.

8. Elementary Japanese: Intensive. (12) Lecture, five hours; discussion, 15 hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Japanese, including pronunciation, grammar, and Japanese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

10. Intermediate Modern Japanese: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Enforced requisites: courses 1, 2, 3. Intensive course equivalent to courses 4, 5, and 6. Readings in modern Japanese, with emphasis on comprehension and structural analysis. Offered in summer only. Letter grading.

15. Intermediate Reading and Writing for Japanese-Heritage Speakers. (4) Lecture, three hours; outside study, nine hours. Designed for intermediate-level Japanese-heritage learners or nonheritage learners who are fluent in daily spoken Japanese. Emphasis on building vocabulary knowledge of Kanji, reading and writing, and formal aspects of spoken Japanese (polite and honorific/humble forms). P/NP or letter grading.

50. Japanese Civilization. (4) Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Survey of development of Japanese culture and its relationship to the Asiatic mainland. P/NP or letter grading.

60. Images of Japan: Humanistic Tradition. (4) Lecture, three hours; outside study, nine hours. Basic introduction to literary heritage of Japan and to its humanistic tradition through exposure to select literary works and to documentary and feature films based on Japan's literary classics. P/NP or letter grading.

90. Japanese Aesthetics and Tea Ceremony. (4) Lecture, three hours. Introduction to Japanese aesthetics in theory and practice, including study of ritual and specific trends in Japanese aesthetics such as imperfection asymmetry, suggestion, miniaturization, indirectness, *wabi*, *sabi*, *hie-kare*, *yugen*, especially as reflected and practiced in the tea ceremony.

Upper Division Courses

100A-100B-100C. Advanced Modern Japanese. (4-4-4) Lecture, two hours; discussion, three hours; outside study, seven hours. Requisite: course 6. Learning Japanese language with emphasis on sociocultural issues of contemporary Japanese society. Materials selected from contemporary publications, videos, and audiotapes. Reading with focus on linguistics features, writing summaries and opinions, oral activities, and project work. P/NP or letter grading.

101A-101B. Advanced Readings in Modern Japanese. (4-4) Lecture, two hours; discussion, 90 minutes. Requisite: course 100C. Advanced readings and discussion for students planning to do advanced coursework or research on Japan. Topics selected from magazines, journals, and books related to humanities and social sciences.

110. Introduction to Classical Japanese. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100C. Introduction to fundamentals of classical Japanese. Grammar and reading of selected texts.

120. Introduction to Japanese Linguistics. (4) Lecture, three hours. Requisite: course 3. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics.

CM122. Structure of Japanese I. (4) (Same as Linguistics M176A.) Lecture, three hours. Preparation: two years of Japanese. Requisite: course 120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C222.

CM123. Structure of Japanese II. (4) (Same as Linguistics M176B.) Lecture, three hours. Preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course C223.

CM127. Contrastive Analysis of Japanese and Korean. (4) (Same as Korean CM127 and Linguistics M178.) Lecture, three hours. Preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227.

130A-130B-130C. Readings in Modern Japanese Literature (4 units each). (4-4-4) Readings/discussion, three hours. Requisite: course 100C. Readings and discussion of works by modern Japanese writers. Letter grading.

140A-140B-140C. Readings in Classical Japanese Literature. (4) Discussion, three hours; readings/outside study, nine hours. Requisite: course 110. Readings and discussion of works of classical Japanese literature. **140A.** Heian; **140B.** Medieval; **140C.** Edo.

C149. Introduction to Kambun and Other Literary Styles. (4) Lecture, three hours; outside study, nine hours. Requisite: course 140A or 140B. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Concurrently scheduled with course C249.

150. Japanese Literature in Translation: Classical. (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the beginning to 1600, emphasizing Chinese, Buddhist, and Western influences.

151. Japanese Literature in Translation: Modern. (4) Lecture, three hours; discussion, one hour. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the 16th century to post-World War II.

154. Postwar Japanese Culture through Literature. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Use of fiction and film to explore Japanese culture in postwar era in a broad cross-disciplinary and cross-cultural context. P/NP or letter grading.

155. Topics in Japanese Cinema. (4) Lecture, three hours; film viewing, four hours; outside study, five hours. Critical and historical examination of Japanese cinema. P/NP or letter grading.

C160. Japanese Buddhism. (4) (Formerly numbered 160.) Lecture, three hours; outside study, nine hours. Knowledge of Asian languages not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Concurrently scheduled with course C260.

161. Religious Life in Modern Japan. (4) Lecture, three hours. Religious transformations accompanying rapid industrialization, urbanization, militarism, and defeat in the Pacific War, including analyses of Shinto mythology, secular positivism, Buddhist reform movements, new religions, and continuing role of traditional village/family religious rites.

165. Introduction to Japanese Buddhist Texts. (4) Lecture, three hours. Requisite: course 140B or C149 or Chinese 165. Readings in Buddhist texts written by Japanese in literary Chinese, Kambun, and mixed Japanese/Chinese literary styles concerning textual commentaries, doctrinal treatises, hagiographies, temple histories, etc. Coverage varies. May be repeated for credit with consent of instructor.

175. Introduction to Japanese Thought. (4) Lecture, three hours. Knowledge of Asian languages not required. General survey of Japanese thought from early to modern times, including analyses of Shinto mythology, forms of Confucianism, ethic of bushido, National Learning School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative types of contemporary thinking about Japanese thought, especially the question of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy.

C180. Readings in Japanese Literary Thought. (4) Discussion, three hours; outside study, nine hours. Requisite: course 110. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C280.

CM182. Japanese Folklore. (4) (Formerly numbered M182.) (Same as Folklore CM182.) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM282. Letter grading.

188. Personalities in Japanese Civilization. (4) (Formerly numbered C197.) Seminar, three hours; outside study, nine hours. Five weeks of introductory lectures and five weeks of student presentations based on instructor-guided student research.

C195. Japanese Aesthetics and Hermeneutics. (4) (Formerly numbered 190.) Lecture, three hours; outside study, nine hours. Requisite: course 50 or 60 or 150 or 151. Introduction to field of modern and pre-modern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formulation of aesthetic judgment. Concurrently scheduled with course C295. P/NP or letter grading.

197A. Undergraduate Seminar: Classical Japan. (4) Seminar, three hours; outside study, nine hours. Selected topics in classical Japanese literature and thought.

C197B. Seminar: Modern Japan. (4) (Formerly numbered 197B.) Seminar, three hours; outside study, nine hours. Selected topics on modern Japan. Concurrently scheduled with course C297B.

Graduate Courses

200. Bibliography and Methods of Research in Japanese. (4) Lecture, three hours. Required of all graduate students in Japanese.

201A-201B. Introduction to Reading Japanese Academic Texts. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100A. Course 201A is requisite to 201B. Designed for graduate students. Introduction to modern Japanese-language academic texts, both prewar and postwar, with focus only on reading; students who need to improve other skills should take additional courses. S/U or letter grading.

210. Issues in Modern Japanese Literature. (4) Lecture, three hours. Introduction to issues in the field of modern Japanese literature, with readings in primary and secondary sources. Topics vary.

211. No and Kyogen. (4) Lecture, three hours. Preparation: one year of classical Japanese. Readings of selected No and Kyogen texts from Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor.

212. Kyoto through Classical Japanese Literature. (4) Discussion, three hours. Preparation: knowledge of Japanese. Investigation of history and life of the city as seen through Japanese literature.

C222. Structure of Japanese I. (4) Lecture, three hours. Preparation: two years of Japanese. Requisite: course 120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM122.

C223. Structure of Japanese II. (4) Lecture, three hours. Preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course CM123.

224A-224B. Seminars: Selected Topics in Japanese Discourse Linguistics. (4) Seminar, three hours. Requisite: course CM122. Critical reading and discussion of selected topics in Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading.

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives. (4) Seminar, three hours. Requisite: course CM122. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading.

226. Survey of Functional Linguistics. (4) Lecture, four hours; outside study, eight hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. S/U or letter grading.

CM227. Contrastive Analysis of Japanese and Korean. (4) (Same as Korean CM227.) Lecture, three hours. Preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127.

228. Fundamentals in Discourse Data Analysis. (4) Lecture, three hours. Designed to prepare students to conduct research in natural discourse data, both spoken and written, for linguistic analysis. Discussion of discourse taxonomy, data collection methodologies, data organization, analytical frameworks.

235A-235B. Seminars: Selected Topics in Modern Japanese Fiction. (4-4) Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

240A-240B. Seminars: Selected Topics in Japanese Literature. (4-4) Seminar, three hours. May be repeated for credit. In Progress grading.

241A-241B. Seminars: Japanese Classics. (4-4) Seminar, three hours. Prose and poetry from early times to 1868. May be repeated for credit with consent of instructor. In Progress grading.

245A-245B. Seminars: Medieval Japanese Literature. (4-4) Seminar, three hours. Preparation: one year of classical Japanese. Selected readings in travel poetry, travel diaries, and other genres of Japanese travel literature of Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. In Progress grading.

C249. Introduction to Kambun and Other Literary Styles. (4) Lecture, three hours; outside study, nine hours. Requisite: course 140A or 140B. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Concurrently scheduled with course C149. Graduate students cover more text and submit one additional translation.

C260. Japanese Buddhism. (4) Lecture, three hours; outside study, nine hours. Knowledge of Asian languages not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Concurrently scheduled with course C160. Graduate students read additional texts and submit one additional written assignment.

265A-265B. Seminars: Japanese Buddhist Texts. (4-4) Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

M270A-M270B. Seminars: Japanese Ritual Arts. (4-4) (Same as Folklore M270A-M270B.) Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

M276. Reading Modern Bodies. (4) (Same as Comparative Literature M276.) Seminar, three hours; outside study, nine hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from variety of locales, with particular emphasis on Japan. S/U or letter grading.

C280. Readings in Japanese Literary Thought. (4) Discussion, three hours; outside study, nine hours. Requisite: course 110. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C180. Additional translations required of graduate students.

CM282. Japanese Folklore. (4) (Same as Folklore CM282.) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM182. Letter grading.

290A-290B. Seminars: Japanese Philosophy of Art. (4-4) Seminar, three hours. Preparation: reading knowledge of Japanese. Requisite: course 110. Reading and discussion of selected topics on philosophy of literary arts. May be repeated once with consent of instructor. In Progress grading.

C295. Japanese Aesthetics and Hermeneutics. (4) Lecture, three hours; outside study, nine hours. Preparation: one Japanese culture course, working knowledge of Japanese. Introduction to field of modern and premodern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formulation of aesthetic judgment. Concurrently scheduled with course C195. Additional research required for graduate term paper, incorporating primary sources. S/U or letter grading.

C297B. Seminar: Modern Japan. (4) Seminar, three hours; outside study, nine hours. Selected topics in modern Japan. Graduate students to be assigned additional readings and write seminar papers based on research in their own disciplinary areas. Concurrently scheduled with course C197B.

Korean

Lower Division Courses

1. Elementary Modern Korean. (4) Lecture, two hours; discussion, three hours. Not open to students who, from whatever source, already know the language. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation.

1A. Elementary Korean for Korean-Heritage Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Designed for Korean-heritage learners who have very limited knowledge in the Korean language or have had no formal instruction in the language. Emphasis on spelling, basic grammar, reading, writing, and daily conversation. P/NP or letter grading.

2. Elementary Modern Korean. (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

2A. Elementary Korean for Korean-Heritage Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 1A. Designed for students who are from a Korean-speaking family background and have some limited knowledge of Korean. Emphasis on formal aspects of standard Korean (basic grammar, reading, daily conversation, polite forms, basic writing). P/NP or letter grading.

3. Elementary Modern Korean. (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

3A. Elementary Korean for Korean-Heritage Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 2A. Continuation of course 2A. P/NP or letter grading.

4. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 3. Conversation, composition, and readings with structural analysis in modern Korean.

4A. Intermediate Korean for Korean Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 3A. Not open to students who attended elementary Korean school in Korea for more than one year. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

5. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 4.

5A. Intermediate Korean for Korean Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 4A. Not open to students who attended elementary Korean school in Korea for more than one year. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

6. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 5.

6A. Intermediate Korean for Korean Speakers. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 5A. Not open to students who attended elementary Korean school in Korea for more than one year. Designed for Korean-heritage learners. Emphasis on four skills (spelling, grammar, readings, and conversation in modern Korean). P/NP or letter grading.

8. Elementary Korean: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Korean, including pronunciation, grammar, and Korean characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

10. Intermediate Modern Korean: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Enforced requisites: courses 1, 2, 3. Intensive course equivalent to courses 4, 5, and 6. Conversation, composition, and readings with structural analysis in modern Korean. Offered in summer only. Letter grading.

50. Korean Civilization. (4) Lecture, three hours; discussion, one hour. Knowledge of Korean not required. General survey of development of Korean culture within context of political, social, and economic history.

Upper Division Courses

100A-100B-100C. Advanced Modern Korean. (4) Lecture, two hours; discussion, three hours. Requisite: course 6. Course 100A is requisite to 100B, which is requisite to 100C. Continuation of course 6. Readings of modern prose and poetry, with emphasis on grammar and Sino-Korean. P/NP (undergraduates), S/U (graduates), or letter grading.

101A-101B-101C. Advanced Readings in Modern Korean. (4) Lecture, three hours. Requisite: course 100C. Course 101A is requisite to 101B, which is requisite to 101C. Advanced readings and discussion for students planning to do advanced coursework or research on Korea. Topics selected from magazines, journals, and books related to humanities and social sciences. P/NP (undergraduates), S/U (graduates), or letter grading.

102A-102B-102C. Advanced Korean Conversation. (3-3-3) Discussion, three hours; outside study, six hours. Requisite: course 20C. Course 102A is requisite to 102B, which is requisite to 102C. Courses 100A-100B-100C or 101A-101B-101C may be taken concurrently. Not open to students who have attended elementary school in Korea for more than two years. Reading and discussion of modern Korean authors, designed to further improve spoken proficiency. P/NP or letter grading.

C105A-C105B-C105C. Reading Korean Academic Texts. (4-4-4) Lecture, three hours; outside study, nine hours. Requisite: course 101C. Intended to improve reading skills for students who have studied Korean to an advanced level, with coverage in Korean of materials on modern Korean history, culture, and society. Each course may be taken independently for credit. Concurrently scheduled with courses C205A-C205B-C205C. P/NP or letter grading.

CM120. Structure of Korean. (4) (Same as Linguistics M177.) Lecture, three hours. Preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course C220.

CM127. Contrastive Analysis of Japanese and Korean. (4) (Same as Japanese CM127 and Linguistics M178.) Lecture, three hours. Preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227.

130A-130B. Readings in Modern Korean Literature. (4-4) Readings/discussion, three hours. Requisite: course 101A. Readings and discussion of major modern Korean literary texts.

150. Korean Literature in Translation: Classical. (4) Lecture, three hours. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the 19th century, with all readings from English translations.

151. Korean Literature in Translation: Modern. (4) Lecture, three hours. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature of the 20th century, with all readings from English translations.

155. Topics in Korean Cinema. (4) Lecture, three hours; film viewing, four hours; outside study, five hours. Historical and critical survey of Korean cinema, examining intersection between 20th-century Korean history, politics, and filmmaking. P/NP or letter grading.

160. Korean Buddhism. (4) Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sinitic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea.

165. Introduction to Korean Buddhist Texts. (4) Lecture, three hours. Requisites: course 100A and/or Chinese 110C. Introduction to reading Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor.
